Introducing Text Message Alerts!

The Marine Corps has introduced a new “text alert” program that will send occasional text messages alerts regarding the Johnson Valley Shared Use Area, closure dates, and other relevant information.

To sign-up for text alerts, send an e-mail to SMBPLMSJOHNSONVALLEY@USMC.MIL. For more information, including terms and conditions visit: http://www.29palms.marines.mil/johnsonvalley/.

COVID-19 Vaccinations  Due to the recent increase in COVID-19 positive cases on both the Marine Corps Air Ground Combat Center and in the surrounding community, the Commanding General has directed a change in HPCON status to HPCON B. The implementation of additional personal protection measures in the form of the requirement to wear a facemask regardless of vaccination status is now in effect. This directive includes all persons when inside buildings/facilities located on the installation. Exceptions to this directive are installation housing, personal quarters in the barracks, brief periods of time when eating or drinking, and when alone in an office with the door closed. Facemasks shall be worn outdoors when social distancing cannot be maintained, such as formations or other general gatherings.

Our COVID response procedures will continue to evolve as we posture the installation to respond to changes in the COVID environment while ensuring continued support to our tenant commands. Additional information, including where to get a vaccine and guidance regarding installation services, may be found at our Combat Center COVID-19 media site at https://www.29palms.marines.mil/COVID-19/. The Combat Center will continue to provide COVID-19 information updates and make every effort to keep our Marines, Sailors, Soldiers, civilian employees, contractors, and family members informed of current risks.

The Robert E. Bush Naval Hospital is now offering a 3rd dose of the Moderna vaccine to eligible individuals with moderately to severely weakened immune systems. If you meet the criteria outlined by the CDC, it is recommended that you get a 3rd dose of an mRNA (Pfizer or Moderna) vaccine at least 28 days after your 2nd dose of an mRNA vaccine.

Who Needs an Additional Dose of the Moderna or Pfizer COVID-19 Vaccine?

Currently, CDC is recommending that moderately to severely immunocompromised people receive an additional dose. This includes people who have:

* Been receiving chemotherapy for active cancer treatment for tumors or cancers of the blood
* Received an organ transplant and are taking medicine to suppress the immune system
* Received a stem cell transplant within the last 2 years or are taking medicine to suppress the immune system
* Moderate or severe primary immunodeficiency (such as DiGeorge syndrome, Wiskott-Aldrich syndrome)
* Advanced or untreated HIV infection
* Active continuous treatment with high-dose corticosteroids or other drugs that may suppress your immune response such as immunosuppressive medications used in the treatment of Crohn’s Disease, Ulcerative Colitis, or Rheumatoid Arthritis.

Talk to your clinical care team and specialist about the need to get an additional dose of COVID-19 vaccine and the best timing of a 3rd dose based on your current treatment plan. This is especially important if you are about to start or restart immunosuppressive treatment. To reach your clinical care team at the Naval Hospital, please call (760) 830-2752.

For those eligible beneficiaries with one of the above listed immunocompromising conditions, additional doses of the Moderna vaccine are available in Clinic D of the main hospital. You may schedule an appointment using the DHA
appointing portal: https://informatics-stage.health.mil/COVAX/ or by calling 760-830-2698. Walk-ins are welcome Monday through Friday from 8:00 a.m. to 4:00 p.m.

For those immunocompromised individuals who have received an initial two doses of Pfizer, please use https://www.vaccines.gov/ to find the nearest civilian pharmacy or location to receive an additional dose of the Pfizer vaccine.

Currently, the CDC does not recommend additional doses of the Johnson and Johnson vaccine for immunocompromised individuals who received an initial dose of the Johnson and Johnson vaccine. The CDC also does not currently recommend additional doses of the vaccine for other chronic conditions such as high blood pressure, obesity, or diabetes.

For more information regarding the CDC recommendation for additional doses in immunocompromised individuals, please visit:
