To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. The off highway community brings a lot of money into the local economy by hosting large racing events, and attracting people from all over the world during the course of the year. If the Marines took over this area of land all the money brought in by the off highway community would be lost.

Sincerely,

Randy Wright

Response to Comment N-14437:

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

My family and friends spend thousands of dollars in fuel, food, beer and cleaning up after others every year while camping and wheeling in Johnson Valley.

With the present economy being in a slump alot of the companys in the area cannot afford to loose more money with the loss of wheeling in Johnson Valley. Thousands of dollars are spent from out of towners driving hundreds of miles to come out to this great open area to spend their vacations and weekends.

Please look to the east to expand your training area.

I support the Marines!!!

Sincerely,

Jerry Sporkman

Response to Comment N-14438:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Currently there are at least a handful of sponsored events in this area, not to mention King Of The Hammers(KOH) early in the year. All of these events contribute to the businesses in the community nearby. These businesses count on the thousands of people that visit the area yearly. I guess what I'm saying is, the Marines have MANY other places to expand, including , east. I don't see the need to take away a designated OHV area that distracts the OHV community from becoming pulled into bad things(gangs, bad influences etc) and at the same time, produces revenue for the nearby commerce.

Thanks for your attention, Oscar Velaz

Sincerely,

Oscar Velaz

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,

John Woodmass

Response to Comment N-14452:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

Sincerely,

Chris nolla

Response to Comment N-14456:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

San Diego, CA 92132-5190

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

How should we expect our Armed Forces to cooperate in-theater if they cannot cooperate at home?

The exclusion of this opportunity speaks volumes. Please consider the use of Ft. Irwin for training.

Sincerely,

Shawn Baker

Response to Comment N-14459:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. The loss of an area such as Johnson Valley would make a huge impact on the offroad industry. Not to mention thousands of family's that use the area as a recreational getaway. It is a place were family and friends can get together and enjoy a weekend of sharing, wheeling, camping and over the last few years a race that is already known almost world wide. Many OHV parks have already been lost and to lose this one would be devastating to our sport. Please reconsider. Thanks for taking the time to read my meager letter. I know there are thousands of people who feel the way I do, and thousands who feel stronger.

Sincerely,

Randy Charpentier

Response to Comment N-14460 (Page 1 of 2):

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Comment ID: N-14460 (Page 2 of 2)

Response to Comment N-14460 (Page 2 of 2):

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

San Diego, CA 92132-5190

To Whom It May Concern:

I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

The Corps has excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. For all that will be lost by the expansion into Johnson Valley, it is owed to the multiple use groups involved to consider alternative options with a clear and open mind.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Thomas Bank

Response to Comment N-14475:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. The loss of an area such as Johnson Valley would make a huge impact on the offroad industry. Not to mention thousands of family's that use the area as a recreational getaway. It is a place were family and friends can get together and enjoy a weekend of sharing, wheeling, camping and over the last few years a race that is already known almost world wide. Many OHV parks have already been lost and to lose this one would be devastating to our sport. Please reconsider. Thanks for taking the time to read my meager letter. I know there are thousands of people who feel the way I do, and thousands who feel stronger.

Sincerely,

Randy Charpentier

Response to Comment N-14484:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

San Diego, CA 92132-5190

To Whom It May Concern:

In today's era of low intensity, guerrilla type warfare, the need to train 3 MEB's simultaneously is outdated. We have ample room at ranges already owned and operated by the DOD, including those at Ft. Hood, Ft. Bliss, and Ft. Irwin. We can get more out of our tax dollars using these pre-existing sites. Also, keeping the area open to the public stimulates the economy for a more diverse range of people than the jobs of the training area would.

Sincerely,

Matthew Rose

Response to Comment N-14488:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

To Whom It May Concern:

The Corps failed to justify need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

Sincerely,

Don Valdez

Response to Comment N-14497:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

Comment ID: N-14498

Response to Comment N-14498:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

Sincerely,

John Woodmass

The loss of an area such as Johnson Valley would make a huge impact on the offroad industry. Not to mention thousands of family's that use the area as a recreational getaway. It is a place where family and friends can get together and enjoy a weekend of sharing, wheeling, camping and over the last few years a race that is already known almost world wide. Many OHV parks have already been lost and to lose this one would be devastating to our sport. Please reconsider. Thanks for taking the time to read my meager letter. I know there are thousands of people who feel the way I do, and thousands who feel stronger.

Sincerely,

Randy Charpentier

Response to Comment N-14510:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Response to Comment N-14517:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

Sincerely,

Dusti Hall

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

Beyond the typically defined OHV user, there are many other groups of people that access Johnson Valley - hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc.

All of these groups need to be made aware of the proposed changes and given the chance to add their input on the base expansion. To the best of my knowledge, 29 Palms has not made the effort to reach out to the full diversity of user groups who access Johnson Valley.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,

Michael Gonos

Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

To Whom It May Concern:

Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.

Sincerely,

Dennis Powell

Response to Comment N-14539:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,

John Woodmass

Response to Comment N-14540:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Many families travel annually to Johnson Valley for wheeling adventures, and connect with other enthusiast families and help the sport to grow as a responsible means of family fun promoting proper land use, responsible driving, and trail/land maintenance. Without this type of promotion, wheeling to the rest of the general public appears to be "just a bunch of drunken rednecks tearing up the land". This is not the case here. Places like Johnson Valley OHV NEED to stay open for the protection of the reputation of the sport.

