But \$1 trillion in cuts wouldn't really be as drastic as it sounds—or as the military's no-surrender defenders insist. Such a trim would still leave the Pentagon fatter than it was before 9/11. Besides, there are vast depots of weapons that are ready for the surplus pile. The number of aircraft carriers could be cut from 11 to eight, and perhaps all could be scuttled in favor of Barnett's cruise carriers. The annual purchase of two \$3 billion attack submarines to maintain a \$8-sub fleet as far as the periscope can see also could be scaled back. The \$383 billion F-35 program really isn't required when U.S. warplanes remain the world's best and can be retrofitted with new engines and electronics to keep them that way. Reagan-era missile defenses and the nuclear arsenal are largely Cold War relics with little relevance today. Altogether, Congress could save close to \$500 billion by smartly scaling back procurement over the next decade.

So much for hardware. On the software—or human—side of the ledger,

TIME April 25, 2011

**NATION DEFENSE SPENDING**

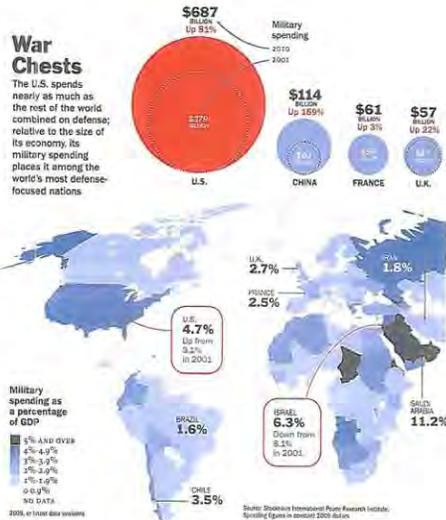

Pentagon pay and benefits have long needed revamping. Here's a number that would make Wall Street weep: some 60 members of the crew of the carrier: U.S.S. *Abraham Lincoln* recently pocketed \$3.4 million in bonuses—\$57,000 each, tax-free—simply to re-enlist. Military pay must be better aimed at troops the military wants to retain. The 20-year-and-out retirement system needs to be replaced with a model designed to keep hard-learned institutional knowledge around for twice as long. Health care premiums, frozen at \$460 a family since 1995, must be raised to keep pace with the rest of the nation's. (Pentagon medical costs have soared from \$19 billion in 2001 to more than \$50 billion today.) Gates recognizes just how top-heavy the Pentagon is. He has proposed cutting 102 of its 952 generals and admirals. Trimming the ranks and replacing archaic pay schemes with smarter personnel policies could save \$400 billion over the coming decade, says the bipartisan Sustainable Defense Task Force, a group created by Congress.

Better cloaked but just as ripe for reduction are dozens of specialized military agencies and outposts, most of which date from the Cold War and are no longer as key to our defense as they once were. The U.S. now has 17 intelligence agencies—from the well-known CIA to the well-hidden National Geospatial-Intelligence Agency—generating so much “intelligence” that much of it can’t even be reviewed. Each service has its own intelligence shop, plus a Defense Intelligence Agency to handle anything that might fall through the cracks. Scaling back collection and analysis to what’s vital—as opposed to what is possible—could cut military intelligence budgets by more than \$200 billion in the next 10 years, according to an estimate from the Cato Institute, a libertarian think tank.

Such cuts would still leave the U.S. military as the world’s most potent. It would remain the lone force with global reach, given its logistical, communications and intelligence dominance. It would still be the only power able to send warships, warplanes and missiles virtually anywhere in the world at any time. A recent *New York Times*/CBS poll found that if they had to choose, citizens were far more willing to cut defense (55%) than Medicare (21%) or Social Security (13%). Yet Congress continues to resist even minor reductions. California Representative Howard McKean, the Republican chairman of the Armed Services

**War Chests**

The U.S. spends nearly as much as the rest of the world combined on defense, relative to the size of its economy. Its military spending places it among the world’s most defense-focused nations.

Committee, says, “A defense budget in decline portends an America in decline.” Attitudes like that can bankrupt a nation, and the public senses it.

**No Politics, Please. We’re Broke**  
OF COURSE, THE PENTAGON BY ITSELF doesn’t decide where to spend all the money. That’s up to Congress—which is a big part of the problem. Nothing else seems to lead lawmakers to open the federal purse like the prospect of, for example, an aircraft carrier’s steaming home to their district. Between the ship and the dozens of aircraft stored below decks, a Navy carrier is a \$15 billion purchase. And that’s before adding the accompanying destroyers and submarines. With numbers like that, who needs pork? It’s little surprise that the folks most involved in the purchase of these ships—the members of the sea-power subcommittees—hail from Navy-friendly coastal states with a strong interest in keeping as many of them sailing as possible.

Except when states fight over the carriers’ anchorage. Right now, for example, there’s a nasty tug-of-war under way between Virginia and Florida over the Navy’s plan to shift one of Norfolk’s five carriers to Mayport, Fla. The Pentagon says the move is vital so that a natural disaster or attack—of some unspecified kind—does not deliver a knockout blow to the Atlantic Fleet.

Florida lawmakers insist that putting all the East Coast carriers in one basket, Norfolk, is dumb. “The decision has been made,” says Democratic Senator Bill Nelson. “And it’s been made for the purposes of securing the national defense.”

Virginia’s delegation contends that a tightening defense budget can’t cover the \$500 million cost of building the new facilities needed to base a carrier in Florida. “Instead of spending more ... for new repair facilities in Mayport, we owe it to our shipyard workers, the fleet and the American taxpayer to maintain our existing

shipyards properly," argues Democratic Senator Jim Webb, a former Navy secretary. Neither side mentions the real prize: the 6,000 jobs and \$400 million in annual local spending a carrier generates. Nor does either state note that the U.S. Navy has not had a real shooting war with another ship since World War II. And what is missing from this entire pork-pulling contest is whether we need that 11th carrier at all. "I do believe that strategic dispersion is a good thing," Admiral Gary Roughead, chief of naval operations, tells TIME. "My job is not to play the politics."

Of course, by spreading its carriers around, the Navy makes them harder to kill—but not because it's reducing their exposure to hurricanes or terrorists. Dispersion makes carriers harder to kill because more states become invested in their future. "It's a disease that infects the entire defense budget," says Gordon Adams, who oversaw Pentagon spending during the Clinton Administration. "We

spend about a third of the defense budget not for national-security reasons but because it's in someone's district or state."

**What's the Mission?**

THERE WAS A BRACING HONESTY IN CALLING the nation's military the Department of War until 1947. War was what the military did, and when it was over, in theory, the U.S. military could shrink to a garrison force. But following World War II, the Department of War became the Department of Defense, with a never ending mission and an ever expanding portfolio. "The United States has been at war for a startling two out of every three years since 1989, and there is no end in sight," observed University of Chicago professor John Mearsheimer in the *National Interest* in January. "Countries that continuously fight wars invariably build powerful national-security bureaucracies that undermine civil liberties and make it difficult to hold leaders accountable for their behavior." Last year the Pentagon's assessment of its must-do list expanded its roles in homeland defense, defeating insurgencies and terrorists, building allies' security forces, defeating those who would deny the U.S. military access to wherever it wants to go, stopping the proliferation of nuclear weapons and waging cyberwar. Even Gates, the budget cutter, has said, "The United States needs a broad portfolio of military capabilities with maximum versatility across the widest possible spectrum of conflict."

But the U.S. military is stretched too thinly around the globe to perform well in its many missions. In the past few years, a realist school of foreign policy thinkers has suggested it is time to rationalize our missions and curb our presence overseas. They call it offshore balancing. Instead of having the U.S. military provide the combat edge in places like Europe, Asia and the Persian Gulf, simply let its presence in those regions shrink and consign their fates to regional powers. This would mean a withdrawal of tens of thousands of U.S. troops in Europe and Asia and an end to the Marines' 66-year presence on Okinawa. South Korea can handle its northern neighbor absent U.S. troops, with offshore aid—intelligence and nuclear weapons

**Sixty crewmen from one ship recently pocketed \$3.4 million in reenlistment bonuses**

among them—coming from its longtime ally. The U.S. will never invade Iran. The U.S. military role there, should it come to war, would consist of air strikes and special operations missions, not an invasion of American troops.

The drain of waging war the old-fashioned way in Afghanistan and Iraq has forced the U.S. to swap boots on the ground for air and naval power in Libya, says Lawrence Korb, a Reagan-era Pentagon official. "We're doing the same thing in Pakistan and Yemen," he adds, "using special forces and drones." Such standoff methods could be applied to Afghanistan and Iraq once U.S. forces depart. But there are downsides to such a scheme. The Persian Gulf would fall more heavily under the sway of states like Iran and Russia, and Japan might feel the need to rearm if the U.S. folded its East Asian umbrella and went home. But leadership is all about making choices, and it's past time for Washington to recalibrate its rusty risk meter. Only by trimming missions can forces be cut, because that's where the real money is: payroll and procurement. Something will soon have to give. "The Pentagon budget reflects our commitments, but the problem is that a lot of our commitments are not essential to U.S. national security," says Christopher Preble, Cato's foreign policy chief. "We could reduce those commitments and leave the U.S. with a measure of safety and security that our ancestors would envy."

The size and shape of the U.S. military don't belong to the President, the Pentagon, contractors or Congress. Dwight Eisenhower, the last general to serve in the White House, knew something about balancing national security with prosperity. Most Americans recall Ike's warning "against the acquisition of unwarranted influence, whether sought or unsought, by the military-industrial complex." But few recall what the World War II hero—the only five-star general ever to sit in the Oval Office—said next: "Only an alert and knowledgeable citizenry can compel the proper meshing of the huge industrial and military machinery of defense with our peaceful methods and goals so that security and liberty may prosper together."

For too long, an uninterested and distracted citizenry has been content to leave the messy business of national defense to those with bottom-line reasons for force-feeding it like a feral gray goose. It's long past time, like might have added today, for U.S. taxpayers to demand that its government spend what is needed to defend the country—not a penny more.

TIME April 25, 2011

## It's just too easy to launch an attack

Having U.S. bases and troops all over the globe encourages military intervention

By CHARLES PENNA  
For McClatchy-Tribune

The speed with which U.S. military forces were able to begin combat operations in Libya last month, following the president's order to intervene in the unfolding civil war, is a tribute to the professionalism and combat readiness of the U.S. armed forces.

But it also should give us great pause. Unless the United States has been attacked, military intervention should be a very difficult, sobering decision requiring painstaking reflection.

The trouble is: With U.S. forces now deployed all over the globe, military intervention has become too easy. If it wasn't so easy, perhaps we would do less of it.

Even before the United States went to war in Afghanistan and Iraq, nearly a quarter of all U.S. active duty forces — 250,000 of the more than 1 million men and women in the active duty military — were deployed overseas.

They're virtually everywhere — with installations in dozens of countries, including Greenland, Bulgaria, Kosovo, Qatar and Kyrgyzstan. In less enlightened times, some would call this an "empire."

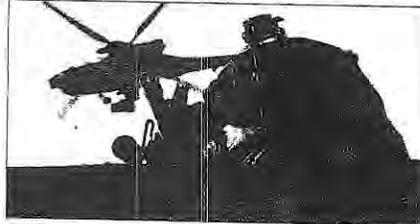

Although the Cold War is long since over and there is no threat of Soviet tanks bursting through the Potts Gap, one of the military fault lines that separated the former East and West Germany, the United States still has 50 Army installations and four Air Force bases in Germany. Elsewhere in Europe, we also have bases in Spain, Portugal, Netherlands, Italy, Bulgaria, Greece and Turkey. Who are we defending against what enemy and at what cost?

In East Asia, the United States has upward of 70,000 troops, mostly in Japan and South Korea.

We also have bases in Singapore, Australia, the Philippines and in the British territory of Diego Garcia in the Indian Ocean (not to mention the U.S. territory of Guam). In addition, one of our Navy's II carrier groups is based in Japan.

The problem with such a sprawling global military footprint, which also includes six U.S. "carrier groups" that typically are on deployment at any given time (each including an aircraft carrier, its air wings, cruise-missile armed cruisers, destroyers and attack submarines) is that it can encourage U.S. intervention by making it easy.

There are those who believe this is a good thing. In his memoirs, Gen. Colin Powell, former chairman of the Joint Chiefs of Staff, recalls a conversation with Secretary of State Madeleine Albright in which she allegedly argued, "What's the point of having this superb military you're always talking about, if we can't use it?" In other words, a good military is a terrible thing to waste.

A U.S. Army soldier stands guard on a rooftop as an Apache helicopter passes overhead in New Baghdad, Iraq, in 2006.

## Military: Smaller footprint would make it easy to say no

Continued from Page G1

how precisely employed, military force is still a blunt instrument intended to destroy and kill.

Ultimately, the only way to wean the United States from using the military to try to solve the world's problems — which are seldom solved by the use of force — is to reduce the size and footprint of U.S. forces.

The good news is that we can do so and still be safe.

America is fortunate to have friendly countries to the north and south and

two vast oceans on our flanks. We do not need to contain the Soviet Union — as we did during the Cold War — and there is no successor rival power on the horizon.

While we clearly have enemies, none has the power to seriously threaten the U.S. homeland.

The United States shouldn't be the first responder to crises that do not threaten our security, such as Libya. If U.S. forces weren't deployed here, there and everywhere, it would be much easier to say "no" when the rest of the world cries out for America to intervene.

Turn to MILITARY, Page G4

Land Acquisition/Airspace Establishment Study  
RE: Aviation

I submitted comments during the first scoping period and attended one of this years meetings.

I own airport FAA designator 7CA1 (Abraham Airport) in Johnson Valley.

In response I see that the proposed land acquisition area was moved northward and eastward from my airport and the neighboring airports 2CAS (B&E) and 31CA (Kelly).

I then studied the proposed airspace proposal for choice 6.

It places my airport underneath the restricted airspace.

I did observe the proposal to have a 1500 AGL shelf over my airport.

I am familiar with the ridges of land to the north and east of my airport.

I have studied the proposed exercise area and it is beyond those ridges I believe.

I am not aware of any restricted airspace that has a shelf underneath it.

I further do not know how the FAA would chart this shelf airspace since it is described in the study to be defined as underneath the restricted area but outside the proposed land

acquisition area which has a very jagged boundary.

I also do not know how pilots could navigate this shelf and how GPS manufacturers would display it.

I therefore would suggest that the land acquisition boundary and restricted airspace be located three miles from any airport.

**Response to Comment N-18863:**

Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the Draft EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

Re: Public Comment – Twentynine Palms Expansion DEIS

Ladies and Gentlemen:

This document constitutes both comments regarding subject DEIS and a solution that is consistent with National Defense Doctrine for the Real Parties of Interest. The People of the United States and the men and women of the American Defense Forces.

On January 31, 2009, I timely delivered my public comments by e-mail to Mr. Joseph Ross, Land Acquisition Manager at MAGTFTC, MCAGCC and upon request I received an e-mail acknowledging its timely receipt. In important part, my comments included a proposed ALTERNATIVE that included a TOPO map to establish a "379,585 acre Training Site" centrally located on the Gulf Coast, specifically on the boundary lines between Kansas and Oklahoma such that the U.S. Marines could "ramp up for a specific mission – to the West, East, North, and South – anywhere in the world – in the LEAST AMOUNT OF ASSEMBLY AND TRAVEL TIME."

I then called the contact number provided in the DEIS Notice and left a message to return my call such that I could acquire the official response to my public comments. No response. I then tried numerous times to make contact with personnel at MCAGCC but no response was forthcoming.

Perhaps part of the reasons for no response is that my 2009 public comment document stated that "It is apparent that the 'process' thus far has been POLITICALLY driven, rather than driven by the best civilian and military minds available," and "Simply stated the Center for Naval Analysis' . . . data would be inadequate to undertake even a startup of a LEMONADE STAND ON A NEIGHBORHOOD CORNER."

Nevertheless, I continued my research and analysis regarding what is really needed by the U.S. Marines as to the scope and location of an adequate Training Range.

**Here I would point out that America's 350 million residents live on only three percent of the total land mass of the United States.**

**Why are we quibbling about a million or two acres?**

**How is it that subject DEIS contains thousands of pages of environmental rhetoric, but does NOT address the key issue: American sovereignty?**

**Response to Comment N-18864 (Page 1 of 12):**

Thank you for your comment. As described in Section 1.3 of the Draft EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public

**Comment ID: N-18864 (Page 2 of 12)**

**Thus, how is it possible that the Twentynine Palms base is one of only two such bases in the United States – and the second base in Florida is being closed or has been closed down?**

**And protecting the Twentynine Palms Military Base “must be achieved,” yet the following issues have NOT been addressed?**

All of the “Base Expansion” programs via Congressional Legislation and related Appropriation Bills are one like the other, just the title of the Military Base changes, except that the Appropriation Bills DICTATE the outcome because of micromanagement of the process to conform with Environmental Law, paid for via the Defense Budget.

My position is that the process for Fort Erwin / National / Training Center has been underway since 2001 and it is NOT CLEAR WHETHER THE EXPANSION WAS COMPLETED AND DECLARED OPERATIONAL. OR AFTER 10 YEARS, IS IT STILL “A WORK IN PROGRESS”?

**SIMPLY STATED, THE 1.22 MILLION ACRES OF THE FORT ERWIN FACILITY SHOULD BE ABLE TO PROVIDE FOR ALL THAT IS PLANNED FOR THE TWENTYNINE PALMS BASE, BUT THIS HAS NOT BEEN DONE.**

**THUS THE TWENTYNINE PALMS BASE DEIS PROCESS MUST BE SUSPENDED UNTIL THE STATUS OF ALL THE “BASE EXPANSIONS” THAT CONSTITUTE ABOUT 1/6<sup>TH</sup> OF THE LAND MASS IN THE REGION HAVE NOT BEEN COMPILED INTO A SINGLE DEIS DOCUMENT SUCH THAT THE ATTRIBUTUTES AND STATUS OF EACH FACILITY ARE DISCLOSED.**

**IT IS MY POSITION THAT THIS MUST BE TIMELY PERFORMED IN A “SUPPLEMENTAL DEIS/ DEIR.”**

Key points and issues follow, NONE OF WHICH WERE ADDRESSED IN ANY OF SUBJECT EIR’S FOR MILITARY BASES:

**FORT IRWIN EXPANSION, KEY ELEMENTS DOCUMENT  
Dated  
January 12, 2001  
  
KEY ELEMENTS  
OF  
PROPOSED EXPANSION PLAN  
FOR  
FORT IRWIN AND THE NATIONAL TRAINING CENTER**

**Executive Summary.**

Congress DIRECTED the Department of the Army and Department of Interior to draft a proposed plan that would expand the maneuver training lands at the National Training Center while protecting endangered and threatened species and their critical habitats; Public Law 106-554, “Consolidated Appropriations Act, 2001,” incorporates by reference H.R. 5666, “Miscellaneous

**Response to Comment N-18864 (Page 2 of 12):**

Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Comment ID: N-18864 (Page 3 of 12)

Response to Comment N-18864 (Page 3 of 12):

Appropriations.” Section 323 of which requires that the Secretaries jointly provide to Congress the key elements of the proposed expansion plan no later than 45 days after enactment. Within 90 days after enactment, the Director of the Fish and Wildlife Service is to provide the Secretaries with a preliminary review of the plan that identifies an approach for implementing the plan consistent with the Endangered Species Act. Within 120 days of enactment, the Secretaries are required to submit a proposed expansion plan and to propose legislation for the withdrawal and reservation of public lands for the National Training Center expansion.

All activities are to be taken in full compliance with the Endangered Species Act, the National Environmental Policy Act, and other applicable laws and regulations.

Introduction.

The National Training Center (NTC) at Fort Irwin, California, is the only instrumented training area in the world suitable for force-on-force and live fire training of heavy brigade-sized military forces. It provides the Army with essential training opportunities necessary to maintain and improve military readiness and promote national security. The NTC must be expanded to meet the critical need of the Army for additional training lands suitable for the maneuver of large numbers of military personnel and equipment, which is necessitated by advances in equipment, by doctrinal changes, and by Army Transformation requirements.

The lands being considered for expansion of the NTC are home to the desert tortoise (*Gopherus agassizii*) and Lane Mountain milkvetch (*Astragalus jaegerianus*), which are protected under the Endangered Species Act of 1973 (ESA), 16 U.S.C. §§1531 et seq. Any plan for the expansion of the NTC must provide for such expansion in a manner that complies with the ESA, the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§4321 et seq., and other applicable laws.

By legislation, Public Law 106-554, “Consolidated Appropriations Act, 2001,” incorporating by reference H.R. 5666, “Miscellaneous Appropriations,” Section 323, entitled “Fort Irwin National Training Center Expansion” (Attachment 1), Congress directed the Secretaries of the Interior and Army to:

Within 45 days of enactment, prepare and submit to Congress a joint report on key elements of a proposed plan to expand the NTC and to provide for conservation measures;

Within 90 days of enactment, obtain the U.S. Fish and Wildlife Service’s (FWS) preliminary review of the proposed expansion plan for the purpose of identifying an approach for implementing the plan consistent with the ESA;

Within 120 days of enactment, prepare and submit to Congress a proposed expansion plan that takes into account the content of the FWS’s preliminary review; and

Within 120 days of enactment, prepare and submit to Congress proposed legislation providing for withdrawal and reservation of public lands for the expansion of the NTC;

Initiate as soon as practicable, and complete within 24 months of enactment, consultation required under Section 7 of the ESA;

**IS IT NOT ALL BUT IMPOSSIBLE TO PERFORM  
THE ABOVE STEPS IN A THROUGH MANNER  
IN A MATTER OF A FEW DAYS, NOT MONTHS AND YEARS?**

Within 30 months of enactment, complete any analysis required under NEPA.

**Comment ID: N-18864 (Page 4 of 12)**

**Response to Comment N-18864 (Page 4 of 12):**

THE FOLLOWING RHETORIC IS THE SAME FOR SUBJECT DEIR.

III. Fort Irwin and the National Training Center.

A. Establishment, Purpose, and Mission.

In 1940, President Roosevelt established the Mojave Anti-Aircraft Range, a military reservation of 1,000 square miles, in the area of present-day Fort Irwin. In 1942, the post was re-named Camp Irwin in honor of Major General G. Leroy Irwin, World War I commander of the 57th Field Artillery Brigade. The post was deactivated in 1944. It was reactivated in 1951 as a training center for combat units in the Korean War.

The post was designated a permanent Class 1 installation in August 1961 and was designated Fort Irwin. During the Viet Nam buildup, many units, primarily artillery and engineer, were trained and deployed to Southeast Asia directly from the post.

In January 1971, the post was again deactivated and placed in maintenance status under the control of Fort McArthur, California. Despite deactivation, the post continued to serve as a training site for the National Guard and Army Reserve.

On October 16, 1980, Fort Irwin was selected from several candidates to become the site of the new National Training Center. On July 1, 1981 Fort Irwin was reactivated as an active installation.

The mission of the NTC since its inception has been to provide tough, realistic combined arms and joint training to be conducted under conditions that must remain relevant to the combat situations our forces must face.

Advances in weaponry, demands in logistics and command/control, and developments in information technology emphasize the need to train brigades across the full spectrum of operations.

Such training carries the added benefit of allowing brigades to be trained with their full complement of combat and support units during each NTC rotational training exercise.

These larger training operations enhance the development of doctrine and technology for the future.

The NTC is limited by its current available acreage to provide a realistic training environment to meet the expanding needs of Army brigades.

B. Need for Expansion.

The expansion of the NTC at Fort Irwin is essential to maintaining operational readiness for National Security.

It is the only instrumented training area in the world suited for force-on-force and live fire training of heavy brigade-sized and battalion task forces. Advances in equipment (e.g., longer engagement ranges of weapon systems), doctrinal changes (expansion of the battle space by at least a factor of four), and the ongoing Army Transformation require the expansion.

Because of advances in weapon systems, brigades and battalions are required to cover more ground; they operate in dispersed areas of operation; mass to conduct decisive combat operations; and then disperse again.

Comment ID: N-18864 (Page 5 of 12)

Response to Comment N-18864 (Page 5 of 12):

*It is my position that subject "New Doctrine" is FATALLY FLAWED because the New Doctrine may be able to TAKE ground during BATTLE, but would be UNABLE to KEEP the ground upon ATTACK by a subsequent MASSED offensive by the enemy because of the LACK of an ADEQUATE level of US Soldiers deployed in the "Field of Battle," thus incurring US Soldier casualties for which there can be NO possible justification*

*And THIS New Doctrine was propounded by President Bush Sr. during the 1990-1991 "Persian Gulf War" that Secretary of Defense Dick Cheney and Joint Chiefs of Staff Chairman Gen Colin Powell's "Desert Shield" doctrine CREATED as the only option available to overcome the Democrats' 1970's "Vietnam Peace Benefit" that was FUNDED by CUTTING IN HALF military personnel, Defense Dept R & D, etc., and thus the military budget... totaling Billions of Dollars... that Congressional Democrats' spent wildly and freely... and are STILL doing so today as shown by subject "Twenty-nine Palms Expansion" which DUPLICATES BOTH THE INTENT AND THE CONTENT IMPOSED BY THE ABOVE 2001 "FORT IRWIN EXPANSION" DOCUMENT.*

**Key Points and Issues  
That are NOT Addressed in Subject DEIR**

Units are [now] required to cover and operate over more ground than ever before -- 50km x 100km, as opposed to the 26km x 58km-maneuver space currently available.

These factors drive the Army's requirement for additional maneuverable training land at the NTC to accommodate brigade-sized and battalion task force training operations.

When Fort Irwin was designated the NTC in 1980, tactics were structured around equipment that could effectively engage an enemy at ranges of 1 to 12 miles.

Today, the Army effectively engages the enemy at ranges up to 60 miles away.

Comment ID: N-18864 (Page 6 of 12)

Response to Comment N-18864 (Page 6 of 12):

Also, the pace of tactical operations has increased from 10 miles per hour to more than 25 miles per hour. The effectiveness of NTC training were first demonstrated during Desert Storm [in Nov 1990, with MUCH hoopla], and the success of the Army during Desert Storm was directly attributable to having trained with these new weapon systems at the NTC.

**RESEARCH AND ANALYSIS FINDINGS**

C. History and Alternatives.

In the mid-1980s, the need for additional land for training at the NTC was identified because of changes in doctrine, equipment, and tactics. This need was subsequently validated and quantified by two Land Use Requirements Studies (LURS).

["Studies" performed by WHO? - "The Center for Naval Analysis, Alexandria, VA" [aka] "The Center for Naval Analysis" that performed the "study" to expand the "Twentynine Palms Marine Base"? Equals "Junk Science !!!"]

The studies indicated a shortfall of about 193,000 net maneuverable acres on the NTC to adequately meet training needs. Various alternatives were developed and studied to enable the NTC to meet the needs identified in the LURS. These alternatives included variations of land configurations adjacent to the NTC, as well as use of other military installations. Each of the studied alternatives presented disadvantages as to impacts on the environment, training value of the land, cost, and co-use complications.

The Army has identified a proposed expansion plan that incorporates the advantages of both an eastern and western expansion.

This alternative involves acquisition of approximately 110,000 new acres on the east and southwest sides of the existing NTC and the return to training use of about 22,000 acres in the south that are currently set aside [for WHAT?] on the NTC. While this total is less than the 193,000 acres identified in the LURS, it satisfies the most critical needs [WHAT?] for additional maneuver lands, while taking into account the Army's environmental stewardship responsibilities.

IV. West Mojave Desert.

A. Endangered and Threatened Species

Twelve federally listed threatened and endangered species are found within the West Mojave Desert. These include endemic plants with a very limited range to wide ranging species that are endangered by disease and human-related actions. An additional 106 unlisted species have been identified as target species for protection by the West Mojave Desert Coordinated Management Plan (West Mojave Plan), a habitat conservation plan that is being prepared in accordance with section 10(a)(1)(B) of the ESA, 16 U.S.C. §1539(a)(1)(B). This plan is described in greater detail in section C of this part of the Report.

Two listed species occur within the proposed Fort Irwin expansion area -- the desert tortoise and the Lane Mountain milkvetch. Training activities on the proposed Fort Irwin expansion lands will not proceed unless the Army determines, pursuant to section 7(a)(2) of the ESA, 16 U.S.C. §1536(a)(2), and

Comment ID: N-18864 (Page 9 of 12)

Response to Comment N-18864 (Page 9 of 12):

in consultation with the FWS, that the training activities will not be likely to jeopardize the continued existence of these species or destroy or adversely modify any designated critical habitat. Critical habitat is defined as areas that contain the physical or biological features essential to the conservation of the species, and that may require special management considerations or protection. In 1994, the FWS designated critical habitat for the desert tortoise that includes substantial tracts of land on and around Fort Irwin, including the Superior Valley portion of the proposed expansion area. 59 Fed. Reg. 5820-5866 (1994). The FWS has not designated critical habitat for the Lane Mountain milkvetch.

While the proposed expansion area does encompass desert tortoise habitat, it avoids the important tortoise habitat immediately south and southwest of the proposed expansion area, including the Paradise Valley and the Coyote Basin. Based on surveys [by WHOM?] completed in 1998 and 1999, these areas apparently [i.e., NO evidence of] support some of the highest numbers of desert tortoises remaining in the West Mojave Desert.

While the desert tortoise has received most of the attention during the longstanding efforts by Interior and Army to accommodate an expansion of Fort Irwin, the milkvetch presents equally challenging questions to address during the consultation process. Two of the three known occurrences of the Lane Mountain milkvetch are within the proposed expansion area, and these are located within areas susceptible to training maneuvers (20% slopes). Other potential impacts of the proposed expansion that could occur on or off the expansion area include, but are not limited to, dust and obscurants. Potential habitat exists, however, outside the proposed expansion area on Lane Mountain and in the Paradise Range, and efforts will be made during the pre-consultation period to locate other populations in these and perhaps other areas outside the proposed expansion area.

A number of unlisted, but sensitive, plants and animals occur within the proposed expansion area. Animals include the LeComte's thrasher, Bendire's thrasher, golden eagle, prairie falcon, burrowing owl, and the state-listed Mohave ground squirrel. Major populations are present for LeComte's thrasher and Mohave ground squirrel. Plants include small-flowered androstaphylos, desert cymopterus, Barstow woolly sunflower, alkali mariposa lily, and Clokey's cryptantha. The small annual plant, Clokey's cryptantha, is known from only two locations, and about half of its predicted distribution is within the proposed expansion area. Many of the mitigation measures that will be implemented to protect listed species, especially land acquisition, should have a salutary impact on these unlisted species.

B. Description and Purpose of West Mojave Desert Wildlife Management Areas.

The Desert Tortoise (Mojave Population) Recovery Plan (1994) recommended that four Desert Wildlife Management Areas (DWMA) be established within the West Mojave Desert: Superior-Cronese, Fremont-Kramer, Ord-Rodman, and Joshua Tree.

These areas consist of approximately 1.5 million acres of habitat that is considered essential to the conservation of tortoises.

Through the West Mojave planning process, biologists used 1998 and 1999 tortoise survey information, land ownership patterns, and discussion with scientists and [what?] agency personnel to propose DWMA boundaries for consideration by the West Mojave Supergroup, a group that includes federal, state, and local agency officials, as well as representatives of the environmental community and development interests.

The Superior Valley portion of the proposed expansion area lies within the Superior-Cronese DWMA.

**If the proposed expansion goes forward, the boundaries of this DWMA will need to be changed to exclude most of these lands.**

C. Description and Purpose of Wilderness Study Areas.

Five former BLM Wilderness Study Areas (WSA) identified in the 1980 California Desert Conservation Area Plan lie adjacent to the National Training Center. The Death Valley National Park Boundary, Kingston, Avawatz Mountains, South Avawatz Mountains, and Soda Mountains WSAs were legislatively designated in October 1994 by the California Desert Protection Act (CDPA) [S-21] and the public lands withdrawn from entry.

**The CDPA allowed these areas to remain under wilderness review pending a final decision on the National Training Center expansion.**

[PROOF - The "implementation rules" in THIS document all but PRECLUDE "Fort Irwin" from EVER being authorized to be as stated herein [FIND OUT IF IT WAS!], THUS leaving ALL the above areas being ABSORBED in Feinstein/Scarry Harry's 2011 Desert Protection Act - ALONG WITH THE "TWENTYNINE PALMS [29Palms]" BASE EXPANSION that has been set with similar "implementation rules" as has likely the "El Centro" base expansion - CREATING "ENVIRO HEAVEN" and 1,000s of ENVIRO JOBS - AND VOTES - LEAVING THE MILITARY CRIPPLED AND AMERICA DEFENSELESS.]

If Fort Irwin expands as proposed, conserving sensitive species in the western Mojave Desert will become more difficult, because most of the lands in the proposed expansion area will no longer be available for species conservation purposes.

The conservation measures proposed as part of the expansion should be taken into account as the West Mojave Coordinated Management Plan is developed.

Consequently, the development of the West Mojave Coordinated Management Plan and the proposed expansion of Fort Irwin should be coordinated closely to ensure that the adverse and beneficial impacts of both actions can be fully considered in the decision-making processes.

Mr. Chris Proudfoot  
Proposed 29 Palms Training Land/Airspace Establishment Project  
MAGTFIC, MCA GCC  
Bldg. 1554, Box 788104  
Twentynine Palms, CA 92278-8104

Re: Comments to Proposed Twentynine Palms Land Acquisition/Airspace  
Establishment Project Draft EIS

Dear Mr. Proudfoot:

On behalf of TETRA Technologies, Inc. ("Tetra"), we are submitting this letter to comment on the Draft Environmental Impact Statement ("EIS") for the proposed land acquisition to expand the Marine Corps facility. As you know, Tetra is a company that specializes in certain chemical production and oil and gas services. Tetra owns and operates two calcium chloride/sodium chloride production facilities that are located in the eastern study area of the proposed land acquisition, considered in Alternative 3 of the EIS, where it produces calcium chloride and sodium chloride by solar evaporation of naturally occurring brines beneath the operations. These two operations, the "Amboy Operation" and the "Lee Operation," are generally located to the east of the existing Twentynine Palms Marine Corps Base, in southeastern San Bernardino County, primarily in T3N R12E, T4N R12E, T3N R15E, and T2N R15E, San Bernardino Meridian.

As we stated in our letter to Mr. Joseph Ross, dated January 29, 2009, we believe that our operations will be significantly impaired or potentially terminated if the eastern study area is selected for inclusion in the land acquisition. As such, we appreciate the Department of the Navy taking our concerns into consideration and agree with the Department's determination that Alternative 6, encompassing the western and southern study areas, is the preferred alternative and best way to achieve the three fundamental components of the proposed project.

Response to Comment N-18865 (Page 2 of 6):

Mr. Chris Proudfoot  
May 26, 2011  
Page 2

I. Acquisition of Land and Operational Feasibility.

The Draft EIS discusses threshold requirements for an alternative to be considered feasible. Action alternatives must be capable of providing land and associated airspace necessary to meet the minimum criteria. In addition, the alternatives were considered based on objective requirements for evaluating the desirability of an alternative. The stated objective requirements included the following: (i) Independent, offensive maneuver of three battalion task forces abreast and associated air combat element operations, with the three battalion task forces converging on a single MEB objective; (ii) 48-72 hours of continuous offensive operations by the three battalion task forces as they converge on a single MEB objective; and (iii) Integrated air and ground maneuver live-fire with optimized freedom of action to the greatest extent practicable considering operational range capabilities and munitions safety requirements. (DEIS at 2-83-84)

Alternative 3, comprising the east study area, although allowing for three battalion task forces to converge on a single MEB objective, has terrain features that limit the ability to fire and maneuver in the study area. Specifically, dry lake beds and Amboy Road would impose limitations that would not occur in the western study area. The two battalion task forces would be funneled between the dry lake bed and the Sheephole Wilderness area. In addition to this restriction on operations, these battalion task forces would have to administratively cross Amboy Road at hardened crossings, which does not provide the best operational simulation of terrain conditions. Further, live-fire would have to be restricted in the east study area in order to safeguard civilian traffic on Amboy Road. (DEIS at 2-84)

The Preferred Alternative, as well as other study alternatives utilizing the west study area, however, are more desirable from an operational standpoint. Alternative 1, meets all of the optimal requirements and would not impose any training restrictions. The Preferred Alternative mitigates some of the environmental impacts of Alternative 1, and still provides a more desirable training area from an operational standpoint. The Preferred Alternative also allows for all three battalion task forces to converge on a single MEB objective. It does not have terrain restrictions such as dry lake beds or Amboy Road. Live-fire is also not restricted in order to protect civilian safety. The one training restriction Alternative 6 imposes—the limited use of dud-producing ordnance due to the restricted public access designation of a portion of the west study area—still meets the optimal requirements for MEB training. (*Id.*) As such, we agree that the Preferred Alternative is the best way to accomplish the Marine Corps training objectives as it not only takes the public into consideration, but also allows for a more optimal training scenario from an operational standpoint.

Comment ID: N-18865 (Page 3 of 6)

Response to Comment N-18865 (Page 3 of 6):

Mr. Chris Proudfoot  
May 26, 2011  
Page 3

II. Impact on Transportation and Safety.

The east study area is the only area which considers the closure of a major road. Amboy Road is the principal route between Twentynine Palms, California and the Interstate 40 corridor to the north of the Combat Center. (Draft EIS at 2-85) Implementation of Alternative 3 would involve the closure of Amboy Road for two days out of the year. While signs could be put in place to advise the public of the closure of Amboy Road in advance, the complete road closure would be significant, as the general public could not access a route to Interstate 40 for more than 30 miles beyond Amboy Road. (Draft EIS at 4.6-6) In addition, tanks would cross Amboy Road as part of the training exercise. This would involve the installation of four concrete tank crossings over North Amboy Road which would be required to minimize the impacts to the roadway from the military vehicles. (Draft EIS at 4.4-14)

The Preferred Alternative would not restrict public access to any paved roads or traffic thoroughfares. (Draft EIS at 4.6-8) As the Preferred Alternative would not involve use of public roads, potential transportation impacts would primarily occur due to trespasser interference. (See Draft EIS at 4.4-7) Because these impacts can be mitigated, the potential impacts to safety based on transportation are greatly reduced as compared to Alternative 3.

In addition to impacts on Amboy Road and vehicular transportation, the east study area also contains railroad line crossings, increasing the risk of injuries or impacts related to ground transportation in the east study area. Railroad line crossings have the potential to occur during ground training activities, and these crossings may disrupt rail traffic or result in accidents between military vehicles and train cars. There is also the potential that ordnance may strike rail cars in transit during training activities. The Combat Center does not currently have a protocol to deal with these types of impacts, and would have to develop some standards if the east study area were acquired for the expansion of the Center. (Draft EIS at 4.4-14) Railroad lines are not present in the west study area, eliminating these potential transportation and safety related impacts from the Preferred Alternative.

III. Impact on Socioeconomics.

As we stated in our January 29, 2009 letter, Tetra's operations are an important part of the local economy. Tetra directly employs 22 people at its operations within the eastern study area, paying a total of \$775,000 in salary each year. Tetra also spends \$2,100,000 per year to ship and transfer its products, and spends \$3,800,000 per year in California to produce its products. Alternative 3 could require the closure of Tetra's operations, as well as the operations of other mines and agricultural lands in the area. (Draft EIS at 4.1-11)

**Comment ID: N-18865 (Page 4 of 6)**

**Response to Comment N-18865 (Page 4 of 6):**

Mr. Chris Proudfoot  
May 26, 2011  
Page 4

The closure of mining operations in the east study area would be significant and inconsistent with the California Desert Conservation Area ("CDCA") Plan's multiple use objectives, which include provisions for mining access and approved permits allowing for the operation of Tetra's and National Chloride's mines in the east study area. Further, the BLM has assigned a Known Sodium Leasing Area (43 Code of Federal Regulations 2400) land classification to lands in the vicinity of the mines, indicating its intent to retain access to mineral resources without interference from other users. (Draft EIS at 4.1-11)

As such, adoption of Alternative 3 would create economic impacts due to the loss of mining production and the associated income that is the result of the production, transportation, and use of the sodium chloride product. Relocating these mines may be costly and potentially infeasible. Furthermore, preclusion of access to these mineral resources would result in adverse impacts on mining in the future. (Draft EIS at 4.1-12) In addition to the economic impacts, acquisition of the east study area would conflict with BLM policy, which recognizes the need to continue mining in the area without interference. Alternative 6 would avoid all of these impacts, as no active mines are present. (Draft EIS at 4.1-17)

Alternative 3 also creates fewer Combat Center jobs than the other considered alternatives. Due to the configuration of the land and training capabilities, Alternative 3 would create approximately 59 new jobs at the Combat Center. Alternative 3 would result in the loss of approximately 135 jobs as a result of displaced businesses. As such, Alternative 3 would result in a net loss in regional sales, income and employment. (Draft EIS at 4.3-17-18) Although this was found to be less than significant, the Preferred Alternative offers a combined increase in income due to the creation of additional Combat Center jobs. Specifically, the Preferred Alternative would create approximately 110 jobs and would realize a beneficial combined impact from a net gain in regional sales, income and employment. This personnel increase would offset any impacts due to the loss of recreational or film industry spending. Further, the area has the capacity to support any additional demand for housing or services. (Draft EIS at 4.3-27)

Alternative 3 has the potential to result in the loss of 135 jobs, while only creating 59 Combat Center jobs. Further, Alternative 3 could result in the loss of mining operations and associated revenues and property taxes. The impacts of Alternative 6 primarily concern recreation and film industry impacts. While the loss of a portion of the Johnson Valley OHV Area would result in some detrimental impacts on those industries, the Combat Center would realize an increase in 135 jobs. This increase in personnel and their families would increase spending in the area and overall, the impacts would be beneficial. Further, existing businesses in the east study area would

Comment ID: N-18865 (Page 5 of 6)

Response to Comment N-18865 (Page 5 of 6):

Mr. Chris Proudfoot  
May 26, 2011  
Page 5

be retained, further preserving revenue in the area. Because Alternative 6 would realize a net socioeconomic benefit, we concur in the determination that it is the Preferred Alternative.

IV. Impact on Air Quality.

Impacts to air quality can occur due to both construction activities as well as operations. Generally, all of the proposed alternatives would have similar air quality impacts, although Alternative 3 produces additional significant impacts to National Ambient Air Quality Standards ("NAAQS"). Because of these additional impacts, the Preferred Alternative and acquisition of the west study area is preferable to Alternative 3 from an Air Quality standpoint.

Construction activities under all alternatives would produce similar impacts. Operationally, however, Alternative 3 would generate more combustive and fugitive dust emissions from tactical vehicles and tactical support equipment due to vehicles needing to travel greater distances based on the location of the proposed assembly areas. (Draft EIS at 4.8-10) Implementation of Alternative 3 would result in greater PM<sub>10</sub> emissions, exceeding the NAAQS standard. Alternative 3 is the only alternative that would result in significant air quality impacts. Accordingly, we agree that Alternative 6 is preferable as both an operational alternative, and an environmental alternative.

V. Impact on Recreation.

There have been arguments that acquisition of the east study area should be the preferred alternative due to impacts on recreation should the Johnson Valley OHV Area be acquired, and there is concern that the Preferred Alternative would result in greater socioeconomic impacts due to the impact on OHV use and loss of income from businesses supporting OHV use and recreation. We agree with the findings in the Draft EIS that Alternative 6 mitigates these concerns by retaining public access to a large portion of the Johnson Valley OHV Area, namely, 82,802 usable acres, or approximately 44 percent of the Johnson Valley OHV Area, would be available for public recreation 10 months per year. (Draft EIS at 4.1-16)

The Preferred Alternative maintains the Cougar Buttes, Anderson Dry Lake, and Soggy Dry Lack OHV staging and camping areas, as well as several popular OHV trails including Bullfrog, Cakewalk, Chicken Rock, and Hammerdown Trails for public use year round, and keeps the area available for other public activities such as hiking, picnicking, photography, geocaching, and wildlife and wildflower viewing. The restricted public access area also permits OHV use on 38,137 acres for ten months out of the year, and includes a major staging area, Means Dry Lake, as well as several

Comment ID: N-18865 (Page 6 of 6)

Response to Comment N-18865 (Page 6 of 6):

Mr. Chris Proudfoot  
May 26, 2011  
Page 6

popular trails, including the "Hammer" trails. (Draft EIS at 4.2-19)

Thus, although Alternative 6, the Preferred Alternative, will result in the loss of a portion of the Johnson Valley OHV Area, some of the most popular and unique trails and staging and camping areas are preserved either year round or within the restricted public access area. By preserving these areas, as well as maintaining public and private land used for mining and agriculture within the east study area, the Marine Corps is able to obtain an operationally feasible expansion area, preserve recreational opportunities, and reduce socioeconomic impacts due to loss of mining and recreational lands.

We agree with the Department of Navy's determination that Alternative 6 is the Preferred Alternative for the reasons stated above and appreciate the Department's consideration of our concerns expressed in our letter dated January 29, 2009. Please contact me should you have any questions or comments.

Very truly yours,

Amanda E. Schneider, for

(CEQ # 20110051)

Dear Mr. Proudfoot:

The U.S. Environmental Protection Agency (EPA) has reviewed the above-referenced document pursuant to the National Environmental Policy Act (NEPA), Council on Environmental Quality (CEQ) regulations (40 CFR Parts 1500-1508), and our NEPA review authority under Section 309 of the Clean Air Act. Our detailed comments are enclosed.

The Draft Environmental Impact Statement (DEIS) evaluates the impacts from the proposed establishment of a large-scale training range facility at the Marine Corps Air Ground Combat Center at Twentynine Palms, California, involving the acquisition of adjacent public and private land, establishing and modifying special use airspace above the training range, and conducting sustained, combined-arms, live-fire, and maneuver training for all elements of the Marine Expeditionary Brigade.

Based on our review, we have rated the DEIS's Preferred Alternative 6 as Environmental Concerns – Adequate (EC-1) (see enclosed "Summary of Rating Definitions"). We have concerns regarding impacts to water and biological resources, including the threatened desert tortoise. We are also concerned that the exclusion of recreationalists from large portions of the heavily-used Johnson Valley Off-Highway Vehicle Area could result in transferred impacts to other more sensitive areas. We recommend that the Marine Corps give further consideration to Alternative 5, which the DEIS identifies as the Environmentally Preferable Alternative. Alternative 5 would meet the Marine Corps' minimum training requirements, potentially reduce transferred impacts from OHV users for most of the year, and result in lower adverse impacts than the Preferred Alternative.

EPA appreciates the opportunity to review this DEIS. When the Final EIS is released for public review, please send one copy to the address above (mail code: CED-2). If you have any

GEN-1

Response to Comment N-18866 (Page 1 of 7):

GEN-1:

Thank you for your comment. The contact information provided has been added to the project mailing list as requested.

NEPA-1:

Section 4.13 addresses the potential impacts on groundwater quality, and concludes that because of the ongoing management and minimization of Munitions Constituent residues at the Combat Center and implementation of management and minimization of Munitions Constituent residues in the acquisition area, impacts to surface water quality Munitions Constituents would be less than significant. The low precipitation rate, intermittent receiving surface water bodies, and deep groundwater, limits the migration of Munitions Constituent residues and thus the potential impacts of use of munitions.

Chapter 2 of the EIS has been revised to include a more detailed description of the current range clearance operations. As discussed in Section 3.4.2.1, the Marine Corps' Range Environmental Assessment (REVA) program uses an EPA-approved screening model for Munitions Constituents in surface and groundwater. The REVA evaluation occurs every 5 years and the first reassessment began in October 2010. Confirmatory sampling will occur if a future REVA evaluation indicates there is a source, pathway, and receptor with detectable levels of Munitions Constituents.

**Comment ID: N-18866 (Page 2 of 7)**

questions, please contact me at (415) 972-3521, or contact Karen Vitulano, the lead reviewer for this project, at 415-947-4178 or [vitulano.karen@epa.gov](mailto:vitulano.karen@epa.gov).

} GEN-1

Sincerely,

Kathleen Martyn Goforth, Manager  
Environmental Review Office

Enclosure: Summary of EPA Rating Definitions  
EPA's Detailed Comments

**Response to Comment N-18866 (Page 2 of 7):**

**WAT-1:**

The well field in the Surprise Spring Basin is in a restricted area where maneuvering or live fire is prohibited. This area is shown in Figure 1-6 and Figure 1-12 of the EIS. The Combat Center has a water quality monitoring plan (2009) that evaluated the risks to the wells and an on-going water quality monitoring program. No direct live fire or maneuvering in the restricted area is part of any of the alternatives. The restricted area and the water quality monitoring program adequately address the protection of the water supply drinking wells.

**WAT-2:**

Playas are not Waters of the USA per Swank vs. Cook County; therefore, a wetland delineation at the Combat Center is unnecessary. Note that a planning level wetland delineation was completed by Lichvar and Pringle (USACE) in 1993. The main features were waters of the US, 289 washes and 14 playas were classified as waters of the US in that report.

Comment ID: N-18866 (Page 3 of 7)

**SUMMARY OF EPA RATING DEFINITIONS\***

This rating system was developed as a means to summarize the U.S. Environmental Protection Agency's (EPA) level of concern with a proposed action. The ratings are a combination of alphabetical categories for evaluation of the environmental impacts of the proposal and numerical categories for evaluation of the adequacy of the Environmental Impact Statement (EIS).

**ENVIRONMENTAL IMPACT OF THE ACTION**

***"LO" (Lack of Objections)***

The EPA review has not identified any potential environmental impacts requiring substantive changes to the proposal. The review may have disclosed opportunities for application of mitigation measures that could be accomplished with no more than minor changes to the proposal.

***"EC" (Environmental Concerns)***

The EPA review has identified environmental impacts that should be avoided in order to fully protect the environment. Corrective measures may require changes to the preferred alternative or application of mitigation measures that can reduce the environmental impact. EPA would like to work with the lead agency to reduce these impacts.

***"EO" (Environmental Objections)***

The EPA review has identified significant environmental impacts that should be avoided in order to provide adequate protection for the environment. Corrective measures may require substantial changes to the preferred alternative or consideration of some other project alternative (including the no action alternative or a new alternative). EPA intends to work with the lead agency to reduce these impacts.

***"EU" (Environmentally Unsatisfactory)***

The EPA review has identified adverse environmental impacts that are of sufficient magnitude that they are unsatisfactory from the standpoint of public health or welfare or environmental quality. EPA intends to work with the lead agency to reduce these impacts. If the potentially unsatisfactory impacts are not corrected at the final EIS stage, this proposal will be recommended for referral to the Council on Environmental Quality (CEQ).

**ADEQUACY OF THE IMPACT STATEMENT**

***Category "1" (Adequate)***

EPA believes the draft EIS adequately sets forth the environmental impact(s) of the preferred alternative and those of the alternatives reasonably available to the project or action. No further analysis or data collection is necessary, but the reviewer may suggest the addition of clarifying language or information.

