GAS LINE REPAIRS IMPACTING MCAGCC HEATING AND POWER GENERATION

SoCal Gas will be performing off-base repairs on one of the natural gas lines that supplies MCAGCC. Due to this, we will be limited in our methods and capacity for producing electrical power and mainside building heating and domestic hot water. We do not anticipate any lapse in service, but vigilance and conservation are particularly critical during this time. Individual building natural gas will not be affected. The work is anticipated to last until mid-April. During this time, please make sure you keep doors and windows closed at all times and conserve energy.

If you are having heating problems, or you have a requirement for an electric space heater, please submit a work ticket to PWD. Electric space heaters are NOT authorized without an electrical analysis as these may overload electrical circuits and cause safety hazards.