Sincerely,

Michael Matthews

To Whom It May Concern:

I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,

Thomas Bank

It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

Response to Comment N-14547:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Hummers and the King of the Hummers race have reshaped the rock crawler world and design. There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,

Tyler Gowans

Response to Comment N-14561:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

ATTN: 29 Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,

Steve Pissken

Response to Comment N-14567:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

Kalispell, MT 59901

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The EIS does not state the impact of an expanded 29 Palms to the residents on Old Woman Springs Road.

The current 29 Palms west boundary is over 10 miles away, and exploding ordnance can already be heard. With a westward expansion into Johnson Valley, the noise impact to Old Woman Springs Road residents will be terrible.

Johnson Valley OHV area makes a great buffer between the current Base and nearby residential areas.

Sincerely,

Shawn Baker

Response to Comment N-14568:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). To Whom It May Concern:

Has the USMC notified residents of Lucerne Valley, particularly the residents on Old Woman Springs Road that their idyllic desert neighborhood may be next to a bombing range?

Has the USMC notified the business owners in Lucerne Valley that no longer will they be supported by money from OHV recreation from outside the county--and from out-of-state and that the few remaining residents of Lucerne Valley will be relied-upon to keep their businesses open?

Will Marines on exercise be given leave to support these businesses if OHV visitors no longer can?

Expand East and accomplish the goal of additional areas for training while also providing the benefit of minimal impact to the surrounding communities.

GO EAST MARINES

Sincerely,

Ryan Brown

Response to Comment N-14578:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not. Thus, military use of this land would be devastating to this currently well preserved and environmentally appreciated place.

Sincerely,

Kristen Carter

Response to Comment N-14581:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions. Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not. As off road enthusiasts, we take a lot of pride in minimizing our environmental footprint in the areas that we use. I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great environmental impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Chris Schutt

Bob Gray

Response to Comment N-14591:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc., may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Shaun Bootsma

Response to Comment N-14602:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Response to Comment N-14620:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

I have been aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

OHV vehicles are generally on rubber tires and stay to specific trails. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Chris Schutt

Response to Comment N-14623:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

Johnson Valley OHV area is irreplaceable.

Not only is the terrain durable enough for our rubber-tired vehicles to give us a healthy challenge; it is filled with gorgeous desert flora and fauna.

The area was used for a short time after World War II, and some of the bomb range scars are still healing.

Today's munitions have much more power than WWII-era munitions, and will scar the terrain for an even longer time.

Sincerely,

Shawn Baker

Response to Comment N-14634:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

Responsible OHV users know that airing down our tires gives us better flotation in soft sand, and better grip on rocks.

We also find that our aired-down tires do little damage to the desert floor.

The EIS fails to note whether wheeled military vehicles will be similarly aired-down for less impact to the desert floor, and fails to note that using tracked vehicles will absolutely have a greater impact on the desert floor.

Sincerely,

Shawn Baker

Comment ID: N-14647

Response to Comment N-14647:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-14654:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. Johnson Valley is a place I frequent; it's elimination will also mean my elimination along with the dollars I put into the local economy each trip.

Sincerely,

Max Barker

Response to Comment N-14661:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Many, many, many responsible OHV enthusiasts will be displaced if the Johnson Valley OHV area is overrun by 29 Palms.

Many of us will find other legal places to go.

A small percentage (but a large number of people) will inevitably choose to ride illegally and keep riding and enjoying Johnson Valley.

Please do not displace honest, hard-working, taxpaying recreating Americans. Please do not force the good apples to go somewhere else. We'd just as soon ride legally alongside the "bad apples" at Johnson Valley and share our love of the trails and our ethics with them.

Sincerely,

Shawn Baker

Response to Comment N-14671:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

I have been aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

Not only during the KOH race, but throughout the year, off-highway and other recreational uses brings thousands of users to the area. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,

Chris Schutt

To Whom It May Concern:

People wander in the desert. It is fun to explore. People currently wander onto the existing 29 Palms base.

Many more people would wander onto an expanded 29 Palms if the base expands into an area that the public has been long accustomed to using.

The public does not much use the area East of 29 Palms. This area would be ideal from a safety standpoint for a base expansion.

Sincerely,

Shawn Baker

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. It is a risk to the Marines as well as to the public. Johnson Valley has been open to the public for many years and it is possible for someone to not know that it is closed and wander in and possibly get hurt. Going East into an area that is not open like Johnson Valley would be safer for all.

Sincerely,
Daniel Rider

To Whom It May Concern:

The Hammers and the King of the Hammers race have reshaped the rock crawler world and design. I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Tyler Gowans

Response to Comment N-14696:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Please study the potential of expanding ZP Palms to the East instead of into Johnson Valley to the west.

Johnson Valley is valuable to hundreds of thousands of ORV enthusiasts.

The wilderness area to the east is valuable to several dozen people.

The greater good would have ZP Palms expand (if at all) to the East.

Sincerely,

Shawn Baker

To Whom It May Concern:

Please do not be part of the problem. The OHV industry and vast majority of our users fight each and every day to encourage responsible OHV use. The expansion of 29 palms will take away one of the last remaining legal OHV areas in the area. One that we've fought to protect, fought to clean up, and continue to fight to improve. Closing this area will do nothing but encourage the illegal OHV use of other areas. Please do not be part of this problem. Go East and leave the Johnson Valley OHV area to the citizens you fight so hard to protect.

GO East

Sincerely,

Ryan Brown

Response to Comment N-14709:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,
Steve Kaiser

To Whom It May Concern:

It seems odd to write this letter asking the Marine Corps to make a change to their direction because the Marine Corps is something that I normally support whole heartedly.

Please consider whether the expansion of 29 Palms is really necessary given the role the Marine Corps wants to play in the future, and if the expansion is necessary go East instead of West.

Go East Marines

Sincerely,

Ryan Brown

Response to Comment N-14715:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and participation in the NEPA process.

Please consider the affect your expansion will have on all of the families around the country that enjoy OHV use. Taking my family with me is why I enjoy venturing beyond the paved roads. We spend time together, we talk, we make memories. We do so in a responsible way, and the closure of a mecca in the culture is just another loss to the way of life that we hold dear.

Please expand East instead of West. Don't take away another place for my family to enjoy together.

Sincerely,

Ryan Brown

I would like to write to urge you to move the 29 Palms to the East. This area is currently designated as a wildlife area, but is not being used by the public. This area would be easier to patrol, and also leave more room for the 29 Palms to expand. Johnson Valley OHV area, is currently used by the public, and brings in a HUGE sum of money to the area. This area also offers little expansion room for the 29 Palms.

Sincerely,

Chris Dykeman

Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,
Ryan Higgins

Response to Comment N-14734:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Furthermore, it would give the Marines more room to expand 29 Palms.

Additionally, the "Hammers" are a legendary natural resource areas, that myself, and many of my local like minded off-road hobbyists travel to every few years, to attend events or to attempt the trails ourselves. Typically, we travel together, staying for week at a time, and bring family member which add to the tourism dollars that California sees, as well as the neighboring states along the way.

Not only does this areas provide a recreational benefit to us, but it provides a positive contribution to many industries in the area.

Sincerely,

Wayne De Meyer

Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The OHV community has given up enough of our public land to Wilderness interests. While we support the mission of the US Marine Corps and love our freedom, it is time to lose some wilderness for the sake of defense.

Please expand East. The USMC has the power to get the area re-designated (whereas the OHV community never will). Please do so.

It would be of great benefit to all if 29 Palms were expanded to the East.

GO EAST MARINES!!!! We will support your expansion to the east.

Sincerely,

Ryan Brown

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

Sincerely,

Tyler Douglas

Response to Comment N-14740:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Comment ID: N-14741

Response to Comment N-14741:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

Will the 29 Palms expansion occur under Environmental Protection Agency oversight?

If the laws created by Congress and promulgated by the EPA apply to the citizens of the United States, then they should apply equally to the military of the United States.

If "carbon footprint" is a valid environmental concern, then the massive number of diesel-burning military vehicles on maneuver through an expanded Johnson Valley should put this project to a halt.

If "carbon footprint" is bum science, then the US Marine Corps must invalidate this factor—for themselves and the general public—to consider moving forward with a 29 Palms expansion into Johnson Valley.

Sincerely,

Shawn Baker

Response to Comment N-14760:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

Sincerely,

Jon Morelock

Response to Comment N-14761:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

The closure of Johnson Valley OHV will not only deal a blow to the economy of the surrounding towns, but will place a strain on CA already dwindling OHV areas. With the economy such as it is, any negative blow to any area can be devastating. It is my opinion that the USMC should either go east, which an area better suited to the needs of the Marines, or drop the project in its entirety. If expanding to the east is not a viable option, why? In this time of economic uncertainty, we all need to live within our means and that includes not putting an addition on the house you already can't afford!

Sincerely,

Chris Field

Response to Comment N-14776:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. I would like to enjoy the JV ohv area with future generations of my children. All ready Most of the places that I traveled with my parents as an adolescent are closed or developed. This is denying me a chance to bond and teach my children respect for Americas land as my father did with my brothers and I. I often wonder Will I be able to raise my children in the same manner as my past generations did.

Sincerely,

Brian Tecco

Response to Comment N-14783:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. This is a very real problem, the more land we lose to recreate on, the less places we have to go to legally recreate! Reconsider this please!

Sincerely,

Travis Carpenter

Response to Comment N-14792:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Comment ID: N-14795

Response to Comment N-14795:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-14800:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. The Environmental Impact Statement FASLS to consider the Cumulative Effect on the closure of OHV routes due to route designation, Wilderness Study Areas, and route closures.

As with anywhere, there is only a finite amount of land. Vehicle users are being painted into a corner and the corner continues to shrink. This is not the only Desert resource management story, but it is one that hits home the most for vehicle users and must be an environmental consideration under "cumulative effects"!!!!

Sincerely,
Daniel Rider

Although I have not yet been to the Johnson Vally area, it is a dream of mine to someday go there for myself and experience the amazement that many others have described. It would be a huge loss to the OHV community, as one of the largest off-road races in the country takes place at Johnson Valley. Please take this into consideration when making your decision.

Sincerely,

Amanda Leighty

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms were to expand East.

Sincerely,

Brad Hooten

Response to Comment N-14812:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions. Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race. The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms were to expand East. I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Chris Schutt

Response to Comment N-14819:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East. The OHV community has given up enough of our public land to Wilderness interests. While we support the mission of the US Marine Corps and love our freedom, it is time to lose some wilderness for the sake of defense.

Please expand East. The USMC has the power to get the area re-designated (whereas the OHV community never will). Please do so.

It would be of great benefit to all if 29 Palms were expanded to the East.

Sincerely,

Daniel Rider

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Our family uses the Johnson Valley O.H.V. area, close to, if not more than 20 times a year and spend thousands of dollars in the local economy during those times. Why do you need more training grounds in an area that is so important to so many people when you could easily go east in an area that is not used by people. Please reconsider this decision to expand in this direction.

Sincerely,

Doug La Crosse

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Sincerely,

Marie Bush

Response to Comment N-14854:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. There are numerous businesses in the area that would be bankrupted almost instantly with the loss of revenue. It is beyond me as to why anyone would wish to do such a thing, especially when the economy is as bad as it is now, and when there are other viable choices. Please take this into consideration.

Sincerely,

Matthew Hazel

Response to Comment N-14857:

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Personally I visit the Johnson Valley area multiple times a year. Hundreds of dollars each trip go to fuel, food, firewood, etc. Taking this away from the local businesses that are propped up by the thousands of OHV's heading to Johnson Valley would cripple the local economy and businesses.

Sincerely,

Keith Ratzburg

San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Has the USMC notified residents of Lucerne Valley, particularly the residents on Old Woman Springs Road that their idyllic desert neighborhood may be next to a bombing range?

Has the USMC notified the business owners in Lucerne Valley that no longer will they be supported by money from OHV recreation from outside the county—and from out-of-state and that the few remaining residents of Lucerne Valley will be relied-upon to keep their businesses open?

Will Marines on exercise be given leave to support these businesses if OHV visitors no longer can?

I remain doubtful.

Sincerely,
Daniel Rider

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,

Steve Kaiser

Response to Comment N-14870:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Palm Desert, CA 92260-5636

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The Corps has excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. For all that will be lost by the expansion into Johnson Valley, it is owed to the multiple use groups involved to consider alternative options with a clear and open mind.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Chris Schutt

Response to Comment N-14872:

Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,

RYAN MAXFIELD

Response to Comment N-14877:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. Don't expand at all, and if you do.... GO EAST MARINES!!

A Marine Expeditionary Brigade (MEB) is a formation of the United States Marine Corps, a Marine Air-Ground Task Force of approximately 14,500 Marines and Sailors constructed around a reinforced infantry regiment, a composite Marine aircraft group, a logistics group and a command element.

The Commandant of the Marine Corps stated just months ago that the USMC's mission would be changing and that the Marines are not a second Army, and in past years have not been used like they should be used, so he is getting the Marines back to their roots.

Their roots do not consist of three simultaneous MEB's.

The US Army has just expanded Ft. Irwin for simultaneous battalion-level training. Leave the land army to the Army!

General James F. Amos promised the Armed Services committee promising that the Marines will only ask for what they NEED, not for what they WANT. I sincerely hope that Johnson Valley is on the "WANT" list and will be peacefully removed from that list!

Defense Secretary Robert M. Gates is quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

Sincerely,

Ryan Brown

Response to Comment N-14881:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

To Whom It May Concern:

How necessary is this expansion?

It's seems Ft. Irwin, which is the Army's National training Center went through an expansion similar to 29 Palms.

Ft. Irwin was 642,000 acres in size. An additional 150,510 acres was added for a grand total 792,510 acres.

29 Palms is currently 596,480 acres, and wants to expand by 422,000 acres for a grand total of 1,018,480 acres.

If a second Land Army is not desired, then why does the USMC need a 35% BIGGER training area than our actual Land Army?! The EIS fails to provide any justification. If it is found to be absolutely necessary, then GO EAST MARINES!!!

Sincerely,

Ryan Brown

Response to Comment N-14882:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-14893:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Comment ID: N-14894

Response to Comment N-14894:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

Sincerely,

Ryan Higgins

Steve Kaiser

Response to Comment N-14920:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

The Corps failed to justify need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

The last time the marines fought "three wide" was in early Iraq...it seems that went pretty well...and they had never practiced it! With technology moving forward towards unmanned aircraft and "RC" style fighting it seems this type of warfare is highly out dated and land should not be taken from anybody to train for something so archaic.

Sincerely,
Kristen Carter

Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

To Whom It May Concern:

The Corps failed to justify need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. A Marine Expeditionary Brigade (MEB) is a formation of the United States Marine Corps, a Marine Air-Ground Task Force of approximately 14,500 Marines and Sailors constructed around a reinforced infantry regiment, a composite Marine aircraft group, a logistics group and a command element.

The Commandant of the Marine Corps stated just months ago that the USMC's mission would be changing and that the Marines are not a second Army, and in past years have not been used like they should be used, so he is getting the Marines back to their roots.

Their roots do not consist of three simultaneous MEB's.

The US Army has just expanded Ft. Irwin for simultaneous battalion-level training. Leave the land army to the Army!

General James F. Amos promised the Armed Services committee promising that the Marines will only ask for what they NEED, not for what they WANT. I sincerely hope that Johnson Valley is on the "WANT" list and will be peacefully removed from that list!

Defense Secretary Robert M. Gates is quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

Sincerely,

Daniel Rider

I am a retired veteran who uses Johnson Valley. I have the unique perspective to understand both sides. Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

Sincerely,

Kevin McMahon

Response to Comment N-14940:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

I grew up around Johnson Valley and have been care of it in the process. I'm finally old enough to enjoy it by myself and with other friends, and now I hear it could close. My parents have so many sad stories of things that were great back in the day and I don't want to be telling a story about "a place I use to go" to my children. I would like for them to experience it for themselves one day.

Sincerely,

Justin Hutchinson

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. Along with the other multiple uses, it is THE Mecca of off-roading that people from all over the world travel to in order to experience it. The King of the Hammers race has made Johnson Valley a household name throughout the world. I doubt that the USMC realizes the full importance of this area to our community and OHV "Culture" that it entails.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,
Chris Schutt

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

Sincerely,

Doug La Crosse

Response to Comment N-14955:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Dear Sir or Madam,
The Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". The Johnson Valley Recreation area features prominently in the minds and day to day life of people as far away as Pennsylvania and New Jersey. If the Johnson Valley area were to close to the public, I do not know if the sport could recover. People have traveled from Australia and other countries to participate in the King of the Hammers race hosted at Johnson Valley. I have traveled across the country to explore and experience the awesome beauty of Johnson Valley. Were the park to close, I do not know where the throngs of people who participate and enjoy off road recreation would call the new Mecca.

Sincerely,
Owen Albert

OHV use and the activities that go with it such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.

Having an area like Johnson Valley in close proximity to the large, densely populated metropolitan areas of Los Angeles and San Diego is critical for the well being of the residents of these areas so that folks have a place to relax, unwind, and let off stress. The more these such areas are removed, the more it will lead to aggression within the nearby cities.

Several studies have shown the link between access to large expanses of natural space and the health and well being of the surrounding population. For example:

There is increasing evidence that access to high quality green spaces can produce measurable improvements to stress levels in a relatively short space of time.
Julia Thrift, Journal of Public Mental Health (2005)

For every 10% increase in green space there was a reduction in health complaints equivalent to a reduction of 5 years age.
Dr William Bird, Natural Fit (2004)

For this reason, I urge you to reconsider the planned expansion of the US Marine Corps to the area of the Johnson Valley OHV.

Sincerely,

Jeffrey Tharp

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

San Diego, CA 92132-5190

To Whom It May Concern:

DHV use and the activities that go with it such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.

Sincerely,

Nick Glaser

Response to Comment N-14988:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

San Diego, CA 92132-5190

To Whom It May Concern:

OHV use and the activities that go with it such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Johnson Valley is one of the few areas in the United States where the land is open and can be used by the public. Closing it would be detrimental to the OHV sport as well as the local economy.

Sincerely,
Daniel Rider

Response to Comment N-14999:

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Norco, CA 92860

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.

Sincerely,

Steve Kaiser

Response to Comment N-15025:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Spokane Valley, WA 99206

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, television and video games.

Sincerely,

Jon Morelock

Response to Comment N-15038:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Comment ID: N-15045

Response to Comment N-15045:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

Comment ID: N-15046

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordnance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Eric Longenecker

Response to Comment N-15054:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Sincerely,

brad hooten

Response to Comment N-15063:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. I feel that it is very important for families to get away from technology and spend time together. Johnson valley brings families together, and if it is closed where will those families go? In today's society it is important to protect what little areas that bring families together we have left. Please choose a different alternative to expanding into Johnson valley.

Sincerely,

dustin brueckner

Response to Comment N-15086:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family oriented" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Sincerely,

Derek Kagley

Comment ID: N-15088

Response to Comment N-15088:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordnance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

Sincerely,

Eric Sheets

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordnance, many of these routes will be damaged. This problem has not been addressed in the EIS.

Sincerely,
Eric Sheets

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Sincerely,

Kyle Bowles

Response to Comment N-15107:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Sincerely,

Kyle Irvin

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased. With all the wild land fires across the US, it doesn't make sense to create another area to further fuel these fires.

Sincerely,

Mike Munding

Response to Comment N-15110:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

Comment ID: N-15123

Response to Comment N-15123:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

Sincerely,

Kyle Irvin

Comment ID: N-15139

Response to Comment N-15139:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers.

Sincerely,

Greg Dornain

Response to Comment N-15140:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

Comment ID: N-15159

Response to Comment N-15159:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Loomis, CA 95548

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive, the local air quality will suffer and then Los Angeles will most likely enact more strict emission requirements on their population as the attempt to mitigate a problem that they have no control over, and is hundreds of miles away.

Sincerely,

Katie Providence

Response to Comment N-15160:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

Response to Comment N-15167:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Please reconsider, look into taking a smaller area. Look into going east, consider requesting a smaller area east and slowly expand if funding allows....anything but THDS!

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

Sincerely,

Kyle Irvin

Response to Comment N-15169:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. I am on a breathing machine at the moment due to work conditions. I know all too well what lung conditions are like. Unfortunately mine are from breathing fryer smoke and ammonia at work. I am thankfully un-effected by pollen, dust, etc. like so many other asthmatics. Knowing how it feels and what it's like to be on breathing machines drugged up on all kinds of steroids to try and stay alive, I feel a new sense of compassion for other asthmatics and feel terrible for those effected by dust and the like. Please leave JV alone, move EAST instead and help keep the public safe.

Sincerely,

Mike Munding

Response to Comment N-15173:

Thank you for your comment. OHV use is a legitimate use of our publicly owned land. Taking that access to our country, like liberty, in order to defend our country, may only be done as a last resort.

Sincerely,

Eric Sheets

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, the public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Please do not take Johnson valley from us.

Sincerely,

Daniel Wooten

Response to Comment N-15202:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Closing these public lands just moves those public folks elsewhere. Be it the streets, or other areas that are now off-limits. Please help us keep public lands open for the public. The Marines can pick up the land to the EAST and still do their training there, that way the public can retain JV and continue taking care of this land and ensuring it's there for generations to come.

Sincerely,

Mike Munding

It seems, the more people that get into OHV usage, the less lands there are, every year we are losing lands to use which is pushing people to use private property to ride on. Most of us do not want that, but this is our hobby, and we love what we do.

Thanks,
Michael Fox
Sincerely,
Michael Fox

Response to Comment N-15212:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV use. An in-depth study on the effects of the OHV community needs to be done. It is unfair to continue to close OHV areas to expand wilderness areas without proper study as to the effects of OHV use on the land. The OHV community cares just as much about the environment and mother nature in general as the people trying to convert it strictly to wilderness area and therefore should be given an equal opportunity in the efforts in making a decision in converting land to wilderness area.

Sincerely,
Colin Cleator

To Whom It May Concern:

The love of this sport is rapidly growing. It is an industry that thrives even in the face of a massive recession. The King of the Hammers spectator attendance has increased exponentially over the last few years, starting in 2007 from a relatively small group of people getting together for a little race, to a draw of 20,000 people with vendors, and media, and a complete infrastructure (I dare say it's own city) in 4 years...
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms were to expand East.

Sincerely,

John Proviencé

Response to Comment N-15220:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms were to expand East. and while your thinking about those wilderness areas, think about opening the other ones up to LIMITED-USE for green stickier use. So we as AMERICANS can continue to explore our great country of our. Spend money in our own country where it is need to stimulate OUR ECONOMY!!

Sincerely,

MATTHEW SANTORNO

Response to Comment N-15227:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Sincerely,

Sean Rogers

Response to Comment N-15256:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordnance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Kyle Bowles

Response to Comment N-15277:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

San Diego, CA 92132-5190

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordnance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Response to Comment N-15284:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

Please reconsider, look into taking a smaller area. Look into going east, consider requesting a smaller area east and slowly expand if funding allows....anything but TH2S!

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordnance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,
Kyle Irvin

To Whom It May Concern:

What about Public lands for public use?

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,

Steve Schneider

Response to Comment N-15296:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. To Whom It May Concern:

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,

Curtis Bowles

Response to Comment N-15312:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts, four wheeling is a way to be who we are, express ourselves, connect with our family and friends, get away from life's problems and connect with our country, our land.

Wheeling has developed into a culture that properly uses the land for it's beauty and challenge. By not addressing our use as a valid pursuit, you marginalize a large segment of our country, which transcends age, sex, race, wealth, poverty, education and where we are from.

The great impact of closing Johnson Valley to the OHV culture should be addressed in the EIS.

Sincerely,

Eric Sheets

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

OHV use and the activities that go with it such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Comment ID: N-15342

Response to Comment N-15342:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

The rather limited exposure here greatly limits the public feedback, many folks don't know or weren't given the chance to comment and those from out of state had no chance as well. A rather limited population was questioned and not a fair representation of ALL of those folks who use and love this area. Please reconsider the need for the expansion as well as the idea to move EAST instead.

Sincerely,

Mike Munding

Before making a final decision please notify ALL users of Johnson Valley as to what your proposed outcome is. As stated above, OHV users are not exclusively those with modified four wheel drives, ATVs, or dirt bikes and proposing to close this area to OHV use is very misleading to those who use the area for other things other than driving a modified 4WD. Please notify all users of Johnson Valley as to the proposed closure.

Sincerely,
Colin Cleclor

Comment ID: N-15364

Response to Comment N-15364:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,

Stacy Newman

Response to Comment N-15368:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. Response to Comment N-15370 (Page 2 of 2):

Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,
Kyle Irvin

Response to Comment N-15374:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. Comment ID: N-15382

Response to Comment N-15382:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture".
Johnson Valley was one of the first spot that I went off roading/ATV riding. It's great to be able to ride all day and not see the same scenery. Johnson Valley needs to remain OPEN for generations to come. It's an open use area that has already been scared, so leave it OPEN for us to enjoy.

Sincerely,

MATTHEW SANTORNO

Response to Comment N-15385:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

OHV use and the activities that go with it such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

John Fair

Response to Comment N-15388:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-road riding that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV culture.

Sincerely,

Eric Sheets

Response to Comment N-15411:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-road riding that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". Johnson Valley is to four-wheeling as Yosemite is to hiking and climbing, or Yellowstone is to geysers and wildlife. Those areas would never be considered to military expansion and Johnson Valley should not either. Though not a National Park (we would not like it to be for obvious reasons) it is on much of the same scale as one. It is a place that is truly ONE-OF-A-KIND!!! Places like this should not be taken from us or our future generations.

Sincerely,

Colin Cedor

To Whom It May Concern:

There is a huge concentration of OHV enthusiasts in the southern California area. Their "Mecca" for off-roading happens to be Johnson Valley. As so many off road areas have been closed in the past few decades, those enthusiasts have so few choices for their activities that the encroachment of the 29 Palms Marine Base into the area will not only devastate their culture, but will end up encouraging a sizable number of them to off-road on closed or protected lands. I would not be surprised if a decent number of them end up on the expanded portion of the base. The simple mention of SHARING of these lands by Marines and OHV is a complete joke...this will not be feasible financially, time-wise, or safety-wise due to unexploded ordnance and a number of other factors. The simple truth is, the loss of recreation lands in this case is unacceptable and will create numerous bad situations that will affect the OHV community, the residential and business communities around Johnson Valley, and ultimately create less-than-safe situations on and around the base itself.

DQ NOT expand the 29 Palms Marine Base into Johnson Valley!

Sincerely,

Brena Penniman

Response to Comment N-15418 (Page 1 of 2):

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected

Comment ID: N-15418 (Page 2 of 2)

Response to Comment N-15418 (Page 2 of 2):

alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

The expansion plans for 29 Palms Marine Base pushing into, and taking over, most of Johnson Valley's multiple-use recreation area appears to be ignorant of the process in doing a proper EIS. There are numerous areas that were left out of the EIS studies, including the impacts on an entire culture of recreationalists...multiple cultures actually.

The activities seen in the Johnson Valley Recreation Area are not just some pop-fad or single-event taking place, never to be seen again, but instead are truly "lifestyles", dedicated to participation in a certain activity. Whether it be the racketeer, the wind-sailer, the rock hound, the off-roader, or any other of the large number of activities taking place in the area, the individual participants invest tens of thousands of dollars, if not hundreds of thousands or even millions of dollars in order to participate. With that much invested, it proves that these activities go far beyond an "intermittent hobby" and are actually in a classification comparable to an entire culture of their own...very large cultures at that.

To ignore something as great as a culture, many cultures in-fact, combined with the fact that Johnson Valley happens to be the "Mecca" of many of those cultures (especially in the off-road world), again shows that the EIS was NOT completed correctly and that the choice to expand into Johnson Valley would be a travesty against a large number of Americans, who are supposed to be protected by the EIS. There are reasons the EIS is a legal process...the way the EIS for the 29 Palms Marine Base expansion has been handled has NOT followed the reasoning for doing an EIS in the first place.

The cultures driven by the unique recreation activities possible in Johnson Valley would be GREATLY impacted by the 29 Palms Base expansion. Do the EIS right, or DO NOT expand the base.

Sincerely,

Joe Asplet

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Sincerely,

Kyle Bowles

Response to Comment N-15440:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. Closing the land only puts all those people on the streets. Kids need to be outside and playing in the dirt, away from TV, video games, cell phones, etc. With those kids out in the dirt now enjoying being kids, let this continue. Put them back on the streets and they'll only wind up pregnant or on drugs. Keep America safe, forget the expansion or move EAST if necessary.

Sincerely,

Mike Munding

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. There is no need to expand the base with the very real risk that it will no longer be used by the Marines in the near future.

Sincerely,

Katie Providence

Response to Comment N-15464:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

Sincerely,

Kyle Irvin

To Whom It May Concern:

The Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability. This expansion will cost far more than it appears on paper. In addition to regular costs, then figure in the costs of damage to the local economy, figure costs of adding extra patrol help to keep kids off the streets, fight higher crime rates, more city cleanup for local areas, etc. Taking kids out of the dirt only puts them in the streets and we all know what that will cost over time. Please reconsider the need to expand. If you do, go EAST instead.

Sincerely,

Mike Munding

San Diego, CA 92132-5190

To Whom It May Concern:

The Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability. Budget issues need to be addressed to ensure that funding for base expansions will remain and that the EASTWARD expansion will continue to test for many decades of training.

Sincerely,

Katie Providence

Response to Comment N-15494:

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Comment ID: N-15502

Response to Comment N-15502:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,

Kyle Irvin

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The EIS does not state the impact of an expanded 29 Palms to the residents on Old Woman Springs Road.

The current 29 Palms west boundary is over 10 miles away, and exploding ordnance can already be heard. With a westward expansion into Johnson Valley, the noise impact to Old Woman Springs Road residents will be terrible.