***Category "2" (Insufficient Information)***

The draft EIS does not contain sufficient information for EPA to fully assess environmental impacts that should be avoided in order to fully protect the environment, or the EPA reviewer has identified new reasonably available alternatives that are within the spectrum of alternatives analyzed in the draft EIS, which could reduce the environmental impacts of the action. The identified additional information, data, analyses, or discussion should be included in the final EIS.

***Category "3" (Inadequate)***

EPA does not believe that the draft EIS adequately assesses potentially significant environmental impacts of the action, or the EPA reviewer has identified new, reasonably available alternatives that are outside of the spectrum of alternatives analyzed in the draft EIS, which should be analyzed in order to reduce the potentially significant environmental impacts. EPA believes that the identified additional information, data, analyses, or discussions are of such a magnitude that they should have full public review at a draft stage. EPA does not believe that the draft EIS is adequate for the purposes of the NEPA and/or Section 309 review, and thus should be formally revised and made available for public comment in a supplemental or revised draft EIS. On the basis of the potential significant impacts involved, this proposal could be a candidate for referral to the CEQ.

\*From EPA Manual 1640, Policy and Procedures for the Review of Federal Actions Impacting the Environment.

Response to Comment N-18866 (Page 3 of 7):

**WAT-3:**

The impacts to ephemeral streams or intermittent washes are discussed on page 4.13-5 in section 4.13.2.1. The impacts to ephemeral streams or intermittent washes are discussed on page 4.13-5 in section 4.13.2.1. The EIS mentions that exercises avoid playas to the extent possible. Specifically, "Combat Center Order 5090.1D (MAGTF Training Command 2006) provides general guidance for avoiding impacts to natural resources, as well as specific guidance for avoiding disturbance of playas or other sensitive areas. The existing INRMP and compliance under Combat Center Order 5090.1D applies to existing and continued use in the Combat Center and would be expanded to cover the acquisition areas."

**NEPA-2:**

Thank you for your comment.

**BIO-1:**

Comment noted. An update on the Section 7 ESA consultation process has been included in the EIS, and the conservation measures that have been developed during the consultation process are described in Section 2.8.

**CR-1:**

Updated information in regards to traditional cultural properties and tribal consultation will be added to Section 4.11 of the EIS as available.

Comment ID: N-18866 (Page 4 of 7)

EPA DETAILED COMMENTS ON THE 29 PALMS TRAINING LAND ACQUISITION/AIRSPACE ESTABLISHMENT STUDY DRAFT ENVIRONMENTAL IMPACT STATEMENT, TWENTYNINE PALMS, CALIFORNIA, MAY 26, 2011

Water Resources

Water Quality

The DEIS discusses the Range Environmental Vulnerability Assessment (REVA) from 2008. This was a baseline assessment of the operational range areas which used a fate and transport modeling/analysis of munitions constituents based on site environmental conditions. This assessment did not appear to be based on any actual sampling data. The REVA concluded that there is potential for munitions constituents to be transported offsite, with the greatest potential occurring from the Lead Mountain area to Bristol Dry Lake and from the Prospect area to Dale Lake. Despite this, the DEIS concludes that, due to low potential for off-site transport, indirect impacts to off-site surface waters would be less than significant (p. 4.13-4). The model results predicted that concentrations of some munitions constituents would exceed trigger levels, but the DEIS states that the levels were below toxicity thresholds for sensitive indicator species (p. 4.13-4). The Executive Summary of the REVA references the toxicity threshold for reptiles, but does not mention other eco-receptors, such as wintering waterfowl or terrestrial birds and mammals.

The DEIS references DoD Instruction 3200.16 – Operational Range Clearance, and cites this as the basis for less than significant direct impacts to on-base surface waters (ephemeral washes and playas). This instruction states that the head of the DoD components shall “determine the frequency and degree to which range clearance is required to support operational range safety and sustainable use”. No information is provided regarding the current frequency and degree of range clearance, nor the expected change to this frequency to correspond with greater use of training ranges and deposits of munitions.

*Recommendation:* We understand that reevaluation of the REVA findings will occur every 5 years and that the first reassessment began in October 2010. We recommend that sampling be done to confirm or deny the modeled results of the REVA, and that the susceptibility of additional eco-receptors, including birds, be evaluated.

The FEIS should discuss the current frequency and degree of Operational Range Clearance activities and identify how this would change under the selected alternative. We recommend that DoD commit to a frequency and degree of range clearance commensurate with the increased use of training ranges and munitions, and that this be documented as a special conservation measure in the FEIS.

Drinking Water Wells

Drinking water wells are screened in the Surprise Springs subbasin and provide all potable water to the base. The DEIS does not explicitly identify the location of the wells within this area, but states that the groundwater wells are located in a restricted area of the Combat Center where mechanized maneuvers, OHVs, and training with vehicles are not permitted (p. 3.13-10). It is unclear whether any new proposed training or deposition of munitions could occur in this area as a result of the project alternatives.

*Recommendation:* The FEIS should include an assessment of the impacts of the alternatives on drinking water resources. We recommend that the well-field be assessed for and protected from

NEPA-1

WAT-1

Response to Comment N-18866 (Page 4 of 7):

REC-1:

The specific details on management of the RPAA in regards to timing, permitting process, permits and fees for events in the RPAA, etc. have not been formalized at this time. If the alternative selected is one that would involve an RPAA a Recreation Management Plan would be developed that would address these details (see Section 4.2.5.4). While preparing the Recreation Management Plan, the Marine Corps would solicit input from the public, BLM, and other agencies. Exact timeframes would be determined and communicated to the public if Alternative 4, 5, or 6 is selected. Please see Section 2.5.4 of the EIS for a discussion of the proposed communication and notification procedures in regards to public access to the RPAA.

The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

Comment ID: N-18866 (Page 5 of 7)

Response to Comment N-18866 (Page 5 of 7):

any threats from new sources of pollutants and contamination, including ammunition. A source water protection program addressing any threats to drinking water sources on the base should be developed and implemented.

*Aquatic Resources*

Clean Water Act, Section 404 applicability

Based on Figure 3.13-1 - Surface Water Features, ephemeral drainages are common throughout the entire study area and playas occur in all but the South Study Area. It is not clear whether these ephemeral drainages are jurisdictional waters under Section 404 of the Clean Water Act. Digging activities associated with staged training operations would create ground disturbances below the normal soil horizon of 12 inches. On average, an estimated 12% of the ground element forces will dig a fighting hole on any given day (p. 1-28). There is also reference to tank traps, trenches and obstacles being filled and graded (p. 4.12-15). If these activities result in dredged or fill material being deposited into waters of the U.S., they would require a 404 permit to be issued by the Army Corps of Engineers (Corps).

WAT-2

*Recommendation:* The Marine Corps should contact the Corps about completing a jurisdictional delineation of aquatic resources in the project study area. Results of this delineation should be included in the FEIS. Any determination that aquatic resources are not jurisdictional should be provided to EPA.

Avoidance of playas and ephemeral washes

The DEIS references a 1994 waters of the U.S. study by the Corps that identified several types of "wet areas" that are of special concern at the Combat Center, including playa lakes, dry washes, seeps and springs, and man-made water bodies (p. 3.13-4). This report identified 11 important playas that are entirely or partially in the Combat Center. The playas maintain intra/inter-ecosystem integrity and were settings for prehistoric cultural activities. Following rain events, when surface waters are present, playas attract wintering waterfowl; when dry, they are often populated by terrestrial birds and mammals where adequate vegetative cover exists.

WAT-3

The DEIS states that impact avoidance is the preferred approach for management of biological resources (p. 4.10-17). It appears that the playas would be largely avoided from high impact areas of training, as shown in Figure 4.10-6. Additional refinement of training impact areas should attempt to further maximize this avoidance. For example, it appears that, for Preferred Alternative 6, the predicted medium disturbance area could be altered to avoid the Dry Lake (Lead Mountain). Alternative 5 would avoid this and other playas to a greater extent than would the Preferred Alternative.

Similarly, ephemeral drainages should also be avoided when possible, as they provide a wide range of functions that are critical to the health and stability of desert ecosystems and wildlife. The project would construct approximately twenty-five to thirty-five miles of new unpaved roads. It is not clear how sophisticated these roads would be, but improper design and maintenance of roads and road crossings can lead to excessive erosion and sediment deposition in ephemeral drainages and receiving water bodies.

Comment ID: N-18866 (Page 6 of 7)

Response to Comment N-18866 (Page 6 of 7):

Finally, the DEIS does not identify the timing of the two 30-day training events and there was no discussion of the practicability of scheduling events to avoid biologically active periods, such as when surface water is present in playas. This is a potentially effective mitigation measure.

*Recommendation:* EPA recommends refining the training routes of the selected alternative to maximize avoidance of important playas. The FEIS should discuss avoidance of ephemeral drainages and ensure proper road design to minimize erosion and sediment deposition in drainages. Discuss the mitigation measure of avoiding biologically active periods when scheduling Marine Expeditionary Brigade exercises.

WAT-3

**Transferred Impacts from Displaced OHV Users**

The Preferred Alternative 6 would acquire the Bureau of Land Management's Johnson Valley Off-Highway Vehicle (OHV) Area. It would eliminate recreational access to this area for 2 months of the year during military training exercises, and allow restricted public access to 44% of this area the rest of the year. The Johnson Valley OHV Area is one of the most intensely used OHV areas in California (p. 3.2-17) and the DEIS acknowledges that this action may result in an increase in illegal OHV activity on nearby closed public land, private property, and local and regional wilderness areas as a result of recreationalists being restricted to smaller open spaces (p. 4.2-20). The BLM estimates that 90% of the displaced recreational users would go elsewhere in San Bernardino County, and the quality of the surrounding OHV resources may experience substantial physical deterioration. The Stoddard Valley OHV Area would likely experience the majority of this surge since it is closest, and increased OHV activity in this area may result in increased direct and indirect impacts to desert tortoises since the Stoddard Valley OHV Area has historically had higher tortoise densities than Johnson Valley (p. 4.10-12). Also, residents of nearby Wonder Valley have registered complaints with local authorities about OHV use, and this area is adjacent to a designated wilderness area (p. 4.2-1). The DEIS acknowledges that an increase in illegal riding would likely occur in Wonder Valley and lands adjacent to the south study area (p. 4.2-8).

NEPA-2

Alternative 5 would allow restricted public access to almost the entirety of the Johnson Valley OHV Area when exercises are not occurring (approximately 10 months per year), thus reducing displacement of OHV activity to potentially more sensitive sites for most of the year. It would avoid acquisition of the southern study area, and the DEIS indicates that overall exercise design and direction of maneuver under that alternative would result in lower adverse impacts. Estimated "take" of the federally threatened desert tortoise is lower under Alternative 5, and it is designated as the environmentally preferable alternative.

*Recommendation:* We recommend that the Marine Corps give further consideration to Alternative 5. While we understand that Alternative 5 is less favorable from an operations standpoint, the DEIS indicates that it does meet minimum training requirements and screening criteria.

**Desert Tortoise**

The project will significantly impact the federally threatened desert tortoise. Under the Preferred Alternative, the DEIS estimates that between 154 and 714 would be "taken". Tortoises could be crushed by wheeled or tracked vehicles, or crushed or buried from temporary construction and excavation, temporary bivouacs, helicopter landings, and foot traffic (p. 4.10-10). An estimated 128,386 acres of

BIO-1

Comment ID: N-18866 (Page 7 of 7)

Response to Comment N-18866 (Page 7 of 7):

occupied desert tortoise habitat would experience direct and indirect impacts, including loss of forage, nesting and cover sites, loss of dispersal areas, increased predation, impacts from increases in non-native plant species, inability to dig burrows from soil compaction and ordnance explosions, and stress and resultant dehydration (p. 4.10-11). The DEIS also acknowledges the potentially significant cumulative impacts that this species would experience from multiple solar energy projects in the Mojave Desert. The Marine Corps is requesting an incidental take statement from the U.S. Fish and Wildlife Service (FWS).

BIO-1

*Recommendation:* The FEIS should provide an update on the Marine Corps's Endangered Species Act Section 7 consultation with the FWS. If the Biological Opinion is available, append it to the FEIS. All terms and conditions from the Biological Opinion should be incorporated into the project Record of Decision. The Marine Corps should commit to implementing any additional conservation measures recommended by the FWS since there is a strong potential for significant cumulative impacts to this species.

**Cultural Resources/ Tribal Consultation**

The DEIS does not provide any information regarding traditional cultural properties; it simply states that the Marine Corps is currently in the process of conducting government-to-government consultation with seven Indian tribes and that no major issues have been identified as of May 2010 (p. 3.11-7).

CR-1

*Recommendation:* The FEIS should provide an update on the tribal consultation process and potential impacts to traditional cultural properties. The consultation process should also be described. Key elements of consultation are direct interaction and an exchange of views.

**Recreational Impacts**

The DEIS proposes 3 special conservation measures to reduce impacts from illegal OHV riding, including educational outreach highlighting law enforcement penalties, signage, and coordination with law enforcement. These measures are listed in the chapter assessing impacts to recreation; however, they seem to address impacts to other resources from illegal OHV activity and do not address the loss of recreational sites. Input from the public during the scoping period included a suggestion to explore the release of other DoD or BLM-administered public land not currently open to recreation. The DEIS states that this would be analyzed as part of the impact assessment and mitigation development (p. 2-99), but this analysis was not found. Instead, the DEIS simply states that the Marine Corps considered potential mitigation measures but determined none were feasible so none are recommended for the significant impacts to recreation.

REC-1

The DEIS does not discuss the timing of when the 2 month-long training exercises and closure of the Johnson Valley OHV Area would occur. A potential mitigation measure would be to time the closures to correspond with times of minimal recreational user demand, consistent with Marine Corps training needs and avoidance of impacts to other resources.

*Recommendation:* In the FEIS, discuss the possibility of releasing other public land for recreation if the preferred alternative is selected. If this was considered but deemed infeasible, the FEIS should discuss this in more detail, especially since it is identified as within the scope of the EIS (p. 2-98). Explore timing/scheduling of OHV Area closures as mitigation.

Mr. Chris Proudfoot  
Proposed 29 Palms Land Acquisition/Airspace Establishment  
Project  
MAGTFTC, MCAGCC  
Bldg. 1554, Box 788104  
Twentynine Palms, CA 92278-8104

Re: Request for Extension of Time to Comment - Draft  
Environmental Impact Statement - Land Acquisition and  
Airspace Establishment To Support Large-Scale MAGTF Live-  
Fire and Maneuver Training at the Marine Corps Air Ground  
Combat Center, Twentynine Palms, California.

Mr. Proudfoot:

The purpose of this letter is to make a formal request for  
and extension of time to provide comments to the  
aforementioned document.

The rationale for this request is several-fold:

1. The DEIS and its appendix are a complex and lengthy  
document. Given the USMC has had nearly two years to  
compile this document and has only given the public 90 days  
to provide comment, it is our belief that it would be in

Page 1 of 3

Response to Comment N-18867 (Page 1 of 3):

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Comment ID: N-18867 (Page 2 of 3)

Response to Comment N-18867 (Page 2 of 3):

Mr. Chris Proudfoot – USMC 29 Falls – Request for Extension of Time to Comment – DEIS  
5/20/2011

the public interest to allow for additional time to provide such comment.

2. Only recently, we discovered that the *Federal Register*<sup>1</sup> Notice of Availability of this Statement provides that the public comment period ended April 11, 2011. The said Notice is in conflict with Press-Release No: PR-110224NH1 as it provides for the comment period ending May 26, 2011.

Since indeed the *Federal Register* Notice is the only legal Notice of the USMC's intent of this document, the public is now confused and may have not submitted comments after this April due date.

3. The issue cited in number two, above, is now compounded by fact that the USMC has submitted to the *Federal Register*<sup>2</sup> the following Notice:

EIS No. 20110051, Draft EIS, USN, CA, Marine Corps Air Ground Combat Center Project, Land Acquisition and Airspace Establishment to Support Large-Scale MAGTY Live-Fire and Maneuver Training Facility, San Bernardino County, CA, Comment Period Ends: 05/26/2011, Contact: Chris Proudfoot 760-830-3754.

Revision of ER Notice Published 02/24/2011: Extending Comment Period From 04/11/2011 to 05/26/2011.

Of particular concern to the undersigned is the provision of "Extending Comment Period". It is our assertion that the USMC has published this later Notice as a correction rather than an extension.

Moreover, as of the writing of this letter, the USMC web site for the expansion does not include the Revision Notice, nor a press release, of the revised Notice published in the Federal Register on Friday, May 13, 2011.

In light of the issues cited above, the undersigned request an extension of sixty (60) calendar days for the public to submit its comments to this document. Again, we believe this is in the public interest considering the gravity of the issues cited above and the implications of the project on public lands and related access to the same.

1220 Pacific Highway  
San Diego, CA 92132

Dear sir:

You must provide an additional 90 days for review of the Draft EIS for the 29 Palms expansion project. There is much "good cause" for the reason that you need to provide this additional time:

- 1) The project is extremely large and very complex;
- 2) The EIS is voluminous at 2,000 pages;
- 3) Formal public hearings on the project have not been provided;
- 4) The April open house meetings did not afford the public to hear other people's comments in an official public forum;
- 5) Printed copies of the EIS were only distributed to local libraries despite me asking for one in my scoping letter;
- 6) You are requiring most publics to read the 2,000 pages of complex material on-line via your project website;
- 7) To digest the entire document, a person would have to read over 20 pages of complex material daily for the entire 90 days that you provided. That is not an acceptable expectation for the working public with many other commitments for their time.
- 8) You have worked on this EIS for 5 years. You must provide the public with at least six months to review it.

You must extend the public comment period for an additional 90 days.

You must schedule some public hearings where our comments can be heard by all, including elected officials, and properly recorded.

Then, because of the many problems in your first draft EIS, you must issue a second draft for review. The first draft is not adequate.

An additional 30-60 days public comment period with hearings should follow the issuance of your second draft EIS.

Thank you.

Sincerely,  
  
John Everett

### Response to Comment N-18868 (Page 1 of 1):

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Dear sirs:

Subject: Comments on the Draft EIS for 29 Palms

AIR QUALITY

You have been remiss in not addressing all of the state and national ambient air quality standards that are applicable in California. Your EIS must be revised to fully analyze:

State and National Ambient Air Quality Standards Applicable In California Pollutant	Averaging Time	Standards In	Standards In	Standards In	Standards In	Violation	Violation
		Parts Per Million by Volume (ppm) California	Parts Per Million by Volume (ppm) National	Micrograms Per Cubic Meter (µg/m <sup>3</sup> ) California	Micrograms Per Cubic Meter (µg/m <sup>3</sup> ) National	Criteria California	Criteria National
Ozone	1 Hour	0.09	Standard rescinded	180	Standard rescinded	If exceeded	Not applicable
Ozone	8 Hours	0.070	0.075	137	147	If exceeded	If exceeded by the mean of annual 4th highest daily values for a 3-year period
Carbon Monoxide	1 Hour	20	35	23,000	40,000	If exceeded	If exceeded on more than 1 day per year
Carbon Monoxide	8 Hours	9.0	9	10,000	10,000	If exceeded	If exceeded on more than 1 day per year
Carbon Monoxide	8 Hours (Lake Tahoe Basin only)	6.0	9	7,000	10,000	If equalled or exceeded	If exceeded on more than 1 day per year
Nitrogen Dioxide	Annual Average	0.030	0.053	57	100	If exceeded	If exceeded
Nitrogen Dioxide	1 Hour	0.18	0.100	339	188	If exceeded	If exceeded by the mean of annual 98th percentile values over 3 years
Sulfur Dioxide	Annual Average	No standard	0.030	No standard	80	Not applicable	If exceeded

This letter is a duplicate to comment letter N-18729. Please see Comment N-18729 for response to the comment.

Comment ID: N-18869 (Page 2 of 10)

Response to Comment N-18869 (Page 2 of 10):

Sulfur Dioxide	24 Hours	0.04	0.14	105	365	If exceeded	If exceeded on more than 1 day per year
Sulfur Dioxide	3 Hours	No standard	0.5	No standard	1,300	Not applicable	If exceeded on more than 1 day per year
Sulfur Dioxide	1 Hour	0.25	No standard	655	Not applicable	If exceeded	Not applicable
Inhalable Particulate Matter (PM10)	Annual Arithmetic Mean	Not applicable	Not applicable	20	Standard rescinded	If exceeded	Not applicable
Inhalable Particulate Matter (PM10)	24 Hours	Not applicable	Not applicable	50	150	If exceeded	For 1997 non-attainment areas, if exceeded on more than 1 day per year. For other areas, if exceeded by the mean of annual 99th percentile values over 3 years
Particulate Matter (PM2.5)	Annual Arithmetic Mean	Not applicable	Not applicable	12	15.0	If exceeded	If exceeded as a 3-year spatial average of data from designated stations
Fine Particulate Matter (PM2.5)	24 Hours	Not applicable	Not applicable	No standard	35	Not applicable	If exceeded by the mean of annual 98th percentile values over 3 years
Lead Particles (TSP sampler)	Calendar Quarter	Not applicable	Not applicable	No standard	1.5	Not applicable	If exceeded
Lead Particles (TSP sampler)	Rolling 3-Month Average	Not applicable	Not applicable	No standard	0.15	Not applicable	If exceeded during a 3-year period
Lead Particles (TSP sampler)	30 Days	Not applicable	Not applicable	1.5	No standard	If exceeded	Not applicable
Sulfate Particles (TSP sampler)	24 Hours	Not applicable	Not applicable	25	No standard	If equalled or exceeded	Not applicable
Hydrogen Sulfide	1 Hour	0.03	No standard	42	No standard	If exceeded	Not applicable
Vinyl Chloride	24 Hours	0.01	No standard	26	No standard	If equalled or exceeded	Not applicable

Notes:

All standards except the national PM10 and PM2.5 standards are based on measurements corrected to 25 degrees C and 1 atmosphere pressure.

The national PM10 and PM2.5 standards are based on direct flow volume data without correction to standard temperature and pressure.

### Comment ID: N-18869 (Page 3 of 10)

### Response to Comment N-18869 (Page 3 of 10):

Decimal places shown for standard reflect the rounding or truncating conventions used for evaluating compliance.

The "10" in PM10 and the "2.5" in PM2.5 are not particle size limits; these numbers identify the particle size class (aerodynamic diameter in microns) collected with 50% mass efficiency by certified sampling equipment. The maximum particle size collected by PM10 samplers is about 50 microns. The maximum particle size collected by PM2.5 samplers is about 6 microns.

Data Sources: 40 CFR Parts 50, 53, and 58; CARB (2010a); EPA (2010b).

In California, air quality regulation is a joint responsibility between CARB and local air quality management agencies. Local agencies are either a single county or a multi-county agency, typically called an Air Pollution Control District (APCD) or an Air Quality Management District (AQMD). APCDs and AQMDs have primary responsibility for most air quality regulatory programs, with CARB retaining oversight responsibilities. CARB directly implements statewide regulatory programs for motor vehicles, portable equipment, and hazardous air pollutants. The project area is under the jurisdiction of the Mojave Desert Air Quality Management District (MDAQMD).

**You must identify if the MDAQMD has adopted other regulations that affect facility construction and operation.** Training activities would be subject to fugitive dust control requirements that prohibit creation of dust plumes that are visible beyond the property line of the emission source, and requires all "active operations" (construction/demolition activities, earthmoving activities, heavy or light duty vehicle movements, or creation of disturbed surface areas) to implement applicable best available control measures as defined by MDAQMD. You must summarize all best available dust control measures outlined in MDAQMD rules as general dust control measures. Enhanced dust control requirements would apply since the training is considered large operations. A large operation could be any active operations on property which contains 50 or more acres of disturbed surface area, or any earthmoving operation with a daily throughput volume of 5,000 cubic yards or more three or more times during the most recent 365-day period.

**You have not fully addressed Clean Air Act conformity.** Section 176(c) of the CAA requires federal agencies to ensure that actions undertaken in nonattainment or maintenance areas are consistent with the CAA and with federally enforceable air quality management plans. EPA has promulgated separate rules that establish conformity analysis procedures for highway/mass-transit projects (40 CFR Part 93, Subpart A) and for other (general) federal agency actions (40 CFR Part 93, Subpart B). General conformity requirements are potentially applicable to many federal agency actions, but apply only to those aspects of an action that involve on-going federal agency responsibility and control over direct or indirect sources of air pollutant emissions.

The EPA conformity rule establishes a process that is intended to demonstrate that the proposed federal action:

- Would not cause or contribute to new violations of federal air quality standards;
- Would not increase the frequency or severity of existing violations of federal air quality standards; and
- Would not delay the timely attainment of federal air quality standards.

The EPA general conformity rule applies to federal actions occurring in nonattainment or maintenance areas when the total direct and indirect emissions of nonattainment pollutants (or their precursors) exceed specified thresholds. The emission thresholds that trigger requirements of the conformity rule are called de minimis levels. Emissions associated with stationary sources that are subject to permit programs incorporated into the SIP are not counted against the de minimis threshold.

In the DEIS, compliance with the conformity rule can be demonstrated in several ways. Compliance is presumed if the net increase in direct and indirect emissions from a federal action would be less than the relevant de minimis level. If net emissions increases exceed the relevant de minimis value, a formal conformity determination process must be followed. Federal agency actions subject to the general conformity rule cannot proceed until there is a demonstration of consistency with the SIP. **Your DEIS is currently inadequate in this regard.**

#### **NOISE**

**Your EIS has not adequately addressed:**

Noise Descriptors  
Decibel Scales  
Decibel Values  
Applicability with Plans, Policies and Regulations  
Federal Criteria and Standards

State Criteria and Standards  
Local Criteria and Standards (specifically San Bernardino County)  
Vibration

Noise is defined as unwanted or extraneous sound. Sound is caused by vibrations that generate waves of minute air pressure fluctuations. Air pressure fluctuations that occur from 20 to 20,000 times per second can be detected as audible sound. The number of pressure fluctuations per second is normally reported as cycles per second or Hertz (Hz). Different vibration frequencies produce different tonal qualities for the resulting sound. In general, sound waves travel away from the noise source as an expanding spherical surface. The energy contained in a sound wave is consequently spread over an increasing area as it travels away from the source. This results in a decrease in loudness at greater distances from the noise source.

*Decibel Scales*

Human hearing varies in sensitivity for different sound frequencies. The ear is most sensitive to sound frequencies between 800 and 8,000 Hz, less sensitive to higher and lower sound frequencies, and least sensitive to sound frequencies below 250 Hz. Peak sensitivity to pure tones typically occurs at frequencies between 2,000 Hz and 6,000 Hz. Relative sensitivity remains fairly high between about 250 Hz and 2,000 Hz. Relative sensitivity drops off slightly above 7,000 Hz, and drops off significantly below 200 Hz. In addition, relative sensitivity to different acoustic frequencies also varies with the intensity of the sound. Several different frequency weighting schemes have been developed, using different decibel (dB) adjustment values for each octave or 1/3 octave interval. Some of these weighting schemes are intended to approximate the way the human ear responds to noise levels; others are designed to account for the response of building materials to airborne vibrations and sound. The most commonly used decibel weighting schemes are the A-weighted and C-weighted scales.

The "A-weighted" decibel scale (dBA) is normally used to approximate human hearing response to sound. The A-weighted scale significantly reduces the measured pressure level for low frequency sounds while slightly increasing the measured pressure level for some middle frequency sounds. The "C-weighted" decibel scale (dBC) is often used to characterize low frequency sounds capable of inducing vibrations in buildings or other structures. The C-weighted scale makes only minor reductions to the measured pressure level for low frequency components of a sound while making slightly greater reductions to high frequency components than does the A-weighted scale.

*Common Noise Descriptors*

Varying noise levels are often described in terms of the equivalent constant decibel level. Equivalent noise levels (Leq) are used to develop single-value descriptions of average noise exposure over various periods. Such average noise exposure ratings often include additional weighting factors for annoyance potential due to time of day or other considerations. The Leq data used for these average noise exposure descriptors are generally based on A-weighted sound level measurements, although other weighting systems are used for special conditions (such as blasting noise).

Average noise exposure over a 24-hour period is often presented as a day-night average sound level (Ldn) or a community noise equivalent level (CNEL). Ldn values are calculated from hourly Leq values, with the Leq values for the nighttime period (10:00 PM to 7:00 AM) increased by 10 dB to reflect the greater disturbance potential from nighttime noises. CNEL values are very similar to Ldn values, but include a 5 dB annoyance adjustment for evening (7:00 PM to 10:00 PM) Leq values in addition to the 10 dB adjustment for nighttime Leq values. Except in unusual situations, the CNEL descriptor will be within 1.5 dB of the Ldn descriptor for the same set of noise measurements. Unless specifically noted otherwise, Ldn and CNEL values are assumed to be based on dBA measurements.

*Working with Decibel Values*

The nature of dB scales is such that individual dB ratings for different noise sources cannot be added directly to give the dB rating of the combination of these sources. Two noise sources producing equal dB ratings at a given location will produce a composite noise level 3 dB greater than either sound alone. When two noise sources differ by 10 dB, the composite noise level will be only 0.4 dB greater than the louder source alone. Most people have difficulty distinguishing the louder of two noise sources that differ by less than 1.5 to 2 dB. In general, a 10 dB increase in noise level is perceived as a doubling in loudness. A 2 dB increase represents a 15 percent increase in loudness, a 3 dB increase is a 23 percent increase in loudness, and a 5 dB increase is a 41 percent increase in loudness.

### Comment ID: N-18869 (Page 5 of 10)

### Response to Comment N-18869 (Page 5 of 10):

When distance is the only factor considered, sound levels from an isolated noise source will typically decrease by about 6 dB for every doubling of distance away from the noise source. When the noise source is essentially a continuous line (e.g., vehicle traffic on a highway), noise levels decrease by about 3 dB for every doubling of distance.

#### *Applicable Plans, Policies, and Regulations*

Various federal, state, and local agencies have developed guidelines for evaluating land use compatibility under different noise level ranges. The federal Noise Control Act of 1972 (Public Law 92-574) established a requirement that all federal agencies must administer their programs in a manner that promotes an environment free from noise that jeopardizes public health or welfare. The US Environmental Protection Agency (EPA) was given the responsibility for: providing information to the public regarding identifiable effects of noise on public health or welfare, publishing information on the levels of environmental noise that will protect the public health and welfare with an adequate margin of safety, coordinating federal research and activities related to noise control, and establishing federal noise emission standards for selected products distributed in interstate commerce. The federal Noise Control Act also directed all federal agencies to comply with applicable federal, state, interstate, and local noise control regulations to the same extent that any person is subject to such requirements.

Although EPA was given major public information and federal agency coordination roles, each federal agency retains authority to adopt noise regulations pertaining to agency programs. EPA can require other federal agencies to justify their noise regulations in terms of the federal Noise Control Act policy requirements, but has no authority to approve or disapprove the noise regulations and policies of other federal agencies. The Occupational Safety and Health Administration has primary authority for setting workplace noise exposure standards. Due to aviation safety considerations, the Federal Aviation Administration has primary jurisdiction over aircraft noise standards.

#### *Federal Criteria and Standards*

In response to the requirements of the federal Noise Control Act, EPA (1974) has identified indoor and outdoor noise limits to protect public health and welfare (hearing damage, sleep disturbance, and communication disruption). Outdoor Ldn values of 55 dB and indoor Ldn values of 45 dB are identified as desirable to protect against speech interference and sleep disturbance for residential, educational, and health care areas. Noise level criteria to protect against hearing damage in commercial and industrial areas are identified as 24-hour Leq values of 70 dB (both outdoors and indoors).

In 1980 the Federal Interagency Committee on Urban Noise (FICUN) developed guidelines to evaluate whether existing and proposed land uses are compatible with prevailing noise levels. The primary federal agencies participating in the FICUN report included EPA, the Department of Defense, the Department of Housing and Urban Development (HUD), the Department of Transportation, and the Veterans Administration. The FICUN guidelines address land use compatibility and recommend building design considerations according to three noise level categories:

Zone 1 = Ldn or CNEL levels below 65 dB;  
Zone 2 = Ldn or CNEL levels of 65 to 75 dB; and  
Zone 3 = Ldn or CNEL levels above 75 dB.

The FICUN guidelines indicate that all land uses are compatible with Zone 1 noise levels. Educational and residential land uses generally are not compatible with Zone 2 noise levels unless special acoustic treatments and designs are used to ensure acceptable interior noise levels. Residential and educational land uses are not compatible with Zone 3 noise levels. Industrial and manufacturing land uses may be acceptable in Zone 3 areas if special building designs and other measures are implemented.

The Federal Highway Administration (FHWA) has adopted criteria for evaluating noise impacts associated with federally funded highway projects and for determining whether these impacts are sufficient to justify funding noise mitigation actions (47 FR 131:29653-29656). FHWA noise abatement criteria are based on peak hour Leq noise levels, not Ldn or 24-hour Leq values. The peak 1-hour Leq criteria for residential, educational, and health care facilities are 67 dB outdoors and 52 dB indoors. The peak 1-hour Leq criterion for commercial and industrial areas is 72 dB (outdoors).

The relationship between peak hour Leq values and associated Ldn values depends on the distribution of traffic over the entire day. There is no precise way to convert a peak hour Leq value to an Ldn value. In urban areas with heavy traffic, the peak hour Leq value is typically 2 to 4 dB lower than the daily Ldn value. In less heavily developed areas, the peak hour Leq is often equal to the daily Ldn value. For rural areas with little nighttime traffic, the peak hour Leq value will often be 3 to 4 dB greater than the daily Ldn value.

**Comment ID: N-18869 (Page 6 of 10)**

**Response to Comment N-18869 (Page 6 of 10):**

HUD has established guidelines for evaluating noise impacts on residential projects seeking financial support under various grant programs (44 FR 135:40860-40866). Sites are generally considered acceptable for residential use if they are exposed to outdoor Ldn values of 65 dB or less. Sites are considered "normally unacceptable" if they are exposed to outdoor Ldn values of 65 to 75 dB. Sites are considered unacceptable if they are exposed to outdoor Ldn values above 75 dB.

*State Criteria and Standards*

The California Governor's Office of Planning and Research (2003) has published guidelines for the noise element of local general plans. These guidelines include a noise level/land use compatibility chart that categorizes outdoor CNEL/Ldn levels into as many as four compatibility categories (normally acceptable, conditionally acceptable, normally unacceptable, and clearly unacceptable), depending on land use. For many land uses, the chart shows overlapping CNEL/Ldn ranges for two or more compatibility categories.

The noise element guidelines chart identifies the normally acceptable range for low density residential uses as CNEL/Ldn values less than 60 dB, while the conditionally acceptable range is 55 to 70 dB. The normally acceptable range for high density residential uses is identified as CNEL/Ldn values below 65 dB, while the conditionally acceptable range is identified as 60 to 70 dB. For educational and medical facilities, CNEL/Ldn values below 70 dB are considered normally acceptable, while values of 60 to 70 dB are considered conditionally acceptable. For office and commercial land uses, CNEL/Ldn values below 70 dB are considered normally acceptable, while values of 67.5 to 77.5 dB are categorized as conditionally acceptable. The overlapping CNEL/Ldn ranges are intended to indicate that local conditions (existing noise levels and community attitudes toward dominant noise sources) should be considered in evaluating land use compatibility at specific locations.

*Local Criteria and Standards*

Cities and counties in California are required to adopt a noise element as part of their general plans. Many cities and counties have incorporated the California Department of Health Services land use compatibility guidelines as a key item in the general plan noise element, while other cities and counties have developed their own land use compatibility guidelines. In addition to local general plan noise elements, some cities and counties have adopted noise ordinances to legally define noise nuisances. Local noise ordinances vary considerably in their format and coverage. Many noise ordinances establish property line performance standards for different land use or zoning categories. There is considerable variation among communities as to the types of noise sources covered under local noise ordinances.

**The DEIS must say if there is a noise element of the San Bernardino County General Plan that identifies noise-sensitive land uses for: ?**

Residential uses,  
Schools,  
Hospitals,  
Rest homes,  
Long-term care facilities,  
Mental care facilities,  
Libraries,  
Places of worship, and  
Passive recreation uses.

**Your EIS must identify if San Bernardino County has adopted land use compatibility criteria as part of the noise element of the County Land Use Plan.**

In Riverside County, for example, the noise element of the County General Plan includes numerous policies intended to minimize noise-related conflicts between adjacent types of land uses. These policies include the following:

- Discourage noise-sensitive land uses from being located in areas exposed to CNEL levels above 65 dBA;
- Guide noise-tolerant land uses into areas committed to land uses that are noise-producing, such as transportation corridors or areas adjacent to airports;

Comment ID: N-18869 (Page 7 of 10)

Response to Comment N-18869 (Page 7 of 10):

- Discourage projects that cannot successfully mitigate excessive noise;
- Require commercial or industrial truck delivery hours to be limited when next to noise-sensitive land uses unless there is no feasible alternative or there are overriding transportation benefits;
- New land use development within Airport Influence Areas should comply with airport land use noise compatibility criteria contained in the applicable airport land use compatibility plan;
- Require development that generates increased traffic and subsequent increases in ambient noise level adjacent to noise-sensitive land uses to provide for appropriate mitigation measures;
- Ensure that construction activities are regulated to establish hours of operation in order to prevent or mitigate the generation of excessive or adverse noise impacts on surrounding areas;
- Require that all construction equipment utilize noise reduction features (such as mufflers and engine shrouds) that are no less effective than those originally installed by the manufacturer; and
- Consider the issue of adjacent residential land uses when designing and configuring all new non-residential development. Design and configure on-site ingress and egress points to divert traffic away from nearby noise-sensitive land uses to the greatest degree practicable.

The DEIS must also identify if the noise element of the San Bernardino County General Plan also identifies preferred noise standards for stationary noise sources that affect residential land uses.

Again as an example, Riverside County has adopted a noise ordinance (Ordinance 847) to regulate noise sources on one property that may impact adjacent properties. The noise ordinance sets general noise standards according to the land use designation of the affected property. Table 3.10-4 summarizes the basic noise standards in Riverside County Ordinance 847. The Riverside County noise ordinance also includes special provisions related to sound amplification systems, live music, audio equipment, and power tools. The noise ordinance also provides for exceptions from the general and special noise standard provisions.

**Vibration**

The DEIS does not adequately analyze the impacts of vibration.

Ground-borne vibrations can be a source of annoyance to people or a source of structural damage to some types of buildings. Although vibration measurements can be presented in many different forms, peak particle velocity (PPV) is the unit of measure used most often to assess building damage potential. The California Department of Transportation (Caltrans) has identified vibration impact criteria for both building damage potential and human annoyance (Caltrans 2002, 2004). These references are listed below. Both human annoyance effects and building damage effects depend in part on whether vibration events are isolated, discrete events or a relatively continuous episode of vibrations. In general, there is less sensitivity to single, discrete events than to continuous events or frequently repeated discrete events.

You must utilize the following references for adequate analysis:

Caltrans (California Department of Transportation). 2002. Transportation Related Earthborne Vibrations. Technical Advisory TAV-02-01-R9601. Sacramento, CA. Internet Web site: <http://www.dot.ca.gov/hq/evn/noise/publications.htm>. Accessed on March 04, 2008.

Caltrans (California Department of Transportation). 2004. Transportation- and Construction-Induced Ground Vibration Guidance Manual. Prepared by Jorles & Stokes. Sacramento, CA. Internet Web site: <http://www.dot.ca.gov/hq/evn/noise>. Accessed on March 04, 2008.

The EIS must summarize Caltrans criteria for assessing the effects of ground-borne vibration. Type of criteria can be either human response OR building damage. Threshold conditions pertain to the perceptibility for human response, or it can involve varying levels of cosmetic damage for building damage. The DEIS must analyze the peak particle velocity in inches/second to determine if vibration thresholds will be exceeded, especially as a result of transient and/or continuous/frequent sources in all areas and airspace proposed for possible acquisition by the U.S. Marine Corps.

Comment ID: N-18869 (Page 8 of 10)

Response to Comment N-18869 (Page 8 of 10):

The DEIS must also include consideration of ground-borne vibrations. The following land uses are typically identified by the noise element in a County land use plan as being vibration sensitive:

- Hospitals,
- Residential areas,
- Concert halls,
- Libraries,
- Sensitive research operations,
- Schools, and
- Offices.

The DEIS must consider noise and vibration mitigation to vibration include the following:

- Restrict the placement of sensitive land uses in proximity to vibration-producing land uses, and
- Prohibit the exposure of residential dwellings to ground vibration from passing trains that would be perceptible on the ground or second floors (vibrations are presumed to be perceptible if they exceed a peak particle velocity of 0.01 inch per second over a range of 1 to 100 Hz).

GEOLOGY AND EARTHQUAKE HAZARD

The DEIS is not adequate in its recognition and analysis of compliance with the following application State of California laws:

*Alquist-Priolo Earthquake Fault Zoning Act*

The Alquist-Priolo Earthquake Fault Zoning Act of 1972 regulates development and construction of buildings intended for human occupancy to avoid the hazard of surface fault rupture. This act provides mitigation against surface fault rupture of known active faults beneath occupied structures, and requires disclosure of the presence of any seismic faults to potential real estate buyers and a 50-foot setback for new occupied buildings. The Alquist-Priolo Earthquake Fault Zoning Act helps define where fault rupture is most likely to occur. This act groups faults into categories of active, potentially active, and inactive. This information must be disclosed in the EIS.

*Seismic Hazards Mapping Act*

The Seismic Hazards Mapping Act of 1990 directs the California Geological Survey to delineate seismic hazard zones. The purpose of this act is to reduce the threat to public health and safety, and to minimize the loss of life and property by identifying and mitigating seismic hazards. These seismic hazards include areas that are subject to the effects of strong ground shaking such as liquefaction, landslides, tsunamis and seiches. Cities, counties, and state agencies are directed to use seismic hazard zone maps developed by the California Geological Survey in their land use planning and permitting processes. This act requires that site-specific geotechnical investigations. Those must be undertaken before any land acquisition can proceed. This information must be disclosed in the EIS.

PALEONTOLOGICAL RESOURCES

Paleontological resources constitute a fragile and nonrenewable scientific record of the history of life on earth. The BLM policy is to manage paleontological resources for scientific, educational, and recreational values and to protect these resources from adverse impacts. To accomplish this goal, the USMC and your cooperating agency (BLM) must ensure that proposed land uses that it initiates or authorizes do not inadvertently damage or destroy important paleontological resources on public lands.

To ensure the protection of paleontological resources, the USMC considers paleontological data as early as possible in the decision-making process for any project. As part of this ongoing consideration, the USMC and BLM must collate existing information on paleontological resources and uses this information to classify the geologic formations present for their potential to contain vertebrate fossils or invertebrate or plant fossils that are scientifically important. The EIS must include this information.

Applicable Plans, Policies, and Regulations

The major laws protecting paleontological resources on federal lands include the Paleontological Resources Preservation Act (PRPA) which was signed into law as part of the Omnibus Public Lands Management Act (OPLA) of 2009. The PRPA requires the Secretary

Comment ID: N-18869 (Page 9 of 10)

Response to Comment N-18869 (Page 9 of 10):

of the Interior to manage and protect paleontological resources on federal land using scientific principles and expertise, and requires the USMC to develop appropriate plans for inventorying, monitoring, and the scientific and educational use of paleontological resources, in accordance with applicable agency laws, regulations, and policies. Where possible, these plans should emphasize interagency coordination and collaborative efforts with non-federal partners, the scientific community, and the general public.

Other major authorities protecting paleontological resources on federal lands are the Federal Land Policy and Management Act (FLPMA), NEPA, and various sections of regulations.

While paleontological resources are often discussed in parallel to or linked with historical and cultural resources in planning and environmental impact analyses, the identification and classification of paleontological resources is based on geologic units. BLM is a cooperater on your EIS. Therefore, you should use their system for analyzing impacts on paleontological resources. On October 15, 2007, the BLM formalized the use of a new classification system for identifying fossil potential on public lands with the release of instruction memorandum IM 2008-009. The Potential Fossil Yield Classification (PFYC) system is based on the potential for the occurrence of significant paleontological resources in a geologic unit, and the associated risk for impacts to the resource based on federal management actions. Occurrences of paleontological resources are closely tied to the geologic units (i.e., formations, members, or beds) that contain them.

Using the PFYC system, geologic units are classified (Class 1 – Very Low through Class 5 – Very High) based on the relative abundance of vertebrate fossils or scientifically significant invertebrate or plant fossils and their sensitivity to adverse impacts, with a higher class number indicating a higher potential. It is used to set management policies and not intended to be applied to specific paleontological localities or small areas within units.

While they are being updated to reflect the requirements of the PRPA and the PFYC system, the BLM Manual 8270 and BLM Handbook H-8270-1 contain the agency's guidance for managing paleontological resources on public land. The manual has more information on the authorities and regulations related to paleontological resources. The handbook gives procedures for permit issuance, requirements for qualified applicants, information on paleontology and planning, and a classification system for potential fossil-bearing geologic formations on public lands.

Your DEIS is currently not adequate in its analysis on paleontological resources.

**PUBLIC HEALTH, SAFETY, TRANSPORTATION AND ACCESS**

*Oil Pollution Prevention (40 CFR Part 112)*

The goal of the oil pollution prevention regulation in 40 Code of Federal Regulations (CFR) Part 112 is to prevent oil discharges from reaching navigable waters of the United States or adjoining shorelines. Facilities that could reasonably be expected to discharge oil into navigable waters in quantities that may be harmful are required to develop and implement Spill Prevention, Control and Countermeasures (SPCC) plans per the SPCC rule.

*Occupational Safety and Health Administration*

The Occupational Safety and Health Administration (OSHA) administers health standards that (1) provide regulations for safety in the workplace, (2) regulate construction safety, and (3) require a Hazards Communication Plan. The plan includes identification and inventory of all hazardous materials for which Material Safety Data Sheets (MSDS) would be maintained, and employee training in safe handling of said materials.

*Federal Aviation Administration Regulations (14 CFR 77)*

Title 14 CFR Section 77 contains standards for determining physical obstructions to navigable airspace. Form 7460-1, Notice of Proposed Construction or Alteration, must be filed with the Federal Aviation Administration (FAA) if an object to be constructed has the potential to affect navigable airspace according to these standards.

*Federal Transportation Regulations (49 CFR, Subtitle B)*

Title 49 CFR, Subtitle B, contains procedures and regulations pertaining to interstate and intrastate transport, including hazardous materials program procedures, and

*State of California*

Comment ID: N-18869 (Page 10 of 10)

Response to Comment N-18869 (Page 10 of 10):

*California Environmental Protection Agency*

The California Environmental Protection Agency (Cal EPA) unifies California's environmental authority, consolidating the California Air Resources Board (CARB), State Water Resources Control Board (SWRCB), Regional Water Quality Control Board (RWQCB), Integrated Waste Management Board (IWMB), the DTSC, Office of Environmental Health Hazard Assessment (OEHHA), and the Department of Pesticide Regulation (DPR) under one agency. The California Hazardous Waste Control Law is administered by Cal EPA's DTSC.

*Department of Toxic Substance Control*

The DTSC is the primary agency in California that regulates hazardous waste, administers clean-ups of existing contamination and looks for ways to reduce hazardous waste produced in California. The DTSC regulates hazardous waste in California primarily under the authority of RCRA and the California Health and Safety Code. The DTSC manages, maintains and monitors the Cortese list of hazardous waste sites. The Cortese list, or Hazardous Waste and Substances Sites List, is a planning resource used by the state, local agencies, and developers to comply with CEQA requirements in providing information about the location of hazardous materials release sites.

*California Emergency Management Agency*

The California Emergency Management Agency (Cal/EMA) was formed January 1, 2009 as a result of a merger between the Governor's Office of Emergency Services (OES) and the Office of Homeland Security. The Hazardous Materials Unit of the Cal/EMA is responsible for HAZMAT emergency planning and response, spill release notifications, and HAZMAT enforcement of the Unified Program. The OES provides emergency response services in support of local jurisdictions.

*California Public Utilities Commission*

You must state and analyze whether you would use the CPUC General Order 95 and 165, as related to fire-safe design and maintenance practices for transmission lines, to establish minimum requirements for the Project regarding inspection (including maximum allowable inspection cycle lengths), condition rating, scheduling and performance of corrective action, record keeping and reporting, in order to ensure a safe and high-quality electrical service.

*California Vehicle Code*

The California Vehicle Code contains regulations applicable to roadway damage; licensing, size, weight, and load of vehicles operated on highways; safe operation of vehicles; and the transportation of hazardous materials.

*San Bernardino County*

The DEIS has not adequately addressed all applicable plans, policies and regulation of the:

County of San Bernardino Department of Environmental Health

County of San Bernardino Fire Department

All Other Applicable San Bernardino County Departments

**OTHER COMMENTS**

Please include a glossary in the EIS.

Due to the volume and complexity of this project and EIS, please extend the comment period for an additional 90 days.

Please schedule formal public hearings on this proposal.

Sincerely,

  
James Blackwell

**Comment ID** 44

**Last Name** Holloway

**First Name** Jack

**Comment** The southern boundary of the proposed base is only 300-500 feet north from many of my families cabins that are occupied several times per year and my uncle's home at the northern most portion of Ranch Road, just west of Ranch Road. We have owned these cabins and homes for 55 years and would hope you would consider the safety implications of your proposed boundary so close to our homes/cabins. I would propose moving the boundary further north at least 1-2 miles from the northern most cabin off of Ranch Road. It appears to be a simple and miniscule adjustment that would make all happy and lessen the impact to those of us that frquent the cabins with our children and families. Thank you for the input. Jack Holloway

**Date Comment Received** 2/25/2011

**Response** Thank you for your comment. The EIS has considered impacts to adjacent land uses in the selection of boundary alignment. As indicated in Section 2.3.1, for an alternative to be feasible it needs to provide for at least 3,280 feet (1,000 meters) of buffer area between live-fire areas (including SDZs and WDZs) and any proposed or existing installation boundary in accordance with the established Combat Center safety policy (Combat Center Order P3500.4h)

**Comment** I have concern for the increased bombing effects on private water well systems. You didn't address any studies on this.

**Date Comment Received** 2/25/2011

**Response** Thank you for your comment. The potential for munitions constituents (MC) to affect the quality of surface and groundwaters are evaluated in Section 4.13 and determined to be less than significant. The Combat Center has a water quality monitoring plan (2009) that evaluated the risks to the wells and an on-going water quality monitoring program. The water quality monitoring program adequately addresses the protection of the water supply drinking wells and has determined there to be no impacts.

**Comment** My family uses the Johnson Valley OHV area. As you know, public land for OHV use is being reduced at an alarming rate. At the same time I understand the need to provide a suitable training facility for our troops. Perhaps there could be a compromise such as another nearby area for us to recreate. Thanks for your consideration.

**Date Comment Received** 2/26/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the trend in availability of OHV land. The EIS documents both in Sections 3.2, 4.2, and 5.2 of the EIS. The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. As discussed in Section 2.7 of the EIS, several alternative scenarios for implementation of the proposed action were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I completely disagree with the US Marines' land grab of the Johnson Valley OHV area. The OHV area has been the Marines target all along and the so called "goodwill boundry re-assessment" still encroaches on the original boundary, but according to the Marines propaganda, they're do-gooders for returning (part) of the lands??? Pleeze! Their arrogance suggests the land is already theirs and the shell game is an instult to all US citizens. Shame on you Marines. I respect your needs for additional training grounds, but you must respect the publics needs as well by putting forth a REASONABLE alternative. God bless the USA!

**Date Comment Received** 3/1/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, several alternative scenarios for implementation of the proposed action were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I cannot make out any of the maps or legends as they appear too small on the screen, so there is little information here that is accessible to me. I believe you plan to fly over residential areas. I strongly object to your making the peaceful town of 29 Palms and the idyllic Wonder Valley part of your training facility. Also, no public meeting in 29 Palms area, I noticed. BECAUSE???

**Date Comment Received** 3/1/2011

**Response** Thank you for your comment. Your Acrobat Reader program provides the capability to zoom in to make the text of the document larger on your screen. You may also need to adjust the resolution of your computer screen. If those actions do not solve the problem, printed copies of the

document are available for viewing at local libraries as indicated in the Federal Register Notice of Availability: <http://www.federalregister.gov/articles/2011/03/01/2011-4461/notice-of-public-meetings>. The proposed action alternatives do not involve any increase in flying over residential areas and the land areas to be acquired would not include the City of Twentynine Palms or the Wonder Valley area. A description of all 6 action alternatives is available in Chapter 2 of the DEIS. Three public meetings were scheduled during the Draft EIS review period (in Joshua Tree, Victorville, and Ontario). The Joshua Tree venue was selected as a central point for residents of the southern Morongo Basin between Yucca Valley and the City of Twentynine Palms.

<b>Comment</b>	Johnson Valley OHV area is irreplaceable and its loss would be devastating to many four wheeling families, off road businesses and the economy around Johnson Vally.
<b>Date Comment Received</b>	3/1/2011
<b>Response</b>	<p>Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.</p> <p>The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.</p>

**Comment** Comments Related to Johnson Valley Land Acquisition, To whom it may concern, Paragraph 2 of section 4.2.7.1 states the following: “With implementation of Alternative 6, approximately 146,667 acres (59,354 hectares) would be acquired within the west study area. Approximately 82,802 “usable” acres (33,509 hectares) or roughly 44% of the existing Johnson Valley OHV Area (189,470 acres [76,676 hectares]) would be available for public recreation at least 10 months per year (38,137 acres [15,434 hectares] available for 10 months per year and 44,665 acres [18,075 hectares] available year round) (see Table 4.2-1)”. The math here appears to be incorrect (189,470 minus 146,667 equals 42,803) not 44,665. As a result numbers used throughout this report should be adjusted accordingly. A restating of these figures would give a more complete picture of the impact of this acquisition. I suggest the following: 146,667 divided by 189,470 equals 0.77 or 77% acquired for military use. 38,137 divided by 189470 equals 0.20 or 20% available for restricted public access. 42,803 divided by 189470 equals 0.23 or 23% available for unrestricted public access. Twenty three percent (23%) of the current Johnson Valley OHV area would remain available for unrestricted public access or would operate under the current rules of access and use. Twenty percent (20%) of the current JV OHV area would be available 10 months per year for restricted public access with requirements for training, vehicle inspections, a permit process, and a log in procedure. Visitors would be expected to follow rules and regulations that have not yet been defined and could be prosecuted for failing to comply with these yet to be defined requirements. These entry requirements will probably limit the number of users to basically participants involved in organized competition. Most JV OHV users that I have encountered are day or recreational enthusiasts and will probably not choose to go through this entry requirement for a few hours of riding entertainment. In my judgment this acquisition will remove 77% of the current JV OHV area for a large percent of OHV enthusiasts. JV OHV offers the enthusiast the largest verity of off road terrain available in Southern California. The large verity of off road terrain at JV OHV is the feature that makes it the most desirable riding location in this area. I have ridden at JV OHV many times and it is the location that I have chosen to ride on nearly every off road outing. My judgment of the 23%, remaining for unrestricted public access, is that the verity of off road terrain contained in this section is greatly reduced. I will probably never consider using the 20% contained in the restricted public access area due to the hassle involved in obtaining entry permission. In conclusion this acquisition will remove JV

OHV as the most desirable riding area in Southern California. I for one will truly miss this world class OHV asset.

**Date Comment Received** 3/1/2011

**Response** Thank you for your comment. The values listed in Table 4.2-1 are correct and are approximate acreages. As noted in Note #1 under Table 4.2-1, “usable” acreage is defined as the total acreage for public recreation, with the exception of small non-connecting areas, which for the purposes of this analysis are not considered “usable” for public recreation. Also as noted in Note #6 under Table 4.2-1, total acquisition in the west study area would be 146,667 acres, 108,530 would be exclusive military use, and 38,137 acres would be available for 10 months per year. Acreage available for at least 10 months per year =  $38,137 + 44,665 = 82,802$ . Percent of Johnson Valley OHV Area available for Recreation =  $82,802 / 189,470$  Johnson Valley OHV acres = 44%. The 44,665 acre area of Johnson Valley includes the Cougar Buttes and Anderson Dry Lake areas which would not be acquired under Alternative 6, and would therefore be available for public recreation 12 months per year. Additional text has been added to Table 4.2-1 to further explain the calculations and approximate acreages of Johnson Valley available for recreation under each of the alternatives.

The Marine Corps understands the importance of Johnson Valley for recreation and the trend in availability of OHV land. The EIS documents both in Sections 3.2, 4.2, and 5.2 of the EIS. The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact.

**Comment** I am totally against the acquisition of the Johnson Valley OHV area whatever the environmental study. First of all is the impact this acquisition would have on the small communities close to the area. Closing the open riding area would drastically impact their economies, and homes. And the area east of the base offers the same kind of terrain without the same result. After watching how the Russian military had to return home from Afghanistan in defeat, the USA should realize that a ground war is not the way to go. I realize I am no military authority nor have charts and statistics to back up my opinion and I am sure the decision has already been made, but as a resident of the area I feel the acquisition is not in our best interests. Thank You Nancy Berg

**Date Comment Received** 3/3/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

<b>Comment</b>	<p>As a current military member, I can completely understand the necessity of having a place to train our Marines. As an avid off-roader, I also understand the need to keep what little public lands that are designated for off-road use...only for off-road use. In a time where we are constantly losing off-road areas to "wilderness acts" and other forms of land grabs by environmental groups, I feel that the government attempting to acquire what little we have left is completely un-acceptable. I am currently stationed on a shore command in Bremerton, WA with the US Navy. In the past 6 months I have made the drive down to the Johnson Valley OHV area 2 times and have another 2 trips planned in the next 6 months. It is close to a 2500 mile round trip drive each time. I have spent thousands of dollars on fuel, food, and other necessities to make those trips. While I know I am just one person, i would like to think that my contribution to the cities and towns (especially given the current economy) would not go un- noticed. I also know of people who travel, multiple times, from different parts of the country even further away than me. At the last King of the Hammers Race there were multiple teams from the east coast, some from canada, and even one team who shipped their vehicle from hawaii to compete. If the marines take over the proposed land, the race is all but done for. Think of the impact that will have on the small towns of Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow. Not to mention the economic impact on all the cities across the country where people were stopping to buy food/fuel/suplies. also, the impact of condensing the thousands of off-road enthusiasts into a smaller area must be thought about. every year environmental groups claim that we off-roaders do more damage than good, and while i disagree with their assesment, I feel that their fears will come true should the marines take the proposed land. while a majority of off-roaders are avid "tread lightly" fans, unfortunately when you put the same number of people into less than half the space their impact will more than likely double. so if the marines get their way, 3-5 years from now we as off-roaders will have to fight the environmental groups to keep what little the government left us.in conclusion, while I fully support the need for the military to find an area to adequately train it's soldiers I do NOT support the marines expanding the 29 palms base into the Johnson Valley OHV area. I do NOT support any "joint use" areas and believe that the marines should</p>

either expand the 29 palms base another direction or locate another suitable area.

**Date Comment Received** 3/4/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

The EIS also evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. As discussed in Section 2.7, the Marine Corps considered several alternatives for the proposed action. Several alternative scenarios were rejected (including conducting MEB-sized MAGTF Training at other Marine Corps bases in the U.S.) because they did not meet the purpose of and need for the proposed action or were inconsistent with the screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I wanted to make a comment about Johnson valley and what its going to mean to the surrounding towns. Johnsons valley is a meca for 4x4. Its unique terrain is noted by so many people around the world that wheel. I know events like KOH bring big revenue but there is people out there every weekend. Its a place that families spend their weekends and enjoy each other. On an average weekend I spend \$500+ on food, gas, ect. On a KOH week I spend 3x that. I'm one family that does this, only one but I know

there are a lot that do this more than I do. Please think of what you're taking from an area that doesn't have that much to offer. Thank you

**Date Comment Received** 3/4/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). **Comment** After working 28 years for the USMC in a senior management position I have first hand knowledge on how the Marine Corps approach a land request. My years of experience with BRAC and base relocation has taught me that the Marine Corps always ask for more than they need! The Marine Corps has learned whether it's budget, land, people, equipment or facilities you ask for more than you need! Then adjust to the smaller amount that they receive! Sadly the Marine Corps is using this approach with Land Acquisition Alternative Six. Sharing this land with public will not work. Once you use the land for a bombing range the Marine Corps will not let the public re-use the land due to "safety reasons". Unexploded Ordinance will prevent civilians for entering the areas! Clearing ranges of unexploded ordinance is an ongoing problem for the Marine Corps on all of their ranges. Funding, equipment & personnel shortages delay range clean up! This has been an issue for Marine Corps Air Ground Combat Center Twentynine Palms on their other ranges. As a homeowner in Johnson Valley I am against the Marine Corps taking way the largest offroad riding area in Calif. (Johnson Valley OHV). The effect on the local communities will be devastating; the fragile small businesses will not survive with the loss of Johnson Valley OHV. In my opinion illegal offroad riding will increase on private property in this area. The Marine Corps needs to consider one of the other Alternatives!

**Date Comment Received** 3/4/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access

to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding (refer to Section 4.2). The proposed action includes implementation of several special conservation measures (refer to Section 4.2.2.1) designed to reduce these potentially significant impacts to a less than significant level.

As an avid off-roader and frequent user of the Johnson Valley area, in a time where we are constantly losing off-road areas to "wilderness acts" and other forms of land grabs by environmental groups, I feel that the government attempting to acquire what little we have left is completely unacceptable. This area is the Holy Grail for rockcrawling. At the last King of the Hammers Race there were multiple teams from all parts of the US, some from Canada, and even one team who shipped their vehicle from Hawaii to compete. If the marines take over the proposed land, the race is all but done for. Think of the impact that will have on the small towns of Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow. Not to mention the economic impact on all the cities across the country where people were stopping to buy food/fuel/supplies. Also, the impact of condensing the thousands of off-road enthusiasts into a smaller area must be thought about. every year environmental groups claim that we off-roaders do more damage than good, and while i disagree with their assesment, I feel that their fears will come true should the marines take the proposed land. while a majority of off-roaders are avid "tread lightly" fans,

unfortunately when you put the same number of people into less than half the space their impact will more than likely double. so if the marines get their way, 3-5 years from now we as off-roaders will have to fight the environmental groups to keep what little the government left us. In conclusion, while I fully support the need for the military to find an area to adequately train it's soldiers I do NOT support the marines expanding the 29 palms base into the Johnson Valley OHV area. I do NOT support any "joint use" areas and believe that the marines should either expand the 29 palms base another direction or locate another suitable area.

**Date Comment Received** 3/5/2011

**Response**

Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS, Impacts on recreation.

The EIS also evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. As discussed in Section 2.7, the Marine Corps considered several alternatives for the proposed action. Several alternative scenarios were rejected (including conducting MEB-sized MAGTF Training at other Marine Corps bases in the U.S.) because they did not meet the purpose of and need for the proposed action or were inconsistent with the screening criteria for identifying suitable lands for acquisition. In addition to the purpose and need for the proposed action, the Marine Corps considered fiscal, training, and environmental constraints associated with all of the suggestions from the public.

**Comment** Please address how the base realigned boundaries will be marked and fenced where private property is next to new base property. How will buffer zones be developed between active training areas and nearby off base private property?

**Date Comment Received** 3/6/2011

**Response** Thank you for your comment. The Marine Corps has developed a variety of proposed measures to identify the boundary, including signage and public information and outreach campaigns. EIS Section 2.5.3 states "Significant and durable signage would be placed at all known and likely access points to the RPAA (as well as the exclusive military use area for Alternative 6) to ensure the public would be informed that the area they are entering is a military training area and that there are restrictions on public use. Signs would also be staggered across the boundary lines at an acceptable interval to make it difficult for anyone to actually enter the RPAA (and especially the exclusive military use area in the case of Alternative 6) without having seen a sign. For all action alternatives, a minimum of a 1,000 foot buffer between the property boundary and any training activities would be maintained as is currently done with the existing installation boundary."

**Comment** I served my country, while in the Navy, during Vietnam and now you want to STEAL my land. Johnson Valley belongs to US the American public. What are you going to come after next? I just came back from a gathering for Offroaders in the desert called Tierra Del Sol. We honored the men and women, in service to this country, with a special raffle drawing. I think you will find no more country loving military backing bunch of folks than the offroading community. Thanks for nothing.

**Date Comment Received** 3/6/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that

acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** While I fully support our USMC and would like for them to acheive proper training, I wish to ask that the Johnson Valley area be left alone for the off road community. More and more areas of the U.S. public lands are being closed leaving us less and less area to enjoy our recreation. There are hundreds of thousands of acres of open desert land within, CA, NV, AZ, UT and TX. Please condsier those areas. I would also suggest using desert land near the Mexico border, this would also help to keep the Mexican drug

cartels out of our land and from killing our people and will let us have our land back. Thank you for your consideration. Sincerely, Matthew D. Fellows

**Date Comment Received** 3/7/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** I do not support the expansion of 29 palms by overtaking the public lands known as Johnson Valley, or labeling it a joint use area. I travel to Johnson Valley twice a year to recreate on trails and natural obstacles which are not open to the public anywhere else. Too many public lands are not accessible because they're scooped up into wilderness acts or shut down completely for the benefit of the environment. Keep our public lands accessible to the public.

**Date Comment Received** 3/7/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2

of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

**Comment** I appreciate the opportunity to comment on the proposal to expand the 29 Palms area into the current Johnson Valley OHV area. Although I understand the need to properly train our Military I do not support the proposal to use the proposed area for this purpose. I travel from Idaho to visit Johnson Valley. It is a unique area not rivaled anywhere I have traveled for OHV recreation. My last trip there was February of 2011 and I was amazed at how well the area has been taken care of. I see a very sustainable future for this area with OHV use! I do not support any mixed use alternatives either. I would like to see the Marines go a different direction or find an alternate location all together. I urge you to allow the public the use of this area.

**Date Comment Received** 3/7/2011

**Response** Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

I LIVE IN DERSERT HEIGHTS, JUST SOUTH, WHERE YOUR PLANES, HEILCHPPERS, ARE. SINCE, THE BOMBING STARTED, ALONG WITH THE PLANES, AND HELICHOPPERS FLYING OVER MY PROPERTY, ESPICALLY THE BOMBING MY HOUSE AS INDURE CRACKS IN MY WALLS ALL

OVER MY HOUSE, WHICH IN MY OPION, HAS LOWERED MY PROPERTY'S VALUE..SOMETIMES I WONDER IF MY PLACE AND I WILL END UP BEING PART OF OOPS BOMBING...IT IS SCARY AT TIMES. I WAS WONDERING WHY YOU HAVEN'T OFFER BUYING THE LAND FROM LEAR AVE., AND POLELINE, TO MORONGO RD

**Date Comment Received** 3/8/2011

**Response** Thank you for your comment. The EIS acknowledges potential impacts to property values due to increased noise and proximity to military operating areas (see Section 4.3 of the EIS). The Department of Navy acquires the minimum land necessary to meet its mission requirement, and to minimize impacts on local tax bases. As discussed in Section 2.2, the Marine Corps is proposing to acquire the minimum lands necessary to conduct large-scale MEB exercises involving three battalion task forces . The land that you suggest be purchased would not benefit a large scale MEB exercise as described in Section 2 of the DEIS. Moreover, much of that land is privately owned and the Marine Corps is trying to minimize the amount of private property that it acquires.

**Comment** I am not a local to the Johnson Valley area. I have been there 3 times, all for the King of the Hammers race. On each trip I have made it a point to do all my shopping as close to Johnson Valley as I can, spending over a \$1000 on each trip. I am one of 10,000+ people who were at the king of the hammers events over the last 3 years. If Johnson valley goes away so will King of the Hammers, so will hundreds of thousands of dollars being spent, all taxable, all responsible, all for the love of the outdoors and freedoms our forefathers left other countries to pursue here.

**Date Comment Received** 3/9/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the local economy in the Johnson Valley area. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** Coming from a military family, I understand the Marine's need to to train and to have an area large enough to do so. However, Johnson Valley OHV is one of the few places left in the country where off roaders can truly get out and wheel or ride, and considering that the off road community has been losing land yearly due to government and environmentalist land grabs, it just hurts to see that the Marines wish to do so as well. I've travelled twice now from CO to CA for the specific purpose of going to Johnson Valley to camp and off road, and I already have another trip planned for next year for the King of the Hammers race in February. I know of so many people that absolutely love this area, and the race itself has become a HUGE deal in the past couple years. It is now the top race to be in in the rock racing world, with this year's race drawing over 15000 people from around the globe. I personally know of many people from the east coast, Alaska, even Australia who made the trip to Johnson Valley for the King of the Hammers this year. Also, the impact of condensing the thousands of off- road enthusiasts into a smaller area must be thought about. Every year environmental groups claim that we off-roaders do more damage than good, and while i disagree with their assessment, I feel that their fears will come true should the marines take the proposed land. While a majority of off-roaders are avid "tread lightly" fans, unfortunately when you put the same number of people into less than half the space their impact will more than likely double. So if the marines get their way, we as off roaders will have to fight the environmental groups to keep what little the government left us. **Comment** The concept of sharing land for recreational and military use is done in Michigan, and allows for more recreational opportunities while maintaining required training grounds. I believe it is a good compromise between user groups, especially with the continuous closing of recreational areas without new alternatives being provided. I have reviewed the EIS Plan 6 and I was hopeful that a good balance had been worked out, until I saw an overlay of the land that would remain open part time. Although some of the recreational area would remain open part-time, a large chunk of the land would be gated off from recreational use. Based on this, I would like to voice my opposition to this plan without revisions to allow more of the area to be open part time. If this is not possible, then an alternate area should be opened to allow public use.

**Date Comment Received** 3/9/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact

to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** I would like to keep this short and simple. Public use of public land is becoming more and more rare. Johnson Valley has been the home of King of the Hammers race since 2007 and has entertained the off highway vehicle community since its first discovery. The expansion of 29 Palms will close a large part of the greatest OHV land in America. I moved to the west coast for just this reason. The east coast has been littered with trail/land closings since I was able to par take in this OHV community. Please keep the land open for OHV use. My friends and family enjoy this land at least twice a year.

**Comment** To whom it may concern: I am a patriotic American and an off-road vehicle enthusiast. I support the need for America's fighting men and women to have realistic training areas. However, I DO NOT support the acquisition of the Johnson Valley OHV area for our Marines to train. Multiple-use recreation has been constantly attacked by environmental groups, and we have been forced into ever smaller and smaller areas. Johnson Valley OHV area is THE premier OHV area in the entire country. Its closure to off-road use is unacceptable. The military has the ability to take nearly any area necessary for training 'please select another area. I travel to the Johnson Valley OHV area annually, and spend thousands of dollars of my hard-earned money each trip. When several tens of thousands of people visit the area each year for rockcrawling, mining, desert racing, motorcycle racing, and camping in the desert with their families, the impact of our use is beneficial to every community along the way when we stop to stock up on food, fuel, snacks, parts, etc. The economic impact of this closure to the nearby California communities Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow will be terrible. Finally, just as has happened when environmentalists have closed our trails, responsible off- road enthusiasts are forced onto ever smaller areas, and even though we go to great lengths to Tread Lightly and minimize our impact on the environment, our impact is cumulative. The vast majority of us are patriotic supporters of our armed forces' please do not take so much from some of your biggest advocates. I am in full support of a realistic training area for the Marines. I am in full opposition of using THIS area to train Marines. This is far from a “not in my backyard plea”. Please do come to Montana to train. I am certain there are lands here similar to Afghanistan.

**Date Comment Received** 3/9/2011

**Comment** I live in Colorado Springs, Colorado; home of the Air Force Academy, Ft. Carson and Shriever Air Force base. I am familiar with the military and support military efforts whole heartily. A good portion of my disposable income is obtained directly from the local military. I am proud of my county and pound to be an American where I live free. My proudest day yet as a new farther was the day my 4 year son came home and recited the pledge of allegiance, with the words under god. As an American I take full advantages of the freedoms I have. One of greatest prides is public land. You may ask why would a Colorado native be concerned about public lands in California? In the past 5 years I have made 5 trips to Johnson Valley California to recreate at the “Hammers”. This piece of ground has a special part in my heart and I firmly believe this land must remain public. I support the military and fully understand the need for land to practice on. Locally Ft. Carson is trying to expand on to private land and literally take the land from families that have been on the land for generations. This is too much. Our military needs to learn to work more with the communities they serve. This is not a case of “not in my backyard”; this is a case of one American standing up for what he believes in. Please take a minute to think about the intent of “public lands” and consider what it does to not only communities but the individuals that use these lands when the land is taken away. It's time for this stop, and you can help. Keep our public lands public!  
Sincerely Roger Lovell

**Comment** I would really like to see this dropped, and leave Johnson Valley as an open OHV area. There are increasingly fewer areas for outdoor recreation, of any type. I spend a week in this area every year, more if I can. This provides tax money to the state, as well as many local businesses from myself, and many many others that travel thousands of miles to enjoy this space. Folks travel from the East coast, and can't even believe the amount of area so open to enjoying, instead of paved. This area has been a major contributor to the development, and very existence of Rock Crawling, even on a much greater scale than the Rubicon Trail! Closing this area off from the people of the USA, will have a very detrimental effect on many local businesses, CA state tax revenue, as well as companies all over the country. We are out in Colorado, and a significant part of our business goes to people who enjoy this area yearly, if not monthly! I hate to try an fathom the way this business would look should this area be taken from our citizens. Another thought folks have mentioned to me, is what about all the vacant land in Nevada that is adjacent current bases, yet not enjoyed by anyone currently? We've been fighting every attack on this sport, and every attack on outdoor recreation for years, from the folks who want no one to step on dirt, and now our own military is trying to take it away. I always thought the military was supposed to help the people in this country have a better life, a more joy filled live. Taking this land from the citizen will cause many thousands if not hundreds of thousands of folks to have much less joyful lives. We all know no one can work all the time, and this area is where so many go to enjoy themselves on the weekends, and take weeks off from work to enjoy this land. Please leave Johnson Valley to the citizens, and look elsewhere for a less offensive piece of land to use for the training.

I understand that the Marines need new / more realistic / bigger training grounds. I support the need. Just not here. Not in Johnson Valley. It seems OHV recreation is always under attack. More areas are closed every year. Johnson Valley is the premier OHV area in the entire country. Its closure to use is unacceptable. Please find another area. I've been to Johnson Valley once. I plan on visiting many more times. There are many other users like me, out of state or not that recreate at Johnson Valley. We spend our money in the local economy. The impact on towns in the area will be terrible. I support the Marines finding a realistic training area. I do not support the use of this area by the marines. I don't support any "joint use." Please find another area to train.

**Response**

Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. As discussed in Section 2.7, the Marine Corps considered several alternatives

for the proposed action. Several alternative scenarios were rejected (including conducting MEB-sized MAGTF Training at other Marine Corps bases or locations in the U.S.) because they did not meet the purpose of and need for the proposed action or were inconsistent with the screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** As a current military member, I can completely understand the necessity of having a place to train our Marines. As an avid off-roader, I also understand the need to keep what little public lands that are designated for off-road use...only for off-road use. In a time where we are constantly losing off-road areas to "wilderness acts" and other forms of land grabs by environmental groups, I feel that the government attempting to acquire what little we have left is completely unacceptable. I am currently stationed on a shore command in Bremerton, WA with the US Navy. In the past 6 months I have made the drive down to the Johnson Valley OHV area 2 times and have another 2 trips planned in the next 6 months. It is close to a 2500 mile round trip drive each time. I have spent thousands of dollars on fuel, food, and other necessities to make those trips. While I know I am just one person, i would like to think that my contribution to the cities and towns (especially given the current economy) would not go un-noticed. I also know of people who travel, multiple times, from different parts of the country even further away than me. At the last King of the Hammers Race there were multiple teams from the east coast, some from canada, and even one team who shipped their vehicle from hawaii to compete. If the marines take over the proposed land, the race is all but done for. Think of the impact that will have on the small towns of Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow. Not to mention the economic impact on all the cities across the country where people were stopping to buy food/fuel/supplies. also, the impact of condensing the thousands of off-road enthusiasts into a smaller area must be thought about. every year environmental groups claim that we off-roaders do more damage than good, and while i disagree with their assesment, I feel that their fears will come true should the marines take the proposed land. while a majority of off-roaders are avid "tread lightly" fans, unfortunately when you put the same number of people into less than half the space their impact will more than likely double. so if the marines get their way, 3-5 years from now we as off-roaders will have to fight the environmental groups to keep what little the government left us. in conclusion, while I fully support the need

for the military to find an area to adequately train it's soldiers I do NOT support the marines expanding the 29 palms base into the Johnson Valley OHV area. I do NOT support any "joint use" areas and believe that the marines should either expand the 29 palms base another direction or locate another suitable area.

**Comment** Public lands should REMAIN PUBLIC. As much as I think our troops need the ability to train, I also believe the American citizen should also be able to enjoy any and ALL public land available to him or her. Shutting down this land for non-public use would further enforce the feelings that many have that the government is getting further and further out of touch with the

average American citizen's thoughts and feelings. Please let this land remain PUBLIC so people can continue to enjoy this land for many years to come.

**Date Comment Received** 3/9/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** To Whom it may concern-I firmly support our Armed Forces in every aspect. If it was not for them we would not have the Freedom to do any of this. However with our freedom we have public land that we the people will not be able to use. That makes no sense to me why don't they find another area. It would be much easier for them to find another area somewhere else than it would be for the off-road community as all of our favorite spots are becoming Wilderness Area. What about are children, what will they do? Get involved in something else they can't do with their family (video games, computers, gangs, etc..). What about the Economy I know I have brought a ton of Revenue in to the surrounding area of Johnson Valley, but most of all when is it going to stop. If they acquire this area they will want more, I am sure of that, and next thing you know it will all be gone. We can't afford to lose anymore recreational areas. What if the Marines just used the area for 6 mos out of the year, and the public has it the other 6 mos, I know there can be a compromise somewhere, whether or not they choose to compromise is beyond me. I have been involved in off-road activities for more than 25 years with my father, and what will the next generations do when there is no more public land that we as the TAX PAYER give our hard earned money for. It seems like all the government and other agencies want to do is use our money to put up more fences, and just close off all access for the people who pay for it. this closure will only hurt the economy, and last I saw the Marines were kicking ass as usual with the current training excercises so I see no need for them to acquire this PUBLIC LAND.This is just my opinion of this whole situation.

By reducing the size of the Johnson Valley OHV area, and constricting the dates that it is open to the public, it reduces the draw of tourist dollars, specifically mine- Tolls, fuel, lodging, miscellaneous purchases and the Non-Resident OHV permit. Every time that I have to write one of these letters typically gives me a reason to think of traveling elsewhere in the western United states. Reducing Legal Public areas for OHV use, among other outdoor activities only puts greater stress on the remaining areas. While I understand that the Marines need more room for live fire exercises, The surely do not need all of the Johnson Valley areas that they requested all the time; Would it be possible for the areas that are currently public domain to remain that way most of the time? Can the USMC and John Q Outdoorsman not share the same space? If this issue is about airspace, Im quite sure that most of the users in the JV area wont mind High speed flyovers, In fact, If they're like I am, They would probably enjoy it. I am in full support of the USMC's need to train. I do not support them in this attempt to acquire an enormous part of the Johnson Valley and take it from

the public for good. Please do not take this area away from the people of California, and the United States. Come to Maine. I am sure that there is enough uninhabited land here that can be used for exercises.

**Comment** I am completely against the acquisition of the Johnson Valley BLM land for training use by 29 Palms. I fully understand the need to train our military with modern weapons and tactics, but Johnson Valley is the biggest and most popular patch of desert terrain designated multi-use in the nation - there is nothing to replace it for the public if taken for training use. This acquisition would displace tens of thousands of US Citizens looking for recreation, yearly – and have serious negative economic fallout on local communities from Yucca Valley to Barstow. There are equally viable training grounds in far less populated areas of both Nevada and Utah available to the US military - their only drawback being they do not have the misfortune of an adjacent marine base. Please continue looking elsewhere for training ground - the loss of Johnson Valley to the US Public will not be justified by the value military training brings. Cal Tuttle Fullerton, CA

**Comment** I do NOT support the Marine's use of Johnson Valley. They will pollute the air and damage the natural beauty of the area.

**Date Comment Received** 3/10/2011

**Response** Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

**Comment** Dear Sirs, Please consider the ramifications on the civilians that use this area and the businesses that depend on that tourism. This is a unique place in the United States where ORV use is allowed and can support racing. That racing is a multi million dollar industry. I personally drive from Texas 2 times a year to use this area. I Understand the Military position on the need for this area but the citizens should not be shut out of the public land. All of the Public Land needs to stay Public. If that means a dual use for all of it, that is fine.

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Some real important things to consider when looking at the proposal to move Marines into the Johnson Valley Area. The Johnson Valley OHVA is one of the few areas left that provide recreation for many thousands of individuals. will there be other areas opened up to handle the thousands that will be displaced? Closer to the largest metro areas? As a resident of Johnson valley we often find the noise created at the current facility a problem. Moving the Marines closer with live fire is absolute nonsense from a as safety and noise perspective!

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be

implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

**Comment** To begin, I must first make it known that I fully SUPPORT the Marine Corps. However, I am completely opposed to the 29 Palms base expansion. This would greatly effect OHV use in California. Johnson Valley and the Hammers trails system a the Mecca for OHV use. I would like to submit this entire thread on Pirate4x4.com as part of my comment: <http://www.pirate4x4.com/forum/showthread.php?t=664629> In that thread, literally hundreds of people have illistrated how important the area is to them.

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the Draft EIS.

**Comment** Pleas do not take one of the best off-road sites away from the American Public. There are many people who dream that some day they can come out there and use those trails, please do not take that away from us. If you must use this land please allow us to use it when you are not, all of the trails. I am

greatfull for the american military and all they do to keep us safe, surely there is a plan we can all live with.

**Comment** To whom it may concern: I am a patriotic American and an off-road vehicle enthusiast. I support the need for America's fighting men and women to have realistic training areas. However, I DO NOT support the acquisition of the Johnson Valley OHV area for our Marines to train. Multiple-use recreation has been constantly attacked by environmental groups, and we have been forced into ever smaller and smaller areas. Johnson Valley OHV area is THE premier OHV area in the entire country. Its closure to off-road use is unacceptable. The military has the ability to take nearly any area necessary for training' please select another area. I travel to the Johnson Valley OHV area annually, and spend thousands of dollars of my hard-earned money each trip. When several tens of thousands of people visit the area each year for rockcrawling, mining, desert racing,

motorcycle racing, and camping in the desert with their families, the impact of our use is beneficial to every community along the way when we stop to stock up on food, fuel, snacks, parts, etc. The economic impact of this closure to the nearby California communities Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow will be terrible. Finally, just as has happened when environmentalists have closed our trails, responsible off- road enthusiasts are forced onto ever smaller areas, and even though we go to great lengths to Tread Lightly and minimize our impact on the environment, our impact is cumulative. The vast majority of us are patriotic supporters of our armed forces' please do not take so much from some of your biggest advocates. I am in full support of a realistic training area for the Marines. I am in full opposition of using THIS area to train Marines.

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

The EIS also evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I'm just a normal person who enjoys off-roading fairly often. Closure of existing OHV lands will not stop individuals from enjoying off-roading. Rather, it will force those people into a smaller area and create more

negative environmental impact. Nobody wants to destroy the land in OHV areas, but when we are forced into such a small space, the negative impact is unavoidable. MORE OHV area needs to be created for ever-growing population who enjoy off- roading. Even seasonal closures have a significant impact and can often result in permanent closures. The acreage available for OHV use has be steadily declining for decades but the number of people wishing to use those resources has been growing. I understand and respect the need for the military to have places to train and to practice, but with the wars we have faced in the past decade involving less of armed services, is this a plan that is still necessary considering not just the immediate local impact of this proposed closure of OHV land, but also in terms of OHV access state-wide and nationally. OHV lands need to be protected from closures. It's one thing to close OHV land because of endangered species, but it's terribly sad that we will loose OHV land to an institution that so many of us off-roaders greatly respect. Thank you for listening to my comments.

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the analysis presented in Section 4.2 of the EIS acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. Furthermore, the Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** The potential base expansion involving the Johnson Valley OHV area is devastating news to my friends and family. We have been offroading there for nearly 10 years now and Johnson Valley is more than a desert. It is a place where friends and familes come together to enjoy the great outdoors

and experience some adventure together. The memories we create at Johnson Valley stand out in my mind a really unique times. The people I share those memories with are some of my closest friends and family. Losing the ability for future generations to have these experience is a shame.

**Date Comment Received** 3/11/2011

**Response** Thank you for your comment. **Comment** I'm concerned with the expansion of military airspace and how it will limit local pilots and business aviation on flight training and further restrict our flying.

**Date Comment Received** 3/12/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

**Comment** Adding or expanding restricted or special use airspace (SUA) around 29 Palms impacts all air travel - commercial, scheduled, business or private to the point that aircraft separation becomes difficult if not impossible. Squeezing, rerouting, or eliminating existing Victor Airways only adds expense and endangers the safety of aircraft while in the vicinity. Adequate air travel safety corridors must be considered and maintained in any reconfiguration of SUA to ensure integrity and safety of flight.

**Date Comment Received** 3/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. **Comment** As a homeowner in Johnson Valley, I am worried that my property value will decrease without sufficient open riding areas close by. My home is extremely close to the drawn line (a few hundred yards) and would limit my access to the lake bed for riding. I also enjoy the quietness and sounds of nature for which I bought the property. I already see helos close by and my windows shake from artillery during the week. As a son-in-law of a USAF Fighter Pilot, I bleed red/white & blue but please draw back the lines and allow more peace to the homeowners. Please go more towards the north and east if possible.

**Date Comment Received** 3/15/2011

**Response** Thank you for your comment. The EIS acknowledges potential impacts to property values due to increased noise and proximity to military operating areas (see Section 4.3 of the EIS).

**Comment ID** 149

**First Name** Ken

**Comment** I frequently fly VFR between Las Vegas and San Diego, using the corridor between the current Restricted airspace/Bristol MOA and Turtle MOA. The proposed Western Restricted area would close off my alternative route (KMYF- HEC-KHND) and force me to fly over higher terrain. For this reason Alternatives 1,4,5,2,6 are a non-starter for me. Alternative 3, of all the alternatives, would have a significant, but the least, impact of the alternatives proposed. Alternative 3 does appear to be in conflict with the existing Cadiz and Danby private airports. For these reasons, I have to state that I can not support any of the options presented. As a veteran I support the needs of the military, but can not support the expansion of airspace in the already congested west coast area.

**Date Comment Received** 3/15/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. **Comment** To Whom It may concern: I am writing to express my disapproval of allowing the United States Marine Corps to expand their training grounds into the Johnson Valley OHV area. I am 100% apposed to the expansion. I have taken my family to the Johnson Valley OHV for the last 4 years. This is a unique area for the public to enjoy as an already established OHV area. The public interest in the the varying types of OHV activities continues to grow, yet our own government, the same government we fund, keeps closing or in this case taking away our rights to use this public land. The Johnson Valley OHV area is very important to me and kids. There is nowhere else like it in the country. We hope to continue to use this area for generations to come. Please consider to "Keep public land Public". Sincerely Jeff Swigard

**Date Comment Received** 3/16/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** I am firmly opposed to this Land Aquisition. I find it extremely difficult to believe that with all the millions of acres of government owned land in the US that the 29 Palms area is the ONLY area large enough for Marine operations.

**Date Comment Received** 3/16/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I do NOT feel that an expansion of the current base limits is required. I fully support the Marine Corp, but I feel this is nothing but a land grab. We off roaders have had land taken from us for many years - never has it been returned. Between this and the BLM, there will soon be nowhere to ride legally.

**Date Comment Received** 3/17/2011

**Response** Thank you for your comment. As indicated in the EIS in Section 1.3, the purpose of the proposed action is to fulfill the Marine Corps' training requirement. A November 2006 Marine Requirements Oversight Council decision validated the need to establish a large-scale MAGTF training area for large scale MEB training. The Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for a MEB-level training. As discussed in Section 2.7, the Marine Corps considered several alternatives for the proposed action. Alternative 6 would retain public access to a large portion of the Johnson Valley OHV Area. Alternative 6, while not the best alternative from either an operational or environmental impact perspective, is the optimal alternative given both the operational and environmental impact factors considered together.

**Comment** To whom it may concern, I am a patriotic American and an off-road vehicle enthusiast. I support the need for America's fighting men and women to have realistic training areas. However, I DO NOT support the acquisition of the Johnson Valley OHV area for our Marines to train. My family and friends travel to the Johnson Valley several times a year to recreate on some of the most unique off road trails anywhere in the United States. These rock trails are one of a kind and do NOT exist anywhere else. For these trails to be lost would be devastating to the people who use them and to the local economy. Annually there are dozens of organized events held there. These events bring much needed money to the local economy. People buy food, gas, parts, snacks and patronize eating establishments in and around Johnson Valley. Multiple- use recreation has been constantly attacked by environmental groups, and we have been forced into ever smaller and smaller areas. Johnson Valley OHV area is THE premier OHV area in the entire country. Its closure to off-road use is unacceptable. The military has the ability to take nearly any area necessary for training' please select another area.

**Date Comment Received** 3/18/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. **Response** Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Hello, My name is Mike Evans I am an OHV recreationist. Let me start by saying that I do believe the military needs areas to train. I also believe We The People also have needs and enjoyment of "OUR" lands are one of those needs.. OHV use is increasingly being squeezed into smaller and smaller areas while the amount of folks using these lands are increasing by leaps and bounds. We are over crowded at the areas that we have left. The land is now being over used and the increased traffic is becoming deadly. I feel the military could also use these lands for many types of training while we also use them but don't feel that they have the right to steal these lands from the public. I also feel that the military would be around civilians in a real world situation and should know how to conduct themselves in a situation with civilians present. Air space shouldn't be considered an issue either. OHV community is very supportive of the armed forces and I don't believe any one cares about the airspace above the lands. In closing, If the military wants to take Johnson valley back then fine but only If the people are given

lands equal in size and quality else where in the vicinity to replace the ones lost. Eye for an Eye. Thanks so much for listening.

**Date Comment Received** 3/19/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. impacts on recreation. Unfortunately, the Marine Corps does not have the authority to designate recreation lands for mitigation.

**Comment** As a Vietnam Marine Veteran I know they need land to have there wae games but why take the land given to us for OHV's. You will distroy the town of Lucerne witch is suported by the 1,000's of familys who come to enjoy the land. We all know there is lots of land they could use, they could go east and not hert any town, there is a lot of unused land at other California bses, like Edwards A F B, right next to my home, there is lots of land that they do not use. In 2008 I was in DC, I talked to the Commandant of the Marine Corps and he said they would be fair about the land. Now they shoud be!

**Date Comment Received** 3/19/2011

**Response** Thank you for your comment. As discussed in Section 2.7, the Marine Corps considered several alternatives for the proposed action. Several alternative scenarios were rejected (including conducting MEB-sized MAGTF Training at other Marine Corps bases or locations in the U.S.) because they did not meet the purpose of and need for the proposed action or were inconsistent with the screening criteria for identifying suitable lands for acquisition. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live- fire and maneuver objective training

requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** I'm highly opposed to the aquisition of Johnson Valley by the Marines to expand their training area. Johnson Valley ("The Hammers") is a historical offroading area that is like a "Mecca" for offroaders around the world. To me it'd be like filling in the Grand Canyon with concrete to be able to make a highway accross it. There's plenty of similar "Afgan like" through out that part of the desert. Please spare our land!!!

**Date Comment Received** 3/19/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** It makes no sense to civilians who have lived in the desert for over 30 years, to have the military consider the West Study area for expansion. NO. Go East! We may not like the alternative of expansion at all, but if you must expand don't threaten the public's established homesteads, small businesses, and desert townsites with a West Study alternative. NO. Go East. To quote directly from your Fact Sheet on your web site: "People have been drawn to the southern Mojave Desert for diverse reasons. Native Americans first visited the scattered oases that dot the landscape to gather seasonally available food resources and resupply essential tool stone. Later, hard-rock miners came in search of rare metals. Early homesteaders arrived in search of new opportunities for life away from urban centers. People

were and remain captivated by the stark and pristine beauty of the panoramic vistas, colorful granitic and volcanic landforms, and the vast undulating alluvial fans leading to sand dunes demarking the margins of scattered Pleistocene era playas. The gradual habitation of the region eventually resulted in the establishment of communities such as Twentynine Palms, Joshua Tree, Yucca Valley, Landers, Wonder Valley, Johnson Valley, Lucerne Valley, Ludlow and Amboy, as well as in the formation of roadways that connected these communities to each other, and to the urban centers beyond. Railroad corridors transect the area as well. These desert population centers, both large and small, have grown closer in proximity to the Department of Defense military training ranges that were established during World War II and afterwards, including what is now known as the Marine Corps Air Ground Combat Center (MCAGCC) at Twentynine Palms." We are also aware that backdoor dealing with Senator FeinStein has forced you to consider avoiding Special Use corridors and trade of land use agreements east of 29Palms. It was a bad trade and now you have to backpedal to find appropriate lands .. FeinStein doesn't own the desert. Go East! Go East. If you have to expand then go East. Respect the desert dwellers who chose to live away from government interference, urban blight, and crowding. Respect our wishes.

**Date Comment Received** 3/19/2011

**Response** Thank you for your comment. The Marine Corps understands the impact of the proposed alternatives on natural, cultural, and socio-economic resources, and has reduced the number of acres proposed for acquisition. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Johnson Valley is a very popular off-roading area used by many people every weekend of the year. Good trails for motorcycles, jeeps, ATCs, hikers and rockclimbers, rockhounds and just camping. Many historical mines, quarries, homesteads, petroglyphs and vistas to explore. Surely a less used corridor could be used for military training!

**Date Comment Received** 3/20/2011

<b>Comment</b>	Having been to 29 Palms many times I do not feel there is any need for the Marine Corp to expand and take over a large part of Johnson Valley. The Johnson Valley area is used for recreation by a large number of families and losing this area will be another will close off another public recreation treasure. I truly do not understand with all the cutbacks how the Marine Corps would be considering this or why it would be allowed. We have lost enough recreation areas and to lose this area when it is not needed is truly a sad thing.

<b>Comment</b>	where should we be able to use our land? That we have earned and pay ridiculous taxes on. Maybe the state could save some money by not paying the forestry workers 60k or more per year. Who in turn does all he or she can to hand out as many pay tickets as they can while doing as little actual forestry work as possible.I am absolutely sick of the state s constantly closing down trails for absolutely no reason other than because they can. This is America right?

**Comment** Johnson Valley is one of the very few places that remain where people can go and off road. The Marines want to take this away from the public. It is bad enough that the people who off road are constantly battling a constant flow of lawsuits trying to shut down land that is used for off roading, but now this? The plan is taking away 2/3rds of the land in Johnson Valley. By taking this land away, off-roaders will have a larger impact on the land, because they will be unable to spread out, and allow anything to recoup. Instead the land will be used over and over again, taking away from the beauty that is the desert. Off roading has being a family activity that my family has been involved in for years. It's the one thing that has keep our family together, and allowed us to come together and spend time together without spending a huge amount of money on a vacation we cannot afford. This is public land, that is owned by the tax payer, not by the military, and it should stay that way!! I strongly oppose the land in Johnson Valley being cut off to the public, even if some of the areas are open some of the times. Do not take more land away from the American Public, that barely have anything left for recreation to begin with.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of any amount of land within Johnson Valley would cause a significant impact to recreation, even under alternatives

involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live-fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

We have been enjoying the desert for more then 40 years in this area around Landers. To take away peoples homes and land is crazy in these tough times. People like us who enjoy off road sports keep getting pushed into smaller and smaller areas causing more damage to the land then if we had a larger area to enjoy. We are proud Americans and are so proud of our Marines and what they do for our country-but this land thing is crazy. We need to cut spending let's don't waste millions buying up properties of people that don't want to move. Thanks.

**Comment** Please consider the recreational needs of the public when deciding on public land designations. I am the father of three children and my wife and I dream of making a trip to access the natural wonders of Johnson Valley via hiking, offroad vehicles, and mountain bike. Please work to strike meaningful compromise into the preferred alternative which would allow for our forms of recreation to remain in place. The loss of diverse recreational access to wild places will result in a poor society overall. Allow for recreation to inspire conservation.

**Date Comment Received** 3/21/2011

**Comment** The Marines already have huge bases at 29 palms and Camp Pendleton, both in Southern California. Also being part of the Navy they have access to the huge Navy base at China Lake, also in So. California. Partner with the Army and use Fort Irwin in Barstow (also another huge base in So. Cal). Take a look at Nevada. Some of the bases there have the added plus of glowing in the dark. Where are the people supposed to recreate? The population grows unchecked while open recreation lands are continually being taken away.

**Date Comment Received** 3/21/2011

**Comment** While I support our troops, I don't think taking away what little land is left for the wheelers is the best option. by shutting down the bulk of Johnson valley you will be killing off the local communities and many other businesses around the country. as just one race held there in february, we brought in well near \$1 million dollars for the local economy and untold amounts for surrounding communities. as a wheeler there for the last 10 years, we've watched the marines train alot. there is plenty of room north of those

mountains that they want to take. personally, i don't think our troops should be fighting all the wars we are at the moment, but, that's another topic. please, think of the people that you will be effecting for some training ground.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is likely to be a direct impact on individual small business that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The Marine Corps understands how important the Johnson Valley OHV area is for recreation. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I have been a strong supporter of the USMC my entire life. While I do want to see the USMC have whatever training facilities they need, Johnson Valley is the ONLY area of it's size that we can use. My only opposition to this expansion is the loss of PUBLIC lands that I will not be able to use with my grand children. If the Marines were able to arrange for another area of the same size somewhere in the Mojave desert to replace the lost PUBLIC lands, I, and many of my friends and family, would fully support this expansion. Please, replace the land acre for acre.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. Unfortunately, the Marine Corps does not have the authority to designate recreation lands for mitigation. However, the public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the live- fire and maneuver objective training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Furthermore, as a result of comments received during the Draft EIS public review period, Alternative 6 has been further revised (in consultation with representatives from the OHV community) to increase public access to key portions of Johnson Valley and further reduce impacts on recreation.

**Comment** Please, be respectful of the Johnson Valley OHV area. It is a very special place to the off roading community, both for the general openness of the area to explore a true wilderness and the uniqueness of the Hammers trail systems. There are entire industries focusing on building vehicles that can handles the Hammers, not to mention the local economy, from Yucca Valley to Victorville. This area is used by thousands of recreational users every weekend during the winter. Anyone thinking of closing the area should visit it over Thanksgiving or Christmas weeks and see the large numbers of peaceful folks using this land. You see a wide range of camping

styles (tents, to pop ups, to toy haulers, to class A RV's), a wide range of off-roading vehicles (motor cycles, ATV's, mildly built jeeps, to custom rock crawling buggies). You will see small groups of friends, large organized clubs, and multi generational families all enjoying this area in one way or another. Please find a way to satisfy our need for military preparedness, without taking this land from the off- road community.

**Comment** I am all for a strong military and believe proper training must be completed. However, I do not believe it is necessary for 29 Palms to increase the size of this already huge base by almost 30 percent. Future military conflicts will likely be in urban environments against unconventional (guerilla) adversaries like we are currently facing in Afganistan and Iraq. Training for these types of conflicts do not require 263 additional square miles of

training area. The Johnson Valley OHV area should not be closed or impeded by military training activities.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. As indicated in the EIS in Section 1.3, the purpose of the proposed action is to fulfill the Marine Corps' training requirement. A November 2006 Marine Requirements Oversight Council decision validated the need to establish a large-scale MAGTF training area for large scale MEB training. The Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for a MEB-level training.

**Comment** Johnson Valley is one of the declining number of off-roading areas available to off-road enthusiasts. Unfortunately, liberal California and Washington politicians are gradually reducing the areas that are open for off-road users and we now face losing the entire Johnson Valley area for an expanded military training grounds. The domino effect of these closures will be fewer dollars spent on vehicles, equipment, gasoline, RV's, etc. because the off-roading community will get frustrated with not having available areas to participate in off-road activities. I appreciate the need for proper training facilities, and we have a kick-ass military that is respected and feared around the globe that has appropriately trained on the current military training grounds. Is it really necessary to take nearly all of the Johnson Valley area? Expand in the other directions first, and only take what is absolutely necessary of Johnson Valley-- PLEASE!

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** The military has already taken up enough pristine California desert and now it the time to say "enough is enough". When will it end? In times of economic hardship such as these the military should be cutting back its expenses rather than looking for new terrain to destroy. Do we really need more space to play pretend war with everyones hard earned tax dollars?? How about doing something useful with our military like putting more troops on the borders and catching actual bad guys rather than make believe ones. Oh wait...that makes too much sense

**Comment** our familey started going to Johnson Valley over 30 years ago, it has been a very good life for them, my children have grown up and now have famileys of there own and still go Johnson Valley with there kids,off roading has taught my children a lot about nature and how to take care of desert,I have riden all over Johnson Valley and still find thing that most people will never see, turtles mating, swarms of bee looking to nest, sitting on top of a hill and looking out across the desert is one of the best parts of my life, I never thought we could lose J.V, but now its in danger from my own government, after years of play riding and desert racing with AMA Disrtict 37 the thought of not going out there, is hard to swallow. I cant even think of the local people and business's that will suffer, the gas stations and market in Lucerne valley will be hit hard by any closure,not to mention the OHV suppliers and manufactures,I feel that no action is the best course, or move eastward for the expansion, dont take the last large open area away from the people who dearly love it and if it must be taken, give us a area of the same size, if it is closed it will be lost forever, the goverment never gives anything back

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined

that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** I work for the Navy and I understand the need for the military to find an area to adequately train it's soldiers. I do NOT support the marines expanding the 29 palms base into the Johnson Valley OHV area. The area is greatly needed for the use of the public as public lands. Absorbing the land into the base will greatly hamper 4WD, Motorcycle, and ATV recreation that has already been reduced multiple times already here in California. I do NOT support any "joint use" areas and believe that the marines should expand the 29 palms base in another direction or locate another suitable area.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I disagree with your aquisition due to the impact it would have on the current users, we have been using these lands for 40 years and feel that there are many other lands you could aquire in new mexico arizona and texas you are taking public land that cannot and will not be replaced due to the environmental groups that continue to shut down off highway land. The long and short is we have fought to keep this land open and we were here first and here come the marines and in less than 2 years its on the verge of being closed.

**Date Comment Received** 3/21/2011

**Comment** If the marines are going to take this land they have the authority to find an equal amount of land that they could open up to the users who are going to lose there off highway land. The marines have the authority to over ride the environmental activist that will not open new lands for off highway use. You must offer an alternative to us the off road community. i look forward to your suggestions and help with starting the process of opening new land.

**Date Comment Received** 3/21/2011

**Comment** I vehemently oppose the expansion of the current 29 Palms military base. Me and my family own property in the Johnson Valley area and have enjoyed the serenity and peacefulness of the Johnson Valley area. We are also avid off- roaders and cannot fathom the idea of our desert being taken from us. We hear the wicked noise from the base on a regular basis now and know there will be a significant impact from noise if the expansion is approved. I vote no to "Alternative 6". I vote yes to "No action". If the base were to expand "Alternative 3 should be considered due to the fact that the battalions could converge on an objective within the current MCAGCC base. Please don't take our desert.

**Date Comment Received** 3/21/2011

**Response** Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in the EIS, some noise and vibrations associated with ordnance use under the proposed action may be periodically detected by residents and other members of the public from a distance, and may sometimes be an annoyance. The results of additional single-event noise modeling have been added to Section 4.9 of the EIS to contribute to the evaluation of noise impacts. Noise exposure from existing/current conditions are provided in Chapter 3. Appendix H has four sections: H-1 through H-4. Sections H-1 through H-3 contain a wealth of technical data used in the noise modeling; Section H-4 is the noise primer. Airspace flight operations are assessed using the CNEL<sub>mr</sub> metric consistent with Navy RAICUZ Instructions. This metric accounts for the sporadic nature of airspace activity as well as the “startle” effect caused by low-altitude high-speed flights (see Section 3.9.1). The Maximum Sound Level (L<sub>max</sub>) metric was not specifically designed to measure impulsive sounds and although L<sub>max</sub> provides supplemental noise exposure information, the correct noise metric for assessment of land use compatibility is CNEL (and its derivatives). In addition to the aforementioned high-altitude refueling activity, modeled operations included low-altitude high-speed flight operations characteristic of existing and proposed flight activity at the Combat Center (see Appendix H).

**Comment** Please do not take land away from the Hammers OHV recreation area. Vehicle accessible land is becoming more scare every day with environmentalist concerns. Now we are having to fight closure from military acquisition. I have not yet been able to enjoy the Hammers myself, other than in pictures. But I hope to be able to get there one day and take my son. We need to keep areas like this open so he has a place to recreate when he owns his own jeep. Please keep our access open.

**Comment** Dear Sir or Madam, I am writing this letter to let you know how much the land at Johnson Valley OHVA will be missed if it is included in the Marine Corps base expansion. I have made at least two trips per year there for the past 7 years from Bakersfield, CA. I spend money on fuel, food, and camping supplies in the towns of Lucerne, Apple Valley, Adelanto, Mojave, Boron, Tehachapi etc. Environmental groups have been taking off road area's land for years, please don't take it too! Sincerely, Monte Myers

**Comment** I feel the needs of Marine Corps fire and maneuver training for the MEB and MAGTF are important but the constant fight for continuing OHV area access is important also. I do recognize that these proposed areas are the only alternative, as MCAGCC 29 Palms is "land locked" by protected wilderness on or near some of its borders. In the end, I would prefer to see the Marine Corps have non live fire access to the Johnson Valley OHV area in order for it to remain completely accessible to the public.

**Comment** My Husband and I bought a cabin in Johnson Valley and have completely fell in love with the people of the community and with the beautiful desert surroundings. We plan to build our retirement home on our property and enjoy all of Johnson Valley for many decades to come. I'm crushed by the thought of our retirement home being taken away from us. I understand the need to train our troops, however I don't think taking land away from hard working people is the answer. Furthermore recreational areas for off-roading, exploring, and learning about our deserts are dwindling. The desert may seem quiet but on the contrary it is very much alive. We observe others as well as ourselves exploring Johnson Valley and the pure essence of freedom that it brings. A small piece of freedom that we desperately need in an overly congested Southern California.

**Comment** I've look at the maps. I have read where the off road area would be still open 10 months a year. I still don't understand how you can put the off roaders in such a small area. Didn't the death of 8 people open your eyes? The off roaders are being squeezed into such a small area that the public lands open to all should be expanded not reduced. This is a travesty to the off road community. I for one am totally against any military land grab.

**Comment** My family and I would like to express our great desire and need to not, I repeat, not have the expansion of the military base 29 Palms expand into the area of Johnson Valley. More and more land is being taken by the government. Johnson Valley has literally saved my family. It has given us a calm peaceful place to spend quality time with our family in a time when our family was crumbling. I do not believe there is a real need for this

additional land when the hopes is to actually pull our troops out of foreign soil. Please reconsider this decision. My family needs this land.

**Comment** Hello, As an American who enjoys the personal freedoms we can all tank our armed forces for protecting, I support the military in their efforts to secure proper training areas. However, I am also a avid off roader and am very concerned about the potential loss of the Johnsen Valley OHV area. As you know as the urban development continues, more and more folks are looking for outdoor areas to get away from it all. Off-road enthusiasts #'s have quadrupled in the last decade and yet areas for them to recreate responsibly are declining. This of course increases the foot print at the areas still available. Another side effect is that if there is no where legally to recreate, less responsible folks may end up trespassing onto private property. Which only compounds the problem. I trust you will look at all options available including the proposed areas current use and user base #'s making sure that right long term decision is made with the best end result for all. Thank you for your time and am closely watching how this plays out. Eli Casey

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** My family and friends have been going to Johhson Valley for years enjoying our off road freedom AND the beauty of the untainted hills. We chose JV for its quietness yet accessibility to public necessities all the while in the middle of an off road haven. Currently my friend Brian Rupert bought a 5 acre property and my brother Ryan Cumming did as well a couple of miles away. Then last year my father purchased a property within walking distance to my brother! We're a close knit group of law abiding, married, happy families that get together at the different properties (off Ghost Road), sharing day rides on our quads, buggies and bikes then BBQing and having fires and playing games at night. We wear helmets, don't leave trash behind, don't drink and drive and maintain and update our properties and dwellings. I believe that JV has saved our life and limb because had we been forced to live and play in the more dangerous areas like Superstition and Glamis, surely some of us would be injured due to other's carelessness. Please do not take away my friend's and family's freedom of enjoying the open terrain. We feel safe in JV and will fight to stay there! Thank you for your consideration.

**Comment** I would again like to state that I oppose the expansion of the 29 Palms in the Johnson Valley off-road area. It is unique and becoming very rare for the federal government to allow "open" areas for the always increasing numbers of off-road vehicles. I do understand the need to expand the base and hope there are other areas the USMC can utilize rather than annex a very popular off-road area. The area in question is known nationwide as a "place to be" similar to the Rubicon or Moab. Thank you for providing an opportunity to comment. I support our troops and hope there can be a different solution rather than annexing a very popular off-highway vehicle area.

**Date Comment Received** 3/22/2011

**Comment** I have been an avid user of the Jonson Valley recreation area since i was 5 years old when my partent brought me camping.. Although i can understand the need for additional training area, i dont understand why an already designated OVH area needs to be selected? There are thousands of open desert miles which are not currentlty designated for OVH. WHY can't some of those area's be used?

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** The current proposal of expansion does not adequately consider the economic and recreational loss to the surrounding community and related businesses. Stop trying to take land away from the public! The planned use of live fire in such close proximity to current homes and property is ridiculous and this whole expansion project should be stopped in the name of safety for the surrounding communities.

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. Furthermore, the loss of OHV land over time was analyzed in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a

significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under the proposed action to enhance public safety.

**Comment** It is not the only place in this wide expanse of country that you can train. In this case you will be taking away land that avid offroaders use on a regular basis. There are not many places left in this country that allow us to enjoy our sport. Being the Marine corp allows you to use just about any area that you would like. In many cases you can get special use permits, where regular civilians can not. I am all for the well rounded and complete training of our armed forces, but I completely disagree that this is the only area that fits your criteria. Even if you do take this area for your use, history tells us that when you are done with it you will either hold onto it forever, or it will be reassigned so that our sport will still lose use of the area.

I can see where it would be easier for you to choose this area as it would be easier to get the nod from enviromental groups that know what will happen to it when you leave. Many of your own personnel, and members of other armed forces use this area. I would appreciate if you would keep this in mind. As I know you will do what ever you want anyways.

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** As an OHV enthusiast I must voice my disapproval in expanding the 29 palms training area into the johnson valley OHV area. I understand the need for the marines to train but taking away this area from OHV enthusiasts is unnecessary. Making the trip to johnson valley is one we look forward to each year and loosing it would be a shame. thank you

**Date Comment Received** 3/22/2011

**Response** The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I would suggest that any branch of the military is not deserving of any more land than it already has and, in reality, should have some of what it has taken away. The military, all branches, are not good stewards of the lands, with a history that goes back to many decades of pollution, artillery shells left behind that have killed people who have come upon them, environmental degradation (in all its forms), and absolutely no respect for anything that might impact the environment around them. Further, the statement that the military needs additional "training" areas is specious and disingenuous at best. What does the military train young recruits for? For another Abu Ghraib? A reprise of US soliders engaged in atrocities in Kabul? Establishment of "Kill Teams"? No, the military is not deserving of anything.

**Comment** I am writing this email in regards to the possible closure of land to public use by an expansion of the 29 palms area. I would like to say that I fully support our military in all their efforts and realize they need training to remain the world leader. That being said, the loss of the use of this area

(particularly to offroading) would be a horrible blow to our sport and the already hurting California economy. I live in Louisiana and have made the trip to the Johnson Valley area specifically for offroading and plan to do so again in the future. The King of the Hammers event draws approximately 50,000 specatators a year (many of which from as far away as the east coast and other countries) and has grow to that number in a only 5 years. I strongly urge you to at the minimum find a way to for this land to be a dual use area.

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** I am writing in support of Alternative 3. The Johnson Valley OHV area provides an extraordinary landscape that is rivaled by no other in our country. The land is diverse, beautiful and unparalleled. Every day, numerous families recreate in this area via off road vehicles. This recreation solidifies the bond between family members and helps them forget any petty differences they may have. Simply put, off-roading promotes good family values, keeps our children out of trouble such as gangs and drugs, and provides for endless enjoyment. However, all the options presented (except for Alternative 3) take away that opportunity for endless enjoyment. While your intentions for the Marines may be noble, the effect on American citizens is palpable. There is no other area in our country like Johnson Valley. Please do not close it or take it away from us for 2 months out of the year. I don't trust the Navy/Marines to abide by the 10 month open access Alternative. I have been enjoying this area all my life and the proposed disruption would be devastating to my family and friends. Please, KEEP OUR LANDS PUBLIC.

**Comment** Southern California Off Highway Vehicle area are getting smaller and smaller. The area the Marines wish to annex is THE premier destination in all of the United States for rock crawling. The trails there have taken 1000s upon 1000s of man hours to make. It is a destination that should be deemed a historical mounment. In fact, we should push for it to registered as a place of historical significance so it can't be developed any other way. The area the Marines seek is in very close to homeowners as well. Please do not consider the Johnson Valley area as a area for Marine manuevers. It makes no senses.

**Date Comment Received** 3/22/2011

**Comment** To whom it may concern: Please consider the amount of impact the Training Land Acquisition/Airspace Establishment Draft EIS will have on the surround community and established communities by moving West and taking more lands from the Johnson Valley OHV area. Johnson Valley OHV is the home to one of the last great wildernesses that our great country has. I come from a military family and fully understand the need to support our military and to support our government. But, by moving west and taking the proposed lands of Johnson Valley many responsible members of the offroad community will not come back to this area. Each year for the King of the Hammers race I along with 25000 other members of the offroad community travel to the Johnson Valley OHV area. I travel from Maryland the 2600 miles to get to the event each year. My team alone spends an estimated \$10000.00 just to attend the event each year and almost additionally the same amount in the area supporting the local businesses. If the Johnson Valley OHV area is diminished I will not make the annual trip to the area and the I am sure the race will be moved to another area of the state if not out of the state to a more suitable location. I am sure there are other alternatives to supporting our military by moving east and or north of the area where even more lands are available. Doug Bigelow Bigelow Motorsports

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that

acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The public involvement process has led to the development of specific project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

<b>Comment</b>	To whom it may concern, I'm not in favor of this attempted take over of PUBLIC LAND. This area is one of the few areas in the United States left where we the off road community can go. The recent trend of taking away public land is a very disturbing trend. If the freedom of being able to go to and use public land is constantly removed from we the people. Then why continue to Fight for these constantly decreasing freedoms? Whom ever jumped on this Idea, which is obviously a knee jerk reaction to the current fighting overseas. Is apparently not familiar with the vast amount of land currently at the disposal of the combined Armed Forces of the United States. Being from a family with Army, Navy and Marine Corps back-round. I am an avid supporter of the Armed Services. But I don't support the attempt to take away the land in Johnson valley.

In regards to the closure of Johnson Valley OHVA..... Please try to use another option other than closing this area to us off-roaders. This place is very special to me, my family and friends. I've camped there for 30 years, and hope to watch my young niece and nephews continue to ride and grow up there as I did. To be able to learn about wildlife and all the beauty of our California desert. I appreciate this area very much and always look so forward to visiting, and I hope that in the future I'll be able to continue to visit the beautiful place I call a second home.

**Comment** Although I support the Marines fully, I am against expansion because it will close down a premiere off road riding area called Johnson Valley. There are very few places like Johnson Valley left after many years fighting enviro restrictions and closures. Just feels like if its not one thing its another. My family travels over 700 miles from Oregon to ride Johnson Valley because of the freedom and desert experience it provides. Guess I'll just have to stay home and read about how great it was. I cant see why the Marines cant expand south or east, oh well.

**Date Comment Received** 3/22/2011

**Comment** My family and I have been enjoying the Johnson Valley off road area for more than ten years. This is a unique are where family and friends can gather and enjoy the desert. The state of California has continued to reduce the amount of area available to the off roading public. The Marines already have all of the area at Camp Pendelton and 29 palms! You don't need any more land! Use what you have more effectively and quit trying to take our limited off roading resource.

**Date Comment Received** 3/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact

to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

**Comment** As a long time member of the santa cruz 4 wheel drive club as well as a long time outdoor enthusiast, It is a shame that we see all of our "public" lands being scooped up by the environmentalists, state and federal governments and knowing that my children may never know what it means to go 4 wheeling in some of the greatest areas that this country has to offer. I understand that our soldiers do need a place to train but i feel there has got to be many more areas that are not in such high use by the public that they can use to train on.

**Date Comment Received** 3/22/2011

**Comment** First let me state that I am a strong supporter of our military and the role that it plays in protecting the freedom of US citizens. It is exactly that freedom that will be taken away if the proposed "Land Grab" proceeds. I've been enjoying and riding the Johnson Valley area since 1976 - As soon as I could drive I was spending at least 2 weekends a month in the area. As you are fully aware, Johnson Valley is one of the few remaining open riding areas (OHV) in the state. It is home to a large number of AMA District 37 off road races, provides significant opportunities for the movie industry, is loved by Jeepers, Rockhounds, and simply families looking to get away from the cities. If Johnson Valley OHV is taken over by the military as has been recommended in the EIS it will force responsible OHV enthusiasts like myself to seek other riding areas, many of which are likely to be in illegal areas. I urge you to NOT take one of the few remaining Open Riding OHV areas away from the people. There are other alternatives for training which will not have such a huge impact on recreation in the area. -Greg Eyrich

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding and illegal off-road riding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at

other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** Our family has begun off-roading in the past year to introduce our children to something other than city life. We have loved seeing all that California has to offer! It truly saddens me that this may be taken away. Johnson Valley is one of the few remaining areas we've only just begun to explore. Also, I can't imagine how the local mountain communities will suffer with the loss of income from travelers such as ourselves buying gas/food & camping. Please reconsider this plan! Don't take Johnson Valley away from the community! Thank you for your consideration.

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I have been going out with family and friends to Johnson Valley and many other areas in the Mohave Desert since 1965. Over the years I have seen our motorcycle riding areas taken away, to the point where we only have a very few small areas left. This causes the remaining areas to be over used. I would hope that the Johnson Valley OHV area would be left for families, and the Marine expansion go in another direction. Most of our riding areas have been taken away to supposedly protect plants or animals. I have a great respect for this Earth, but, when plants and animals take a back seat to humans, SOMETHING is terribly WRONG. Thank you for your consideration.

**Date Comment Received** 3/23/2011

**Comment** I would like to voice my concern about the plan to annex a large portion of the Johnson Valley OHV Area. I personally use the area slated to be annexed quite often and would be quite disappointed to see it closed. This area is a very unique area that cannot be found anywhere else in the country, the "hammer trails" are world class rock crawling trails, events centered around them bring a lot of money into the local economy, just ask any auto parts store or towing company in Lucerne Valley or Yucca Valley how often they get customers who broke their vehicles out there. We have lost enough recreation land from various sources, please don't add another.

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson

Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use (including a majority of the Hammers area). Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** As the uncle of a Marine stationed at 29 Palms I think I can have some say in this land grab that is being asked for. The area to the west of the base includes many world class off road vehicle areas and nothing that would facilitate training for Marines. There are many other areas currently unused on the base or at nearby Fort Irwin that would be a much better fit. The area of Johnson Valley the Marines are asking for offers some of the premier rock crawling in the world. This area was set aside for public use and should not be closed for training that can be better accomplished on land already closed to the public by both the Marines and the Army.

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I am not in favor of the Johnson Valley OHV area being taken over for live fire exercises by the Department of the Navy. As an avid east coast OHV user, once public land is gone...it is gone forever. If Alternative #6 is chosen, I see the Department of the Navy's 2 month usage steadily increasing until the Johnson Valley OHV area is permanently closed to the public/OHV community. Has an economic impact study been conducted to show how closing or limiting public access to the Johnson Valley OHV area will hurt the local economy and the retail sales of companies that support the OHV community?

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I would first like to say i am my fellow offroaders appreciate what our armed forces do for us. But what freedoms will we have left when we cant even enjoy offroading with our families and many of the soldiers and their families enjoy this hobby. With the economy the way it is Johnson Valley is a major income for the locals and their businesses. If you take this income from them it will put them in the poor house just like so many others right now. I understand training and exercises but we need to keep some public land public. It is being closed all over the country for reasons like keeping it protected for future generations and you guys are going to bomb it and run tanks all over it. We users have protected it better then that. I urge you and beg you to choose somewhere else to do your training operations. Thank You

**Date Comment Received** 3/23/2011

**Comment** As designated wilderness land would be better managed and "protected" as part of a military base than just as areas on a map, I would like to see a request for Congress to transfer portions of the east side wilderness to the Marines. Major area loss in the at times heavily used Johnson Valley Recreation area hurts. At least part of it can be shared with military use under the proposed alternative. It would be more favorable to me if mitigation for the lost recreational area could be accomplished by access by transient users to other portions of the base or other means.

**Date Comment Received** 3/23/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** please review your choice for closing this riding area. a lot of families and groups use this area for recreation. i have been using this area for over 20 years. this area means a lot to me. both for the memories i have, and the ones i wish to create. this is a designated riding area. green sticker fees help fund this area. surely there must be an area that is just as compatible somewhere else for our troops to train. please take your time and think fully on this matter. most people don't care , but the ones that do, that actually

utilize this land, care about it tremendously. we do not wan't to lose it. thank you for your time. bryce barker

**Comment** I have been recreating in Johnson Valley for over 20 years. My family has taken me there since I was a small child. I have alot of fond memories from there of camping with all my family and their friends. Some day when I have children of my own, I hope we can continue the tradition. But now I am worried that it may be in jeporidy. I understand that the military needs areas to practice the manuveurs.I have been recreating in Johnson Valley for over 20 years But I feel that using Johnson Valley area is not in the publics best interest. Maybe if the expansion could stay to closer to 29 Palms and not to the west near Lucerne would be a better choice. I am not sure if you realize how many people visit Johnson Valley for many different reasons. Also the local bussiness count on the visitors money and many could go out of bussiness without the tourism. thank you, Kristi Hoffman

**Comment** I do not need to send a entire essay like some people send. All i have to say is i absolutely love Johnson Valley. I have grew up out there going every couple years. I am now a proud owner of a Jeep and our group goes out there and has an absolute awesome time. There is yearly events out there like King Of The Hammers which is also a Huge event where people come ALL over the world for. All in all i cannot imagine why in the world you guys would consider taking land that is used so much by the off road community. We keep the land clean and have desert clean ups for those who like to dump trash. My BIGGEST question for you guys is: What is so hard about going to Texas or another state where there is hundreds of miles of open, vacant land that is not used? Please consider keeping this awesome place open for us to use.

**Date Comment Received** 3/24/2011

**Comment** I am interested in hearing about the possibility of the Marines trying to take over Johnson Valley OHV area, this area has been set aside for public use as a family off highway vehicle recreational area and is used by thousands of tax payers most every weekend of the year. Also why would this area be needed if the combat situation in the middle east is going to end in 2012, and be taken from public use for EVER.

**Date Comment Received** 3/24/2011

**Response** Thank you for your comment. The Draft Environmental Impact Statement and a wide range of other detailed materials about the proposed action are available on the project website at <http://www.marines.mil/unit/29palms/LAS>. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

**Comment** I am writing again to tell you how disappointed I am with our government. The people of the little town of Lucerne Valley doesn't stand a chance against the mighty Marine Corp. I work and play in Lucerne and moved to the area to enjoy off-roading. Johnson Valley is the biggest play area that we have left and the marines are going to take it even though the people have asked them to go East. I spent a lot of money to build my house three years ago on the border of A.V. and L.V. and didn't know I'd be able to hear and see the Marines practicing. Now they want to come even closer to me! This is going to decrease my property values even more! There are many more reasons why the Marines should go to the East and there are so many other people besides those of us that live here, that are going to be greatly affected if you take over J.V.. Our Marines are the best trained in the world and have been doing fine so far. Why are you going to make the public pay for our governments greed? Please! Go to the East.

**Date Comment Received** 3/24/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time- averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Although I agree training like we wage war is very important, who are we waging war for, the public. When we take away lands that cannot be replaced to secure our way of life, are we not contradicting our own actions? I understand that finding another place, making trips to training areas, and any other option will cost tax payer additional dollars. This is still the action that should be done. Don't take away what amounts to over half of the known trails in a sport that has so few places to recreate. The military already must pratice deploying to wage war. Well deploy to pratice as well. Leave Johnson Valley alone.

**Comment** i have grown up riding and camping in Johnson valley it kept me off of drugs and running on the streets of orange county I have 2 girls that I have raised and it has kept them drug free also. The public has very few areas left to OHV this would put us in much smaller locations which in turn there will be more injuries ext. Open the wilderness area the opisite direction that would give you more land and keep all of us off roaders very happy. The Marines can get that land open and we the people never would be able to get that area open for off roading. Thank you for listening.

**Date Comment Received** 3/24/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. **Comment** I fully support the Marine's need to train, and politely request that you expand into land farther from population centers, especially land which is currently off limits to motorized vehicle enthusiasts; OHV use has been severely curtailed over the last 30 years by politically motivated land use policies, leaving only a fraction of the previously available acreage for recreational use. Expanding into the OHV use area of Lucerne Valley essentially eliminates one of the best venues for off road racing left in the

State of California. There are other areas such as the East side of Highway 395, or closer to Las Vegas, where the impact on recreational users would be less than in Lucerne Valley. Further, restricting airspace should be balanced by releasing other airspace (MOA's or restricted areas) currently used by the military. Isn't it better to have a large restricted area for training in a single location rather than several restricted areas across the Southwest? Getting around in the desert in an General Aviation Airplane requires dodging all manner of special use airspace, most of which is vacant and unused. How many thousands of gallons of avgas is burned flying around these empty MOA's and restricted areas? What is the impact on the economy, and on the environment? Would it be possible for the Marines to share Edwards AFB and use the land around that area for these exercises rather than appropriating more public use land and airspace? Once again, I respectfully request that this plan be reconsidered as part of a larger land use plan which prioritizes the needs of the US citizens who pay taxes to support the military, who use the land, and a compromise be proposed which would allow for training room while minimizing the impact on the local community. Thank you for your consideration, and thank you for your service to our country.

**Date Comment Received** 3/24/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

**Comment** I am wholly opposed to a complete land grab proposed for Johnson valley. The two month training time is acceptable as long as it is not a precursor to a twelve month permanent occupation. This land is the core of the the off road competition and recreational industry and greatly effects people at many levels. Recreationalists, media, manufactures of a large spectrum of products and services all gravitate to the area from the U.S. and from

around the world. This spawns income to the local area and promotes and expands interest in the off road industry, ultimately increasing commerce country wide. Johnson valley is one of a very few off highway Mecca's left in our country, with this continued posture there will be no land left for our current and future generations. As a veteran of the US infantry I can empathize with the necessity for quality and realistic training areas, however I hope that a mutual compromise can be made in Johnson valley's regard that is fair for all perspectives of it's use. Thank you, Clifton Slay

**Date Comment Received** 3/24/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I have nothing but respect for our American Military, I spent 4.5 years in the Army. The area near Means Dry Lake has some of the most popular 4 wheels in the country. These trails were developed by the Victorvalley 4 wheelers Club and have been heavily used by many 4 wheel drive clubs across the entire country for many years. My question is, isn't it possible to expand into the open desert toward the east of the base. As I drive from the Arizona border into the 29 Palms area on Hwy 62 I see a vast open desert from Vidal Junction to 29 Palms.

**Date Comment Received** 3/25/2011

**Response** Thank you for your comment. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center, which was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment ID** 264

**Comment** The areas open for recreational off-road vehicle use are continuing to shrink state-wide. Though sensitive to the need for the military to carry out their necessary training, it would seem that their options for expanding training areas are much greater than those looking for public lands on which to recreate. If this land acquisition is absolutely and uniquely necessary, perhaps there can be some land provided in another area presently controlled by the military and yet not in critical use.

**Date Comment Received** 3/25/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps does not have the authority to

designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** The Johnson Valley area needs to be open from the Cougar Buttes area, east to the Means Dry Lake & Hammer Trail area. This area is heavily used by families for camping and off road fun. We are all patriotic Americans & want the Marines to have the training they need, but the area is so large, that we should be able share this beautiful rugged desert. As far as the Environmental Impact, the Off Road users will do less damage than the Marines and there training will. By closing this to the Off Roder's, you will force them to over use the remaining areas that are open to ORV activity. That would be bad for the environment. PLEASE... Don't Tread On Us.

**Date Comment Received** 3/25/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the

Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use (including the Hammers area, Cougar Buttes, and Means Dry Lake). Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** I certainly understand the need for training and recognise the requirement for this proposed action. I am an off roader and outdoor enthusiast. Please do not encroach on the eastern side of the base. I have seen the wildlife that reside in the mountains. The Desert Bighorn Sheep are beautiful, majestic and attempting to squeak out an existence in the area. Even though the acquisition does not encompass their usual habitat, it will be very close. I believe that closeness will affect their lifestyle. These shy and elusive creatures climb many mountains in search of food and I cannot imagine what a disturbance the actions of Marine activities nearby would do to their existence. I would rather see the land be taken from the western edge in the Johnson Valley area.

**Comment** As a landowner on the edge of the proposed acquisition, I oppose the proposal on the basis of safety, preserving the natural habitat and serenity of our environment, and strongly urge the government to find another alternative that does not so devastatingly affect the Johnson Valley area. At present, we hear some of the Marine activity, and find it disruptive from time to time.....should the area expand as proposed, all residents in the area would be powerfully negatively affected, to an extent that is absolutely unacceptable.

**Date Comment Received** 3/25/2011

**Response** Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use under the proposed action may be periodically detected by residents and other members of the public from a distance, and may sometimes be an annoyance. Although proposed training activities would increase noise levels in adjacent land areas, noise levels would not exceed the threshold criteria outside of the proposed acquisition boundaries. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** My husband and I own land bordering the ORV area of Johnson Valley, and are extremely concerned about the proposed takeover of land for the Marine Base. We and our children are avid ORV'ers and nature lovers, and have developed a great love and appreciation for the beauty of the Johnson Valley area, it's history and natural beauty. We take great pride in making every effort to preserve it's intactness, and in sharing it with amazed and impressed visitors and friends. I believe that this would be lost if the proposed changes are implemented, and the beauty and perhaps more importantly, the safety of the area for all to enjoy, will be compromised. Do NOT allow the proposal to go forward!

**Date Comment Received** 3/25/2011

**Comment** Hi my name is steve clavett. I am sending this in To help the efforts of many other friends and fellow offroaders. Now i do greatly support the military and especially the marines in what they do for us, our country, our saftey, and our freedom. And i am forever in debt to these outstanding men and woman. I do understand the need for this land in order to train and ready people to better prepare for what they are about to face. How ever. This land is become almost a life goal for people like me. Seeing how people can work together and have fun in the way of offroading in the johnson valley area is very special to me and my community. My father has been very active in what the offroad community has been doing out there with the "King of the Hammers" race and it has become more than just getting some friends together for a weekend of fun. it is a tradition and for some a way of life. I have shared some very special times there with my father and have always hoped to have kids of my own and to be able to share this experience as it has been shared with me. I am now attending school for auomotive in hopes to one day. make it out there with my own offroad rig myself that I have built and prepared just so I my experience what has becomea legend. Please do not strip me from my dreams. There has to be anouther place where you can train and support our troops. i do not want them to go un trained i would just like it to happen at a diffrent facility. This place represents A sort of home or well being for allot of people. And if you take this away from us it will be devistating to more people than you can imagine. Please for the sake of current and future offroaders. Do not take away johnson valley. Thank you, Steven

**Date Comment Received** 3/25/2011

**Response** Thank you for your comment. **Comment** Can not view your files even though we have Adobe 9.4.3 as you stated we need. Don't know why 29 palms can't continue to use/share the area of FT. Irwin. The government has taken over enough land. The area proposed (AKI Johnson Valley/Hammers) is greatly used by off-roaders and is a very scenic area. Environmentalists keep finding ways to close everything to off-roading. The land and people can and have gotten along well together for many years. Leave us somewhere to go. Don't know why you provided the public a opportunity to speak as the gov. always takes what they want anyway!

**Date Comment Received** 3/26/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S. such as Fort Irwin) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I believe having a trained Marine Corps is very important. I also believe that Johnson Valley is a cherished public use area that has been and continues to be enjoyed by many for many reasons. These types of Public lands continue to shrink, California OHV funds continue to be misdirected and many other area's around the base that do not encompass a OHV area

should be considered. I believe the direction should go east of the Base where many do not go or recreate.

**Date Comment Received** 3/26/2011

**Comment** ohnson Valley has been an Off Road Recreation Area for 40+ years. In fact, it is one of the few remaining Off Road Areas left for vehicle racing. While I am aware of the training needs of the USMC, I feel other areas surrounding the 29 Palms could be utilized. If you must use this particular area, an acre for acre land swap must be implemented in order to address the future needs of the Off Road Recreation Area users.

**Date Comment Received** 3/26/2011

**Response** Thank you for your comment. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. **Comment** By closing the Johnson Valley the tens of thousands of people that ride and recreate in the Desert will be squeezed down to even smaller patch of desert. This over crowding will put the public at risk and over use of the desert will impact the small patch of renaming desert still open. This will force Illegal Use of the Closed areas and encourage illegal riding and driving in environmentally sensitive areas. Every citizen should insist the Military Share the Large bases surrounding the 29 Palms base not take more desert. Te Army recently expanded and took over a large section of desert just north of Barstow. They should share with the Marines!

**Date Comment Received** 3/27/2011

**Comment** My family and I are opposed to the Marines taking over a portion of Johnson Valley. Johnson Valley is the largest OHV area in the U.S., and should remain that way. We have been going to Johnson Valley as a family for years. Moreover, we live in Lucerne Valley and the economic impact on our town needs to be seriously considered. The businesses in Lucerne Valley survive on the off-roaders that go Johnson Valley. The Q&A states that it would still be available ten months out of the year. Two months of this land being closed to the public will have a negative impact on these businesses and may cause some of them to close their doors. Again, WE ARE OPPOSED TO THE MARTINES TAKING LAND FROM JOHNSON VALLEY.

**Date Comment Received** 3/27/2011

**Comment** Just wanted to share my thoughts on the new land acquisition. I recently visited Johnson Valley OHV area last month for the King of Hammers Race. Johnson Valley was a great place. I feel it was a huge mistake to take this land away from all of the enthusiasts. Myself from CO and two others from MO flew into Las Vegas and rented a RV and camped in Johnson Valley for the week. We spent a great amount of money in the local lucerne valley area. Im not sure if totals have been made but Im sure millions were spent into the local economy during this one week event. Everyone worked well with BLM and their strict requirements at this year's KOH race. If Johnson Valley is kept open this event will continue to grow and bring more money into the local economy than the local could ever imagine. Please keep this area open!!!! We are losing land to legally use more and more every day. This is really a unique place I feel everyone should get a chance to experience before its taken over and closed.

**Date Comment Received** 3/27/2011

**Comment** Due to the dwindling areas of availability for OHV users I would like to see the USMC leave the area as is. Civilian and Military co-existence rarely works and usually ends in one or the other leaving. I have stood my watch and understand the need for good training. There is plenty of underutilized areas already restricted that should be looked into before these lands are seized.

**Comment** my concern with the amount of land the marines want to take, it will take away from open desert that i refer to as a second home! i grew up near 29 palms marine base (in yucca valley) and having to deal with that. i have no problems with them wanting to expand for training just not to the west. the west is pretty much all that's left for us ohv users in the Johnson Valley area. with so much land to the east that's not open to us.why cant the marines go that way. its further away from the population as well! the noise and air traffic will be a major problem being that close to major desert city's and towns. taking away from the desert for ohv use will also hurt some

smaller towns in the area with the loss of much needed business. not to mention with people not going riding then they do not spend money on or purchase ohv's which hurts that already weak industry. i have already been in the bad side of the decline in the industry due to the crash of the economy and was out of work for 6 months. if this expansion goes through it will be another big blow to the Southern California off road industry.

**Date Comment Received** 3/27/2011

**Comment** I am against expansion of the Twentynine Palms Marine Base into Johnson Valley. Expansion into Johnson Valley is inconsistent with the Johnson Vally OHV Area Management Plan. The impacts to OHV recreation would significant, which would also negatively impact the economies of the small communities surrounding Johnson Valley. At a time when OHV use has been steadily rising, acreage available for OHV use has been decreasing. The further decrease in available acreage due to the base expansion to the west would be devastating. I recently traveled from my home in Western Colorado to Yucca Valley, CA, along with seven other friends and family members, for the sole reason of enjoying the OHV recreation available in Johnson Valley. With the acreage currently available for OHV recreation,

we were able to enjoy 6 days of fun in the desert, and spent 7 nights in Yucca Valley. While we were there we stayed in a local hotel, purchased fuel several times, purchased groceries, visited local 4WD shops for repairs, made purchases in local auto parts stores, and ate in several different local restaurants and coffee shops. Another group from Colorado, larger than our group, was there the same week we were, also spending their vacation dollars in the local communities. It's due to the current quality of OHV opportunities that recreationists like us make the 700+ mile trip to spend our vacation time and money in Johnson Valley. We wouldn't do that if the base were to take away the public's access to the public lands that are of high value to the public.

**Date Comment Received** 3/27/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The EIS also evaluates land use incompatibilities and inconsistencies in Section 4.1.

**Comment** I BELIEVE IN A VERY STRONG MILATERY. VERY STRONG. NO BODY TAKES ON ONE THEY KNOW THEY CANT BEAT. AND I BELIEVE IN CARRING THE BIGGEST STICK ALSO.NOT TO USE FOR EVIL BUT FOR GOOD..I HAVE SERVED IN THE US NAVY AND AM PROUD TO SAY SO. I LOVE AMERICA AND THE MILATERY. BUT I HAVE LOVED TO RIDE AND RACE MOTCYCLES ALL MY LIFE. AND SEEN HOW WE THAT DO HAVE

HAD TO FIGHT FOR EVERY FOOT OF GROUND WE RIDE ON FOR OVER 40 YEARS WE HAVE HAD LAND TAKEN AWAY FROM US .PUBLIC LANDS THAT WE SERVED AND DEFINDED TO KEEP AS FREE AMERICAN. THE LUCERN VALLEY AREA HAS BEEN A GREAT PLACE TO RIDE IN FOR OVER 50 YEARS.AND NOW YOU ASK US TO GIVE IT UP AND LEAVE US WITH NOTHING. IF THE GOVERMENT GIVES US ANOTHER LARGE AREA TO USE AND RIDE IN IT IS OK. BUT DONT JUST THROW US A BONE. AND THINK IT WILL BE OK.THERE IS FAR MORE LAND IN THIS COUNTRY THAN WE WILL EVER USE FOR OPEN RIDEING. SO IF THE GOVERNMENT TREATS THE PEOPLE OF AMERICAN THAT LOVE TO RIDE AND USE FOR RECREATION. AND IT IS GOOD LAND THEN I HAVE NO PROBLEM WITH IT.

**Comment** I would like to lend my support for the Marine Corp expaning their trainig facilities at 29 Palms. Having spent time in the area as a guest of a retired Marine as well as a periodic recreational user of the Johnson Valley OHV area and surrounding areas I would like to lend my support to Alternative 3 as the best alternative. I believe that Alternative 3 will provide the Marine Corps the needed space for training and have the least impact on the the citizens of the area and recreational users. Please make Alternative 3 your preferred alternative. The current preferred alternative - Alternative 6 is superior to alternatives 1, 2, 4 & 5 but has a greater potential for a negetive impact on the local citizens and recreational users thus I believe that Alternative 6 should be ranked second to Alternative 3. What are the proposed 2 months that the public would be restricted from portions of the

Johnson Valley OHV area under Alternative 6? Please keep in mind that the Johnson Valley OHV area currently sees minimal usage from May 15 - October 15 with peak usage occurring during the remaining 7 months. Alternative 3 is a great alternative / option and I hope that the Marine Corp will successfully pursue this alternative / option.

**Date Comment Received** 3/27/2011

**Response** Thank you for your comment. The proposed two months of usage have not been determined at this time; however it is expected that training would occur in the spring and fall. Exact timeframes will be determined and communicated to the public if Alternative 4, 5, or 6 is selected.

**Comment** I am upset that the military and the BLM are constantly trying to take away our off road areas. I am an avid off roader and I respect the desert highly. I participate in CORVAs Clean Dezeret program every year. I always take away more trash then I bring. I "spot correct" and or report vandalism and or abuse of the dezert. I know alot of this si due to the tragedy that happened at Luncerne Valley last August. My opinion on that issue is that it was no fault of the drivers and the fans were too close to the track. I am pleaded not to take anymore of our off road areas. Thanks. Bruce Barnes

**Date Comment Received** 3/27/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** We as Americans appreciate the great work the men and women of the military are doing. I myself are a veteran and believe it is our duty to support our country. But I have a real problem with another big land grab of our public OHV land. Having lived in Calif for 25yrs, Ive watched acres after acres being fenced off from the public and turned into preserves for the enviroment. With this land grab it will take at least half of the Johnson Valley public OHV land, the same land we take our families and friends out to enjoy the beauty of the high desert. With the econuts grabing public land for national preserves and the military needing more for training, whats left for the public. If this action happens, the state needs to repace the acerage like for like with land in the high desert. With 29 Palms being the largest Marines base, isn't it large enough?

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** If the 29 Palms training area is the only place where the Marines can fulfill their training need, then they need to go east and expand to the Arizona boarder. I am aware of the small area of protected land east of the base, and if expanding east, this would cause a bottleneck for training. Well, what if this was a war, what are the Marines going to do, say sorry, can't go that way, because of a bottleneck. Take that land too then. The Marines are not worried about preserving the environment anyway, not when they use life munitions and bombs. Go east, stay out of Johnson Valley. Stay away from the people who live there, do business there. Don't take their homes, go east, nobody is out there. Don't take the best recreation area in Southern California, Johnson Valley OHV Area. It is very sad the people in our country has to fight their own military for what is theirs, when there are other solutions available. You have over 900 square miles already, if you can't make it happen with that, what is the problem? Go train with Army in Barstow. You go to war with them, go train with them.

**Date Comment Received** 3/28/2011

**Comment** The continued training of our freedom fighting forces is paramount to anything that could conflict my recreational riding and camping tours. But, I am pleased with the Co-habitation of the training grounds. You have an established 2 month schedule and the OHV areas are open for use the other ten months of the year. THANK YOU, Military and political leaders. By putting the military training first and still letting the public in and planning for us to be there is a great bennifit for all interested parties. The ONLY way for me to keep my freedom and my freedom to ride is for the military to be there first.

**Comment** I hope that this does not go through. I live in and recreate in this area. My family and many friends have been utilizing this public land for many years. I would hate to see it closed down to such a small area. I race the District 37 desert series and this will drastically affect it and the entire ohv

community. Which will intern effect the economy. My towns economy is greatly affected by the weekend recreation dollars that are generated by the ohv community. I hope this expansion does not go through. It would be a shame to cause even more people to become unemployed so that 1% of the United States population can have a bigger training area.

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. **Comment** I understand the importance of training troops for combat. However, with the vast amounts of land to the east and the resources already available at Ft. Erwin, I fail to understand overtaking the area currently being used by the off-road vehicle users. We have already limited areas to recreate and this acquisition will severely impact us.

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center, which was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I am a supporter of the US military, however I am adamantly opposed to the acquisition of land in the Johnson valley off road area. Wholesome family recreation is getting hard to find. Off road areas are increasingly under attack and closure. protection of public lands should be our highest priority. What is the point of spilling American blood only to close ourselves out of our own land? Military training is of the utmost importance, but not at the expense of the land and life style the military is tasked to protect. Respectfully submitted, Charles Callicott

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. The Marine Corps appreciates your comment and participation in the NEPA process. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Please discontinue the thought, and action of seizing land from the taxpaying ohv community. We have been stangled to death already by the enviromentalists, we don't need to lose any more riding area from the military too. We pay our taxes, and bring in large amounts of money into the lucern valley and neiboring cities with our races. Our people are of family nature, and our racing is our life. many of our racers are active and retired military, police and fire fighters. We are the good people of the usa that fully support our troops and federal funding for the saftey of our nation. Please don't take from us, the people that love and cherish you. There are many better options rather to take our land. please refrain from this and take

land elsewhere if absolutly needed.the ohv community loves you guys,please show us some love and let us be,and let us keep our racing. If you take this land you will destroy an american tradition.the only other place we have is red mountian,and that is limited to. I drive hundreds of miles just to race here and be wih my friends and family.please don't take this from us.

**Comment** I understand the issue of space. Please understand the off road communities position on space. For decades, we have been pushed into smaller and smaller areas to recreate and participate in our sport to the point where there is hardly any land left. If there was a compromise where one area of restricted land was given to off roaders in exchange for what the Marines wish to take, then there would be more support. However, with the current options, this is not the case and as a result, we are losing again. It is sad. Between the environmentalists and now the Marine Corps, there soon will be nothing left.

**Date Comment Received** 3/28/2011

**Comment** I respectfully submit that the Johnson Valley OHV area remain open to public access indefinitely, without limitation. Johnson Valley OHV is a jewel of the OHV community and has been enjoyed for generations and should be accessible for generations to come. I believe the offroad community has less of an environmental impact than any military operation conducted in the area. I also believe that our community should not agree to share the area with the U.S. Marine Corp because I believe the Marine Corp will determine that more training time will be needed to conduct exercises in Johnson Valley OHV and our right to access the land will be gone. Therefore, I petition to opt for No Action- ( No New Land). I respect the U.S. Armed Forces and all service members for their sacrifice to uphold our freedom at home. We have the most powerful military force in the world. Surely our forces can maintain this strength without encroaching onto Johnson Valley OHV. Sincerely submitted, Robert Galletta.

**Comment** There are so many things wrong with this...Environmentally: Whats worse for the plants and animals, atv's, dirt bike's, 4x4's or 3 battalions of tanks? Economically: You're going to crush apple and lucerne valleys. If this expansion is allowed to happen there will be no reason for anyone to pass through these cities. That should put a dent in local businesses and tax revenues. Safety: California already has too few ohv areas and you plan on taking one more away. which mean more and more people in the remaining areas. Land use: This is public land after all. I really enjoy the space and freedom it provides. Its great having somewhere to go that doesn't charge an

entry fee for some tables, a pit toilet and the option to pay \$10 more for wifi. Alt 6 is still a land grab. Should we be excited the marines lock down 3/4s of the area in question and leave 1/4 for us depending on the time of year? Fort Irwin has plenty of space and I doubt the Army is training 100% of the time. As for your 'goals' not being compatible, schedule some time when the army isn't running maneuvers and do whatever you want.

**Date Comment Received** 3/28/2011

**Response**

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study.

Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally

prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

**Comment** There isn't a service member around I would not give the shirt off my back to, but who is running the show in our military? Marines need all this space to practice a large scall battle? Who is keeping up with current events at Marine headquarters? Maybe the Chinese could pull this off but do the Marines think the Chinese are going to waste resources on a desert war in the middle east? No, they are smarter than us. Also, if they invaded the US; do we really believe they will head for our desert south west to do battle? Our current enemies do not have the resources to fight that kind of war and the Chinese would not head for the Mojave to have it out with the Marines. This is just a blatant waste of tax payor money. Our military needs to be mobile, efficient and deadly. Do the brilliant generals really believe that there will be a war in the future were a bunch of tanks and soldiers will line up across an open area from each other and then say ready set go!?! We need a competent run military and the mentality this land grab is based on scares me. It is not about proper training it is a money grab.

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training

**Comment** As a military family who supports our warriors in every respect, I oppose the proposed land grab in Johnson Valley California. This area is regarded the world-over as the premier off-road destination in the world. The King of Hammers race brings tens of thousands of people to Means Dry Lake Bed to witness the world's toughest off-road race. I understand that the military would like to expand their training area into our off-road Mecca, but to me, you are taking away land owned by the people, against our will. Using this land for military operations will have a far more negative impact on the environment than families driving their Jeeps do. Also, once you start dropping ordinance in the area, it will never again be given back to its rightful owners (the public) for safety reasons. We have already seen how this works out in other areas of California and in Nevada. Its amazing that given the vast expanse of desert in the southwest, due to military use and environmental regulations, the public only gets to enjoy a very small portion, and now you plan to take that. Please reconsider taking this land away from us, so that our children and grand children can enjoy it like my father and I have.

**Date Comment Received** 3/28/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the

I have been following this issue for some time. As an active offroader, my wife, two daughters, and I have spent many weekends exploring the area in and around Johnson Valley and the Means dry lake bed. Those trips have provided my family with many fond memories and hopefully many more to come but I am concerned that the current plan of limited access, 10 months, is only a stepping stone to complete closure of the area. As a veteran of the US Air Force, I appreciate the need for top level training facilities for all branches of our military and I support land acquisitions when necessary but in this case I can't see the advantage of training lands so close to popular offroading areas. It seems like an accident waiting to happen to place live fire exercises so close to public use land or even worse share lands. As I mentioned before I am very familiar with the area and know there is more than enough land out there between 29 palms and highway 40 away from the popular offroading areas that can serve as raining areas. It is my opinion that NAVFAC and the Marine Core stay away from the popular offroading areas in Johnson Valley and expand East for their training areas. Having a shared use area in my opinion is dangerous and only provides opportunity for the future complete closure of the area after one or two inevitable incidents. Thank you, Chris Mock

Yes we need to train our troops. Yes we need land to do this. But you need not to take this land from us The People. There is plenty of land east of Johnson Valley that is more than applicable to host live training. The impact of this would be devastating to the off road community. It would also destroy the lively hood of many business and organizations the depend on the users of this land to generate revenue for their business. I strongly oppose the joint uses of Johnson valley as we would not be able to use this land once live ordnances have been fired. This would be considered a hot zone and would be permanently shut down to the public. SAVE JOHNSON VALLEY!!! Thank you Mr. Garrison and Family

**Date Comment Received**

3/29/2011

**Response**

Thank you for your comment. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center, which was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range sweep, and range clearance) that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted

Public Access Area to be available for public use (refer to Section 2.5 of the EIS). If acquired lands were transferred back to public domain, the Marine Corps would be required to comply with range closure procedures (USEPA 40 CFR Part 300), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Base Realignment and Closure Policies (BRAC), Reporting Hazardous Substance Activity When Selling or Transferring Federal Real Property (40 CFR Part 373), and Defense Environmental Restoration Program (DERP) (10 USC 2701).

I was brought up in rural Illinois on a farm and participated in the Boy Scouts for the majority of my adolescent life. The outdoors have been a part of my life for as long as I can remember and I want to pass this on to my children. I have been taking my family out to Johnson Valley, Cougar Buttes, and the San Bernardino National Forest as often as I possibly can for camp outs and family recreation for the last 3 years. I think it is an important part of teaching my children about the environment and the responsibility we have as human beings to be good stewards of it. My children have been able to see and experience the outdoors in a way that many my civilian peers have only seen through books and the internet. This also gives my wife and I an opportunity to really press home, what we believe, is a good moral foundation for our children. As a member of the off-road/Off-Highway Vehicle (OHV) community and having been a U.S. Marine for over 17 years I have the following comments to be submitted on the Draft Environment Impact Statement (DEIS). The DEIS does not cover some of the crucial points that the OHV community would need answered. Is the Federal Government, Department of the Navy, and United States Marine Corps willing to take on liability for the public in the use of the Restricted Public Access Area (RPAA) and the management of an OHV area? In the management of public lands and specifically Johnson Valley the BLM has stipulations for Special Recreational Permits (SRP) which include specific insurance levels for event holders. For the Marine Corps to get into public land management I believe is a bad idea, especially from a liability perspective. Much of the actual management of the RPAA is not defined in the DEIS and I believe for the government and its people to make an informed decision on the Marine Corps Air Ground Combat Center (MCAGCC) Land Acquisition that these details need to be worked out. What will the process for permitting RPAA users would be? How would that access permitting be policed? Would there be infrastructure there in Johnson Valley to support the un-informed desert adventurer and

provide them the training and access same day? What would event promoters need to do as far as obtaining a SRP? Would there be fees involved? How would that work if an event was to take place in both the RPAA and the open access area of Cougar Buttes, i.e. as an event promoter would I have to pay both the Marine Corps and the BLM to be able to host that event? What levels and what type of insurance would need to be obtained for the event? Johnson Valley has also supported the filming industry as well, how would those crew members (some being hired on the day of) be permitted use? I have participated in several division level exercises at the combat center that I think would come close to the size of a MEB type “large scale exercise” where, in the Final Exercise (FINEX) the ground force (2-3 Battalions) would assault from the southeast, through multiple corridors, using combined arms and consolidate on a target in the northwestern corner of the Combat Center know as the Sunshine Peak Training Area (TA). I personally have not participated in one of those exercises since the summer of 2003 I have however; been to both Iraq and Afghanistan as part of an Infantry Battalion/Battalion Landing Team. Since then technology and tactics have changed and I accept that it may require more ground to fully exercise those assets. But, as a former member of the MCAGCC Range Control, I know that 1st Marine Division has sent a Special Purpose Marine Air Ground Task Force (SPMAGTF) within the last year to conduct such an exercise (Steel Knight) with over 10,000 troops, just slightly smaller than the exercise force for a MEB exercise. I also understand that the Sunshine Peak TA has been closed to all training units so that aircraft exiting the R2501 airspace can expend any remaining ordnance they have on their craft so they can land safely at their home base. If we require more land to complete our training I think it is the Marine Corps’ responsibility to look inward first. While being assigned to 2d Marine Division we did several long range exercises including some Tactical Exercises Without Troops (TEWTs) hopping from Camp Lejeune through various public lands all the way to Fort A.P. Hill. Whereas the land was only temporarily occupied, this would be the case with a MEBEX, and did not require an increase in infrastructure or any significant cost to the Marine Corps. I think that an alternative of partial public land closure to the public during a MEBEX where the operating force would simply maneuver through public lands would not incur significant cost to the Marine Corps or be a detriment to the public’s recreational opportunities. I believe that if additional land ownership is a requirement of the MEB level exercises it would best be played out as put forth in the DEIS as Alternative 3. I have operated at Fort Bliss which has a similar Main Service Road (MSR) running north/south through the training area that must be closed by unit road guards for unspecified times which is also not too unlike Highway 172 at Camp Lejeune.

**Date Comment Received** 3/29/2011

**Response** Thank you for your comment. The specific details on management of the RPAA in regards to permitting process, permits and fees for events in the RPAA, etc. have not been formalized at this time. If the alternative selected is one that would involve an RPAA a Recreation Management Plan would be developed that would address these details (see Section 4.2.5.4). An Educational Outreach Plan would also be developed under all action alternatives. The Recreation Management Plan would be subject to further analysis and public involvement under NEPA, including soliciting input from the public, BLM, and other agencies. As described in Section 1.3 of the Draft EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

**Comment** I am an off road motorcycle enthusiast since 1967. I got my start in motorcycling in the shadow of the 29 palms marine base, as my grandfather had a homestead on bluegrass trail. While I always support the military missions that are assigned by the president. The lose of use of Johnson valley would hurt just the same as the loss of the towers in New York. The very task of protecting the citizenship can not justify takeing the very lands away you are assigned to protect. Th 29 palms base is very large and i would suggest taht the train rules be changed so that the Marines needs can be met on their current lands available Thank you

**Comment** As a former active duty Marine I agree that the training required is essential for combat operations, But I have seen too much recreation land become off limits to offroad campers, motorcycles and other offroad recreation. The Johnson Valley area is still one of the few places wide open to experience the freedoms which service men of all branches have fought for. The desert is a very large place shrinking on an ongoing basis. Before I would be on board with any additional acquisition of public lands I would like to see the existing lands used more efficiently. We tend to want more without using what we have wisely. Show the maps with the plans before attaching the property and then ask yourselves if this is really what you need!!

**Comment** Let me start by saying I respect all our Military and everything they do for us. My concern is the acquisition of Johnson Valley OHV in California is not taking into account the impact to local economies and the culture of offroad rock crawling. The loss to the offroading community would be dramatic. The Hammers holds the roots of offroad rock crawling. In the midst of many public land closures we are losing places to get out and enjoy our sport. I ask that you please consider other areas for expanding our Military base. I am not in favor of Marine Corps Air Ground Combat Center at Twentynine Palms, California taking over any portion of Johnson Valley OHV.

**Date Comment Received** 3/29/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a

direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I fully understand that we need training areas for our troops. Please consider any other area besides the one that has been chosen now. We do not need to train our troops in desert only scenarios. Taking away public land that is used by thousands of people for recreation is not the answer. It is not the ONLY answer! Please reconsider other areas, despite the fact that they maybe in more mountain / forested areas in our nation. Thank you, Armistead Coleman

**Date Comment Received** 3/30/2011

**Response** Thank you for your comments. **Comment** Contrary to common belief, off road recreation is an endangered species. With constant attacks from environmental extremist groups, our available riding areas are dwindling to nil. I have to drive 4 hours from San Diego to utilize the Johnson Valley area, and now you are looking at removing that as an option. Is the Marine Corps planning on mitigating this land acquisition by offering up land from one of their other bases? If you fly across this part of the country there appears to be miles and miles of unoccupied desert. It would seem that the U.S. Government, with it's vast mapping, planning and logistical capability would have the resources to find un-utilized land for their training purposes; land that has not had years of effort to turn it into a mecca for off roaders. Many off road groups have volunteered for years to help build Johnson Valley into what it is today- a world recognized off-roading experience. Please do NOT take it away.

**Date Comment Received** 3/30/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** No concerns or issues with proposed expansion. Believe training needs of our armed forces that protect us, defend us and preserve our freedom are far more important than preserving the hand wringing desires of what has become the new religion of extreme environmentalism who, under the guise of saving natural resources for future citizens destroy the economy, impede growth, restrict freedoms and now try to hinder our nations defenders ability to maintain the strength needed to continue to be the best fighting force in the world.

**Comment** This area is not twenty-nine palms it is Johnson Valley. Home to King of the Hammers and dozens of other offroad events every year and one of the few offroad areas left in Southern California. One by one our government and environmental extremists alike take away areas set aside for those of us who chose to enjoy offroad motorsports. I find it very very hard to believe this is the "only" area that could be used for this testing. So I ask; if they are going to close this area down are they going to replace it with another area? Maybe give us the rest of Glamis (Imperial Sand Dunes) back or all of Riverside County or any of the hundreds of other areas closed over the last ten years? If this land is taken now it will never be given back or replaced. Southern California is very limited on open space the public can enjoy as it is and this acquisition will only make matters worse.

**Date Comment Received** 3/30/2011

**Comment** While I am a supporter of our military and understand the need for training, I do not believe that the recreational areas surrounding Twentynine Palms, specifically the Johnson Valley Off Highway Vehicle (OHV) Recreational area is an acceptable location. As an avid outdoorsmen, and OHV enthusiast, I make trips each year to that area to recreate with my family. Removing our ability to access this area would have a severe, adverse impact on not only the interaction and dynamic of my family, but also of the local businesses that benefit from monies spent in travel, not just by me, but by ALL users of the area. With legal areas to enjoy a multitude of OHV lifestyles (Single track motorcycles, ATV's & Quads, as well as light duty 4WD vehicles) diminishing at an alarming rate, while the popularity of the hobby is on a rapid INCREASE, I feel that closing this area to recreation will do irreparable harm to an already struggling negative public opinion. Many times in the news you hear about people and children hurt or unfortunately even killed while riding an OHV. By diminishing our areas to legally and safely enjoy our hobby, it will force more people to ride illegally, unmonitored, and trespass in areas that they shouldn't be, contributing to a direct increase in injuries and fatalities. As an American and outdoorsman, I implore that you save the Johnson Valley Recreational area for all of the general public to enjoy. Thank you for your time.

**Date Comment Received** 4/1/2011

**Response** Thank you for your comment. **Comment** I have worked at China Lake, Fort Irwin NTC and am not sure why you can't train with the Army at NTC. The desert is the desert. If you are going to build realistic training environments, NTC has plenty of established training props. Beat up the desert you currently have and God Bless you for protecting the USA.

**Date Comment Received** 4/1/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

**Comment** Just the same as wilderness is hard to change back to various uses, BLM is difficult to close to various uses. Environmentalists know this so through high profile influences they convince military that they need this land. Furthermore, they know they can't win through trail closure but can try and kill an industry that supports it. Take away hard core trails and you take away incentive to build performance products for our sport, then the sport dies. I feel the Johnson Valley closure would be devastating to the enthusiasm of rock crawling as we know it. Just my two cents.

<b>Comment</b>	I am all for the marines needing training and am all right if they want to use some of Johnson valley for it 2 months out of the year but to loose some of the public land and trails permanently is not all right. The public is losing land all the time to environmental causes, growth, and other reasons that don't make sense and we are forced to gather in areas unsuitable for the amount of people because there is not enough places to go and recreate. I have been going to Johnson valley for the last 15 years starting with my father and I going and now it's my son and I doing this trip, hopefully I can continue to do this for the rest of my life and my grand children's life too. We need to keep Johnson valley the way it is, open to the public and access to all the trails we already have.

**Comment** Yes we need to train our troops. Yes we need land to do this. But you need not to take this land from us The People. There is plenty of land east of Johnson Valley that is more than applicable to host live training. The impact of this would be devastating to the off road community. It would also destroy the lively hood of many business and organizations the depend on the users of this land to generate revenue for their business. I strongly oppose the joint uses of Johnson valley as we would not be able to use this land once live ordinances have been fired. This would be considered a hot zone and would be permanently shut down to the public. ....

**Date Comment Received** 4/5/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

## Appendix N – Response to Public Comments on the Draft EIS

---

**Response** The Marine Corps appreciates your comment and participation in the NEPA process.

**Comment ID** 349

**Last Name** Nuss

**First Name** Richard

**Comment** I do not understand why you don't go to the east of twenty-nine palms? As a veteran, I appreciate the needs of the Corps to train our troops. It's the location that has been selected I have the problem with. The OHV community has had land taken away from us at rate that will leave no where for our kids to ride. If the land is needed, can we atleast get an equal amount of land returned in another area?

**Date Comment Received** 4/5/2011

**Response** Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment ID** 350

**Comment** I oppose the proposal. The public lands are for public use. They should be used for peaceful, recreational purposes, not to train for war. I am concerned about environmental contamination by elements such as lead and uranium that are used in live-fire exercises. These toxins contaminate the air, soil, and potentially the groundwater. The US is involved in too many wars and there is too much militarism in our society. Expanding training facilities for the Marines will only increase the degree of militarism in our communities, our public lands, our foreign policy, and our society. Enough already!

**Date Comment Received** 4/5/2011

**Response** Thank you for your comment. There is no requirement to use depleted uranium rounds in training. The Marine Corps has determined that

Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

**First Name**

**Comment** While I support the training of the marines, the land proposed to be taken over is great off-roading land with several difficult trails and I would hate to lose access to that land.

**Date Comment Received** 4/5/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** My family and I have been visiting the Johnson Valley area for over 30 years for recreational and leisure purposes. We shop at stores in Yucca Valley, Twentynine Palms, Landers and Barstow, enjoy riding and driving in the OHV area, attend desert races and explore the desert around our cabin in Landers. We have invested approx. \$100,000 in vehicles including ATV's, tow vehicle, trailer and jeep in order to enjoy the public lands. We respectfully urge that the Marine Corp. select any option for expansion that does not impact the Johnson Valley OHV area.

**Date Comment Received** 4/6/2011

**Response** The Marine Corps appreciates your comment and participation in the NEPA process. Public comments on the Draft EIS are an important part of the decision- making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I am a proud supporter of the Military in general. Having said that, I feel that the use of the Johnson Valley area is too close to populated areas for the purpose of live fire exercises. My family does use the area for off road family vacations. We have had wonderful family time there, and to be moved from there would hurt us a great deal! I am familiar with the area around the 29 Palms base and to move your exercises to the North and East towards Amboy and into the wilderness to the east would seem like a more realistic move. I live less than 20 miles from the Johnson Valley area, and I am also concerned that the exercise may impact the quality of life at home also. Another suggestion I have is to investigate the possibility of moving the area to the north to connect with the Fort Irwin exercise area. It seems that joint exercises would be a more viable training option. Thank you for the opportunity to comment on this topic. I am a proud American. I believe in our Fighting Men and Women and their Families! I want the USMC to Fight as they train. I am just hoping that the government will consider other options other than taking away our recreational space! Thank you!

**Date Comment Received** 4/8/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I would like to voice my concern for the public losing access to Johnson Valley and KOH 4x4 areas due to the proposed land acquisition. As a responsible outdoor enthusiast I would hope there would be a shared use agreement that would allow for public activities on this land when not being used by the military. As a 4x4, motorcycle and hiking enthusiast, it pains me to see the beautiful areas of American taken away from the public.

**Date Comment Received** 4/8/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** Regarding the USMC expansion at the 29 palms base. I really would like to say that while I am in full support of our troops especially our USMC, I am not in support of expanding the base into Johnson Valley. Johnson Valley is one of the greatest OHV areas in the US today. Every year this place generates a lot of money for our economy, Just this last February it brought thousands of dollars to our local businesses from the King of the Hammers event. They said over 70k people where there for up to as long as 3 weeks. This brought thousands of dollars for the BLM as well. Many of of have been taking our friend and family's to JV for years and would love

to continue to do so. Please reconsider this and look into building a new training area some where else, maybe somewhere away from the general public.

**Date Comment Received** 4/9/2011

**Response** The Marine Corps appreciates your comment and participation in the NEPA process.

**Comment ID** 358

**Comment** I am a Johnson Valley land owner and have been a user of the Johnson Valley OHV area for almost 20 years. While I fully support the Marine Corps and their need for large scale combined arms live fire training I believe that alternative six is unreasonable both in it's closure of the majority of the OHV area and it's impacts on local landowners. This is especially true as the Marine Corps states that exercises that will only be conducted about 60 days a year. As a landowner, alternative six will cause my property value to be diminished to almost zero. We CAN hear noise from current training (including aircraft and artillery.) Should the training objective be practically on my doorstep in the west there WILL be noise and dust and any potential buyer of the property will know it. As I plan to retire on my property, I do not relish the thought of aircraft, artillery, and small arms fire going on for days during an exercise while I attempt to enjoy my retirement. As a user of the OHV area, the plan is equally worse. The preferred alternative cuts off access to one of the premier off-road recreation areas in the western United States. Rock-crawling at the Hammers is not all the area is used for. The plan will end off-road races (including The King of the Hammers and others) and put an end numerous other organized events. However this isn't as important as the fact that it will stop thousands of people from just going out and playing in the dirt and enjoying the outdoors on our PUBLIC lands. I implore the Department of the Navy to consider these facts and if Johnson Valley MUST be used for this purpose (as opposed to unoccupied areas in the middle of Nevada) that they select an alternative that allows FULL USE of the Johnson Valley OHV area when training is not going on (10 months of the year) AND requires that live fire occur only within the present Twentynine Palms base.

**Date Comment Received** 4/10/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. The EIS acknowledges potential impacts to property values due to increased noise and proximity to military operating areas (see Section 4.3 of the EIS). The EIS concludes that any reduction in property value would likely be marginal and less than significant.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I'm a Northern California resident that has wheeled the hammers since there inception. I make the trek there twice a year and enjoy the wheeling immensely. It's such a shame when politics intervene in decision making that takes away public lands and personal freedoms. I guess it's the times we live in, but don't have to like. This off road park should be left to the outdoor use people and the Marine base can be expanded to the other side of the valley. That way no one is impacted. I'm a Viet Nam vet and completely support our military. However when lobbying groups and politicians play games with our freedoms, I have to draw the line there. Please make all considerations when making your decision to impact our offroad park. Sincerely, Chuck Vanderpool Also consider the impact to local business that will occur based on your decision.

**Comment** I am not convinced that we cant train our troops with what we have now! I read the reasons BUT it seems very weak. If the training was modified to use what is in place Im sure the objectives could be met. The Marines have

some very smart folks along with private contractors to come up with a modified training program. I WILL HELP (for FREE), I have a very good field training background from decades of live fire (wild fire) training, Give me a shot at it..... D O U G A N D E R S O N

**Date Comment Received** 4/11/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. The Marine Corps appreciates your comment and participation in the NEPA process.

**Comment** As an avid offroader and a supporter of the military with many members of my family currently serving I have to object to an expansion into the Johnson Valley area. A large part of our areas for family recreation are being closed and contested by tree huggers. Now the military wants to take land from us. We pay taxes and land use fees to keep areas open. the military needs to use an alternate site.

**Date Comment Received** 4/11/2011

**Comment** As a long time user of the Johnson Valley, Means Dry Lake area, I find it appalling that the military is trying to take it over. There is so much land not being used to the North and East that can be used for the military's purposes. I am a veteran and I understand that training is key, and support the military in every way. But again, there are other options not being considered here and I wonder why that is. Having said that, I suspect this will move forward no matter how many civilian users of the area speak up, so we need to figure out how best to land on some common ground. Obviously the feed back from the offroad community has not been as loud and outspoken as it needs to be, and I plan to help change that. I do not want to see the Johnson Valley area taken over by the military enve if the promise of continued recreational use is given. We all know how the government backs it promises these days. I have attended three meetings and will be a several more. I voice my opinion that the Military needs to seek other avenues and leave the johnson Valley area as it is. Byt the time the decision is made to take over the area it won't be needed for training anymore and massive amounts of money will be lost to the local community and spent needlessly by the miliatry. My tax dollars by the way. I say NO! NO ! NO!to this adventure. Stop it now. You don't need this land, it is a land grab by Fienstien and that is all it is. PERIOD! My tax money pays your salaries, and I served my time in the military so listen to me and others like me. Leaqve our recreation alone. Thank you very much, kurt kauffman

**Comment** This land is regularly used by the offroad community. The current expansion plan would involve sharing this land 10 months out of the year with the community. However, if this land is going to be used for battleground testing 2 months out of the year and used by the general public 10 months out of the year, there is a huge chance for the general population to encounter left behind ammunition or dangerous scenarios that weren't entirely cleaned up after the marines used the land.

**Date Comment Received** 4/12/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. The Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

**Comment** I have been riding in the desert for the last 15yrs. Our area is getting smaller and smaller. It is getting more and more crowded and will put more people in danger. There are millions of acres of desert and you want the little peices that we have to ride in for you to drop bombs, lead and brass casings in. What about going to the East? or how about Arizona? Thank You for giving us a chance to speak up.

**Date Comment Received** 4/12/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). **Comment** I must admit, I'm highly disappointed, but not surprised on the direction the military is going with this JV land grab. I feel the decision has been made well before this has become public several years ago. Last I knew, we live in the Land of the Free. And I know Freedom comes with a price. I honor all those who put their lives on the line to protect our Freedom(s). One of those freedoms is our Public Lands, and how we use them. JV BLM has so many uses, to name them all. And one of the most important uses to my family is the Designation of Off Highway Vehicle Use. My family enjoys what JV has to offer, especially being it's location and close proximity to the masses. Losing this area will have a huge negative impact on countless facets. To name just a few of many negative impacts, family recreation is compromised. Where else can we play with our families as we do here in JV, especially being it's location is near to millions. If we lose this public treasure, the expense to travel to lesser quality locations will be impossible to achieve, especially with the ever so high cost of travel. We personally cannot justify the severely added expense to the much farther, lesser quality locations. Therefore, we will forego and sell off our off-highway vehicles, such as two rock-crawlers, toy-hauler, amongst a few other accessories. Another huge impact will be to the local communities. Such as financially. I know the local communities have claimed their selves as Stakeholders in the process. I personally sat in on a few of their meetings of which is obvious they want the JV Land to remain as is for a multitude of valid reasons. I could only hope that JV will remain as is. But I strongly have my doubts. And if you give us the "Joint Use" condition, I see major potential

problems. One being you have full control on use, and we have none. However, if we the people have full control, and the "Joint Use" would be a permit only as anyone else. My fear is that once you have "Joint Use" control, I can see the scenario play out whereas while under your use, let's say one of your vehicles cannot account for a box of miscellaneous ordinances or such. Then it'd be easy to say the area is now off limits to all general public till the missing ordinances are accounted for. I personally do not like the idea of you guys holding the keys to our beloved OHV area. But if the general public has the keys, I'd feel a bit easier about who has control. Thank you, Steve Parker and Family

**Date Comment Received** 4/12/2011

**Response**

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Please consider moving the training area further east. It would be safer for the general public if you moved training further east rather than closer to the population. It is also very disheartening to me that I have spent my entire life enjoying the public lands of Johnson Valley and have spent most of that time taking care of this land. The idea of this land being blown apart after I have made a painstaking effort to clean this land just breaks my heart. The state of California has such few areas remaining for open desert camping. Please do not take this land. I understand the need and importance of training the military but employ you to take the training further east. Thank you for your consideration.

**Comment** Please DO NOT take away our public lands in such a way that impacts the Lucerne Valley Communities economics as well as depreciating our private property in Johnson Valley. The airspace around and over our airstrip 7CA1 appears to be severely restricted therefore making our strips unusable! Go East and or South of 29 Palms, please! If you take our airspace, you then shall buy our land!

**Date Comment Received** 4/12/2011

**Response** Thank you for your comment. The Marine Corps is sensitive to the potential effects the airspace proposals could have on commercial, business, and general aviation activities and will seek means to accommodate those interests to the greatest extent possible while also striving to meet their

flight training requirements. The airspace proposals will be examined in depth by the FAA and any measures required to mitigate impacts will be discussed with the Marine Corps, airport operators, and other aviation interests, as appropriate. The FAA outlines procedures for public use airports within boundaries of restricted airspace, these procedures will be followed for all airspace proposals. Marine Corps representatives will continue to maintain outreach programs to the civil aviation community to discuss their aviation requirements and those options that will best serve all interest in sharing use of the Combat Center airspace. The location of your particular airstrip will be taken into consideration for boundary revisions throughout the NEPA and FAA process.

<b>Comment</b>	I think it's awesome that the Marines want to acquire this land. Training is needed and can't be done just anywhere, twenty-nine palms is an excellent location for joint operations training. Some will complain about not being able to ride dirt bikes and ATV's but they should realise that what you all do does not come easy. Being able to execute large scale ground and air manoeuvres requires training area large enough to support the mission.

**Comment** Please don't close Johnson Valley (JV) to off roaders. Off roading in J.V. is a favorite past time to many Southern California off roaders/tax payers. This would require us to drive further to good riding areas which which is already a burden with \$4+ per gallon gas. There is plenty of land near 29 Palms where the Military can train.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment**

I understand the need for our military to train and to protect our country, however i feel taking land that was designated to the pubic as a poor choice. The open BLM,OHV land is growing smaller and smaller each year which cause more accidents as areas become overcrowded. I propose that if land is being taken away that we get land back in other areas so adventure groups still have places to recreate. Also i believe taking this land away from the public will greatly affect the entire high desert community as it will greatly diminish income from outside travelers to the commmunities that depend on our money. In the end i dont see how the military taking tons of land in the hopes of protecting the US freedom is really protecting the freedom at all. It seems as if its killing our open land and free rights to use that land, killing the cities and peoples lifestyles in those areas which are being taken over, and ultimately causing more harm then i see is giving back to the country. During a time while the nation has an all time low moral for the gov. based on horrible economy, high unemployment rates, sending troops to remote countries that most people feel we shouldnt be in, why cause more problems by taking away thier free land as well. In the end I hope a common agreemnt can be made that benefits all parties involved instead of a push and grab where the hard working outdoor people end up loosing everything without getting anything in return.

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Public comments on the Draft EIS are an important part of the decision-making process. Public input becomes part of the Final EIS and will be considered by the Department of the Navy during its decision

process. Consideration of national budget and other similar issues is outside the scope of a NEPA analysis. The EIS findings are one of many types of information that decision-makers will consider. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Please do not close or take away any of the Johnson Valley OHV area. Please go EAST. We already dont have enough areas to ride on. It has slowly been taken away from us. It would also hurt the local economy by eliminating the money spent in the area. This is one of the ONLY spots left in Socal to ride and race. Environmentalist are killing the family recreation of OHV use and now another entity wants to really make it hard for us to ride legally. Please consider another area. If we had more places to ride it wouldnt be so bad but we dont. Thank you.

**Comment** Please leave the OHV lands alone. This land means a lot to off roaders and their families. My sister and I bond over the time we are off roading. We don't see each other a lot since I live in NY and she lives in CA, but when I do get out there its important to be able to spend that quality time together. My younger sister and father travel to CA every year to do the same thing. These lands aren't just important to CA residents they are important to people from all over the country, I think its even safe to say, the world. I implore you to please find an alternative to the OHV land. Thank you.

**Comment** Johnson Valley Off Road area is a very special place to me and my family. This is a place we go to spend time together and "bond" with my son. To take this place away from us, as well as from the thousands of other people that call this place their sanctuary can not be allowed. Every day, more and more trails are being closed to the public. PLease leave this off road mecca alone, and let my kids enjoy the great outdoors like I have been able to.

**Comment** The hammers have been a long standing ORV and 4x4 attraction and taking it away from the people now would just be insane. Many people travel each year to this place as a vacation destination for outdoor activities. Many of us have not been able to acquire funds to make the trek but would like the

opportunity to do so in the future. I am fully opposed to the land grab and wish for the hammers in Johnson Valley to remain a public use and access site. Public disapproval has been shown before rallied by Pirate4x4.com and all of us who are members of the site are still opposed to the land grab. Thanks for your time.

**Comment** While I fully support the US military, I feel that the expansion of 29 Palms would have a very negative impact on a growing hobby. Tens of thousands of people take pleasure in recreating at the "Hammers" and make use of all it has to offer. Even though I live on the other side of the country, I have friends who have been to Johnson Valley, and tell me that it is a wonderful place. I hope to have the opportunity to travel out there someday, and make use of what it has to offer. The expansion of 29 Palms would have a detrimental impact on a very quickly growing sport. A sport which has a huge impact on the OHV community and economy. I hope that an agreement can be reached to preserve Johnson Valley for future OHV use and recreation. Thank you for your time.

**Comment** Johnson Valley, has been an amazing place to me. I have been only a few times, but everytime I have gone I've encountered amazing things, I've met many wonderful people, and I've pushed my vehicle to do more technical and more fun four wheeling than I can offer it in northeastern Nevada. Our sport is all about progression. Without progression there is zero point to continue. I've watched my vehicle as well as my fabrication/welding skills explode throughout the time i've been in this sport. With that said, Ive also seen Johnson Valley explode to one of if not the most progressive OHV location in the world. It means a lot t a lot of people. My 3 year old neice keeps asking when we're going back to Johnson Valley. She has been one time and it has impacted and influenced her life as well as mine. I understand the need for land for Military use. I respect every decision made. And I appreciate everything the Military has done and goes through to protect this country and allow me to post comments and go four wheeling with family and friends. Thank you for all of the service. And please remember Johnson Valley is an amazing place to a lot of people. Thank You.

**Comment** I am writing this comment on behalf of my family and my close friends that are involved in off-road recreation. I am from Northern California and I have family from other states that travel to Johnson Valley OHV Park annually to vacation and to be a park in the greatest off-highway race in the USA. By the Marines wanting to take over this land area, it will force the greatest race and a naturally awesome off-highway location to disappear. I am a Hugh supporter of all the armed forces and all of our troops. Many of my friends and family have and do serve our great country and they are also very involved in the off-highway recreation. Please do not close down to the public one of our greatest locations. God Bless Our Troops. Thank you, Andrew Wilder

**Comment** As an avid OHV user and a tax payer, I feel that clousure of any more public land is just flat stupid. I don't understand why other locations cannot be used? It seems dumb to shut down the one place where so many people recreate! I encourage you to explore other options! Thanks you!

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** As you can see Johnson Valley does not only affect enthusiasts from the region itself but those of us from across the country. Every bout and battle to enjoy our great outdoors does need to be preserved in a manner of activities that I like others to pursue in the form of OHV. I grew up in the BLM area managements of Las Vegas and find some of my greatest times where had during OHV activities. I don't get the same joy here on the eastern seaboard and it is not the same being subject to foot trails. Treading lightly is of ut most importance and packing out what you packed in but there are many hidden wonders in the vast trail system that myself and others enjoy and are not realistically accessible by foot on a holiday.

**Comment** I have noticed that the areas remaining open to 4x4 usage is slowly dwindling to nothing. It is crucial that we keep these areas open and accessible to the public. Less and less lands are currently being allowed for public use, and one day I fear that my future children will not be able to enjoy America as I have. Thank you.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Dear USMC- Let me start by saying THANK YOU for protecting our county and all that it stands for. With that said, please rethink your approach at taking away a large chunk of Johnson Valley OHV. I grew up in So Cal and own property in Newberry Springs. My parents took me to the desert every other weekend to explore. As a child, I remember sitting next to the fire at night listening to the bombing practice over the mountains. I also remember my father taking me over the hills and showing the bomb craters....I was amazed. Now that my father has passed, and I have a two year old son, I want to raise him in a very similar fassion. I want to teach him how great of a country we live in, our freedoms, our liberty. Johnson Valley OHV is such a wonderful place for families to gather, from all walks of life, to make memories that last a lifetime. Off-roading is such an awesome hobby...one that keeps our children interested in something family oriented, and keeps them away from such harmful passtimes, such as drugs, premarital sex and violence. Please listen to all

that ask you to reconsider your options. From what I have read, the USMC is open-minded to the many civilain requests...please keep it that way. I know my argument may not be as strong as others, but I still felt it necessary to express it. Thank you very much for taking the time to hear me. Thank You.

**Comment** to me, johnson valley is the quintessential embodiment of freedom and nature. it is a premier offroad attraction, the host of thee most iconic offroad race, and a huge draw for revenue in this downed economy. king of the hammers is epic, and keeps getting bigger and bigger. it draws in a lot of revenue for many offroad parts suppliers, small business fabrication shops, fuel, food, advertisement..... and above all that, its quality open space, protected from the spread of society. please dont take johnson valley away, it is a bucket list destination for me, my family, and a lot of my friends! thank you

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS

and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Please reconsider expanding the Marine Base into the proposed area of the Means Dry Lakebed.. a.k.a. The Hammers OHV Area. My family and I have been coming here for recreation for many years, it's a long drive from where I live, but well worth it. We love this area for it's variety of terrain and land features found nowhere else in southern california. Each year public land is taken away, thus forcing us into smaller areas. Increased traffic in these other areas causes accidents, increases stress to plants and animals that call these areas home. I would hope that other options for the Marines exist. I support our Men and Women in the Armed Forces in our Fight for Freedom. God Bless America. Thank You, Mike Baker

**Comment** Regarding the Johnson Valley ohv area: Ive been 4wheeling for 18 years. Since the very start of it I have heard of 'The hammers'. The holy grail of hardcore 4wheeling. I was scared of the place, I went everywhere in washington and got tired of it all. Finally in January of '09 i came down for the king of the hammers race. I drove 1250 miles one way to come there. I was not dissappointed. Incredible scenery, Simply awesome trails and views, Smells and sensations. It is simply a special place to be for me and soo many others like i am. As you know the King of the hammers race has garnered many followers, For me it marks the only vacation i take every year. To have this incredible area closed to us would be heartbreaking. Please reconsider your expansion and consider all of the folks like myself who are passionate for the area we call 'The Hammers'

**Date Comment Received** 4/13/2011

**Comment** I just wanted to say that as an out of state wheeling enthusiast Johnson Valley is a dream to me. I came out in 2010 for the King of the Hammers and I came back with a passion to wheel in a place as awesome of the "Hammers". The place is irreplaceable to me. It is a bit of heaven on earth to me and people like me. Thanks, Gary Lawson Houston, TX

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Means Dry Lake has become a meeting place for thousands of families not only in southern california, but all over the nation. A gathering place where families can camp out and do their off-road adventures. This last February the lake bed was host to around 40,000 people for a week and that is not the only time of the year that folks gather there. Almost every weekend hundreds of people spend quality time together. What this means to the local economy is outstanding !!! what better place to raise kids and show them how to enjoy and respect the out- of-doors !

**Comment** As a big supporter of our Armed Forces, I know how important it is that the Marine's expand and become as strong as possible for our safety and freedom, however the Johnson Valley OHV area is one of those freedoms that we enjoy all year long. Please take a long hard look at all other possibilities for expansion, and leave the OHV area alone. This is a place we go with our families to recreate, and enjoy the freedoms that the Marines help to keep for us. I'm sure for most people the Johnson Valley OHV area make just be another piece of the Southern California desert, but for thousands of us, it is a great place to spend our time with friends and family. Please do not take it away.

**Comment** To my military friends, I have been riding and racing in Johnson Valley for the last 20 years. I taught my son to ride off Boone Road. In my opinion Johnson Valley is one of the last purest desert OHV areas. My family loves camping there with our friends. It would be a shame to lose this riding area. I hope to teach my grandson to ride bikes there someday. Don't make me a grumpy old man, let's work together to keep open our beloved riding areas. Thanks

**Comment** Please keep Johnson Valley open as an OHV park. This land is legendary for offroad activities. I have not yet been, but from the pictures and videos I have seen, it is a mut-do in my lifetime. Our available spaces for off-roading are rapidly shrinking, and this is one of the best places still open. Again, please consider that closing this area will affect people from all over the country. Respectfully.

**Comment** Thank you very much for considering the opinions of the 36 million OHV users in the US. I support the military and want our fighting men and women to have the best equipment and preparation available to them, but also urge you to keep the Johnson Valley area open so that all of the citizens of this great country can explore and enjoy this unique area. The OHV community is filled with people that love our military. We appreciate all the sacrifices you make so that we're able to enjoy the freedoms this great country offers. We are also a community that travels extensively to enjoy our sport. Seeing different parts of this country and getting off the beaten path to enjoy the ruggedness of this great land is as much a part of us as supporting the military. I ask you to seek an alternative to the Johnson Valley area for your training. If an alternative is truly not available, I ask that you work with all of the users of the Johnson Valley area to keep this area open to the citizens of the US.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** To whom it may concern, I felt compelled to write and state my feelings concerning Johnson valley OHV. Seven years ago I bought a pickup truck and went 4 wheeling for the first time, since then my skills and knowledge have slowly increased. The other thing that I have noticed is the huge amount of land that is being closed to vehicles for different reasons. The few challenging public trails that remain have become household names in the 4wd community nation wide, and even throughout the world. One such

place is Johnson valley and the hammers trails. This OHV area is truly legendary, both for its varied and rugged terrain and for hosting the phenomenal king of the hammers race. The money that is brought in by our growing (and expensive) sport is surely important to the local economy. As an opportunity for OHV enthusiasts Johnson valley is irreplaceable. Ultimately access to our public lands for all different user groups is part of what makes this country the greatest place to live in the world. I firmly believe that public lands should be kept for the enjoyment and use of future generations. I hope some day to test my vehicle and myself on the trails of Johnson valley. Sincerely, Chase Crayton

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** To whom it may concern, Over the last 8 years my family, friends, club, and I have enjoyed the vast land of Johnson Valley and Joshua Tree. I am a supporter of our troops and do feel like out Marines need our support for

whatever training they may need. But I am conflicted here because we love the Johnson Valley area. We venture out there almost every other weekend for our off-road trips and family gatherings. The vast desert has provided some of my most stunning work as far as my professional career when it comes to photography. That area has become part of who my family is. And if you take that away from us we loose a part of of who we are. I love death valley but Johnson Valley is where our hearts are at. I believe a proposal to share the land was submitted and I am 100% in favor of this proposal if it means we can still continue to use JV. But to take it completely away from not only the OHV community but from families like mine is just sad. So please, lets come up with a viable solution that will please both parties.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** There are not many places left for recreational four wheelers to enjoy. Many of the spots that are under fire from Gov. are mainly cared for by the four wheel drive community. Why would anyone want to lose more land that was once accessible to them in the past. The Hammers OHV park is literally our Mecca and there is no other area that even come close to being

as important. Little by little we loose more and access which is a horrible injustice to the ones who live,eat and breathe this past time. I want my kids to experience the same outdoor activities that i have had growing up. Four wheeling is good clean fun and very family orientated. Please do not take a way our access.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center, which was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Johnson Valley is a wonderful area. One of the most scenic and unique. Off road enthusiasts are some of the most patriotic people I have ever met. They appreciate these lands more than anyone I have ever seen. Many of them are not just off-roaders but hikers, bikers, hunters, farmers etc. These are people who truly value the land, america, and the right to use it. Johnson Valley has become world known because of a few, dedicated offroaders. At the KOH event I had a booth set up and talked to at least 100 Marines that came to see the event. Another 200 LOCAL residents. I think that we should do more with the local communities, the Marine base, and get people involved. I think the rules & regulations for the lands should be strictly enforced during the event. I think between the local residents, offroaders, and the marines we could have a much more successful event. I think the Marines should have a prescence at the event, in trucks, troops, etc. It would be a great marketing opportunity for the Marines because the many of the young participants in this sport are enlisted and potential Marines.

**Comment** Please allow continued access to the Johnson Valley Recreation Area for OHV use. There are very limited areas remaining where the sport of off-roading is legal. Closing these great areas to the public will not allow us to participate in a sport that we love, and prevent access to some of te most

beautiful parts of our country. The off-road community has lost access to areas in the past for numerous reasons, but i assure you none of them were lost because a lack of trying on the communities part. Please be part of reversing the trend of closing public lands to the public and allow Johnson Valley to remain open for all to enjoy.

**Comment** Hello, Im writing concentering the Marine expansion into Johnson Valley. This is a bad Idea. The public needs public lands. The Economic Rammifications alone could kill the surrounding towns if OHV users have no access. My self and My family travel to Johnson Valley from Utah at least twice a year to off-road. Each time we spend no less than \$5,000 in California alone. I am not alone either. It would be a huge impact to stop all of the thousands of people like me from enjoying OHV's on public land. Please reconsider thank you

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I don't visit California to go to Hollywood, the beaches, or the wineries. I make the 3500 mile round trip at least once a year to visit Johnson Valley offroad Area, truthfully it is a rare day that passes without my thinking about the one week or so a year that I have spent there for the last couple of years. I have a tremendous amount of respect for all of our armed forces, the Marines in particular. And as such I will not pretend to understand or try to simplify the complexities involved in training or maintaining the readiness of this great force. I will respectfully ask that those in charge look for other ways to train as needed without acquiring Johnson Valley. Respectfully, Joseph Hines Madison, MS

**Comment** To whom it may concern, I am an avid four wheel drive enthusiast and utilize public lands many times a year in support of my hobby. I plan on traveling to Johnson Valley in February to attend an off highway vehicle race held on the public land which might be lost to this acquisition. It would be a shame for the many local economies to miss out on the tourist dollars that come into the area from visitors like me. Please keep public lands open to the public.

**Comment** Johnson Valley is a very special place for myself, my family and my friends. I go there often for business as well as pleasure. My company goes there every year to cover the King of the Hammers race for the rest of the world that is not able to attend this amazing event that has the entire off roading world captivated. It is our biggest and most important job of the year. Aside from business, we travel down to Johnson Valley a few times a year for family recreation. There is almost nowhere else like it in the country (world?) available to the general public with continual land closures and land grabs by the federal government. While I support our military, I also believe that the public showed it's ability to work along side and active base, even in live firing exercises such as they were conduction at 29 Palms during the King of the Hammers race when there were approximately 20,000 people in the OHV area. Please reconsider taking away one of the absolute true meccas of recreation in this nation. Let us keep Johnson Valley. Respectfully, Lance Clifford President, Pirate Media Group

**Comment** Please do not close access to Johnson Valley. I live over 1000 miles away and have personally been to "The Hammers" 3 times with friends/family to enjoy the terrain. We always make a point of doing our shopping in Lucerne to show thanks for letting us share their land. It would be a huge loss to both the offroad community and the local economy to have this area closed. It is extremely unique terrain and I really think it will not be replaceable.

**Comment** I've made it out to Johnson's Valley every year for the King of the Hammers (KOH) races and hope to be able to continue doing so. My son is now getting to the age where my wife and I can start taking him with us for longer wheeling trips and KOH is #1 on our list of planned trips throughout the year. If the USMC takes over this land for additional training area then we will be unable to do so. As a member of the US Army and the Colorado Army National Guard for the last 10 years I can understand the need for training area for our soldiers and Marines. However, there are already several large training areas in the nearby locale for them to utilize. Additional training can also be had by convoying out to these farther away training sites, as well as giving soldiers/marines a more diverse field training experience than constantly using the home station areas.

**Comment** Reclamation of the Johnson valley for military use seems a bit out of place considering the fiscal situation in the United States today. Notwithstanding is the Government's complete inability to see the profits that come in from all over the country due to usage of OHV parks such as the one in question. People such as myself come from many states away just to be able to enjoy nature, and responsible four wheeling. Do not block many thousands of TAX PAYING citizens from using the lands set aside for recreational use; too many public lands have been closed already.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Please leave the OHV are open to the public. The land is a mecca for OHV enthusiast such as myself. I have never be able to make the trip out to the area but would like to have the opportunity to take my family there. Public OHV areas are necessary for many to have access to outdoor family activities. The land provides endless revenue streams, from OHV supporting companies to simple tourist dollars. I'm sure that a compromise on land use can be found for all interested. OHV enthusiast are very active in land use and are a great group to have protect and extend the use of the land.

Even though I am not from Ca, nor have I ever been there, the trip planning has already began. The main reason is to bring the family's off road truck to the famous "hammers", and to watch the King of Hammers race. My 2 yr old boys falls asleep watching the KOH movies a couple of days a week. The wife and I are already planning on being there next Feb with our two kids(3 yr old daughter) to watch and wheel for a week or so. The amount of

land that is truly open to the public is getting smaller by the day. This issue brings the question to me if my kids will have any place to recreate on public lands when they get older. Especially will there be any of the epic destination areas left open. If it is truly public land can you please leave it for the public to enjoy. Thanks

**Comment** I am an avid off road enthusiast and am very much upset at the land use policies that continue to take away the limited space we have to use. It seems that the off road spaces are the first and often only places considered "up for grabs" whether it is base expansion, wilderness designation, solar or wind farms etc. Johnson Valley has become the premium offroad area for the hard core enthusiasts and my primary use area. It seems clear that the Marines are just paying lip service to the opinions of the offroad users and will do what ever the hell they want anyway.

**Comment** In regards to the Marine corps wanting to expand the 29 palms base into the Johnson Valley OHV area I must strongly disapprove of this decision. There is no need to expand the base especially into an area that is vital to the OHV community. This is also important to those towns we drive through on our way there, as we all spend money on our trip to Johnson Valley OHV area.I feel loosing this area is both an abuse of power and economically detrimental to the surrounding towns.

**Comment** On behalf of Daystar Products, a company that manufactures suspension components and accessories for both the military and the automotive aftermarket, we are opposed to the proposed Land Acquisition that would include the Johnson Valley OHV area or any of the surrounding OHV areas. While we strongly support our military and recognize the vital role that training plays in keeping our forces both effective and safe, it is also vitally important for public areas to remain open for motorized recreation. Closures of many OHV areas in the region over the years have caused a concentration of OHV use in Johnson Valley and the surrounding area (including Cougar Buttes), and the loss of yet another area in Southern California will seriously jeopardize the rights of tens of thousands of off-road and outdoor recreation enthusiasts in the Southwest to enjoy their sport in a responsible manner. In addition, countless hours of volunteer money and labor have been instrumental in keeping the area properly maintained and free of trash and debris, not to mention trails properly signed and marked to minimize impact to the environment within the OHV area and the surrounding region. Elimination of the Johnson Valley OHV area will make the tireless efforts and money of these volunteers worthless. It will also have a profound impact on the revenues generated by the surrounding communities from OHV tourists and can hurt the ability for people to enjoy both motorized and non-motorized recreation in many different forms. This includes, but is not limited to: hiking, mountain biking, camping, motorcycling, and many forms of four-wheeled recreation. Let us not forget that a surprising percentage of these enthusiasts are active or former military. On a larger scale, reduced access to motorized recreation will impact the industries associated with supporting off-road recreation, from shops that sell accessories to the manufacturers that produce the equipment. All of these shops and the majority of the manufacturers (including Daystar) are located in the U.S., which means potentially impacting hundreds of thousands of jobs in an economy that is already struggling. Though the area may be viewed by the uninformed that the area is simply a desert wasteland that is of no use to anyone other than the military, there are hundreds of thousands of people that will tell you otherwise. For many, Johnson Valley is the only remaining area in which they can safely and legally enjoy their sport; to take this area away would also take away an aspect of their basic right to the “pursuit of happiness.” In conclusion, I am confident that a satisfactory resolution can be reached that meets the needs of the military and outdoor enthusiasts in their many forms. Thank you.

**Comment** Please reconsider your expansion into Johnson Valley OHV area. I have travelled to Johnson Valley from North Carolina three times in the last three years to recreate. We only have 16 miles of OHV trails there, so I took a job that moved me closer to the west. I understand the need for training and the realestate it requires, but please consider NOT including Johnson Valley. V/R, Rob Usnick

**Comment** I have been planning a trip east of the mississippi to KOH in 2012 since 2006. Thats when I started building my rig for "The Hammers". My whole family has been looking forward to this, and has been a part of making it happen. This area is known world wide as the location of one of the most demading motorsports in the world. This area is "All of Ours" as Americans, including 4WD enthusiasts. I believe this community, as well as the hikers, and bikers that use this area,a multi-billion \$/YR demographic is large enough to preclude this land appropriation. The Federal Gov't has plenty of other land they have already made off-limits to us based on fraudulent, in-accurate, and more and politically motivated science, and 29 palms doesn't need to be bigger. I know, I've humped it. Why can't this continue to be known as the worlds toughest race! I ask for your consideration and Let us keep the Hammers.

With all due respect to the USMC, please do not take JV OHV area away from us. That area is used by tens of thousands of hardworking, patriotic Americans. We have limited OHV areas with no other options. The USMC can expand in other areas, including Sheephole, Fort Erwin, or Amboy. Seasonal access to JV OHV as in Option 6 is a farce, that area will quickly become permanently closed too! There are countless families and businesses, that rely on activities in and around JV OHV. Likewise, millions in revenue and taxes are generated directly and indirectly, from access to our lands. The USMC fights for our freedoms every second, for that I can never thank you enough. What I'm asking you to understand is this battle for JV OHV is also a battle for American freedom. We are on the same team. Please leave the JV OHV area open and accessible to the American public. Thank you and God bless the US Military.

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Johnson Valley is an amazing area, movies are filmed there, so are commercials. literally thousands of dollars are pumped into the local economy every month by people like me, who drive 400-2000 miles each way to experience all the desert has to offer. We leave no trace so it seems like nobody uses the are, that is because we love it, and we want it to be around for our kids and their kids. We do not want to see it closed or worse yet bombed by the Marines. I love the United States and our amazing Military. I am sure they can find an area that truly is "unused" to practice, please don't make this it. My local rock crawling club spent a total of more than 20,000 this Feb. to go see the king of the hammers race. Money spend in CA, that would have been spent in AZ. Think about.

**First Name** fred

**Comment** I oppose the expansion of the Marine base into Johnson Valley OHV area. Johnson Valley and the Hammers trail system are some of the preeminent off road and rock crawling trails in the world. 4x4 enthusiasts from across the nation come to these trails to test their driving skills and vehicle construction. The acquisition of this area will detriment the local economy, off road enthusiasts and eliminate one of the greatest destinations for 4-wheelers. please reconsider this expansion.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** I'm hoping we can work together to make something happen that will still allow for four wheeling in Johnson Valley. I am surprised about many of the findings in the report. Too many limited or little impact, when it appears as though if the Marines take over Johnson Valley an entire industry and those who participate in rock crawling may have no other place to go. Nothing is like JV. The Hammers are our Mecca and to lose that would be devistating to myself and my family. We travel there many times a year and my son and I have developed a strong bond becasue we have been able to build a couple of Jeeps to take out there. Please...if feels like a land grab. Keep Johnson Valley open for all times to the off road community.

**Comment** The Johnson Valley area should remain open to OHV use, it is a unique place that cannot be replaced should it be closed. This area provides recreational opportunity to thousands of off road enthusiasts every year, it has created a whole new form of off road racing in the form of the King of the Hammers race. To lose this area would be a major blow to the off road industry. I fully support all branches of the US military and even have friends serving in the Marine Corp but I feel that there are better alternatives for training than closing the Johnson Valley area.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** When I was stationed in 29 Palms it was the only local area for off-road activities. If you go and as your Marines and Sailors stationed there who have off-road/off-highway/dirt bikes/quads/side-by-sides (and there are hundreds) where they go to off-road they will tell you Johnson Valley. It should be kept because it is an often and heavily used MWR location.

**Comment** I am commenting on the possible closure of much of Johnson Valley OHV area. Coming out to enjoy the desert and everything it has to offer has become an annual experience for my family and I. I fully support our armed forces but feel that our public OHV areas are so limited and constantly under attack I cannot support this expansion. The older I get, the less of our great country I am allowed to share with my children, unless of course we view pictures from a computer since we are locked out of so many incredible areas due to "conservation." Please reconsider your stance and look for other alternatives so that we can continue to enjoy this small part of our great country!

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** The Johnson Valley OHV area is a very large part of the OHV community. The vast variety of trails there bring people from all over the US as well as from other parts of the world. Us losing access to this land would be similar to an entity taking all of the land that the military currently trains and utilizes for testing purposes then explaining to you that "yes you can have this equipment and these vehicles sitting in your garage, but no you can't have anywhere to use them anymore." The land also brings a great deal of money into the local businesses that for some may be all that is keeping their doors open.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). **Comment** I think taking something like this away from the off-road community is just wrong. This land is being used for lots of different things. Why do they need to use this area when there are plenty of other areas around the world that they can use. For instance, all the desert land in New Mexico or other areas in California. This land is used for off-roading and also lots of bikers and other things. I personally think taking this area away from them is wrong!! Find different land to use.

**Date Comment Received** 4/13/2011

**Comment** Aside from the fact this is a Public Recreation Area, there has been an entire industry created out of the Hammers. This industry has created jobs.

It's funny that the same politicians who talk about the need for jobs are all about shutting down this industry. The powers at be are trying to push Green Jobs on us claiming it will help slow the affects of Global Warming, even though there is still no conclusive proof that human impact has created any Global Warming. But my hope is that Johnson Valley remains in place for many generations to use and enjoy.

**Comment** Keep Johnson valley as a useable ORV area. I watch King of the Hammers videos every year they come out, and one of these days I am bound and determined to make it out there and watch in person. This is one of the few places in America with this kind of terrain. Keep it open and keep the travel and profits in America. Otherwise our only option is to go down to mexico for Baja, and that doesn't do America a whole lot of good. Thank you for your time, Paul in Kansas.