Johnson Valley OHV area makes a great buffer between the current Base and nearby residential areas.

Sincerely,

Nick McMurray

Response to Comment N-15520:

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Sincerely,

Bill Bowles

Response to Comment N-15522:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Sincerely,

Kyle Bowles

Response to Comment N-15523:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. Tracked vehicles do a fair amount of damage to the land that takes time to recover. Responsible OHV users frequently use "air down" techniques to enlarge the footprint of their tires and practice "tread lightly" training programs to ensure no damage to the land occurs from wheeling. If it does, we repair our damage before moving on. Please reconsider the need for the expansion and go EAST if necessary.

Sincerely,

Mike Munding

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Comment ID: N-15540

Response to Comment N-15540:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. "Think of the children!!", No, this is not just a comedic line from many episodes of The Simpsons but rather hold much truth. Think of everyone who has grown up using this area and becoming very familiar to all its wonderful trails and destinations. To close an area like this would undoubtedly be without incident. The last thing anyone want is to have some lost soul wander into an active military area.

Sincerely,
Colin Cleator

San Diego, CA 92132-5190

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,

Joshua Puente

Response to Comment N-15556:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Bill Bowles

Response to Comment N-15561:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

If the Marines need room to train, I see it as important to provide the space to do so. I would like to ask 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. This seems like a solution that would work best for all parties concerned.

Sincerely,
Ken Horton

The USMC does not realize the importance of this area to our community and OHV "Culture"
Please reconsider your plans to take over the Johnson Valley Recreation area. There are better
areas for your training. Go East!!!

Sincerely,

John Walker

Response to Comment N-15568:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Christopher Cagle

Response to Comment N-15580:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

Please study the potential of expanding 29 Palms to the East instead of into Johnson Valley to the west.

Johnson Valley is valuable to hundreds of thousands of OHV enthusiasts.

The Wilderness area to the east is valuable to several dozen people.

The greater good would have 29 Palms expand (if at all) to the East.

Sincerely,

Brenna McMurray

To Whom It May Concern:

Just Go EAST! First off, East of Johnson Valley is designated wilderness that is not used by the public and could be changed to allow the marines to use it. It would give the marines more land, and it would be easier for them to have surveillance on. Johnson Valley is a well used city park by the public, and it is simply unnecessary to take that away from them.

Sincerely,

joe aplet

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. The large amount of users of the Johnson Valley area will try to find other areas to use but since those areas are limited a few users may decide to use areas not permitted for OHV and cause damage to sensitive areas.

Sincerely,

Andrew Brodie

Response to Comment N-15593:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. I have seen this many many times in many places across my home state as well. Areas have been shut down that were once popular wheeling spots. No harm was ever done in these locations, nobody was ever hurt, nothing bad ever happened. Now, with those areas restricted, folks have moved elsewhere to other "illegal" areas and are doing damage to other areas now that were and still remain off-limits. Those areas folks once went are now dangerous and have been taken over by transients, drug dealers, gangs, etc. Violence has risen, more kids on drugs, more pre-marital pregnancies, more alcohol use. Please keep public lands open to the public. The consequences of shutting them down are FAR worse than they might appear at first glance on paper.

Sincerely,

Mike Munding

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,
Kyle Irvin

The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

Nick McMurray

Response to Comment N-15602:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. We must provide adequate open space for all activities in the United States, including OHV use. Not doing so will result in the unfortunate occurrence of OHV use. Illegal OHV use nearly always results in significantly increased environmental damage due to lack of designated trails. Along with this would come the increased need for law enforcement (more tax dollars) to help control the problem. If Johnson Valley area is taken over by 29 Palms, it would essentially create a negative domino effect.

Sincerely,
Colin Cedor

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.

Sincerely,
Kyle Irvin

Lansford, PA 18232

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.
Please help protect the natural beauty of this area!

Sincerely,
Scott Fisher

Response to Comment N-15625:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period. In order to properly evaluate all options more time will be needed, the current comment period is much too short.

Sincerely,

Andrew Brodie

Response to Comment N-15632:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often than not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.

Sincerely,

Kyle Irvin

Response to Comment N-15635:

To Whom It May Concern:

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.

Sincerely,

Kyle Cantelmo

Response to Comment N-15652:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not.

Sincerely,

Brad Ioomis

Response to Comment N-15655:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not.

San Diego, CA 92132-5190

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Joshua Puente

Response to Comment N-15676:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

Sincerely,

Laura Miller

Response to Comment N-15677:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Bill Bowles

Response to Comment N-15682:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

The difference of needing, wanting and requiring something are very different. Unfortunately in my experience with the Marines, we often found ourselves entrenched between what was truly required to be effective and what was beneficial to the administration: new technology, larger scope, competition for contracts and unfortunately political aspects. More often that not we spent twice as much time learning a new piece of equipment that may have only marginally improved our processes and would cost millions of dollars. My point is this...I don't believe the Marine Corps will ever fully utilize the expansion of 29 Palms into Johnson Valley. I believe you will take over the area for expansion and then have the funding removed by politics or spending cuts and then it will be nearly impossible for the public to get access again.

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Kyle Irvin

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? Is it necessary?

Sincerely,

Mike Munding

Response to Comment N-15700:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.