**Comment** I oppose the Marine Corp expansion into the Johnson Valley OHV area. Southern California has a large and vital economy with many residence who choose to Off Road as their form of recreation. Over the past two decades

we have lost thousands(if not millions of acres) of OHV land area making OHV areas rare. Johnson Valley is our largest OHV area left and must stay that way. While I appreciate the need for the Marine Corp to train I also know that there are many areas to the east, as well as areas currently used by other services (i.e. ARMY) that the USMC can utilize - including but not limited to the California / Arizona Manuever Area. My tax dollars fund our military and I choose to not have them spent on the expansion of the 29 Palms Base into the Johnson Valley OHV.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). **Comment** Plain and simple...taking Johnson Valley/ the hammers away from the public would be like taking an arm off some people. The reason I put it like that is that some people plan for an entire year to go out there for a few days just to enjoy their time out there. Some people make that their one and only destination for an entire year even. I myself try to make it to Johnson Valley about once a year. Sometimes twice. For me its about a 600 mile drive one way. It is an awesome place to be and go to, and I look forward to it every single time that I go. I had talked to two different groups of people at the

King Of Hammers and one group was from Indiana (46 hours of straight driving one way) and another from Texas (25 hours of straight driving one way)and that was their big trip of the year. Not only is it a great place to have people enjoy themselves, it also is a great place for the surrounding businesses to get some extra customers throughout the year. Plainly put, taking away Johnson Valley would take a huge effect on not only peoples lives but also the surronding communities that look forward to having OHV enthusiasts come there. Thanks for your time, Chris

**Comment** I made my first trip to Johnson Valley this past winter. Living in Missouri I am not used to having access to such great public lands to enjoy. Most all outdoor activities here have to be on private lands. Especially any thing to do with off road recreation. I have already made plans to revisit Johnson Valley next year and hope to stay longer so I can explore and enjoy more of the area. I think it would be a great dis-service to the public to shut down such a great area for outdoor recreation. I would to tell my kids and grandkids about visiting the area and hope they would have the chance to do the same. There has to be a better way to meet the military's training needs without shutting down more public lands. I know there are several other branches of the military that have test ranges close by, surely a joint training area could be established without dedicating such a vast amount of land to just the marines. I DO NOT think that this land acquisition would be the best use for such a wonderful area that could be used for public recreation and outdoor activities for many generations to come.

**Comment** I first heard about Johnson Valley through reading an off road magazine. It was some ten years later that I finally made my "pilgrimage" to Johnson Valley to see the 2009 King of the Hammers race. From the moment my wife and I stepped foot in the sand of Means dry lake bed we vowed to return. Due to the birth of our daughter last year, we were unable to return as soon as we had planned, however we plan to return as a family next year for the 2012 KOH race. It should be noted that my family and I spend several thousand dollars to make this trip, further assisting the national and local economies. Please consider people like me, my family, and our friends who still wish to visit the hammers again. Please don't close our trails. Thank you, Chris Albert

**Comment** Johnson Valley OHV area needs to remain open to the public, period. A lot of time and effort has been spent in creating the trails in the area and they are irreplaceable. Already too many public lands are being taken away from the public especially the OHV crowd. Johnson Valley needs to remain as is so that the tens of thousands of visitors can continue to enjoy it. I make the trip down about twice a year and spend a lot of money in Lucern Valley and the surrounding area. I'm sure I'm not the only one spending money in the small communities around the area. To close Johnson Valley OHV would be the end to many small businesses in the area. Our economy is already on shaky ground, there is no reason to make the area suffer any worse. Johnson Valley OHV should remain open 24/7/365 as it is now. Thank you for your time. Jesse Rivers OHV user and enthusiast.

**Date Comment Received** 4/13/2011

**Comment** Hello, My wife and I moved here 8 years ago over 2000 miles away just For Johnson valley, Nothing else. We moved here from the north east coast where wheeling is poac hing. There is no support for Offroading In the North Eastern States. We came from a area where Friday night the local kids would Illegally drive on others land and trash other people's property. We saw the rare opportunity Johnson valley provides for everyone. So we started are family here. We now have a 5 year old son. Because of local clubs, and friendly wheeling trips offroading has become treasure to value and take care of. My son now makes it a point to pick up litter and spend time outdoors, in a age where kids show little respect and no desire to leave the TV. We have 36,000 in receipts just from last year spent in the Johnson valley area in regards to offroading in Johnson Valley. I have purchased a RV, Buggy , Diesel truck, and a Trailer. Just to use in Johnson Valley OHV on top of the 36,000 dollars. Not including the thousand dollars in tools and supplies to use these toys. We have been coming to Johnson valley OHV for over 7 years and there is NOTHING compared to the terrain in the United States of this size for OHV.

**Date Comment Received**

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** First and for most, I love offroading. Rockcrawling in particular, but also many other forms. Johnson Valley is one of the most recent new places that I have discovered and now really enjoy going to. It is a place I plan to visit again and will hopefully be able to visit for years to come. It is one of the best places I have ever had the chance to visit. Please don't shut it down.

**Comment** Johnson Valley recreational area is very important to our business which employs over 1000 people. This area is one of the best off-road areas in the country and is enjoyed by thousands of families on a monthly basis. Loss of this area would mean loss of a great family recreation spot and could mean loss of jobs.

**Comment** As a US Navy Veteran, I understand and totally support the needs of our Military. However, I also value the use of unique lands to support a growing recreational pass-time and industry that has become a critical part of the American Identity. Off roading, as an Italian friend recently told me, is a greatly American creation and tradition. One that has not only contributed to a great many jobs in this amazing country of ours, but is a part of the life of thousands of men and women across this land. Some people like hiking, some like running, some like fishing, but off-roaders love the open roads and the experience of pushing your vehicle to the limits in areas that most will never try. And many times, the technology we see today being used to protect and serve America's military was first flirted with by an off road enthusiast. Therefore, I wish to appeal to the US Marines to find another avenue rather than the re-acquisition of Johnson Valley. JV has become a destination point for thousands of off road enthusiasts at a time with such locations are closing, I urge you to keep an American tradition alive and let generations of off roaders enjoy the challenges, excitement and memories Johnson Valley has provided us all.

**Comment** I had been waiting to travel to Johnson Valley since early 2003 when I received my drivers license. This past February 2011 my best friend and I decided to make the journey from our homes in northern California. Words cannot explain how great this experience was. It was the first time I had been camping in almost two years. That first trip will always hold a place dear in my heart and I would like to share it with my friends and family in the future. Please allow us four wheelers and outdoor enthusiasts to continue to use this great piece of land that still lets you escape from the every day hustle and bustle of city life. Thank you for your consideration.

**Comment** I wanted to attempt to explain how important JV OHV area is to my immediate and extended family. First of all my family visits the JV OHV area twice a month to camp and enjoy the OHV recreation area. I often invite extended family to camp and also have co-workers and friends camp along during these trips. Closing the JV OHV area would have a series impact on our outdoor lifestyle that we don't believe is necessary. As I am not expert in land use issues I would suggest that there are more people that enjoy the outdoor life style at the JV OHV area that will not know about these issues and the volume of responses is not a true reflection of the off-road and OHV community. A decision panel cannot evaluate the number of responses and think that is the only people that are concerned. I believed the USMC wants the airspace to conduct training and there are alternatives

to this. I would suggest that the US ARMY has one of the largest training areas in the United States at Fort Irwin and I believe it could be used by the USMC. Closing down JV OHV area would be a tragedy and I implore you not to close it down to public use. Thank you in advance Chris Foster

**Comment** To whom it may concern, My family and friends have been visiting Johnson Valley for the past 10 years, and look forward to EVERY trip we can afford to get out there. It is our #1 destination about 5 times each year! I understand and believe that the military needs places to train, but there has to be other places that are NOT already BLM land that could be used. Couldn't the land to the East of Johnson Valley be a good training area? Please consider other options as all of the local small businesses would suffer a great loss of income if the off road community were to loose the area. Thanks, Bryan Putman

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small

businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. **Comment** I would like to respectfully request that you allow the Johnson Valley OHV area to remain open as a public land. While I, as a US Veteran fully support and honor our Armed Forces, it is also my desire to keep areas open for my family and friends to have areas to enjoy including Johnson Valley. As you are aware, there are other area that are available for our fine United States Marines to use in the manner that they would use the OHV area of Johnson Valley. These other areas would be just as beneficial to the Marines, while still allowing the public access to the stellar Off-Road trails and venue offered at Johnson Valley. Along with my wife and I, our entire family engages in and enjoys Off-Road. Both my son and daughter have planned vacations around wheeling off-road, and my granddaughter has been off-road during her first year of life. She now asks to ride in the Jeeps and go explore at the age of two. I would like to thank you for taking the time to read my request and take my concerns into consideration. Hopefully, this matter will be resolved in a way that allows the public to continue to enjoy Johnson Valley OHV and still find a suitable area for our fine USMC to utilize for their continued training.

Hello and thank you for your time. My name is Jason Leigh I served from 88'-92' in the Marine Corp first as a 2621 and then as a 5800 (5831) those in the corp will know those MOS numbers. Just as I started at the bottom and had to work my way up in the Corp learning its history and deep roots in pride, honor, respect and thinking of the unit as whole not just individuals. Offroading and Jeeps have offered me another version of this with the friends and knowledge I have gained by being a part of something bigger than myself. I have found the Hammers and the offroad communitiee around them to be a great opportunity for families and groups to come together and learn the right way to do something in a competitive atmosphere. With the shrinking opportunities for these types of events to be held elsewhere and knowing the Marine Corps has other options I am respectfully requesting that as a former Marine you try to find a way to adapt, improvise and overcome this by looking hard at the other options in order to keep a good thing from being taken from future attendees and spectators while still fulfilling the mission that faces the Marine Corps. I ask that you please dont end something that in its own right provides to a civilian populace what the Marine Corps gave to myself and other former Marines, the chance to belong and believe in something bigger than themselves. Thank you for your time, respectfully Lcpl Jason G Leigh Honorably discharged Marine.

**Comment** even though i'm sure my contributions to this are nothing more than a drop in the bucket, it scares me to think that the thousands of dollars i've spent building my truck SPECIFICALLY to be capable of wheeling at the johnson valley ohv area could soon be wasted. if my understanding is correct, much of the land this expansion is after is intended solely for extra airspace -- there's a lot of extra airspace out there in that big desert that isn't DIRECTLY adjacent to the PREMIER ohv area in the western united states and possibly the entire country. consider the land to the north or east, the JVOHV area is not the only option. it may be the simplest or the quickest, but it's not RIGHT. as a side point, with the concern given to the impact of OHV users on the desert tortoise, it's incredibly surprising to me how the same issue is essentially glossed over when it comes to tanks and weaponry, things that are much more likely to kill or maim those same tortoises. you can see and avoid a tortoise from a truck, i've seen them myself. you can't see, much less avoid one in a tank, and i'm quite sure a bomb dropping from a plane isn't going to care what it lands on. while i may not be capable of

writing the most properly critical letter possible about this matter, i hope i've at least made an attempt to convey the fact that the JVOHV area means a lot to me. riding along with a friend on the trails is what got me hooked on rock crawling to begin with and what led me to build my own truck. if this land is taken away, soon there will be nowhere left within hundreds of miles where i can go to with the difficulty of trails and the same level of enjoyment that i can get at johnson valley. as i've read before, once the camel sticks its head in the tent, the rest is soon to follow. i'd really hate to be squeezed out of my favorite ohv area of the few we have left. what new ohv lands will be opened as a concession to JV being encroached on?

**Date Comment Received** 4/13/2011

**Response**

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS addresses impacts to desert tortoise in Section 4.10 of the EIS and concludes that the proposed action would result in significant impacts to desert tortoise.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** My family and I enjoy the Johnson Valley OHV area very much and look forward to trips to the area every year. We have been going every year for 10 years to play in the desert and would be saddened to have the space restricted. The Johnson Valley OHV area is a great place for some good clean fun which seems to be harder and harder to find these days. We have found that this space in particular is our favorite for off highway use. Please don't restrict the use of this land.

**Comment** Johnson valley. The hammers. Ohv area. This area is very unique. The best trails in the world. This area should remain open for public use. It's about a 9 hour drive from my home but we make the trip many times a year. The loss of this area would be a sad loss to the 4x4 and ohv community. Thank you for your time -Nicholas M.

**Comment** I appose the prefered option #6 for the USMC and think they should use the east side of the current grounds. We as OHV family use this land most of the year and have done so for many years in the past. I grew up riding bikes and driving cars in this area. For this to be removed would impact not just my childhood but my kids future on this land. In this current economy we can not afford to take more dollars away from local business. There is millions of dollars spent just in the OHV business and along with the local shops that we purchase food and supply from. There is no reason for the USMC cant use the east side of the current base that takes importance over the money that will be lost. I strongly suggest they move to the east and think about that option more in detail.

**Comment** Hello US Marines, I am writing to oppose the acquisition of the Johnson Valley Recreation area. I am an avid four wheeling enthusiast and am 100% against that land being used for anything other than an off-road recreation area. The landscape is beautiful there and it would be a shame to close down a very famous recreation area just to have the military drop bombs on it to practice. If you want to drop bombs, go into the flat deserts where there is no one enjoying the land.

**Comment** Hey, I hope that the trails don't become closed like a lot of trails already have! I'm an active wheeler and would love to someday make it out that way to do some sight seeing on the trails! I'm sure there are other places that can be used for training...I know we have a base near my house that is being used but sure could be used more often. Don't want to mention what bases those are but i'm sure you have already looked in to that? well don't want to sit here and rant or rave about this...should be tens of thousands of people writing anyways. But i pray these trails stay open for years to come. Thanks for your time, Paul

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Under each of the action alternatives, many of the current recreational opportunities and uses

would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Johnson valley is the most known place in the off-road world. It holds the biggest event of the year for all off-road enthussis. off-road isn't just a bunch of people in the woods running trees over we respect the land we wheel on. We clean up our trash and maintian our trails. We follow trail markers and never wander off them. I've been wheeling since i was 9 years old. My dad got me into this sport and ive been hooked since. I hope to be able to say the same with my kids someday. Everyone i wheel is like family to me and i meet so many people through what i do. taking off-road land away for me is like taking yellow stone park or the grand canyon away from tourist. This place is one of the main places that i wanna go wheelings at and plan on doing so. So please keep it open to the public.

**Comment** To Whom it May Concern, I am a Mechanical Engineering Undergraduate student at Michigan Technological University, graduating in December of this year. I have been interested in Jeeps and responsible four-wheeling since I was 12 years old. The opportunities that Johnson Valley area offers are quite amazing. This four-wheel Mecca attracts tens of thousands of four wheel drive enthusiasts every year from all portions of the country. If Johnson Valley is lost, the sport of responsible four-wheeling will suffer a major blow. This four- wheeling stimulates the economy in a time of dire need, and if Johnson Valley was closed, this area would suffer a major economic blow. There are other places that you can consider for testing facilities, so please save Johnson Valley.

**Comment** Should we expand our training for fighting, or keep some of the best reasons for fighting? American freedom, for individuals and families, shines in desert offroad areas like nowhere else. When the Marines fly over Means Dry Lake in their F18's, they can look down and see families happily camped in the wilderness, enjoying their freedom in a unique way that is the envy of the world. The King Of The Hammers competitions are just getting started, attracting money and talent from all over the country, and are a spectacular celebration of the American Way. When young men and women weigh the decision to enlist in the armed services, the tie breaker could well be the memories they have of the freedom and magic of Johnson Valley. Please leave it to the civilian world as a wilderness where Americans of all ages can go to play, relax and grow as individuals.

Thank you for taking the time to hear public comments on the Johnson Valley expansion. I have traveled from South Carolina with my family twice to enjoy the undeniable beauty of this area. We are very active OHV users and would hate to see such a wonderful OHV accesable area closed as so many across the country have. I have attended an annual OHV race on two other ocasions with friends and the event seems to be gaining in popularity every year. I have to imagine the influx of thousands of spectators has to make a noticable difference in the local area's economy. I understand the need to train our troops in the most realistic manner possible. Please be absolutly sure that you weigh all of your options in the expansion and understand that the area is extremely important to our community. Thank You, Donnie Buhrmaster

<b>Comment</b>	<p>For over 50 years my family and I, 3 sons and 6 grandchildren, have been enjoying the California desert, on motorcycles, jeeps and bicycles. We appreciate the beauty, the isolation and the freedom to do so. We have always left the area as we found it. We DON'T mind sharing it with the natural or man- made inhabitants. But now it seems our taxes are being paid to not preserve this wonderland of beauty and fun, but to restrict our access and enjoyment. I am a HUGE supporter of our Armed Forces, no matter their affiliation, Marines, Air Force, Army and Navy, and truly feel, between shutting down viable bases in budget cut backs and restructuring base assignments, i.e. Miramar and El Toro, now they are impeding on area not necessary to train and exercise troops. The base at Camp Pendleton is huge and incorporates significant beach front property necessary for training and includes private military campgrounds. Twenty-Nine Palms is also a large base and has other options, and its expansion is questionable. If there are violations of encroachment, please severely punish the violators, not the supportive, peace loving ORV devotees. Check out our desert camps and witness for ourselves the HUNDREDS of American flags flying proudly in our areas. Please consider other or no expansion in the true spirit of sharing this amazing country and land with the thousands of people who enjoy it's beauty and support your efforts, salute your commitment and appreciate and acknowledge your sacrifices. Please do not limit the freedoms you so valiently represent by disallowing our freedoms to use and enjoy our own land. Thank you.</p>
<b>Date Comment Received</b>	4/13/2011
<b>Response</b>	<p>Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.)</p>

because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** I am outraged by our Government's continued expansion of our military. We already have the best, most well-trained military in the world and I do not see nor understand any reasoning behind acquiring more public-use lands for training purposes...especially with the recent horrific press

surrounding the "Kill Team." That is what I'm afraid our continued expansion is creating, because we don't have the safeguards in place to prevent such happenings or to deal with them when they have.

**Comment** To whom it concerns. I am a man of few words. The closure of any public OHV lands disturbs me and I feel strongly against it so I will say a few things. My family and I like to watch the new and upcoming rock racing

motorsport that takes place at Johnson Valley. We as a family would like to use the OHV for a family trip outside of our home state of Oregon. My son should be able to use this land as well when he comes of age. We need to create more OHV land for people, not take it away. People need a place to recreate legally now that many places are becoming restricted to public use. Keep local revenue coming into the area. Many people are against hard economic times and this could be the downward turning point for many. Keep the American people free, free to use the land that they know and love. Bodhi Long and family.

**Comment** As much as I support the armed forces and country I also highly support off-road recreation. The Johnson Valley area has exploded into a new OHV sport in the last few years and is promoting more economic activity than ever. These activities bring revenue to the local area in forms of tourism, travel, business, etc along with various business across the country also. Please consider keeping what part of Johnson Valley how it is, public. Thank you for your time.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** To whom this may concern, To me, Johnson Valley represents something of a Mecca to off-road motor sports. A mecca that I have not even personally had the pleasure to visit...yet. Some day I hope I will be able to experience the wonders that Johnson Valley has to offer with my family. Unfortunately places such as this seem to be disappearing all too quickly across the U.S.A. Please re-evaluate your proposal to close of much of Johnson Valley for the military so that myself and generations to come can enjoy this spectacular area of our country. Thank You

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. **Comment** I traveled from New Hampshire for the first time to Johnson Valley in February to spectate the King of the Hammers race. It was easily the most exciting adventurous amazing trip I have ever taken. I have never been somewhere so wide open where you could view so many miles of pure nature. While visiting the beautiful scenery of the lake bed, I planned to make the trip every year with my friends. Hopefully next year even tow my truck out to offroad on the most famous trails in the country. Please keep the OHV area open so that my friends and I can continue to have such an awesome experience for years to come.

**Comment** Americans from across this great nation spend their summer vacations with family members building relationships that span generations in parks like Johnson Valley Recreational Park. I for one have witnessed that life building experience and will pass that onto my children. If this park closed to our favorite pastime, like so many others it would simply be a tragic loss for a significant part of society. Please don't close this park to my family.

**Comment** i have been going to Johnson Valled since i was very young. My fater used to take me out there and we would go off roading and hiking in the mountains. I now have kids of my own and take them out with me. There are VERY few areas left where a family can go out and experiance the desert, go off roading and spend time together. There are no other area's in the U.S. that has the same terrian as Johnson Valley (the hammers) i have been to different areas on the west coast and been offroading in many areas, nothing compares to johnson valley and nothing can replace it. Please rethink your expansion and leave johnson valley open to the public. Thank you, Jason Brown

**Date Comment Received** 4/13/2011

**Comment** Please keep Johnson Valley Recreation area open for the public to come and congregate with each other. It has been a place where I've made some lifelong friends and meet up with my buds from the past who have moved elsewhere. It's one the most amazing places to enjoy the outdoors and not have to spend thousands of dollars to have such enjoyment. This place means a lot to me and my family. I support the Marines and our Military with letters to the soldiers through my church but please don't take this land from us. Thank You,  
Robinson

**Comment** I have two nephews in the Marines; I support who you are and what you do. I just hope rather than expand in Johnson Valley you could use one of your other locations for expansion. While I know many of your locations are desolate similar to the Johnson Valley area the Johnson Valley area is a location that thousands of us depend on for recreation.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I am an avid off-roader and I hope that Johnson Valley is kept open to the public. I am originally from Pennsylvania, and after joining the pit crew for a team that races in King of the Hammers, Johnson Valley has become a huge part of my life. In the last 12 months I have made 3 trips to Johnson Valley while still living 2,500 miles away in Pennsylvania. The King of the Hammers event has become the biggest event in the offroad world. Even on the east coast people talk about it year round. I have witnessed first hand the rapid growth of offroad racing on the east coast as a result of King of the Hammers. Not only does this race provide a great form of entertainment for thousands, it has kept the offroad industry growing even in this poor economy. My move to Arizona from Pennsylvania is a result of my involvement in King of the Hammers and contacts that I gained through the race. I have been working in the offroad industry as a fabricator since 2008, and if it weren't for King of the Hammers I think the industry would really be struggling, however it is thriving. As big as the King of the

Hammers race is, the thousands of other people who recreate in Johnson Valley every weekend would be devastated by losing this land. At the rate we are losing access to public land, it would be a shame to lose an area that is so critical to the success of an entire industry. Thank you for taking the time to read my comments.

**Comment** I got my start in fabrication by building a Jeep with my Grandpa and Dad. I have since turned my love for welding and fabrication into a career as a Welding Engineer. I am continually building and modifying my vehicle to do better offroad. I live my week so that I can go out and explore the backcountry and the trails less traveled on the weekends. I hope to take my Jeep to every off road park in the country. I fortunately made Paragon before it was shut down but I missed out on Tellico. I am hoping to make it out west for a trip this next year. The money that I along with others who love this sport and hobby put out is never an investment that we hope to get back. It is always given for the next big thrill and wonderful sight that we might see while we are exploring the wild. Thanks for saving this land for future generations to enjoy and explore.

**Comment** I am writing this to express my strong desire that Johnson Valley OHV area be kept open and available to the public for public use. I do understand the needs of the Military to expand training grounds and I am so grateful as an American to every member of the United States military for their efforts and sacrifice. I would aks that the the area be either managed as multiple use which could offer OHV users an alternative area to recreate in. Or the the area could remain open as it is now and other areas be considered for use by the Marine Corp. We enjoy our one week a year that we are able to visit Johnson Valley. Again, I do appreciate the need for more space for large scale training. I just ask that some arrangement could be reached with BLM to assure there will be a future for OHV in Southern California, or more specifically, Johnson Valley. Sincerely Scott Correll

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2

of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

**Comment** Hi! I'm a wife and mother who loves the outdoors! We have based our parenting on spending time with our kids in the outdoors and learning/appreciating nature. Enjoying the King of Hammers and its race course is just part of our experience. Our 2 year old son falls asleep to off road videos every night. He says, "mommy I want to race that when I get older." Closing these lands will shatter one of his dreams. Please consider how many families will be effected as you make decisions about land closures! Thank you.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** The Hammers offroad trails are the best OHV trails in the entire world. It is very important for these trails to remain open to the public. Public lands were protected for the public to use, and should remain open to the public. If the military needs additional lands for training they should look into acquiring private lands for this purpose. In fact the Hammers are so special to the offroad community that events such as the King of the Hammers race draws tens of thousands of people to this area each year. I look forward to making the several thousand mile journey to this very special place next year. In conclusion it is very important to keep the Hammers open to the public. Thank you for your time. Regards, Jim Busch

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** There is always a need for military training. But, expansion should be limited to what is truly needed. Our United States is growing larger, hence

the open ranges are getting smaller. Please take the time to discuss with the community what is to transpire. And please listen to us in that regard.

**Comment** Johnson Valley, ie: the Hammers is the pinnacle of rock crawling, the best and hardest trails in the world. I live 2 hours from them and is one of the reason I retired from the Marine Corps and stayed out here. I live to work on my rig and take it out there to see what my ingenuity can come up with. It's one of the last great bastions of wild you can go to, no camp site, no camp grounds, no facilities, just you and nature and not that warm fuzzy stuff most like to see, but some of the harshest conditions in this country.

**Date Comment Received** 4/13/2011

**Comment** The off road community has taken many hits in the last decade. The "public" land that we cherish is being taking away from us. The off road community are championing for not only a place to enjoy our love for the sport but also for good stewardship of the land. We appreciate you hearing us out over the Johnson Vally area. I hope for everyone's sake we all can come to an agreement that helps both of our groups out because as we all

know no one is making any more land so we all have to work together to make the best of what we have. Due to the economic downturn of late i was not able to attend the events in Johnson Valley in the last few years but I hope that I have not missed out on the experience all together. This area brings people from all over the country and it would be a tragedy to have lost it altogether. Thank you for not writing us off and taking the time to listen to our comments. I hope for my sake, the off road community's sake and our kids sake that we can share the land. Thank you for your time Mike from Charleston SC

**Comment** I travel to Johnson Valley every year, and I have centered vacation time around the King of the Hammers event twice. I have even considered buying income/vacation property in the area as a result of the value this region has for recreational off road vehicles. This region is one of the world's foremost destinations for extreme off road vehicles. It's loss to the OHV community would be a disaster. This would be like closing Hawaii to surfing or Yosemite to rock climbing. Although I fully support all efforts to prepare our troops for the battles they face abroad, I have to hope that there

would be another alternative to using this area for that purpose. Right now, across the country, there are battles being waged by all sorts of competing interest groups who, for one reason or another, are trying to limit the access of Off-Highway Vehicle enthusiasts to public land. Johnson Valley has represented one of our few safe havens, where a healthy balance between recreational use and environmental preservation has been enjoyed by all for many years. Although freedom loving 4 wheelers everywhere would agree that we fully support the mission of the military, to lose this area because of it's value to the adjacent military base would be a sadly ironic blow to our battle-at-large for public land access nation wide. Please consider our battle for freedom here at home as you prepare for battle abroad.

**Comment** keep the hammers open! having access to one of the most remote beautiful places in the world is so important. taking away out legal trails will only discourage people to abide by the law and trespass on private property. keeping the hammers open allows thousands of people to enjoy this beautiful country and explore it legally with our rigs.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to

acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

<b>Comment</b>	Public land is at a premium. Try to wheel or do any off road activities east of the Mississippi. All the public land has been leased out to the highest bidder, who closes this "public" land off to the public. Surely there is an area that can be used in the National Training Center area.

**Comment** To whom it may concern: I am a patriotic American and an off-road vehicle enthusiast. I support the need for America's fighting men and women to have realistic training areas. However, I DO NOT support the acquisition of the Johnson Valley OHV area for our Marines to train. Multiple-use recreation has been constantly attacked by environmental groups, and we have been forced into ever smaller and smaller areas. Johnson Valley OHV area is THE premier OHV area in the entire country. Its closure to off-road use is unacceptable. The military has the ability to take nearly any area necessary for training, please select another area. I travel to the Johnson Valley OHV area annually, and spend thousands of dollars of my hard-earned money each trip. When several tens of thousands of people visit the area each year for rockcrawling, mining, desert racing, motorcycle racing, and camping in the desert with their families, the impact of our use is beneficial to every community along the way when we stop to stock up on food, fuel, snacks, parts, etc. The economic impact of this closure to the nearby California communities Yucca Valley, Landers, Lucerne, Apple Valley, Hesperia, Victorville, and Barstow will be terrible. Finally, just as has happened when environmentalists have closed our trails, responsible off- road enthusiasts are forced onto ever smaller areas, and even though we go to great lengths to Tread Lightly and minimize our impact on the environment, our impact is cumulative. The vast majority of us are patriotic supporters of our armed forces, please do not take so much from some of your biggest advocates. I am in full support of a realistic training area for the Marines. I am in full opposition of using THIS area to train Marines. This is far from a not in my backyard plea. Please do come to Colorado to train. I am certain there are lands here similar to Afghanistan.

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a

direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** My family has been coming to the Johnson Valley area for over 10 years patronizing the local businesses. We enjoy this area so much that we drive over 10 hours each way. Our business over the years has helped the poor economy. I don't think bombing the desert is helping the economy. I don't understand how we say we are taking troops out of war areas but we need additional land to train them on. What has happened to all the areas where the armed services have moved out of? There are many abandoned buildings and the economy of the area is worse off than it was before they moved in. Why not go back to some of those areas and use them? Keep the public land open to the tax payers.

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I know that you are probably wondering what an individual from TN has to do with comments on Johnson Valley California.....well it has to do with the money I spend to come to your great state! I travel multiple times a year to participate in events and trail rides on iconic trails in California including Johnson Valley. Last year I tallied the travel expenses that I incurred in California and it was close to 15,000 dollars. And this was spent on fuel and at local retuarants and hotels. Loosing Johnson Valley would certainly limit the amount of times that I travel to California, and possibly remove it from my travel plans all together. Now I am sure that this may seem small change, one person changing vacation plans, but I know for a fact that there would be hundreds, if not thousands of fellow 4 wheelers who would feel the same way. Please reconsider the closure of Johnson Valley to OHV traffic.

**Comment** To whom it may concern; I am writing you in response for the proposed closure of Johnson ORV area. The area is a popular and well used recreational area for all manner of off-road enthusiasts and outdoor hobbyist. The park itself is become a scarce commodity as more and more ORV lands are closed to public access. The area not only provides the off-

road and outdoor hobbyist a great place to enjoy, but their visitation brings income and visitation to the area. As a supervised government land area it also promotes stable and responsible land usage. Closure of the lands would be detrimental to thousands of visitors, the ORV hobby, and the local economy. I urge you to not close the lands for ORV usage. Sincerely, Scott Marshall

**Comment** Before February 2011, I was not overly concerned with the possibilty of losing access to The Hammers, in Johnson Valley. That changed when I was there for the King of the Hammers, and I got to see just how beautiful and awesome this area really is. Since I have been back home from my trip to Johnson Valley all I seem to be thinking about is how soon I can get back out there, I am to the point where I am considering moving from Chicago-land to SoCal just for The Hammers and the open desert of Johnson Valley. I can't begin to imagine how disappointing it would be to lose access to this land for the families that use it frequently, I can however say that I now know how special of a place Johnson Valley is and I would be heart broken if it was taken away from us.

**Comment** I am from North Carolina and came to Johnson Valley for the first time this year to run King of The Hammers. I have wheeled all over the east cost but this was the first time I have wheeled on the west cost and I loved it. I would love to come back to Johnson Valley to trail ride and go camping. I know what it is like to loose a riding area as good as Johnson Valley because just a few years ago we lost Tellico on the east cost and let me tell you it sucks. We use to go there at least once a month and now its gone. don't get me wrong new riding areas have opened up but nothing will take the place of Tellico. There are places that have harder trails and there are places that have better camping but there will never be a place that has the combination Tellico had. I believe that if Johnson Valley gets closed down the west cost will go thru the same thing we had to go thru new areas will open but nothing will be able to take the place of Johnson Valley.

**Comment** To whom it may concern; I'm writing in regard to any possible closure of the Johnson Valley OHV area. While I appreciate and understand the need

for our nations military to have adequate areas for training, I urge you to consider looking for areas other than Johnson Valley. My family and I are avid off- roaders. We travel throughout the western US multiple times a year in search of trails. The Johnson Valley area is unique in our sport and cannot be replaced. Loosing those lands would be a great loss to our sport and the local economy. Thank you, Brian Smith

**Date Comment Received** 4/13/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** Having been an off-road enthusiast for almost 15 years this is one of the few locations I still want to make it to. As being a United States Navy Sailor I understand the importance to have a viable place to train. While Johnson Valley OHV Park is the ideal location to provide training to my fellow brothers and sisters in arms, there is a way to allow both the use of the OHV Park while training is not being conducted and also allow for training to continue. While training evolutions are often subject to change on short notice, I strongly believe we can work in harmony to ensure training continues and there is continuing access to the OHV area for the public. The public would have to recognize that military training must come first and there is always the possibility of training that must be completed at short notice, there is a vast support for the military in the off-road community and I am sure together we can work a proposal to ensure continued access. As a fellow member of the armed forces I ask and strongly encourage the Marines to evaluate all options, this location is a viable location for the public as a whole from the off-road enthusiasts to hikers. I am sure as a community we can come to an option that would benefit both the public and the Corps.

**Comment** In all due respect, I don't see why it is necessary to expand 29 Palms to the west into the Johnson Valley OHV area. To me, Johnson Valley is the whole reason, I still 4 wheel; it has the best terrain for the type of offroading that I and many others seek. I along with many others enjoy the area and the openness and the sense of freedom it provides. Overtaking the OHV area would also negatively impact the towns in the surrounding areas, with the loss of revenue from the offroading community. There must be an alternative to the base expansion. Why not expand the base to the east? Again in closing, please do not expand the base to the west and over take the Johnson Valley area that so many of us enjoy both for recreation and as a source of revenue. -Jesse Lee

**Comment** I put in my plea to you to please keep the Johnson Valley open to public OHV use. There is getting to be less and less land for public OHV use and to take away more of it would be great sadness to thousands of people who visit and enjoy the area. The government is slowly shutting OHV use down

across the United States and it's only fair to at least keep what is left open to public use. Thank You for your time.

**Comment** The Johnson valley, Means dry lake bed Svra area has been a part of four wheeling since I can remember. It is a destination that fellow Four Wheelers and I talk about with a kind of awe reserved for only the most challenging destinations across the country. Especially with the list of those destinations becoming shorter and shorter each year. And now since the start of the King Of The Hammers race it is a place that tens of thousands of people plan and prepare for the entire year preceding the race. It is a place that I could not wait to take my truck to as a kid, and is a place I hope is still around for my son and following generations to enjoy. Thank you for your time. Daniel

**Comment** 4wheeling is mine and my family and friends main hobby. The recreation, friendships, and environmentalism that goes along with this hobby is unique in and of itself. I have not had the chance to experience the deserts of Southern California but I hope to in the future. Many of the vast areas that used to be open for responsible recreational access in the east have been closed down and used for logging, mining, or development. It would be a shame to see our own government closing its citizens out of one of our most precious natural resources; FREEDOM. In The USA we have the freedom to recreate as we choose, and the off road motorsports community is unique to the USA. I hope the Marines can find a suitable solution for land to use for training.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps also understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Johnson Valley (the hammers) is/are important part of off roading and a true family adventure spot. one of the last for southern californians like myself. I travel all the way to NAWS China Lake for work, to do live demolition and live fire training - There is a ton of "closed to public" land there that could be re- utilized for military only use- if my unit travels that far for just a couple events, maybe you could into that area? Thanks, -Travis

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps appreciates your suggestion for a project alternative. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a

significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Hello. My name is Shawn Hallford, Corporal in the United States Marine Corps. and also an avid offroader. Johnson Valley needs to be left as public land. It is home to the biggest race in all of North America, and it recreational use is enjoyed by hundreds of thousands of American citizens each year. Hasn't the average American sacrifice enough for the government? Haven't Americans lost enough public lands and rights to all the special interest groups and government agencies? By taking this landing you are turning your back, on every person we've sworn to protect. Now protect our PUBLIC lands and let us enjoy whats left of them. Thank you and I prayer you take everyone comments into consideration.

**Comment** Johnson Valley is one of the premiere spots for off road motorsports, with it's wide offerings and diverse trails. It's also home to the King of the HAMMERS. This one time a year event brings people from all over the world, and literally turns this barren desert lake bed into a full fledge city. It also boosts the local economy. While I respect all those that serve this nation and respect the Marines and what they do, This is one issue that I will have to stand against. We have lost a huge amount of trails, and there will not be any more. I want to be able to know taht I can take my grand kids to this place and have them enjoy what the area has to offer. So please leave Johnson Valley alone, and let us have what few trails left to enjoy

**Comment** Johnson Vally OHV park is the most legendary in the world and an icon in the offroad community. To close it would be like shutting down Yellowstone national park. The people have been using it as a meeting place to have family get togethers and outings so our children grow up knowing what the outdoors is all about. It provides a safe and dedicated area for the sport and keeps people from going to non designated areas. If you value America and the way of life it offers, please dont shut down this Legendary location and put the people out cold. Regards John Fleck Back Country Binders 4x4 LLC.

**Comment** Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to

jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us. Thank you for your consideration. Jerry Bransford Escondido, California

**Comment** I am hoping that the U.S. Marine Corps will reconsider expanding their training area into the Johnson Valley OHV area. Unfortunately, I have never been to Johnson Valley, but I hope to go soon, and I will hopefully be able to attend the 2012 King of the Hammers race. This race has been like a small stimulus package for the economy. Over the last several years, millions of dollars have been spent by private individuals looking to participate in this race, who would have otherwise been sitting on their money, and therefore not helping out the economy. Not to mention all the vendors and private citizens that attend the race (as well as the desert races held in the area), and all of the recreational users that use the area year round. If you do not have an alternative area to use, please consider only using the Johnson Valley area for a set amount of time every year, and leaving it open for public usage for the remaining days. This recreational area has so much value for the OHV community, it would be very sad to see it lost to all of us.

**Comment** Please reconsider your plan to close Lucerne Valley and use it for training. This is a valuable area for recreation off-road riding and would have a great impact on families that use this for their family sport. If this is gone families would have to drive to other states and lose their opportunity to do it on a regular basis. Riding as a young child with my family gave me a sense of responsibility and pride and I would hate to see that lost in our youth today. This land is more valuable as an area where families can experience the great outdoors than a military training facility. Thank you

**Comment** Johnson Valley area has been one of the few close areas to ride motorcycles and ATVs for the local residents. I'm concerned that the Marine base is going to consume more and more of "OUR" the public's recreational land. I have heard of a area on base of very historical significance that is already off limits to the public. The Petroglyph site. Please leave the land for our use.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Hello, My name is John and have been recreating in the Johnson Valley OHV area for almost 20 years with my four wheel drive vehicle. It is the only place like it in the world! 5 years ago, I became involved with the King of the Hammers race (in fact, I won it the first year)and have since started a business building race vehicles specifically for the K.O.H. race. They are high end race vehicles vehicles which can cost up to \$160,000 each. There are a lot of parts I buy from other sources and services I use from other shops to produce these race cars. I really hope you can find another way to expand your base without taken away our OHV area specifically, the area around Means dry lake and adjacent trails. Obviously, without the Johnson Valley Hammer trail system, my business will have to close it's doors. Thanks for considering my request, John Reynolds

**Comment** To whom this information will be reviewed by, I have not set foot in the area of the Johnson Valley OHV Park for about 15 years. However, when I was attending California State University, San Bernardino, this area was occasionally used by the geology group for mapping activities and geomorphologic studies. As a geologist, the loss of this area could be replaced by other similar locales. However, as an off-highway enthusiast, I have enjoyed the Johnson Valley area on numerous occasions. With losses of other localities in the greater Los Angeles area, it would be a shame for this area to be no longer accessible. Thank you, Russell Davies

**Comment** Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is

a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us. Thank you for your consideration.

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost

sales and tax revenue related to reduced recreational and film industry spending.

As an avid off road enthusiast and fan of public lands the Johnson valley area is truly one of the finest spots on the country. This site actually gets people into a new and expanding sport, it adds hundreds of thousands of dollars of revenue to the are from people traveling from all over the world to enjoy it. I come from a family with a very long and distinguished history of military service, so I absolutely understand the need for proper training grounds to help our troops. There are hundreds of other sites that could be used for similar large scale operations that would not take a bit out of the local economy and one of the fastest growing recreational activities in the country. Thank you for taking the time to consider the publics thoughts.

**Comment** As a proud American, and a desert lover, i wish to comment on the need to keep this land open for public/civilian use. i personally feel we can share the lands you help protect. we as desert lands users are supporters of our fine military and are wanting nothing but the best for our troops. but what are you protecting our lands for if we the public cannot use and enjoy it? hundreds of thousands of people use and enjoy this land each and every year, and have been for many, many years. we have had generations grow up and pass this opportunity onto their children. and now you want to completely shut it down for public use? did we not learn anything from the building of the berlin wall? with all the unoccupied lands california has to offer, you want an area that has been used and enjoyed by so many Americans for so many years? why? i for one can understand a compromise. like sharing the lands. when the military has a special need for it, use it for that short period, but let us have it back for the rest of the time. fencing off our deserts is nothing different than building a wall. are you getting this? at what point do you want the civilians to be at war with its own military? we wish to continue to support, but if this type of communistic take over continues, i feel it will hurt the relationship between civilians and the military. my family lives on the border of one of the finest Marine bases in the country. and i show and teach my 3 year old son about our troops whenever they drive through our town, or fly over head. not a fly over goes by that he does not wave to the sky in support. but i cannot know what he will think when i tell him we can no longer go to the desert to enjoy its beauty because the military took that land from us and closed it to the public. Please let him and his children grow up in a land that is still free, and free to use and see. your machines are quite capable of transporting our troops and weapons practice to REMOTE areas. Please do not take our accessible lands from us.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to

Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** OK as a veteran (US Army, 1990-96, I trained with Marines at Kaneohe Bay & Camp Pendleton)I wholly understand the need for training areas however I am sure that there are some alternative sites for the Marines to use other than the Johnson Valley OHV park. Too many areas are closed off every year to the Civilian off road community. I have not yet had the opportunity to get down to CA to visit Johnson valley, one of my vacation goals is to attend the 2012 King of the Hammers Off Road race. If the Marines use this as a Training area, that dream will not be able to take place. Please consider alternate areas to use. Thank you.

**Date Comment Received** 4/14/2011

**Comment** With the downturn of the economy we have all had to do with alot less of the "extras" in life..with that said camping and offroading in places that don't charge admission, sell food for obscene amounts, or require you to provide ten proofs of id and insurance are few and far between. Johnson Valley is one of those few havens that have provided all of us with those "memories that will last a lifetime moments" like your kid riding a motorcycle for the first time, or when you went to your first offroad race. These things may sound trivial to the average city dweller that thinks camping is what you do at an overpriced hotel? But it's so much more for "us" the people in this industry. Not only is it our livelyhood but it's our passion the thing that we look forward to, plan for, prepare for, SAVE FOR...so that we can sit in our camping chairs while our 9 year old goes roundy round on her quad feeling that ever so rare moment of freedom seldom felt in this day and age, so we sit and watch them all enjoying, laughing, making new memories to bring back home with us so that we can begin again planning, preparing, SAVING, for the next time...don't take that away from "us" please....

**Comment** After attending the public comment period meeting and reviewing all Alternatives for 29 Palms training land Acquisition I ask that you take Alternative #3. I am addamently opposed to more government closure of our public recreation areas as well as the negative impact closing any portion of Johnson Valley OHV area would have on the economy. This has been a popular recreation area for Southern California for many decades and the closure of this area would increase the potential for unlawful access which could lead to the death if a civilian were to come across live ammo. In addition, the loss of revenue would mean the loss of jobs for many Americans as some of the income derved from this area is what generates most of the income to certain business.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Every one has a bucket list and every trail in Johnson Valley is on mine! It is a one of a kind trail system, that a lot of blood, sweat, and tears have been given from the off road community to make these trails what they have become. Johnson Valley is used by many from Jeeping, Desert Racing, Geocashing, Camping, Hiking, & Dirt Bikes. It is also used by major off road companies for product testing. The King of the Hammers race brings people from all over the world, some who just want a chance to say they have been in the toughest off road race in the world, with a combination of rock crawling & desert racing. This is what being a American is all about, the freedom to be able to have the public land to enjoy. I'm not apposed to the expansion of the Marine Base but would prefer the expansion to be to the east and not affect Johnson Valley. I believe the expansion to the east, is in the best interest to every one! A bridge could be built for Amboy Road to allow military equipment to pass under (it could be possible for the off road community to help fund such a project), the train track could allow a delivery point for military equipment, & as for the natural gas line there are many different options! So Acquisition #3, I believe would be the best solution. KEEP JOHNSON VALLEY PUBLIC LAND.... SAVE THE HAMMERS....

**Comment** I understand the need for our marines to have large areas to train, however I believe that there is more than enough abandoned land that the US government already owns that is available for large scale use of training. Every year we lose places to take our families to ride and fight a losing battle to keep our kids out of trouble and by buying this land you are only further eliminating options for our groups to have family oriented activities. I would hope that you could put forth the effort to find an area that is already owned by our government and use that area for your training.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. as discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I write to ask the marines to not take over what little ohv land the U.S. taxpaying citizens have left. I traveled over 2000 miles last year just to visit the johnson valley ohv area from michigan. I plan on doing this again next year with my 3 year old son. I do not want to have to explain to him why we cancelled our trip.

<b>Comment</b>	<p>To whom it may concern, Our country continues to close state and federal recreation land to our citizens. As each recreation area is closed, those remaining open become more critical. Johnson Valley OHV area is the only OHV area of it's kind remaining in the entire United States. On the other hand, military facilities around the country have been closed and we continue to reduce the size of our military. Is it really necessary for a NEW bombing range versus reopening something that has already been closed? And does it have to be in the one and only area in the entire country that is open to the type of OHV activity that Johnson Valley offers? Please do not close down this area to public OHV use. Sincerely, Jim Kitson Davisburg, Michigan.</p>
<b>Date Comment Received</b>	4/14/2011
<b>Response</b>	<p>Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.</p> <p>The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.</p> <p>As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late</p>

2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** Johnson Valley is an important area to me because it was my first real introduction to what enjoying the outdoors in California was like. I was amazed by the difference in landscape between there and my native state of Alabama. I make the trip out to enjoy the public land at Johnson Valley at least once a year and would be there much more often if it wasn't so far away. I would like to move out west eventually and a big factor in that decision is the vast amounts of public lands and the large system of OHV trails that those public lands host. Please keep Johnson Valley open to public OHV access; it would be wonderful for my kids to have the same access I did when they begin to enjoy OHV activities. Thank you for considering my words!

**Comment** To Whom It May Concern: My wife and I currently live in the northeastern United States where OHV recreation is equal to poaching in some areas. There is little to no support OHV recreation in this area of the county. We are restricted to private lands to recreation, even though there is absolutely no shortage of State and Federal park land. One such public area in the mid- Atlantic, Tellico, has been closed off indefinitely due to questionable environmental findings that have yet to be released to the public. The failure to release this information is illegal in itself. The Johnson Valley OHV area provides a unique experience for everyone. I, one day, hope to be able to take my family there to experience the unmatched scenery and recreation that Johnson Valley has to offer. Across the county, OHV

recreation supports small towns, to big cities and everything in between. The recent King of the Hammers race, held every February for the last 5 years, has attracted more than 20,000 spectators from across the globe to congregate in the Johnson Valley OHV area for a week of the most grueling off-road racing in the world. This year, there were active duty military personnel participating in the race, as well as a United State Marine Corps Color Guard present for the presentation of our nation's colors. Under the proposed plan, the expansion to 29 Palms would takeover approximately 90% of the King of the Hammers race course, and more importantly forever remove it from public access. My uncle and brother are military veterans, and I will support our troops until the end of time. There are numerous other areas across the country that can provide adequate training scenarios for the military to match any environment found anywhere else in the world. This action, if allowed to go forward, will do nothing but evict thousands of recreationalists from PUBLIC land. Public land, as I'm sure you are aware, is becoming more and more scarce. Keep Public Lands Open to the Public. Thank you for your time.

**Date Comment Received**

**Response**

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

**Comment** Johnson Valley needs to remain as on OHV area. Parks like these provide lots of opportunities for the economy in these areas. They provide jobs at the gas stations, fabrication shops, motels, restaurants and it keeps a lot of young kids out of trouble by allowing them a place to hang and to be able to express themselves with through their vehicles.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Dear Marine Corp, I am not even close to the land in question, but it is still a very important part of land to me and othe east coast wheelers that plan to cross the country to enjoy this particular OHV area. There are not many areas left in the US, and I am sure there are A LOT of marines that also enjoy days full of wheeling and hanging with your buddies. Its an event that brings people together, and with most of the larger OHV areas on the east coast closed, parts of Moab closing, we arelosing place to get together and share what we all love to do. I am sure there are other alternatives to building on that land, please take the time to reconsider and see what closing this would do to the offroad world. Ryan

**Comment** The following are comments for Alternative #3: [reasons to expand to the East]? No impact to OHV opportunities in Johnson Valley? More compatible areas with the proposed action? Less impact to local business owners? Less impact to recreational opportunities? Less populated? Has been used in the past by the military? Economy will be less affected Reasons against expansion to the West? Reduction in area for off-road and outdoor recreational opportunities? Reduction in area for the film industry? Negative impact on the economy? May impact public health and safety of surrounding communities? May affect Southern California Edison (SCE) electric transmission facilities and/or distribution facilities? May promote illegal riding? Potential impact on groundwater supplies and quality? Potential impact on biological resources (e.g., desert tortoise and prairie falcon)

**Comment** Please retain the Johnson Valley area as a mixed use recreational area. I do not think it is excessive to ask that American citizens be allowed to use public lands for mixed use recreation while that same public land is not being used for military purposes. Given the state of the US economy, it is even more important for local vendors/business people the opportunity to sell fuel, food, and other necessities to those wishing to use such public lands. When I travel long distances to take advantage of such public lands, I make it a point to make as many of my purchases as possible from local vendors in a way to further thank them for the services they provide and those that the local topography offers. P. T. Schram

To whom it may concern, I am greatly concerned about the issue of Johnson Valley OHV area being acquired by the United States Marine Corps to expand their training area of 29Palms. As both an avid offroader and a retired Marine, I have an interest in both parties reasoning about the land aquisition. While I fully support the training of our Marines and would expect that every opportunity being made available to them to increase the positive effect of their training, I do not feel that Johnson Valley OHV should be allowed to be made part of the 29Palms Base, nor do I see a need for the Marines to conduct training at this location. There are better locations for the Marines to use and the loss of Johnson Valley OHV to the recreational offroading community will cause local businesses in Victorville and Yucca Valley to lose money. I truly hope that all opinions and options are weighed and considered prior to the decision being made. Thank you for your time. Sincerly, Jon Simpson GySgt, USMC (Ret)

**Comment** Johnson Valley is an area I have been riding, climbing and hiking since a child and to lose this area or have limited access will be a very sad day. As I hope in the near future to teach my grand children the beauty of Johnson Valley, the terrain of the geological landscape and the versatility of the riding areas. It is unfortunate that "WE" as US citizens that love to ride in the desert and mountains continue to lose land. The majority of the riders that are responding to keep Johnson Valley open are those that also GIVE back to Johnson Valley. Our club continues to have CLEAN UP weekends where we all help Johnson Valley keep her beauty and pick up the trash that others forgot to take away. We also continue to have our Trials events at the Cougar Buttes location. A tradition since the 1940's. This is not something we take very lightly as everyone has a piece of history with Johnson Valley. Please consider that as decisions are being made.

**Comment** Johnson Valley OHV area has been shared with our family for many years now. We have built and enjoyed rock crawling as a family and are sad to hear that there is a threat of it being taken away from us, especially that

there is NO other place like it. I can't imagine where else we would have to go to enjoy this kind of terrain. Our children have grown to enjoy and respect these areas as well. I can think of NO other way to teach children how precious this land is that we live on. As much as we have contributed to these parts of the deserts well being, it would be a real shame to have it taken away from us. Please consider our requests to keep Johnson Valley open for it is a way of life for a lot of people. Thank you.

**Comment** With the already limmited open space that allows leagle off road recreation it would only add to the illeagle side of the sport. All to often do I read articles about illeagle dumping, trespassing, and destructive activities ocurinng and being blamed on the offraod comunity. Takeing away open space areas would only add to this problem. We are being taxed and have money being eartaged exclusively for OHV use. But that money is being grabbed by local and state government for uses other than what it was origionaly intended. This is a growing problem and again takeing away more land would only add to it. As I try to raise my children and teach them about outdoor recreation in a responcable way it only makes it even harder when there no place to go. Please consider these oppinions before takeing any more of MY land.

**Comment** To whom it may concern, While I am a patriotic American and strongly support our armed services I strongly oppose the 29Palms Training Land Acquisition in the land area known as "The Hammers". Enjoying the outdoors is something that is important to me and my family. One of the ways that we do this is through family jeep expeditions. We have done this throughout the country ranging from our home state of Massachusetts to as far west as Utah. One of these days I hope to visit these trails in the area known as The Hammers. This is something I hope for my son to be able to do with his future children as well. Public lands are a precious resource that is becoming more scarce on what seems a daily basis. While I do support the Marine Corps and their need for training areas I do not support the expansion of 29Palms.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I ask you to please reconsider your use of this proposed area. Off roading is a very family orientated sport that has recently been under extreme pressure from groups that are not familiar with the sport. There are fewer and fewer places for families to enjoy these activities. It is almost impossible to open up a new park due to the restrictions that are in place. It is imperative that the places that our currently operating as off-road playgrounds stay open for all to enjoy. Best Regards, Tony

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

**Comment** I would like to express an interest in keeping the Johnson Valley OHV area located next to 29 Palms open for public use. I understand there are times when the Marine Corp may need expanded training area and there should be a compromise. Not to mention with the President's proposed budget cuts for the military that may cause a cease in future training missions. There has to be a way to keep the trails open for the public's usage.

**Comment** Good Morning, I am writing to voice my support for an open recreational area at Johnson Valley OHV that is open to the public on a year round basis. We, the people, are finding more and more of our recreational areas closed off, many times in the name of land protection, while at the same time government entities are acquiring lands to be used for their purposes, which end up being far more destructive than anything we could (or would) do. Furthermore, closing off another very popular OHV area will only lead to an increase in "illegal" off road activity by people that are just trying to find some place to go. I ask that you would consider the far reaching effects this decision will have on the public and economy as a whole. And the minimal benefit and use that will be provided to those that want to acquire it. Thank you, Sincerely. Thomas A. Miller

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding (refer to Section 4.2). The proposed action includes implementation of several special conservation measures (refer to Section 4.2.2.1) designed to reduce these potentially significant impacts to a less than significant level.

**Comment** Im writing this to help protect Johnson Valley and keep it open for offroad / recreational use. Former Military I understand the Importance of training and land to do so. I just ask that other land is used and keep this land open to the public since we do not have much as it is. I also get that you take heat from other organizations to go here dont go there blablabla but there must be another option. As always thanks for what yo do! I am proud to be an American. Lastly thanks for listneing.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Public comments on the Draft EIS are an important part of the decision- making process. This

information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I ask you as the daughter of a Veteran, PLEASE reconsider your location for the base addition! Johnson Valley is critical to the OHV community. We are those who most support the troops! Ask your own! I cant tell you how many Marine families I have had the pleasure of spending a weekend with in Johnson Valley. The OHV community is loosing precious land by the thousands of acres. This land supports many professional racing teams(several are military!), industries for research and development, it supports local stores, restaurants, repair businesses and it even supports my business in Northern California. Our children are loosing the potential for healthy active recreation. The families that use that land are extremely supportive of the military. There are many other locations that you could consider for the base to expand and I sincerely hope that you do. Please choose another location and leave one of the last OHV areas in California out of your expansion plans. I cannot express how important this property is to our off-road community. PLEASE RECONSIDER! Thank you for listening to our little voices.

**Comment** To whom this may concern I would like to state how much expanding the base in any direction to the west would impact my family. This area is not just a hobby for my family as well as many others this is a life style as well as a lively hood. We are now on our third generation in our life style and small off road shop that bases a large part of which on the Means Dry lake area. Taking this will remove a key component to my family as well as the future for my kids to carry on what my father started over 40 yrs ago. We are limited to where we can go and use open land the base on the other hand is free to expand in several other directions to the East or in other locations all together. Please consider this is not about a week end get away place but a life style my family has become dependent on.

**Comment** My family and I will greatly be affected by the expansion at the Hammers!! We travel 200 miles each way every other weekend to get away of the regular hustle and bustle of life! We spend approximately \$25,000 yearly just on travel expenses in the Victorville/lucerne area! On top of that I have spent a lot of money building toys just for that area! My question to you is this. Why can't the expansion go to the east? Why take more land away from me, my family, my friends, and millions of other offroad enthusiasts? Have you thought about the effect you will have on all the families that live near the hammers that live off the money they make from the offroad enthusiast? Please reconsider your expansion!!!!!! Thank you for your time, Christopher Midkiff My

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center, which was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** To whom it may concern Please re consider your proposed expansion of the 29 Palms base to the west into the Johnson Valley area. This is an area that is very important to off highway vehicle users. As you are well aware the King of the Hammers race is held in this area in February every year. This event draws a lot of attention to the area for a few weeks but what is not seen is how much the area is used outside of that event. I myself travel from Western Colorado to Johnson Valley several times a year, including King of the Hammers, for recreational events. I have always seen someone out on the Means dry lake bed when I am there. It doesn't matter if it's a weekday or a weekend people that are into off highway sports are out there. I understand that in this day and age the need for Military training in an environment similar to the areas we are currently fighting in is important. This training is what allows the men and women of our armed forces to keep those of us that are not soldiers to have the freedom and ability to do

the activities we dearly love. I do not take this freedom lightly and I thank all of our armed forces members for their service. Part of the freedom we have as Americans is the ability to travel to destinations such as Johnson Valley for a race, family weekend, vehicle testing, hiking etc. If the 29 Palms base is expanded into this area I feel the very hand that protects us is then taking away our freedoms. Please look elsewhere for this base expansion. Thank you for your time Brandon Watson

**Comment** Keeping areas open like Johnson Valley is important to the entire offroading community including myself. I feel as though there are several viable alternatives to this area and would rather the Marines research those. I do not want to appear as though I disagree with or do not support the Marines and what they mean to our country but I live near a large base in NW FL. I see hundreds of acres not being used and the land is in an area that could be used for the public's interest. I have never visited Johnson Valley but would would someday like to be able to visit as large open areas for public use is dying in this country and would like to see a place as special as Johnson Valley stay open for public use.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** what about access to the cal 200 memorial site? what about access to all the mines? which is part of early ca. history. what about the 90 tortoise that died during the solar project relocation? i went to the ontario meeting and got no answers. what 10 months will be available for recreation?

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. Sections 3.2 and 4.2 have been revised to acknowledge the California 200 Memorial site and impacts to access of the site. Access to mining and other land holding will be determined on a case-by-case basis once an action alternative is selected (see Section 2.6 of the EIS for more information). The Marine Corps is currently undergoing consultation with the USFWS service in regards to impacts to the desert tortoise and other wildlife species. The proposed two months of usage have not been determined at this time; however it is expected that training would occur in the spring and fall. Exact timeframes will be determined and communicated to the public if Alternative 4, 5, or 6 is selected. Please see Section 2.5.4. for a discussion of the proposed communication and notification procedures in regards to public access to the RPAA. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to

adjoining desert terrain that does not take our Johnson Valley away from us. Thank you for your consideration. Robert Little Los Angeles, CA 90045

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I am relatively new to rock crawling, but the few times I have been I have become a major fan. This is not just a hobby, but a lifestyle and huge part of everyone involved's life. I see everyone taking in the environment, the views and enjoy the stories that are told about the trails. I was amazed at how much everyone cares about the areas we have to play in, and how far everyone goes to make sure the areas stay safe and clean. We cannot afford to lose such a major and beautiful area such as Johnson Valley, it would be devastating to both families and businesss alike if this was to happen

**Comment** I believe that the land acquisition for the 29 Palms training facility should be the basic Alternative 3 with modified borders on the south to include some of the Sheephole Valley Wilderness area and the Cadiz Dunes Wilderness area. Expansion to the east would effect far fewer people than the Preferred Alternative 6 that you are proposing now. Why do we not use some of these Wilderness areas ? I can see 12 wilderness areas just in the map shown on your web site while I can see only 1 unrestricted OHV area. Alternative 3 does have the problem of 1 road running through it but since you only need this land for 2 months out of the year you could close the road for those 2 months, just as you have proposed closing the entire OHV area for those same 2 months with the Preferred Alternative 6. You can also require people using that 1 road for the other 10 months to buy a permit for it's use, just as you have proposed for people using only 44% of the OHV area with the Preferred Alternative 6. You can also notify the permitted users of the road when it will be closed by the same method you plan on using to notify the OHV area users of when the OHV area will be closed with the Preferred Alternative 6. It seems far easier to police illegal access to the road when it is closed since there have to be very few access points to that road whereas policing access into the OHV area, with the Preferred Alternative 6, when it is closed would be close to imposible since there have to be hundreds of access points into that area from all sides. Costs for policing illegal access for the road with Alternative 3 would have to be far less than the same policing costs using the preferred Alternative 6. If the Preferred Alternative 6 land acquisition is implemented and the only legal unrestricted OHV area anywhere close is reduced by 66%, requires a permit to use, and is even closed for 2 months out of the year it will surly lead to a huge problem with illegal OHV use in all the surrounding communities. I do not believe that expansion to the east with the Alternative 3 plan would cause any of these problems. In all my years of

living here I have yet to see any OHV activity in the Alternative 3 areas. Being a long time resident of Landers I have seen 1st hand what kind of problems illegal OHV use will cause if there is not a legal and unrestricted place for all of the OHV's to use, All the residents in the surrounding communities will be the ones to suffer the consequences. If the Preferred Alternative 6 land acquisition is implemented and the only legal unrestricted OHV area anywhere close is reduced by 66%, requires a permit to use, and is even closed for 2 months out of the year it will greatly reduce the number of races that can be held in this area each year which will be devastating to California's ORV dealers and accessory industries. I am sure there would be far less financial loss for California's businesses if Alternative 3 is implemented.

**Date Comment Received** 4/14/2011

**Response**

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding (refer to Section 4.2). The proposed action includes implementation of several special conservation measures (refer to Section 4.2.2.1) designed to reduce these potentially significant impacts to a less than significant level. Additional information regarding the potential for illegal OHV use has been added to Section 4.2. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** As a 20 year Marine AND avid off road enthusiast, I am opposed to the MCAGCC 29 Palms expansion extending into Johnson Valley ORV Park. While fully understanding the increase in land requirements both for training and impact areas to support a MEB sized element, I also know that our off road lands are shrinking at the cyclic rate. The Hammers trails at Johnson Valley are one are in the country that is both helping to provide growth of responsible use AND large scale growth in both the sport and related industries. During the trying economic times we are currently in, something providing strength and growth to an industry is somethin that can not be overlooked. The King of the Hammers event alone brings people in from all over the world. PLEASE reconsider other expansion options. Thank you and Semper Fi.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I believe there should be some give and take in this proposed expansion on the 29 Palms Combat Traing Center. IF , I repeat IF, it is necessary to expand the training ranges, then the BLM (U S Government) shold allow the OHV area to "expand" an equal amount to allow for the continued recreational use at the current level. A I mean after all, "THEY" can decide to remove land form "public access" then "THEY" can certainly RESTORE" land to public access. I do not think this is to much to ask. Thanks for your time. Karl

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The Draft EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** I am a California native as are my parents before me. I have seen this state go from a thriving economic force to be reckoned with to a Government run Beauraucratic nightmare place to live. We haave run a business here for 22 years. In our off time we take full advantage of the off-road recreatioanal areas with our Jeep and dirt bikes. Please consider a different area for your base. We have few places left we can ride and jeep. In reading the course of action you all are taking, you have no answers to simple questions, such as if the area will be open 10 months of the year, which 10 months, and so on. How can you take the time and money you have spent on the campaign for this closure, we the tax payers have paid for, and not have more answers? Take my vote as a NO for this closure.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with

the NEPA process to assess potential impacts of some other course of action. Exact timeframes will be determined and communicated to the public if Alternative 4, 5, or 6 is selected. Please see Section 2.5.4. for a discussion of the proposed communication and notification procedures in regards to public access to the RPAA. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** In February 2011 I spent a week out in the Johnson Valley OHV area. Myself and 6 other people rented an RV, 4wheelers and UTVs to use in the area for the week, and to get around race day for the King of the Hammers event. I was amazed at how many people were brought to the area for the event. It was fun exploring the different terrain than Im used to in Northeast. We had so much fun that we are planning on making it a yearly event. It would be sad to see Johnson Valley closed since we look forward to coming back.

**Date Comment Received** 4/14/2011

**Comment** I am strongly opposing any land closures of public land. This specific area is not a good option for many reasons as listed in your EIS report. I am a property owner in this area and do not want this area destroyed by the marines. This area is beeming with life and beauty and natural resources. I am well aware of the need to train marines for combat. I feel that this whole thing is another large land grab by the federal government and is happening

all over the USA. I would like to recommend that the commander use his head and come up with a better plan. We all have to live together in this great nation. I really do not believe the smoke and mirrors anymore. You are not above the law of the land. Thanks.

**Comment** As an avid off roader and a fan of the King of the Hammers (KOH) event held annually in the Johnson Valley area, I ask that you reconsider expanding the 29 Palms base to include the all of the major off road trails available. The Johnson Valley Hammer trails are considered by many to be the best available in North America, if not the world, for rock crawling and rock racing. This can be seen through the success of the KOH race, and the massive amount of tourism dollars it brought into the area.

**Comment** I understand the need for training our soldiers, but I feel that there is land elsewhere that can be better served by our military. The public land that we can use for OHV is shrinking fast. The area in and around Means dry lake is one of the best suited for OHV. It is unique in what it has to offer the public. Please allow the public full access to this land. I would be very distraught if my son would not be able to enjoy this area as I have. Thanks  
Scott Parker

**Comment** As a responsible OHV user, I urge the Marine Corp to expand the 29 palms training area in another direction, not into Johnson Valley. I understand the need for training areas, but I also understand the need for our dwindling public lands to stay available to the public. This area is one the few places in the Mojave that I am familiar with, been going there since I was a child. I want the chance to show my own children the beauty of the desert, the same one that I was introduced to in 1970. Thank you for your attention.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Hi Folks, I understand the motivation and desire to have land available for the Marines to train on. I'm a retired US Navy Chief. An FCC(SW) Tomahawk tech, who worked in training other military member for 11+ years, so I understand training. I worked with the Marines from time to time. I do so, on the ground, in the air, and at sea. Like thousands of other folks have mentioned and strongly suggested, taking any OHV land (specifically, Johnson Valley OHV) away from us, should not even be a consideration. There's plenty of adjacent lands available that should be used. I travel to Johnson Valley on a regular basis to enjoy its unique offroad areas, camping, scenic views, and peace it offers that is not replicated anywhere in the USA. Its unique offroad trail system that we have become intimately familiar with, should not be disturbed at all. Doing so would be a complete shame. I also strongly support the surrounding communities when I buy supplies and fuel. On average, I spend several hundred dollars each time I visit, on groceries etc. I do this about 6-10 times a year. Tampering with their well being would be bad for the local economy as well. Do the right thing, consider lands elsewhere, not take ours away like what our forefathers did with the Indians. Joe

**Comment** To whom it may concern: My name is Daniel. I am a legal, tax paying, voting citizen that enjoys responsible low speed OHV recreation. I also support our troops and military. I understand that our Marines need areas to train and perfect their skills. I just wish the Marines would look east for land or somewhere else instead of Johnson Valley, aka "The Hammers." A majority of OHV trails and land have already been closed in California as well as many western states. People need a place to recreate and The Hammers is a perfect place for this, away from cities and in the middle of nowhere. Closing this down to OHV activity would not be an wise economical decision on California's part. Also, let's think about all of our men and women in the military that like to recreate with their OHV's. Are "you" going to stand there and say, "Welcome home, thanks for putting your life on the line, and oh ya by the way you can't recreate at The Hammers anymore. Have a nice day." Really?, how does that seem fair? Thank you for your time and please do not take Johnson Valley away from the OHV community.

**Date Comment Received** 4/14/2011

<b>Comment</b>	Hello. I would like to state that I am very much against the Marine takeover of the Johnson Valley area. While I understand the needs of the Armed Forces, there are more appropriate options. I am a devoted user of the JV area. Johnson Valley has a long history of recreational use and is getting more popular every year. It has features and terrain that make it uniquely valuable. There are huge areas in the Mohave desert that are NOT uniquely valuable for recreation, and are much more appropriate for Marine use. Much of it has been incorrectly designated as Wilderness, but that should not remove it from consideration for Armed Forces use. Thank you.

<b>Comment</b>	Thank you for the opportunity to comment on the Hammers trail system. KEEP JOHNSON VALLEY OPEN FOR OHV USE. The marines can train with the navy at China Lake CA. Johnson Valley cannot be replaced as the perfect place for OHV events. Johnson Valley is very important to the community for economic and legal recreation purposes and should be left as is. If this area is closed to OHV use where are the thousands of OHVs going to be used legally? Johnson Valley must be kept open for OHV use. Thank you David Philblad 1552 Gaber Ct. North Las Vegas NV 89032

Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

<b>Comment</b>	Hello. I would like to state that I am very much against the Marine takeover of the Johnson Valley area. While I understand the needs of the Armed Forces, there are more appropriate options. I am a devoted user of the JV area. Johnson Valley has a long history of recreational use and is getting more popular every year. It has features and terrain that make it uniquely valuable. There are huge areas in the Mohave desert that are NOT uniquely valuable for recreation, and are much more appropriate for Marine use. Much of it has been incorrectly designated as Wilderness, but that should not remove it from consideration for Armed Forces use. Thank you. P.S: I would support Alternative Plan #3 or #7.
<b>Date Comment Received</b>	4/14/2011
<b>Response</b>	Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that

acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** It seem to me that the Military would have limitless options as to a location for training. The public who pays for this public land is slowly being excluded from any use what ever of their land. I would suggest the military go further east in the area used by Patton that is now classified as "wilderness." Leave Johnson Valley open to off roaders!!

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would

be a significant impact under the proposed action as well as a significant cumulative impact. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

**Comment** To whom it may concern, Im from the North coast of Canada, people like myself have not had the privilage to see and experience the beautiful area around Johnson Valley California, I hope to, one day. If this OHV area is closed, our sport will suffer a great loss which will be hard to recover from as we lose more and more acsess to land across the US and Canada. I hope a fair alternative can be achieved that will make everyone happy. Thanks for reading. Josh.

**Comment** Please keep the Johnson Valley lands open to OHV use. My oldest son Riley is 11 years old and loves to go off road. He has transversie myeletis which attacked his spinal cord at the age of one. He has to wear full leg braces a forearm crutch just to walk on level ground. He can't walk up but a few steps and must use a wheel chair for longer distances. If it werent for OHV use he would never have the opportunity to visit the wonders of the USA. Please keep the Jonson Valley lands open for OHV use so those who can't will be able.

**Comment** Johnson Valley needs to stay an OHV area. It is a childhood camping area and I wish to take my children there as well. It is also one of the last good motorcycle areas. Please use Ft. Irwin training grounds instead of usurping public BLM land.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and

maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would interfere with the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

<b>Comment</b>	I ask that you would take into consideration the amount of people who utilize the Johnson Valley OHV area. This area is a premiere OHV destination and is in a great location. Thousands of people travel to this area for the soul purpose of meeting new people and enjoying the land that our great nation has allowed us to use. Please do not take this land from those of us who visit it many times a year or those of us who dream one day of visiting the area. Many people have seen pictures, videos, and media coverage of trips to Johnson Valley for club runs or events like the King of the Hammers and have dreamed of running the same trails they have seen. **Comment** I am a retired 64 year male. I served in the USN for 4 years on a destroyer that made tours to Viet Nam. Therefore, I do understand, the need for training for our armed forces to go into battle situations. I have been offroading for many years. Over the years the offroad community continues to lose more and more of our public land to recreate on. I would like to see Alternative #3 implemented. That way I could continue joining my dear friends in an area that we have enjoyed offroading in and would like to continue. I have over the years met and made great friendships by virtue of common love of the outdoors and 4wheeling. Some of these friends, I only see when we are out in Johnson Valley. It would be a shame if this were to be taken away from us, especially when there are other options available.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. **Comment** I support Alternative #3: This option leaves Johnson Valley OHV area untouched. This particular 'wilderness area' was used by General Patton to train military before it was designated as wilderness. The other Alternative de-designates OHV areas that are being used by Americans for recreation, living, income and more. The following are comments for Alternative #3: [reasons to expand to the East] No impact to OHV opportunities in Johnson Valley More compatible areas with the proposed action Less impact to local business owners Less impact to recreational opportunities Less populated Has been used in the past by the military Economy will be less affected Reasons against expansion to the West

Reduction in area for off-road and outdoor recreational opportunities  
Reduction in area for the film industry Negative impact on the economy  
May impact public health and safety of surrounding communities May  
affect Southern California Edison (SCE) electric transmission facilities  
and/or distribution facilities May promote illegal riding Potential impact  
on groundwater supplies and quality Potential impact on biological  
resources (e.g., desert tortoise and prairie falcon)

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment and participation in the NEPA process. Comments received during the comment period will be evaluated in preparation of the Final EIS and will be part of the record in front of the Department of the Navy when it makes its Record of Decision (ROD) about whether and how to proceed to meet Marine Corps' MEB training requirements. If the ROD determines that land acquisition is needed, then a formal withdrawal request will be made to Congress, and it will have to approve the withdrawal. If the ROD determines that land acquisition is needed then the Navy would also request that the FAA proceed to evaluate the Department of the Navy's request to establish corresponding Special Use Airspace (SUA), or to modify existing SUA.

**Comment** Johnson Valley to means the world. After losing Tellico on the east coast, it would be another defistating blow to lose another great OHV area. Losing an area such as Johnson Valley is going to hurt the market, in that area, put a potential hurting on the cash flow in that area, and hurt business, and the overall fourwheeling community. People will start out sourcing to other areas for fourwheeling, maybe having to travel great distances to do so. If someone has to go through the trouble of this just to go enjoy themselves, wouldnt you feel bad? You should! Ive traveled thousands of miles from west TN to Johnson Valley just to say Ive been there, Its a compariable excitement as like getting a new toy. Its why were Americans, because we like to enjoy our freedom and expose ourself to memories and travel. Its how this country was founded, by exploring and wondering into the unknown. We've been doing it for hundreds of thousands of years. Now we're becoming a issue, Greed of use for something else or for whatever the secret, unknown, hidden issue the nay sayers are barking about, is. It's just darn right pathetic and to know the things this country is going through and someone else wants to limit, enthusist to yet another thing in life. The

Govt almost shutdown, NFL is in a lockout, were paying ridiculous prices for gasoline. After all the other issues our one get away, our cheapist get away compared to a week vacation. Is trying to be tripped from our grip. Like taking a toy bone from a dog, we'll never stop searching for it. You can bury it and we'll dig it up, my best advice as a young scholar, is let it happen and dont strip us of our passion. Im sure that making a extra buck or million of the restriction of us from Johnson Valley want kill you nor will, it be the end of the world. The land is useless otherwise the miles of dried up lake bed is a great designated spot for our sport. Thanks One of the OHV Saver's from TN

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. As a result of comments received during the Draft EIS public comment period, Alternative 6 has been further revised (in consultation with representatives from the OHV community) to increase public access to key portions of Johnson Valley and to reduce impacts on recreation.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment and participation in the NEPA process. Comments received during the comment period will be evaluated in preparation of the Final EIS and will be part of the record in front of the Department of the Navy when it makes its Record of Decision (ROD) about whether and how to proceed to meet Marine Corps' MEB training requirements. If the ROD determines that land acquisition is needed, then a formal withdrawal request will be made to Congress, and it will have to approve the withdrawal. If the ROD determines that land acquisition is needed then the Navy would also request that the FAA proceed to evaluate the Department of the Navy's request to establish corresponding Special Use Airspace (SUA), or to modify existing SUA.

**Comment** My family and i are planning on venturing west in the near future(we reside in upstate N.Y.) for a multiple state offroading/camping trip. This is one of the locations we are planning to stop at.This would be a big disappointment

to see this place closed. We understand the necessity to train in that area and terrain because it replicates what the U.S. is involved with over seas. Maybe it would be possible to have a small guarded base off limit to the public and train in that surrounding area at a specified month/s and call it quits for a while and let us enjoy the country side. Most everyone in this hobby, sport appreciate what the armed forces do, so please come up with a sensible solution. If this were to close it will only lead to more negativity toward the government. The locals will feel like we do, having public land and not being able to use it (good ol' f-ing N.Y.). THANK YOU

**Comment** My comments today are directed toward the Marines proposed use of the Johnson Valley OHV area. This area is very important to many Americans, as its terrain is unique and the driving and outdoor experience is sublime. Don't take away this treasured area by expanding West into its acreage (Alt. # 6). I see alternative #3 as a much better option for the continued enjoyment of the area by hundreds of thousands of Americans each year. The area to the East will make for less impact on the surrounding businesses as well. Also, this area was used by General Patton for military training. Please don't take away more of our OHV land, not only for the people that want to enjoy the land, but it is also the best alternative for the economy.

**Date Comment Received** 4/14/2011

**Comment** To whom it may concern, Johnson Valley means the world to me. It is what got me into the sport of rock crawling and off road racing. I've been there three times and each time I go I discover some new cool place out there. I can't even begin to explain the memories I've made out there, or the people I've met. Some life long memories have definitely been made for me. I think you should keep the area open to all OHV users because going out there is an unforgettable experience. I would be devastated if going out there were no longer an option for me and my friends. I know there are many others in the OHV community who share my feelings. Please consider this before closing any areas. Thank you

**Date Comment Received** 4/14/2011

**Comment** I am an avid OHV enthusiast and vote for option #3 for the reasons below:  
- No impact to OHV opportunities in Johnson Valley - More compatible areas with the proposed action - Less impact to local business owners - Less impact to recreational opportunities - Less populated - The area has already been used by the military in the past - Economy will be less affected  
Reasons against expansion to the West - Reduction in area for off-road and outdoor recreational opportunities - Reduction in area for the film industry - Negative impact on the economy - May impact public health and safety of surrounding communities - May affect Southern California Edison (SCE) electric transmission facilities and/or distribution facilities - May promote illegal riding - Potential impact on groundwater supplies and quality - Potential impact on biological resources (e.g., desert tortoise and prairie falcon) Sincerely, Scott M. Dorau

**Comment** I must say I have never been to the Johnson Valley area YET!!! I've had plans to for awhile, and now that my kids are getting a little older we plan to attend the King of the Hammers events held there. We also plan to head there to enjoy the challenging terrain with our 4x4. Public lands are constantly being taken from us, the "public". Then where do we take our families and enjoy the land? We do live in Colorado and in the 14 years we have lived there, more public land has been closed to the public. We moved to Colorado from Maryland where public land is almost now non existent. Please reconsider this land grab and consider the "PUBLIC". Thank You

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within

specific portions of Johnson Valley and during various portions of the year. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

**Comment** I have grown up in Southern California. I am now 48 years old. I have seen the offroad areas shrink to almost nothing. My wife of 24 years and children ranging from 14 to 18 all are offroad users. We try to mix up the areas we go to but it is getting harder and harder to go places any more due to the fact that all of the areas available to us are being closed, reduced or taken away. We are being treated like the American Indian. Forcing all of us into a smaller and smaller area. The public wonders why offroad accidents increase yearly. This is why. Why can't the USMC and the federal government use land that is not in use out in Death Valley or in the Nevada desert that nobody uses for family recreation? Why must they take from us the areas of recreation that are used by thousands of people a year that we pay for with our registration money? Why not use Texas? It is a huge state filled with thousands of acres of unused land.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. **Comment** I fully oppose the any plans to expand USMC AGCC into any OHV areas of Johnson Valley. My family and I frequently use these areas and object to these opportunities being removed from our lives. Furthermore, I assert that the USMC AGCC CEQA analysis does not fully analyze the impacts of large combat maneuvers and their contribution to cultural, biological, recreation, and air quality. By adding huge amounts of PM10 USMCAGCC will cause the local air district to not be able to meet their attainment goals. Also, by decreasing the size of one of the few recreational areas left without proper mitigation is a violation if CEQA.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** The Marine corp should use land that has already been used for the military purposes in the past instead of taking recreation area away from the public. There are very limited number of area that are legal for OHV use and the public who uses these areas pays OHV fees for the privilege to do so. Leave one of the few riding areas left to the OHV crowd or those people will be forced into other areas, increasing the impact to even fewer riding areas and increasing death and accidents that occur when to many people are in to small of an area. The land to the east is not currently under use and would be a better use of resources.

**Date Comment Received** 4/14/2011

<b>Comment</b>	Leave Johnson Valley open for public recreation and ORV use. We as off-roaders are finding less and less areas available for use. The Marines can open an area east of Johnson Valley for there use and training. It is less populated, has been used for military training before, and will not effect businesses that depend on the ORV and recreational use at Johnson Valley.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** The land in Johnson Valley was set aside as an OHV area years ago and now the Marines want to take it over. Those that use the OHV area in Johnson Valley may not be huge in numbers in that particular area. However, the OHV community across the country is a strong but mighty group of people. The government is constantly trying to find ways to close public lands, be it military usage (as in Johnson Valley), endangered plants (Imperial Sand Dunes), endangered species (Pismo Beach area, Oregon), or environmental (Seattle, WA area). WHY? If all of the OHV areas are closed in all parts of the country, there would be a huge toll on the economy in general - RV manufacturers, off- road vehicle manufacturers (Jeep, Toyota), ATV manufacturers, repair shops, etc. We the people of the United States need and want areas to recreate with our family and friends. Please don't take another area away from us.

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps also understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** Maintaining the Johnson Valley OHV area is crucial to the principle that the public has the right to use public land. OHV use allows a place for individuals and families to bring their love of the outdoors together with their love of vehicular travel providing a great way to bond with one another and enjoy the fresh air. Closing this area would be irresponsible and a crime against United States citizens.

**Date Comment Received** 4/14/2011

**Comment** California motor vehicle recreation areas are under continuing attack by legislators and government agencies wanting to reduce public access to PUBLIC land. I strongly urge you to consider alternatives that will not negatively affect the access of this area by the general public. Reducing land access only leads to concentrated use in other areas, thus creating a greater environmental impact on those areas still open for use. Further, the off-road motor vehicle industry provides millions of tax dollars to the California economy each year; something that should not be underestimated in these tough economic times. As Alternative #3 has these least impact on the greatest number of people, I strongly urge the adoption of this plan. Thank you for your consideration, Michael Mark

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land

would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I would prefer option 3 if any option has to be exercised. Moving the USMC training ground to the east rather than the west would not have the negative impact associated with a move westward. The urban sprawl of the Los Angeles area is moving eastward. Taking a popular recreation area towards that sprawl is not in the best interest of anyone. Moving eastward, towards a site already deemed acceptable for military training by General Patton, is the only viable option. Please consider this as the only option. Please do not take our public recreation lands from us.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. **Comment** My family and I love taking our children out to Johnson Valley for camping and OHV use. With the area being so unique for the offroading community, it would be very sad for not only my wife and I, but our children and future generations. Currently I have seen a couple of the proposals that have been submitted and agree with Option/Alternative #3 This option leaves Johnson Valley OHV area untouched. Rather, it states the Marine Corp would have to move the proposition to the East of their current boundaries. This would mean that the Government would need to de-designate wilderness area. Note this particular 'wilderness area' was used by General Patton to train military before it was designated as wilderness. The other Alternative de-designates OHV areas that are being used by Americans for recreation, living, income and more. Thank You, George Sims

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I support alternative #3, and suggest 29 Palms expand to the east as it will have less impact to the local economy, and it does not restrict recreational opportunities in the Johnson Valley OHV area. Currently designated wilderness areas to the east of 29 Palms should not be ruled out as potential training areas. Alternative #3 will support the necessary training areas, while having no impact on the OHV industry, an industry that is currently thriving even in a down turned economy thanks to customers who frequent Johnson Valley.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). **Comment** I've always supported the United States Military. As a LEO I understand the need for training, and having the proper training facilities / locations. As a LEO I also know there is need for stress relief, recreation and family time. Johnson Valley actually provides a place for individuals to have all three of these. The ability for the citizens of this great country to get out and enjoy the various terrains / environments is one of the things that makes this country great, it's also one of the freedoms the US Marines have fought for through out it's exsistance. I would hate to see this freedom taken away from us, by the very people who fought for it, and by those that gave their lives during that fight. I believe the civilians and the Maries can co-exist, as Johnson Valley OHV is but a very small part of the area being considered for use by the US Marine Corp. I would ask that you leave the Johnson Valley OHV ara intact and at the disposal of future generations, to use, visit and enjoy. Thank You.

**Comment** Please keep Johnson Valley open. As a pilot I can see all the MOA, and restricted areas across the United States. Most of them are in-active or not in- use. It would be a waste of military budget and a huge lost the the area if Johnson valley were to close.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the Draft EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

**Comment** We should be free to see this nations natural beauty as nature intended. this is the land of the free but many of our scenic trails are being closed. Didn't you go out and camp in the woods as a kid. nothing even comes close to the beauty of a park, a trail, or even a paved road through the mountains. please keep the hammers open so all kids, parents, and grandparents can enjoy the great outdoors. If you keep closing land to the public we won't have anything to share with the later generations. It will be a memory and a memory is never as good as the real thing. It's not spending time with your children. you might as well kill the children's imagination right now. how about their comon sense the outdoors teaches so many things that can not even come close to imitation. with this simple letter i promise to always do my part and tread lightly. so that the next generation can enjoy the outdoors just like us and our granparents have. i would like to leave this open to the public to create and share memeories so that all is not lost. keep us outdoorsmen in mind we can't hunt,wheel or even fish in the cities please continue to keep these lands open.

**Comment** Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and

you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us. Thank you for your consideration.

As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Hello As a long time user of Johnson Valley OHV, I understand that our armed services need to expand their training areas however, expanding into the Johnson Valley OHV area is not a good solution to the issue. I would like to state that I am all for option #3 as it can More compatible areas with the proposed action, as it has the following reasons Less impact to local business owners Less impact to recreational opportunities Less populated The area has already been used by the military in the past Economy will be less affected

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I would hate to see the Johnson Valley OHV area closed to the public. One thing I would like to do during my lifetime is to get out to California with my Jeep and wheel at the nation's most iconic locations. Johnson Valley is at the top of my list, along with the Rubicon Trail. Four wheeling is part of America's history and I would like it if the government put out some effort to keep it that way. Thank you.

**Comment** I have spent an extensive amount of time at 29 Palms and cannot fathom why you would do this expansion to the west. Worse yet, do it in a way that takes away from the very people who support you when there is another obvious choice. I know that the 4 wheeling community supports Marines more than any NY Times reader, or latte drinking hippie. They battle with the EPA and other government organizations to keep their ORV areas open, much the same way you get your training facilities scrutinized. I never dreamed the USMC would work against ORV park users. The oppressed has become the oppressor. Shame on you! I might point out King of the Hammers event draws over 30,000 people in to spend money in the local economy. The economy that the spouses of service members work in order to make ends meet. The same one that supports you. I am truly saddened that my Marine Corps would not recognize this. You need to leave the ORV area intact all year long. Please expand to the East ( Alternative #3) Because it has: No impact to OHV opportunities in Johnson Valley More compatible areas with the proposed action Less impact to local business owners Less impact to all recreational opportunities It is less populated Been used by the military in the past \*\*And it shows respect for the people who love and support you!\*\* You and I both know you will not open the area to the west after exercises for public use. One live round left behind gets it shut it down forever. One oil drip that you get fined by the EPA for ΓÇª same deal. I always have taken pride in the fact the Marines use common sense. Please demonstrate your ability to overcome and adapt. Please demonstrate your ability to respect others in the same way you wish to be respected. Please expand east. Semper Fi

**Comment** As an avid outdoor enthusiast, amateur historian and frequent visitor to Johnson Valley I must express my deep concern over the possibility of losing the Johnson Valley OHV area to an expansion of 29 Palms. While it is true that I support the need to properly train and equip our troops, this proposed expansion threatens to take valuable open land from the public domain. In California there is very little land that is open to as wide a variety of uses as is Johnson Valley, and none of these open areas have the diversity of geology, history or topography. Furthermore, the expansion of the base and increased usage will have detrimental effect on the residences in Landers and Johnson Valley area, as well as a negative economic impact upon the businesses who rely on JV visitors and users who purchase their products and services. Finally, the loss of the most significant off-road open space in Southern California will likely only cause degradation of other lands in the surrounding areas, and significantly increase congestion and related problems in the remaining open land spaces. Having reviewed the proposed expansion plans, I feel that only 2 are suitable at this time: \* Alternate Proposal #3 - which provides for an expansion of the base to the East, and \* Alternate Proposal #7 - which does not provide for any expansion beyond the current base boundaries. If you must expand, go East Marines, go East! Regards, -Brian

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost

sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

**Comment** As an avid 4 wheeler and an outdoor recreationalist, I strongly support Alternative 3 and strongly appose the Marine Corp from acquiring Johnson Valley. The public has already lost many roads, trails and open areas in National Forests and BLM lands to recreate in. Johnson Valley is unique and one of the last areas of its kind for 4 wheeling that is still open to the public. I urge the Marine Corp to expand its operation to the east into what is now Wilderness. The Wilderness area does not have nearly the public use that Johnson Valley has and after all, was once used by the military for training and other uses.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** The marine Corp already has plenty of land. They don't need to take more from us Think of how it would impact the locals and therrre buiness's it would ruin them and add to the downfall of this economy

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands how important the Johnson Valley OHV area is for recreation and the EIS concludes that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

As a result of comments received during the Draft EIS public comment period, Alternative 6 has been further revised (in consultation with representatives from the OHV community) to increase public access to key portions of Johnson Valley and to reduce impacts on recreation. Comments received during the comment period will be evaluated in preparation of the Final EIS and will be part of the record in front of the Department of the

Navy when it makes its Record of Decision (ROD) about whether and how to proceed to meet Marine Corps' MEB training requirements. If the ROD determines that land acquisition is needed, then a formal withdrawal request will be made to Congress, and it will have to approve the withdrawal. If the ROD determines that land acquisition is needed then the Navy would also request that the FAA proceed to evaluate the Department of the Navy's request to establish corresponding Special Use Airspace (SUA), or to modify existing SUA.

**Comment** closing down the johnson valley ohv area will be devastating to many californians as well as off roaders from around the world. many of us have businesses that rely on places like this to keep the sport alive, in order to feed opur families. we also enjoy the freedom of taking our families out there for outdoor recreation, a freedom that gets taken away with every land closure. - billy weiss

**Comment** When people are out enjoying the environment, people will protect the environment. It is human nature. We will protect what we love! We protect family, God, and The United States of America because we love them. We also love our sport. A sport that is under attack from environmentalist and businesses that believe certain land plots are better off used another way (a way that suits their needs). These people tell us we need to find new places to drive our vehicles, but the fact is, THERE ARE NO NEW PLACES! If it was easy to find new places, we would have. It is easier to relocate something that does not exist than something that is already here. Our park is all ready here. Please relocate your facilities elsewhere.

**Comment** Please keep Johnson Valley OHV open to the public year round. This area is phenomenal for outdoor recreation. Closing this area will negatively impact recreation opportunities as well as local residents. The option to the east of 29 Palms will not cause the same issues. Please keep our public lands open to the public!

All the reasons below are valid and responsible reasons. You know if the Marines use this area and think there might be one piece of Marine material or Ordnance left behind it will be closed to the public/ U.S. Tax payers for good. Move to the East and do a Fort Hood number on it and do what you need to do. The Offroad community is losing trails and recreational area by the miles yearly, fighting tooth and nail just to try and hold on to what is and has been available. Please reconsider you're options. Thank You. Reasons to expand to the East by 200,000 acres) No impact to OHV opportunities in Johnson Valley More compatible areas with the proposed action Less impact to local business owners Less impact to recreational opportunities Less populated The area has already been used by the

military in the past Economy will be less affected Reasons against expansion to the West Reduction in area for off-road and outdoor recreational opportunities Reduction in area for the film industry Negative impact on the economy May impact public health and safety of surrounding communities May affect Southern California Edison (SCE) electric transmission facilities and/or distribution facilities May promote illegal riding Potential impact on groundwater supplies and quality Potential impact on biological resources (e.g., desert tortoise and prairie falcon)

This land was set aside for OHV almost 20 years ago. I understand the need for training but the problem is that the off road community keeps getting pushed in to smaller and smaller areas. Between the environmentalist, the wilderness areas and now the Marines, the OHV community continues to get pushed out. If you want to take this area then replace the area. Give us some land that we can use with the same conditions and distance from LA that Johnson Valley is. Under plan 6, you want to share the area with us. Now you want us to get a permit to use the land. We have been using this land without having to pay for a permit. You want to restrict our use and make us pay for it. That is not right. My family has been using that area for over 30 years. At times I have had 4 generations there for a long weekend. My Father, my son & my grandson. My son grew up in the back set of our family Jeep and now his 12 year old son is doing the same. We, the American people believe in family values. My wife and I had been married for 38 years. In today's world with all the family problems. Divorce, drugs and gangs. Spending time with your family, instilling the rights values in your children is what being a parent is all about. You tell me, how many teenagers want to do things with their parents? I get asked Dad, Grandpa when are we going Jeeping? They want to be with us. That's what the OHV areas do, they bring families together. You go out to Johnson Valley on the weekends and what will you see? Families. Also under plan 6, there is a loophole that could keep it closed to the public if the Commanding General determines that the area is not in a suitable condition for public access. It is possible it could be just because of budgetary constraints. With the Federal budget in the mess it is today what are the chances of that? I support plan 3. De-designate the wilderness area. This area has been used by the military before. The area is less populated. It does not impact family recreational use.

**Comment** Hello, My family, friends and I have been using the Johnson Valley OHV area for as long as I can remember. The OHV area at Johnson Valley is our primary getaway for family activities. Not only is it important to be available to my family it's also my primary outlet for spending money!!! I easily spend \$25K+ a year on trips to Johnson Valley, after you add up gas, food, truck payment, RV payment, etc... Keep families together, keep the economy struggling, keep Johnson Valley OHV area open! Thank you-

**Comment** There has be enough desert for the marines not to take away from southern California residents. The Federal government should be able to provide our military areas without taking areas away from public. I believe that I should be able to take my son camping in our state. Unfortunately, the areas are becoming less and less, please do not make another mistake and close yet another area off to responsible, taxpaying, families that have been enjoying this beautiful area for years.

**Comment** I would like to request to keep the land in Johnson Valley, Ca. to remain open as public use as an OHV area. I am a disabled veteran, have had 3 tours in OEF, so I believe I have earned a right to vote on helping decide what happens to our domestic public lands. I am an avid 4x4 enthusiast who enjoys the outdoors and enjoys seeing the beautiful country I helped defend. I would be very upset to hear that another public use area is closed down and taken away from the public. Especially, since there is already a limited trail OHV lands available for 4x4 enthusiasts. Please do not make the wrong decision to close Johnson Valley, Ca. permanently from OHV useage. I am asking as a patriotic american, a veteran, and a believer of freedom. Thanks you.

**Date Comment Received** 4/14/2011

**Comment** I have been going to Johnson Valley for 45 years for off road recreation. I have enjoyed it with my grandparents, parents and children. It has been a tradition to spend major holidays like Thanksgiving, Christmas and New Years with friends and family out there. The biggest problem is that we the off road community are losing off road areas every year due to special interest groups pushing for wilderness conservation. I would hate to see another perfect riding area be lost forever. I'm voting for Alternative #3. Just keep things the way they are and please find somewhere else. Thanks for taking the time to read my comment.

**Comment** I have been frequenting the Johnson Valley OHV area for years and have always had a great time out there. Its such a freeing experience to be able to go out in the desert and cruise around in those magical valleys and secret spots. I want to continue going there for years to come I feel there are plenty of other areas that are not going to impact OHV users nearly as much which could be used for this proposed military expansion. Please take into consideration the many events and fundraisers that happen out in that area, as well as the plain regular joes who go out and enjoy it every weekend, all year long. Please, try to explore other options in this that will not affect our beloved Johnson Valley OHV area in this way. Thank you for your time.

**Comment** Johnson Valley is about a 14 hour drive from our home. But that being said, you need to know that it is one of my familys favorite places to visit about 2-4 times a year. I have a wife of 10 years, 1 boy 10 years old and our daughter 8. In my eyes Johnson Valley is irreplaceable. You just cant find another place like it. Everyone enjoys the Hammer trails, we love to ride our atv,s and ohv,s out in the desert. The King of the Hammers Race is epic! And the quality time my family enjoys together while recreating is priceless. Please find a way to keep this California jewel open to the public. Thank you for your time, Jared

<b>Comment</b>	<p>please offer alternatives to taking over the Johnson valley OHV area. These areas are becoming more and more hard to find and they truly are a place that you can not replicate. Before a decision is made each person looking at this should spend a weekend out in Johnson valley. It is an unforgettable experience I pray I get to share with me son in the years to come.</p>

**Comment** I am a staunch supporter of the military and I did 10 years as a Navy Seabee. I know the more we bleed in training the less we bleed in war. Yet I also know that we need places to blow off some steam and have some fun. We all have hobbies. We all have those things that help us to relax and spend time with friends and family. The Johnson Valley OHV is the place. It is the place that my hobby culminates. My wife and I and now my grandson and daughter spend our disposable income on building a vehicle to take into the back country. The time spent doing it is wonderful time together but we also need a place to take that vehicle when we are done building. Johnson Valley OHV is one of those places. It is a place to test both man and machine. It is a place to meet with friends of a like mind and

enjoy the camaraderie that comes from a common hobby and common interests. I understand Johnson Valley OHV area would be a good location to expand into for training. But I also know there are other areas that could just as easily be utilized that don't already have a designation as an OHV area. The government has lots of land to work with sadly people who enjoy off road vehicles do not have those advantages. The areas we have we have had to claw and scratch to get and then fight even harder to keep. To take this area from us to use as a training area when there are other areas that you could use would be doing a disservice to all of us. and many of the people who you want to train there. Many of the people I have met there are military, it is also the place they go to enjoy their hobby. SO for us and your own, please consider other options, please leave Johnson Valley OHV alone for the use of all enthusiasts. Thanks

**Comment** To Whom it May Concern, I am writing this comment to inform you the Johnson Valley SVRA is an important part of my life. For over 7 years my family and I have recreated in this area to enjoy the raw rugged beauty of the desert, and explore challenging 4x4 trails. Countless friendships have been forged in front of a camp fire and on trails in Johnson Valley. I will be deeply mournful if the priveledge of using this land is taken from the public. I understand and respect the need for the training facilities, however please reconsider taking this special place away from Southern California. Thank you for this opportunity to express my view. Respectfully, Greg Bell

**Comment** I am aware that the expansion of the Marine Base will cover parts or all of the Means Dry Lake area including what is an area called the Hammers. This area has developed a reputation among the 4 wheel drive recreation groups as a Mecca for the most difficult trails known to exist. The Jeep was brought home after WWII and that hobby was born. The hobby gained so

much popularity that Jeep named it's vehicle after the Crown jewel of off roading. The Rubicon Trail. The hobby turned sport as people pushed the limits of what vehicles can do much in the same way the Marines push the limit of what they can endure. I support the efforts of all our men and women in uniform 100 percent at the same time I support the right of the public to use public land. I do not support the expansion of the Marine base to the west. Thanks for asking!!

**Comment** Dear Sirs, I understand the need to train our young men and women of the Marine Corp, but to take away the Johnson Valley OHV land is wrong. In these hard economic times people need to be able to enjoy the access to a place they can go and fell free. Johnson Valley is a wonderful place that we take our family to get away from the stress of everyday living. Do you realize how many American families go to Johnson Valley? We are not allowed to ride our ATV's on our own property do to new city codes. Now the government wants to take away our stress relieving Johnson Valley. I would beg of you, find land elsewhere. There seems to be a large amount of land out by the Yermo base. We pay all our taxes. We do everything we can to help and support our country. Taking away Johnson Valley seems to be something an enemy of this country would do. Thank you for your time. I hope that you will reconsider taking away our access to Johnson Valley. Sincerely, Mary Paolini

I've been reading about the issues affecting Johnson Valley ORV with great sadness and passion. Hearing that the area loved by so many of my fellow wheelers may be affected by government shut-down frustrates me. The area has been open to the public to enjoy, as well as the recent rise and popularity of Rock Crawling/Racing and the King of The Hammers. As the sport grows, its sad to see the areas that can house this sport diminish. Once my son gets a bit older, I had planned on taking him on a trip in the Southwest making stops at many beloved offroad trails; Rubicon, Fordice, and of course, Johnson Valley. If anything but Alternative #3 passes, I fear that I may not be able to show my son these great trails. My vote is for Alternative #3, to keep the public land open to the public all year long. We are being faced with too many land closures that our kids may not be able to experience what this country has to offer, camping and 4-wheeling in the great outdoors.

THIMC I am a Chief Petty Officer in the United States Navy with 23 years of service currently deployed. I am an avid off roader and the Hammers have been the best release for me after any one of my many deployments for the simple fact that it gives me a place to go to relieve, to think, and enjoy nature as well as the great trails provided. This is one desert that you don't have to worry about IEDs or ambushes. This land is therapy for me and many others from different walks of life, not just the armed services. I totally understand the need for quality training to better prepare our troops who will be in harms way but what of the troops that have been there and come back but some of them is still there? The personnel with some kind of

PTWS that is finding it hard to adjust to the real world as we know it. After Operation Iraci Freedom, My wife noticed a change, I noticed a change and I wasn't sure what to do to fix it. My good friend that I have been to the Hammers with before, invited me on a weekend wheeling trip and that did it. I knew I was home in the US, I knew I was safe but the subtle similarities of the desert helped me sort things out, helped me deal with issues and brought me home. I am not saying this will work for everyone but it worked for me and maybe it will work for our brothers and sisters that still have issues to deal with. This holds true for many civilians that I have taken out to the Hammers and the stories are all similer in that the peaceful quiet of the open desert is calming. I hope that you take time and realize this is more than just an offroad park, more that just recreation, and that every single person that goes to the Hammers supports our troops 100%. Thank You for your time and for your service to our great country, stay safe and God Bless. V/R Mario N Galego

**Comment** I oppose eastward expansion of the MCAGC. I feel this will impact wilderness areas that my family has enjoyed for many years. To lose the

beauty of the eastern Mojave to a massive land acquisition of this sort would be a crime for the present and future generations. All this aside from the travel routes and recreational areas outside of the wilderness areas. Please let this land stand in the public domain

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** My best friend, my brother, is a marine. I have another friend marine 3/5. As much as i support them and our nations military. Johnson Valley is too valuable of an offroad resource and recreation area to loose from public usage. Not only do they support my stance, they have also participated in this petition. Johnson Valley is the mecca of the sport, the "holy land" as it has been called. These are the hardest and most storied offroad trails in the world. It would be a total shame to take them away from the American people.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I live in Ohio and belong to a club who have members who have been out to the hammers to enjoy recreating in the great outdoors.(offroading) I am planning on a traveling out for the KOH race as well as plan on taking my family there to vacation. This is a world class place for OHV recreation that would be irreplaceable in my opinion. Please keep it open access to the public. Thank you. Steven E Stroud

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** The military has enough land to practice in. This country is becoming more of a Communist country when the gov't keeps taking freedoms away from the people. It seems the more taxes we pay the more our freedoms are taken from us.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** As an avid off-roader who moved to California from the east coast, I cannot possibly convey how much of an impact the seizure of Johnson Valley from the OHV community would be. Johnson Valley is the PREMIER off-road park in all of the west. Our school sponsored 4x4 club makes 6-10 trips per

year, and its 7 hours from our school. If a bunch of broke college students feel its worth saving every penny to go "wheel" at Johnson Valley, then imagine the heartbreak we experienced when we learned we may not be able to in the future. I'm simply stating my own feelings here, but I'm sure there are thousands of us in the off- road community that will be devastated if J.V. is no longer available for our use. Thank you, -Dan

**Comment** I am opposed to any expansion to the 29 Palms MCAGCC. The MCGACC has proven over the years that it has sufficient space and area to adequately train our Marine Corp. This proposed expansion, in this economic downturn, is foolish. Our government through our military bases in the west have enough land, i.e. Ft Irwin, Camp Pendelton, China Lake. That we should take advantage of we have instead of taking public lands that have been used by the public for various forms of recreation for years. My family has been land owners & neighbors of the 29 Palms MCAGCC since the late 70's. I have interacted with various members of the Marine Corp over the years and was told of the vast and unused area of the MCAGCC. So use what you have and leave what little desert we the people have left to use.

**Comment** My husband and I moved to Apple Valley, CA in 2004. The whole reason we moved here was because of the lifestyle and because we were and are highly involved in the off-road racing/riding community. A year after we moved here, my husband opened his own business at home, a motorcycle repair business. Most of our customers are our friends who are fellow off-road enthusiasts from all around the Southern California area. This is NOT our hobby - this is our LIFE! My husband has built his business from nothing and has been very successful. We could not move our business back to Orange County, CA where we moved from originally. This is our life here in the desert and we do not EVER want it taken away from us. My husband was injured while riding in 2007 and is now in a wheelchair. His work and business has become even more important to him now more than ever. Please take my comments into consideration. There are MANY other people who's businesses revolve around the OFF ROAD Community and any change in the Johnson Valley OHV area that would mean having our land taken away from us for recreation and for our way of life would just be devastating to thousands of us!

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g.,

There are so few places left for the off road community to enjoy their sport it would be a shame to lose another. We are often misjudged as a group that tears up nature but the reality is that the large majority of us take better care of the trail systems and surrounding nature than any of the groups who look to limit access. From a veterans standpoint I also think it's in the best interest of this country to promote activities that get people and their children outside camping and wheeling in places like Johnson Valley as opposed to a bunch of xbox playing couch potatoes. Those couch potatoes aren't likely to be standing in the recruiters office any time soon.... Thank you.

**Comment** Where to start. We as a family have been camping in the area for the last 18 years. We enjoy the park as it is. My kids have basically grown up there, we miss last year and my daughter expressed that she very much missed out on vacation time in the area. So we headed back down this year. This was our first year to see the KOH racing. It's more than just the park. It's the whole area too. If the park is closed or altered to the point where it's not fun then we most likely will not be going to the area. We spend a fair amount of money on food and supplies, not to mention other things like eating out in town. But it's the park that attracts us there each year.

**Comment** Please allow me a chance to visit Johnson Valley in the future. I am an avid rockcrawler. I have left behind many passions to pursue this. Due to the economy I have not been out in over a year. I go to moab on a yearly basis, but Johnson valley offers an experience that is without equal, not even in moab. I have some great memories from my first visit, and would like to make it back someday. It's an experience that cannot be had at any other place on the planet. As a landscape architect, I feel it is an appropriate place

for rockcrawling to take place along with many other forms of recreation. A new sport was born there with the king of the hammers race. It would be a mistake to restrict access to this amazing area. I feel that there are less and less places every year to recreate which has a negative impact on society as a whole. Having said all that, I appreciate the great service that our servicemen give us. I have many family members who are vets and it means a great deal to me. I know there are alternatives and I would ask you to please consider those places for the great work that you do!

**Comment** The OHV area in Johnson Valley represents an amazingly important asset among the few remaining public lands available for public recreation use for the great many citizens and families who enjoy this land each year. As a career serviceman I understand the need for quality training areas, but fail to understand the compelling reason to close Johnson Valley OHV, even for only parts of the year, especially the particularly disturbing options which will leave the decision to open or close a California state (and truly national draw site) resource to the commanding general of the base, a great American no doubt, but a man who will usually have little or no connection to the citizens or their representatives who would be impacted by unscheduled closures at the sole decision of a single man with command authority and extreme pressure to accomplish the given military training mission but no responsibility to the impacted businesses or citizens impacted by closure. Several other options appear to strike a balance between public use and military mission. Option #3 which protects the public lands in Johnson Valley and provides for the military mission by returning land to the East of 29 Palms used by General George S. Patton for military training, and presently unused by the public, to the USMC for their requested expansion.

**Comment** As an outdoorsman / Jeeper I have been aware that the natural progression of our Government is to increasingly deny the public access to their lands. The Desert Protection Act closed massive tracts of land. Now that a budget crisis looms we can expect more parks and OHV areas to be closed. Option 3 is the most undesirable to the Marines but could be a better viable option for them if the SheepHole Valley is mitigated from the wilderness area under the DPA. This expansion east does not close any of the JV area to landing strip access, land owners, and OHV enthusiast. Utilizing Sheephole Valley does not affect anybody as we have already been denied use and enjoyment of that tract of public land. Thank you for your consideration.

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I am a stakeholder in this process for several reasons. Based on the usage that myself and my family have gotten from the JV Open Area over the past 40 years, and the possibility that this may be coming to an end, I must state that I am opposed to the Marine's taking any land to the West of the current 29 Palms Base. 1. Having reviewed the Draft EIS, I have noted that Appendix J is lacking the documentation of, or has minimized the importance of, a variety of cultural resources inside of the revised boundaries, and has missed some critical biographical information from local settlers in Lucerne Valley. I would appreciate being contacted so that I can provide the missing documentation needed to ensure that these sites remain protected if the Marine's take possession of the proposed expansion lands to the West of the existing base. 2. Various branches of the US military have left an unwelcome legacy on desert communities in the past. A prime example is the current ghetto in the center of Apple Valley that was once military housing associated with George AFB. The EIS needs to address the human currency that will be affected, including the livelihood of residents and merchants in Lucerne Valley. 3. Desert Racing, both in terms of Motorcycle and Trucks/Buggies, is a sport that is native to Southern California and remains a major source of revenue for a variety of businesses in Southern California. The JV Open Area is of critical importance to keeping these traditions alive. Any potential shared use of the Open Area

must have written/contractual language that precludes the military from polluting the shared areas with unexploded ordinance and expended ordinance that is harmful to humans. Most of the OHV community is currently of the opinion that the promise to share the Open Area is an empty promise that will be violated by a future lockout of the public due to hazards created by training exercises. 4. OHV use has steadily increased over the past four decades, yet areas where OHV use is allowed have continued to shrink. The OHV community is already faced with overcrowding and dangerous conditions on holiday weekends. This will be dramatically exacerbated if the JV Open Area becomes unusable by the general public. Repeated calls for Mitigation in the form of other desert lands being opened up to OHV use have gone unanswered by both the Marine's and the BLM. In order for the EIS to be complete, this must be addressed. 5. The desert tortoise is an endangered species that has been high on the radar in the Mojave Desert for many years now. Moving tortoises as part of the recent expansion of Fort Irwin has been disastrous to the local tortoise population. Relocating tortoises is not a valid method of mitigation and some other form of mitigation should be addressed. Regards, Michael Mansfield

**Date Comment Received** 4/14/2011

**Response**

Thank you for your comment. The EIS evaluates impacts to cultural resources under each of the action alternatives (see Section 4.11). As noted in the EIS, impacts to cultural resources would be significant under any action alternative.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending. The section has been updated to acknowledge impacts to specific communities.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In

addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). The specific details on management of the RPAA in regards to permitting process, permits and fees for events in the RPAA, etc. have not been formalized at this time. If the alternative selected is one that would involve an RPAA a Recreation Management Plan would be developed that would address these details (see Section 4.2.5.4). While preparing the Recreation Management Plan, the Marine Corps would solicit input from the public, BLM, and other agencies.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

The EIS evaluates impacts to biological resources under each of the action alternatives (see Section 4.10). The Marine Corps is currently undergoing consultation with the USFWS service in regard to impacts to the desert tortoise and other wildlife species.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

<b>Comment</b>	leave Johnson valley alone as a veteran of the spacial forces i do recognize the importance of the training areas. but this place is one of a kind the only one in the world that as such a unique conditions leave it open there are many other places that can be used for the same purpose we as a club wheeling at JV almost every other week. leave it open there not many OHV areas that left open in ca ALON .
<b>Date Comment Received</b>	4/14/2011
<b>Response</b>	Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered

and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

<b>Comment</b>	Closing, or even limiting access to Johnson Valley offroad area would severely limit choices for recreational rock crawling, motorcycle racing, and general desert recreation. Although I live in Arizona, my family and friends enjoy the Johnson valley experience quite often. I would like for my grand children to enjoy Johnson Valley as much as my family has for the past 40 years. Please consider the needs of the general public in your decision. Sincerely, Gene Mooneyham

**Comment** I have been a resident of Johnson Valley since 1994. The proposed expansion of the military base will have a devastating impact on the local economy and property values. Please don't destroy Johnson Valley with your senseless proposal. It's my understanding that of all the alternatives, the proposal called, Alternative #3 make the most sense, it allows for the base expansion, minimizes the impact on the local economy and keeps one of the last open riding areas available for public use, as well as preserves the environment. From the meetings it appears that the area described as Alternative #3 was already used for military operations, so the personnel at the base should be aware of its potential to run the proposed military drills. Given the current state of the economy one has to wonder why the Marines are declaring war on the people of Johnson Valley. It's my understanding that the base is primarily used for artillery drills. Why do you want to drop ordinance within a mile of where people live? And, it seems highly unlikely that anyone in command would drop bombs on our own troops. Finally, from experience, as outlined the proposed drills have not been needed since WWI. Apparently the Marines are going back to donkeys and push carts. It would appear that this is simply a land grab. Grow up! Assuming anyone at the base has any sense, it would appear that an acceptable proposal would consider the current land use, the impact on those activities, the benefit to the community, impact on local business owners, safety of the local residence, affect on local ground water supplies, and potential affect on the local biological resources. Of all the bad choices, Alternative #3 seems to be the only choice. Hopefully, someone reads this and wakes up before Johnson Valley is turned into a memory.

**Comment** Johnson Valley has served as a recreation area for my friends and family for years. To use this part of the desert would take away one of the prime public recreation areas. It is used highly and maintained by several groups. This is not just another random area of unused desert, but is one of the most highly used recreation areas in the State. Please consider keeping this area open and available to future generations.

**Comment** Please do not close down Johnson Valley OHV park. Johnson Valley is one of the last places to truly wheel and shutting it down will force users to go elsewhere. More often than not, for the less thoughtfull, that results in people riding and driving in illegal areas. Johnson Valley is the pinnacle of hardcore offroad sites and the promise land to many offroad enthusiasts. If the marines need more space to practice, I would suggest nevada. Not much there anyways. Kevin

**Date Comment Received** 4/14/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that

acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** Please, please, please do not prohibit the public from using what little public is still available! We appreciate the need for training, but believe there are better areas than this. Johnson Valley has been historically a special place where families can go to get out of the city and be with nature. Areas such as this are getting more scarce every day. Please find a way to compromise, leaving the public land open for the public. Otherwise, what use is freedom?

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The

Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I would like to say that Johnson Valley has been one of the things in life I live for. I plan my life around this place. I spend way to much time and money building my off road truck just to drive the rock trails in this area. I have been to a lot of other spots to off road, but none of them offer what Johnson Valley has. I understand why the Marines want to use this area, but I hope it does not happen. This place really does mean this much to me. Thanks for reading this, Chris Navarre

**Comment** Off-road sports are rapidly losing ground. I live in the East where public land is all but non-existent now. My family and I sorely miss the wide open free-access public land in the West where we spent our first 40 years. Here in the East we are left to shopping, eating out, and going to the movies. Please, please help us to keep our public lands available to the outdoor activities we love.

**Comment** Please don't close the Johnson Valley/29 Palms Area. This is an area my wife and I along with our kids and family frequent throughout the year. We enjoy taking weekend vacations to go camping. It's also a place my father

used to take me when I was a child. We enjoyed many years of fantastic desert outings, camping, and riding our recreational vehicles. This vast open desert area means the world to me and my family as well as dozens and dozens of my friends and their families. I don't want these to become just memories of the past...i beg that you allow this to be open for us to enjoy for years to come. Thanks you!

**Comment** I support having adequate training for our military, but I am opposed to the proposed Marine base expansion into the Johnson Valley OHV area. I've enjoyed riding my motorcycle or driving my truck through California's deserts for over 30 years. I've seen some really amazing places. It concerns me to see so many public lands being closed to the public. The amount of open land available for off road recreation is only a fraction of what it was when I was a kid. The Johnson Valley OHV area is one of the few remaining large open OHV areas in California. People come from all over the state for various types of competition events. Although I live in the San Diego area, I go out to Johnson Valley for motorcycle races, off road car races, or just to camp out with friends and enjoy the desert. I want to continue to enjoy Johnson Valley and to be able to pass that along to future generations as well. Thank you.

**Comment** PLEASE.....PLEASE.....PLEASE DON'T CLOSE OUR RECREATIONAL AREA! :) I have photo books dating back to when I was a kid...40 years ago....where me and my late parents were camped on the dry lake bed camping for the weekend. My dad would fly his model airplane, while me and the kids rode our little mini bikes and mom sat around with all her girlfriends. Very fond memories and great times. Now a days I am fortunate that my husband and my children love to go to the desert and camp out too! We spend every Halloween, Thanksgiving and New Years camping and enjoying the desert year after year. I could also name another 10 x's a year or so we go out to the 29 Palms/Johnson Valley Area to escape our daily routine and live, love and laugh! I LOVE THIS AREA AND BEG YOU DON'T TAKE THAT AWAY FROM ME, MY FAMILY, FIRENDS AND MY CHILDRENS CHILDREN. THANK YOU VERY MUCH!

**Comment** This area had been a wonderful escape for me and my family from the southern california city life. It has provided me a place to take kids that would know no other than video games and graffiti and introduce them to nature and physical activities and options. We have hiked there, Jeoped there, rode dirt bikes and quads there as well as camped and watched events. This place would be a shame for the public to lose. As a former Marine, I ask for serious thought to be placed into this. Semper Fi

**Comment** One of the possible mitigation for Loss of the OHV park of Johnson Valley would be to trade or exchange other Military property that is used only intermittently. As an example The east side of Edwards Air base has an expansive area used for low elevation high speed runs. This might be

opened for recreation part of the year . In addition the Fort Erwin has missive areas that are never used. Some of these could be opened for parts of the year. Also the BLM has close Most of the desert on Both sides of Highway 395 From Just North of Victorville up to Red Mountain. A equivalent amount of desert could be opened in this area allowing OHV use in these areas. OHV over the past 40 years has been chiseled away until now only a small part of the desert is open. Without opening up some of the closed off locations the total riding will be cut 50%. This will create a massive increase in Injury and Death since OHV over crowding will occur in the remaining locations. All ready over used locations will become dangerous due to crowding. The BLM could open areas that are currently Limited use and this would partly relieve the problem.

**Date Comment Received** 4/15/2011

**Response**

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to

Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** I've been riding in The Johnson Valley OHV area since I was a little kid and I hope to someday take my kids there. It seems unreasonable that this base be expanded onto high use public lands when there are so many areas of desert that are completely uninhabited. If you need more space build a new base where there isn't an off road park that serves all of the southwest and is world renown for its terrain. Closure or reduction in size of the Johnson Valley OHV area would have a drastic negative impact on the off highway vehicle community. Lets keep these lands open for future generations to enjoy.

**Comment** Thank you for reading my comment. I fully nrespect our government and the fight that they have constantly to protect my families freedom here in the United States. And I am thankful for these oppportunities that we have as a citizen of the U.S. I would like the Marines to think about taking a different piece of land other than Johnson Valley. This is a very important piece that has just found it's potential in the last 3-4 years. I have seen many people spend alot of money in their local towns in Colorado and in every interstate town from home to Johnson Valley. Just to attend this race. I personally spent over 20,000 in 4 months for this race. Alot of it went to Yuca and Barstow local business'. I hope these words help with the marines decision to move North or east instead of west. Thank You Pat Vigil

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Id like to point out a few areas of the EIS that I feel are inaccurate or misleading. First one, where is the money to buy the mines and other expenses associated with the expansion coming from? at the ontario meeting I heard some numbers, those numbers where \$50-100mil to buy the mines and other private land and up to \$500mil to complete the expansion. I do not see that covered in the EIS. Id much rather the tax payers dollars be spent on debt recovery rather then expanding the already largest base. what kind of impact does that money accompanied with the money that will be spent on the new training exercises place on the nation debt? Secondly I feel the 25% reduction in local tax income is more then the listed "less than significant". I have been in the cities of lucerne and Apple valley on a big race weekend and literally every store,gas station, and restaurant along Bear Valley RD is packed with offroad related people purchasing products. that income accompanied with the thousands of people that are out there every weekend has to play a significant part in those stores staying open. one specific restaurant id like to be considered is "Cafe 247", I know more then 50% of there income comes from OHV users, even loosing that income for 2 months out of the year will be detrimental. do you want to turn Lucerne valley into a ghost town? next, Id like a study of the percentage of OHV land that has been lost over the last 20years in all of southern California to be included in the final EIS. OHV land is being lost due to many causes from green energy to protect species, I would like all of that to be included in the EIS. Lastly, Id like to get more details on the noise produced from the land expansion. The EIS lists it as not being significant, what qualifies it as significant or no significant? I know people that live close to other millitary bases and there houses are shaken on a regular bases from air craft and weapons testing. How would you like to listed to the on a regular basis? Thanks for your time, I hope some of theses comments are considered and added to the next EIS.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the Draft EIS.

The Draft EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the Draft EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

<b>Comment</b>	Johnson Valley is not just a piece of land, it is sort of a sanctuary for off-roaders. Taking Johnson Valley away from the public would be a big mistake. I personally love going out there and rock crawling and a lot of other clubs from different UC schools do the same. There aren't too many places like this in California for people that enjoy that hobby and made a career out of it (King of the Hammers).
<b>Date Comment Received</b>	4/15/2011
<b>Response</b>	Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current

recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I urge the USMC to not expand the Twenty Nine Palms base boundaries into the Johnson Valley Offroad area. This would severely limit the available areas for recreational as well as sanctioned competitions for various activities. Expansion would also have a detrimental impact on the local economies of the communities surrounding the Johnson Valley Offroad area by loss of visitors to the area. Please reconsider any plans to expand the base into this area.

**Comment** It really bums me out thinking of the possibility of shutting down Johnson Valley OHV area. I've been to Johnson Valley probably a dozen times over the past 4 years with my 4wd club. It is truly one of the greatest places to test a vehicles limits on the plant. The area provides some of the best terrain for recreational 4wheeling in the country. I am personally building a suzuki samurai rock crawler right now specifically intended for wheeling Johnson Valley. Every year our club participates in various clean up events and fundraisers for Johnson Valley. This note may not mean much in the big picture, but shutting down an area that is adored by so many is a huge deal.

**Comment** As a former member of the United States Air Force, and a current DOD Contractor supporting the US Navy and marine Corps NMCI Contract, I am well aware of the need to provide quality training to our armed forces. I also understand the need to keep our public lands available for recreational use when there are alternative choices that can be made during these types of

aquisitions. There are vast tracts of land currently set aside by several branches of the armed forces in close proximity to Twenty Nine Palms that can serve to enhance the training environment. China Lake and Fort Irwin are both within minimal flight range of Twenty Nine Palms as well as close enough to provide access to Ground Combat training ranges as well. Rather than lockup more public lands that will only be used sporadically, please consider joint use of existing lands already designated for military traing with existing infrastructure for testing and monitoring which will minimize aquisitional and setup expenditures.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** I am quoting what Jerry B had to say about this topic in case you missed it, because I feel the exact same way and, well, no one can say it like the great Jerry Bransford can! Johnson Valley is a place I would like to see before I die and I know for a fact that many others feel the same. "Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With

that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us. Thank you for your consideration. Jerry Bransford Escondido, California"

**Comment** I have not had the opportunity to make it to Johnsons Valley but have plans to do so in 2012. This is one of the premier offroad locations in the U.S. and is host to one of the most amazing races. It would be a tragic blow to the offroad community if this area were to be closed. This area brings in travelers who spend millions of dollars every year at the surrounding area businesses. This income would be next to impossible without the offroad community.

**Date Comment Received** 4/15/2011

**Comment** While I understand the need for a new training area (I'm a Marine myself) I think that it would be a huge mistake to take over the Johnson Valley area. The OHV community is widespread, and comprised of people from all walks of life. There are many service members like myself, veterans, and patriots. These are responsible citizens who "tread lightly" to preserve the environment and country's natural beauty, while still getting out there to enjoy it. We support the Marine Corps, and don't want to hinder the mission by taking away a necessary training area. However, we believe that there is plenty of space in the areas adjoining Johnson Valley that both groups can be satisfied. After all, offroad events such as King of the Hammers, which is one of the fastest growing races, pump up the local economy. Over 15,000 spectators were present at this past KOH event, and brought in plenty of revenue for the locals, which would be sorely missed. Please consider our request when you seek a new place to train; there is no reason why we can't all enjoy the land.

<b>Comment</b>	As a long-time military family, I am the first to support our troops and the freedom they allow us in this great country. It is the Marines and the rest of

the armed forces that allow me to enjoy my four-wheeling hobby; that being said, I join the others in the request for the Marine Corps to reconsider basing their training in Johnson Valley, home to one of our nation's best OHV areas. I live in Columbus, Ohio, but still have visited Johnson Valley on numerous occasions, because it is unlike any park that I can find in the Midwest or on the East Coast. The closure of Johnson Valley would be a detrimental loss to the recreationalist and four-wheel drive communities, as well as the surrounding towns that depend upon travelers' visiting their local park. I thank the Marine Corps for their service to our great country, and I pray that they might consider the desert areas surrounding Johnson Valley, and not the valley itself, for the future location of their training facilities. Thank you for your time and consideration, Michael Olshove Columbus, Ohio

**Date Comment Received** 4/15/2011

**Response**

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** I am a former Marine, and a Jeoper. Although I have yet to travel to Johnson valley to wheel, it would be a tragedy to take it away from the Off Road Community. More and more places to wheel are getting closed and pretty soon our Jeeps will have no place to go to have a good time. Please consider alternatives. Thank you.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed

MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

<b>Comment</b>	As a kid, my family grew up riding and camping in the Johnson Valley area. After I moved out of state, I have kept up on the events there and now take my family on vacations there. There are less and less areas to use for off road adventure as places are closed, so please leave us with this on e for future use.

**Comment** In a country where Americans are losing more and more of our rights and freedoms everyday, freedoms and rights YOU ALL fight for, we need this land to remain open for public use. There are many, many other alternatives out there that do not provide the opportunities for research, recreation, competition and pure enjoyment as Johnson Valley. If one questions this, you need only see the turnout for the KOH Race and the recreation enjoyed before, during and after by the general public. As a veteran, I appreciate more than some, what it is you all do and provide for me and my family, and I say thank you. I also ask that you reconsider this land issue. My sons have yet to have a chance to enjoy the awesome adventure that Johnson Valley has been, is and will be. With all the resources the US military has, there surely is an alternative to this land for the training that we all know is so necessary. We do not have the resources available nor the options that the US Gov has, and what few recreation areas we do have are being lost on a regular basis to special interest groups. Please reconsider this and even see about a compromise that will be the best outcome for all. Thank you for the consideration and your willingness to listen to our pleas. Thank you very much, Todd, Jennifer, Alex & Koyt Broken Arrow, OK

I understand the need for training space for our troops and I support them however there must be an alternative that could benefit the troops and the recreation community. I have been visiting the Hammers since I was a kid. My family and I have used this area for camping, motorcycle recreate, and Jeep recreate. In this day and age of the kids wanting to sit in the house and just play video games it's getting harder and harder to find areas to take my kids out for some fun in the outdoors. Taking away this land from the public will not only add to the land loss we have already suffered but also effect the economic surplus of 29 Palms and Lucerne Valley. This area is not only for recreation but also a part of some people's livelihood. Thank you for taking the time to hear our requests.

**Comment** Gentleman I am part of the christian based offroad community. We annually particapate in dozens of events all over the country. Sharing Gods word and the beauty he has created. Our dedication to responsible land use is second only to our fellowship. We annually sponser a gathering of like minded offroaders that numbers well into the hundreds. while this is small in comparision to the govt branches . Im sure you have considered the economical impact of these type of events, for a state that is already struggling it makes no sense to remove a revenue source that has counted on the access to our lands. Access that has been made available by the very freedom our military branches have fought and died to protect. Make us proud once again by protecting the use of this land rather than removing even more of the freedom this great nation has stood for. Thank you

**Date Comment Received** 4/15/2011

**Comment** Raising registration for ohv and taking away land doesn't quite seem fair. And taking away one of the best sites for ohv riding is going to drive more careless ohv riders and drivers through private and close lands

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps appreciates your comment and involvement in the NEPA process. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates

several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Comment** Johnson Valley is home to many visitors each and every year for recreational purposes. I love our nation's military, but I think that there are too many people that would be upset by the closing of Johnson Valley. The neighboring communities are supported by the recreational visitors for income. They rent hotels, go out to eat, and shop in those communities. If Johnson Valley is closed, those visitors would stop coming, and would threaten the life of those communities. I'm sure that Johnson Valley as a training ground would not provide the additional income to those communities that the visitors provide. Thank You for your consideration, Matt Richardi

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). **Comment** I have lived in the high desert for over 30 years. Johnson Valley is the biggest and best place for off road activities in the country. I've enjoyed many off road events in JV over the years. These kinds places for outdoor activities are slowly but surely being taken away from the American public. We've lost millions of acres of land to wilderness areas, national preserves, national parks and other military expansions. Take a look at our country, especially California, and see all the public lands that have been taken away from the public! There is almost nothing left for citizens of this state to enjoy! I am a Vietnam veteran and understand the need for our troops to have areas for training but I also believe that the people of this country need to have places like JV to enjoy without fear of loosing access. I would not want to see the expansion into JV.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements

for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** My family and I have been enjoying the Johnson Valley for over thirty-five years. There has never been a season of the year that we have not been able to enjoy mother nature, at her best. To take away the use of the valley would be a great misuse of public land. I understand the need for training in the terrain that we will be fighting in, but I haven't seen much utilization of what you already have. There is a huge training facility at Fort Irwin, near Barstow Ca. that can be used for training in desert warfare. Swallow your pride and ask the Army to use their training facility.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

<b>Comment</b>	<p>29 Palms land grab of Johnson Valley is a terrible idea negatively impacting the surrounding economy, taking away one of the last places I can bring my family to enjoy offroading and the desert environment within a reasonable drive of greater Los Angeles area. Blocking access to this area from the public when there are other options makes little sense, reconsider the people of this area and country have fewer and fewer choices and wonder why are kids become less motivated to do things outside when the outside is only blacktop and concrete.</p>

**Comment** Let me start by saying I AM A PATRIOTIC AMERICAN AND APPRECIATE THE MEN AND WOMEN THAT DEFEND OUR GREAT NATION!!!. I do agree that they need the best of everything, including areas to train; however, I must say that I am against the full or partial closure of Johnson Valley OHV area without providing an additional OHV area of at least equal to the size of Johnson Valley OHV area. I grew up camping and riding mototcycles with my family in Johnson Valley. I feel it creates an activity that ours and many other families can enjoy together and brought families closer. I see so many familes enjoying this area together. I know for me it provide a place to escape from the stress of daily life and work. I go out their with friends and family and we aree all able to leave all the strees behind and connect with one another and nature and it does recharge the batteries. It's important. I know you area aware that JV OHV is the largest OHV in CA. The remaing OHV area are significantly smaller and the closure of JV OHV would create an over-crowded situation on the remaining OHV and increase the dangers for obvious reasons. The closure of the JV OHV will also have a devistating affect on many businesses and organizations thast rely of the folks that use this area. Many families will lose their jobs and homes. I am in favor of alternative # 3. I was made aware at the public meeting on 4-12-11 in Ontario that the Maries did not like this alternative because it was the most difficult area to access due to land formations. I wouldn't think the USMC would ever want to take the easy road. I can see where this would also give them the opprtunity to train their Engineers,etc.. in creating access for the troops. After all, I cant imagine our enemies would be will to negotiate at battlefield that provides easy access for our troops. In closing, please consider an alternative that does not affect JV OHV area or provide the public with an additional area of equal size for our families to use.Your decisions will affect thousands of families. Thank you for listening.

**Response** The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I love the Corps and support our Marines. But I respectfully vote against taking Johnson Valley. The damn tree huggers have already stolen public lands for Americans to freely utilize. Offroading is a healthy family oriented activity that this country needs more of. Americans are being squeezed from all sides. Our ancestors had freedoms such as hunting, fishing and open trails. Sadly there is a trend of government taking away these freedoms. God Bless the U.S. Marines.

**Comment** After review of the EIS for Johnson Valley OHV area I am recommending Alternative 3 to be utilized as all other alternatives will promote several negative aspects to the area. Johnson Valley OHV area is a unique area for the off highway vehicle community as it allows for desert and rock environment in a small area. Closing the area to OHV use will not only impact literally thousands of people that come to experience the uniqueness of Johnson Valley, but it will also have a massive negative impact on the local economy as Lucerne Valley relies heavily on visitors to Johnson Valley OHV area. OHV enthusiasts travel thousands of miles to experience the beauty of the Johnson Valley OHV area desert and the difficulty of the Hammers trails for OHV rock crawling. The area is world famous for its 4x4 trails as well as the desert races and rock crawling events that take place within the OHV area. Additionally the OHV community volunteers thousands of hours to maintain the areas desert beauty, and it would be irresponsible for the BLM to dismiss those hours spent on the ground by volunteers both motorized and non-motorized. Closing any portion of the Johnson Valley OHV area and allowing the Marine Corp to take over the

area will virtually turn the town of Lucerne into a ghost town. This is not what needs to happen when our United States economy is still struggling and the value of the US dollar continues to fall worldwide. Furthermore, what the Marine Corp has planned if they take over any area of Johnson Valley OHV Area is to turn it into a bombing range and training grounds that will have more of an environmental impact on the area than even the largest OHV event in the area. The impacts are widespread from public health and effects of ground water and surrounding housing communities. Overall, Alternative 3 is the only responsible alternative choice given the aforementioned reasons.

**Comment** I, as a taxpaying citizen, am requesting that the military NOT take Johnson Valley OHV area for training purposes. My family has been going to Johnson Valley OHV area for years and it is one of the last remaining open areas with varied terrain. The OHV community has been repeatedly shat on and had recreation areas taken away. My tax money goes to support both the military and OHV recreation areas. To use my tax money against me to close down areas seems un-American. I know for a fact that there are THOUSANDS of acres to the North and East of 29 Palms base. Please use that area for training.....as a matter of fact, there are already closed areas for OHV's out there.....perhaps that would be the BEST areas to confiscate for military training. It is not right to continue to strip away family friendly OHV recreation areas. We have given MORE THAN OUR FAIR SHARE ALREADY!!!!!!!!!!!!!!!!!!!!!! Thank you. M. Lahr

**Comment** I am against the closing of ANY public use land in the Johnson Valley OHV area. It should stay open to the public as it was intended. The Military already has plenty of land with the 29 Palms base, and they should instead figure out how to utilize it more efficiently.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

**Comment** I am writing this letter in hopes that the OHV area in Johnson Valley may remain open for the public, for the families, and for the community of offroaders who pour their heart and sole into the sport. The biggest impact closing more OHV land will be to the economy, as hundreds of businesses rely on this market to support their business. Taking away OHV land will also take away business from these people, if there is no where to ride, there is no market for these businesses. Everyone understands the military needs space to do training for the war in Afghanistan, but what will you tell all these families whose businesses are gone after the war is over? A war that these businesses help pay for with tax money?

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). Please reconsider this land grab for the Military. Johnson Valley OHV is one of the last large open OHV areas in southern California. My family and I have been using this area for more then 20 years. With the recent economic downturn, the PowerSports industry has been hit very hard and is finally starting to see some recovery. Closing this area to OHV will certainly not help this recovery. I understand the need for our Military to train but I don't believe that this is the only area capable for supporting this scale training. In my opinion this is only being considered because the 29 Palms infrastructure already exists. The Military and US Government should be good neighbors and not force your will on the public.

**Comment** I have been going to Johnson Valley my whole life and enjoying it for every type of recreation. It would be a shame to see it go to the Marines when California is so big and has so much desert. Please keep JV open to the public, it will help spread out recreational users from LA, SD, and OC. If you close it off we all have to go further from home and will concentrate environmental impacts to the remaining open desert.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in

Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Alternative #6 is the worst of all the options, it impacts the local and regional communities economics. A vast segment of the population from all over California, Arizona and Nevada travel to Johnson Valley for off-road activities, camping and community. Further closures of what are now designated off- road areas and specifically the proposed closure of Johnson Valley will have a significant impact on the remaining OHV areas. The intensification of use in other areas will create over-use. Dangerous conditions that will result in injury and death through over-crowding. It will stress emergency response systems required to serve the higher numbers of collisions and accidents. The proposed restriction placed on air-space, MOA's and Restricted Air Space will have an adverse and dangerous effect on General Aviation in the region by compressing already narrowed flight corridors. This will result is more general aviation traffic traveling through uncontrolled airspace. Incidents and collisions in the tightened uncontrolled general airspace with increase causing threats to life and limb to pilots and passengers. It would serve the military better to develop training systems which will train the defenders of this country in manner that imposes less upon the freedoms of those you are sworn to defend. Please reject ALT#6 it is not a viable option to those who already use this PUBLIC land. We have paid license, registration and use fees, for over thirty years, to maintain our right to use this land. Since the Marines primary duty is to protect the citizens of this countries Life, Liberty and pursuit of happiness I consider this "land acquisition" proposal in conflict with all three of those imperatives.

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the Draft EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** To Whom It May Concern, I am a 56 year old California native. One of the great benefits of living in California has always been the ability to make use of, and enjoy, all the state has to offer. The beautiful ocean and its' beaches, the mountains and their beautiful forests, the deserts and their beautiful wide open spaces. Johnson Valley is one of those beautiful, wide open spaces. The area offers the perfect opportunity for off-road, recreational vehicle use. It's location makes it ideal and easily accessible to the entire Southern California area. In these days of world turmoil it is easy for everyone to understand the need for our military to be as well trained as possible, however it seems clear that alternative #3 offers a workable solution for all involved. I don't feel I need to list all the reasons because they appear pretty obvious to me. The easiest thing would be to leave them as they are today, but if in the interests of national security the additional training area is imperative, please choose alternative #3, Thank you for your consideration

**Comment** Johnson Valley OHV park and rec area is an incredible place for people to get away and enjoy themselves without the public getting involved and complaining about our hobbies. Taking that away would force us to relocate possibly encroaching on other people's territories which would cause problems. And the military doesn't need this great piece of land to destroy, train soldiers, and test weapons on. California only has so much open space, so we should conserve it as long as we can.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state,

or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Comment** Please do not acquire the public OHV recreational areas of Johnson Valley and Lucerne Valley. I enjoy riding my dirt bike there with friends and family on the weekends. There are limited areas to ride already and it will be a huge disappointment to lose another one. I have a lot of respect for the Marines and for anyone who fights for our country, and I understand that they need to train to be effective. Even with that said, I respectfully ask that the Marines do not take over the afore mentioned recreational areas. There must be some other area that can be used. Thank you very much for your consideration.

**Date Comment Received** 4/15/2011

I am an active outdoor enthusiast that spends my hard earned money on activities that are American and look out for the best interest of my future generations. Family adventures and activities are the things that I only hope can be preserved for generations. Militant development is necessary, however when it becomes the large industry that it has become, I am starting to become disappointed. Once again I appreciate the purpose, but question the growth. How do appropriations for this expansion become available to the military and how does this lack of public access get addressed? I am not sure that having new areas to test bombs and train military tactics is high priority for anyone except for the specific leadership at the base trying to expand. Perhaps public opinion polls from third party groups could gauge that? My submission is that public opinion would not favor this expansion unless patriotic misguidance is applied. Please accept my comments as a Grass Roots American that wants to participate in all that is public about our country. I want my children to maintain a desire to recreate and explore. I want my children and thier children to have a life long skill set that would further a truly American way.

As a person struggling to make a living in southern California in the motorcycle industry, please consider my petition to keep the Johnson Valley OHV area open to Off-Highway Vehicle use as it is now. Riders in the greater L.A. area need places to recreate, and this is one of the few legal areas left within 2 hours drive. This will affect a lot of riders and further depress the motorcycle industry that is already being impacted by the slow economy and rising price of fuel. We pay high taxes and high DMV fees in CA that are supposed to be used for maintaining OHV areas. Please do not take this riding area away from those who use this area responsibly.

**Comment** Gentlemen, I have visited Johnson Valley OHV area for over 45 years, First starting with my parents at the age of 8 and now with my family and friends. I do not wish this area to be cast to the "Remember When " section of my thoughts. Off road users have been squeezed into small segments by environmentalist for the last 30 years, This is the last straw. While your documentation is thorough, It is also very government orientated and confusing. It is my small understanding of your documentation, that by going east, it would have the least impact on the Johnson valley OHV use. So to the best understanding of this information - My vote is for Alternate 3. Leave The OHV area as it is! As a secondary comment - Fort Irwin is just up the street and you can shoot all you want- Is that in any plan ? Thank you for the chance to comment. Thomas Bruiniers

**Comment** Please dont take the public land away. We're hard working Americans that spend most of our lives working for the freedom to enjoy our deserts and recreational areas. We go to these areas not only to escape the rigors of everyday life, but to spend time with our family and friends. Johnson Valley is in close proximity to the masses who enjoy such terrain and activities. Local businesses rely on the racers and enthusiasts for revenue relating to fuel, food, and supplies. Others rely on the land to hold sanctioned events. At a time when the government is taking from the average working person, let this be a time to give back and let us win one. When taxes are increased, we go with the flow. When government asks, we give. But we have to draw a line at some point. That point is drawn when we have to give up the freedom of use we worked so hard to maintain. Let us keep our land that so many rely on and appreciate so much. If there is more that we need to do to show our gratitude for the use of this land, then ask. Ask us to show you this gratitude. Guess what...? You've asked before and we've responded. Let us respond to this issue in an appropriate way and let your ears listen to our response. And furthermore, let your conscience act patriotically to the response from your fellow American citizen. I thank the armed forces everyday for the sacrifices given, and I thank you again for reading this in full and considering my point of view and response to this proposed issue. Take care.

**Comment** When making decisions regarding this project please keep as few things in mind. The Johnson Valley OHV area is the largest in the state and provides enjoyment to thousands of patrons year around. Users ranging from hikers, to OHV users, to campers, etc spend countless days each year in the area. Closure, even partially will substantially limit(nearly close) all usable land. Additionally the surrounding communities will suffer economically users that spend money on fuel, groceries, etc will no longer travel through the area. I hope that you take my comments and those of otherss before making any decision. Thanks for your time.

**Comment** I am writing to you to voice my complete and total disapproval of the Marine Corps to take over much of the Johnson Valley Off Highway Vehicle Area in the Mojave Desert. I am not an off-roader, but a plant enthusiast. I greatly enjoy going to Johnson Valley to enjoy the spring wildflowers, (some of them endangered) as well as the numerous species of animals that inhabit this area- and have for millions of years. This area is OUR TREASURE-and belongs to the people of California! The Fort Irwin land grab was tragic! We cannot sustain another loss of more of OUR land. This land belongs in OUR hands! Many Victor Valley and Lucerne Valley businesses will suffer-if not downright close if this becomes a reality. Part of FREEDOM is having the opportunity to enjoy our public lands, without having to fight for what has already been classified as OUR land, not yours. Please leave it alone and find someplace else to expand.

**Comment** I am not in favor of the addition of either air or land expansion for military exercises. there are already enough places available to preform these exercises without disrupting the people and wild life in this area. In addition, we don't need to be spending the extra monies to establish this area as an exercise area at this time in our economy.

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** As a fan, spectator, racer, rock crawler, event promoter, and general off road enthusiast I really hope that now action is taken in regards to closing the Johnson Valley OHV area in whole or part. The government through various agencies have been reducing the size of open recreational areas for years, and now they want JV. Stop already, enough is enough. If we lose JV, not only will the communities near JV be effected financially, but hundreds of small business's that depend on racing and off road activities that the area affords will be adversely effected. Please look for another alternative and leave JV to the thousands who enjoy the area every day.

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

I am a US Army Infantry Veteran and would like Johnson Valley to remain open to the public year round. I am also a supporter of the off-road and US Military communities and would like to see an amicable resolution to this situation where both sides are satisfied.

**Date Comment Received**

4/15/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement.

Public comments on the Draft EIS are an important part of the decision-making process. **Comment** I just simply want to state that the land that is being looked at by the Marines is one of the last large OHV areas in the state. Look at your own map and compare it's size to all the others combined. OHV users are beng squeezed out of all areas of Ca. Myself, my family and many friends rely on these areas for our recreational needs. We have holiday traditions and yearly friendly get-togethers in Johnson Valley. We simply ask that you allow us to have what little space we are still allowed to use. My kids will thank you.

**Comment** Alternative #3: This option leaves Johnson Valley OHV area untouched. Rather, it states the Marine Corp would have to move the proposition to the East of their current boundaries. This would mean that the Government would need to de-designate wilderness area. Note this particular 'wilderness area' was used by General Patton to train military before it was designated as wilderness. The other Alternative de-designates OHV areas that are being used by Americans for recreation, living, income and more. this is the best one thank sam

**Comment** With the war in Iraq winding down and the war in Afghanistan scheduled for troop withdrawal there is no need to do this. Many of us could no longer enjoy the desert. Flying to various places on the Colorado River and points east would become more difficult

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The Marine Corps understands the importance of the affected airspace with respect to the local aviation community and the EIS concludes that the acquisition of airspace proposed for each alternative would cause a significant impact to airspace. As indicated in the Draft EIS, no airspace decision has been or would be made before complete environmental review and consultation with the FAA, other stakeholders, and the public. The Marine Corps is currently undergoing consultation with the FAA in regards to the proposed airspace. Airspace dimensions, altitudes, and times required may change as this cooperative effort is conducted. Please refer to Section 1.5.3.2 for information on the FAA airspace proposal process.

**Comment** I am voting for the United States Marines to move their excersises to the east. Johnson Valley has been an off-road paradise for many years. There are generations of families their. Taking it away from the community would have a "HUGE" impact on the off-road community. This could lead to businesses shutting down because of the revenue these enthusiest bring during the weekends or special holidays. It would cause people to off-road illegally. It may cause people to go elsewhere, which would cost them money. Please take consideration in our requests. Thank you and god bless.

**Date Comment Received** 4/15/2011

**Response** The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. **Comment** Hang glider and paraglider pilots frequently fly around the existing controlled airspace at 29 Palms. Just last summer I flew from San Diego and landed at Pioneer Town, at the southern edge of the proposed Johnson Valley MOA/ATCAA. With just one more thermal I would have continued north for a few miles then northeasterly towards Lucerne. Many pilots have followed that path in the past and that path goes through the proposed airspace. If the lower boundary of the airspace was set at a few thousand feet agl that would allow these flights in the future. There is flying site a few miles northeast of Joshua Tree. This site is not in the current airspace, but is in the Proposed Sundance MOA/ATCAA. Typically hang glider pilots just fly the site, meaning they just go a few miles back and forth along a ridge and land below where they take off. So horizontal space is not an issue. However pilots do get as much as 3000 feet agl. If the lower limit of the airspace was set at 4000 feet agl then there would not be any problems.

**Comment** I am a fan of offroad vehicles, and using them for recreational purposes. I also fully support our troops, for without them we would not have these freedoms and liberties. I have plenty of friends who feel the same way. But the land that we are able to use to legally go wheelin' in with families and friends is slowly diminishing. We should try and hold on to what little we have left, because there is truly not much. I hope to work my way up to the park to enjoy it in the future. I wish the proposal would be reconsidered to a nearby location but not the park itself. Thank you for your time, Sean

**Date Comment Received** 4/15/2011

**Comment** While I deeply appreciate the mission of the USMC and know as well as anyone the importance that training provides to its members, I believe that keeping Johnson Valley OHV Area open for public recreation is also vital. This area is used weekly by hundreds of OHV enthusiasts, including Marines, soldiers, sailors, airmen, law enforcement personnel, fire fighters, etc. Thousands of acres of previously open OHV lands have already been shut to the public. Shutting Johnson Valley would have significant negative impact on both the local economies (Lucerne Valley, Victorville, Hesperia and other high-desert communities) and of the OHV-dependent businesses in all of Southern California, Nevada and Arizona.

**Date Comment Received** 4/15/2011

**Comment** Rather than fighting hundreds of thousands of recreationalists who use the Johnson Valley, why not fight Senator Feinstein to de list the Sheep Hole Wilderness area of 174,800 acres?

**Date Comment Received** 4/15/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

29 Palms base is currently home to the largest military training area in the nation (and the largest US base in the world), and consequently, the largest training program. The program known as Mojave Viper has become the model of pre- Operation Iraqi Freedom deployment training. The majority of units in the Marine Corps undergo a month at Mojave Viper before deploying to Iraq or a mixed training venue using the Mountain Warfare Training Center for Afghanistan. Live fire exercises, artillery, tank, and close air support training are used for training, in addition to the sprawling "Combat Town," a 2-acre (8,100 m<sup>2</sup>) fabricated Middle Eastern village, complete with a mosque, native role- players, an "IED Alley," and other immersive touches. Since the USMC already has 46,000 acres at The Mountain Warfare Training Center (MWTC) installation located in Pickel Meadows in California already providing the training needs. 100's of thousands acres of California land are already used as military bases & about 50% of California land is owned by government agencies. More California land should be returned to the public & not taken away. As a former US Army soldier myself who when threw pre deployment training at Fort Polk, LA. I believe that this Land Acquisition put forth isn't needed. As most of the operation overseas have been done by Platoon size to company size elements. In Afghanistan the need for tanks or TOW ITAS missile's hasn't even been allowed to be used or needed! Because there is mostly just AK-47's, PKM's, mortars & landmines. I see this Land Acquisition as a publicity stunt, as a former soldier I served to defend the right to have the freedom to Off-road among everything else. Now Off-roading provides me a way to cope from what I had experienced while serving stateside & overseas. While a lot of the Off-road community here in So Cal are former military, in the military or have son & daughters that are serving now. For the freedom we have to be able to enjoy this land we have sacrificed for. Johnson Valley (AKA The Hammers), Most visitors tour the area in four-wheel drive vehicles. The area near Anderson and Soggy Dry Lakes is used extensively for competitive racing events and OHV free play. There are numerous opportunities for hiking, rock hounding, and wildlife watching. The eastern boundary is shared with the Twenty-nine Palms Marine Air-Ground Combat Center. Johnson Valley offers a riding opportunity for every skill level. The South east portion of the riding area offers a large mass of hills known to rock crawlers world wide as the

“Hammers.” This area is for experts and has gained the attention of off-roaders in recent years through an event called “King of the Hammers”. People come from all over the world to enjoy the Hammers, please don't allow politics to destroy are public land and freedom. "SAVE THE HAMMERS"

**Response**

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

<b>Comment</b>	<p>I am opposed to the expansion of the Marine Corps training base into Johnson Valley. My family (Navy/Marine Corps Veterans by the way) has been recreating in Johnson Valley for decades. I grew up riding motorcycles and exploring in 4WD's there and I have been raising my own kids doing the same. As Off Highway enthusiasts, we have already lost so much land in which to enjoy our pastime that we will never get back. Our way of life, passed down from one generation to another is in danger of becoming extinct. I am a huge supporter of the U.S. Marine Corps however I do believe an alternate expansion plan is in order here. JV is too precious a resource to those who recreate there.</p>

**Comment** The KOH race in Johnson Valley is the biggest of it's kind in the world and this area is home to some of the most challenging trails and amazing vistas to be seen. Destroying this landscape for military purposes would be devastating. We (OHV users)need this area to help keep our sport alive and the sport's contributions to the economy. Please keep public lands open to the public.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact

to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** I have been Jeeping "off roading" for 40+years and have seen many many great off road parks shut or sized down. "we" need to have these places for people who love the "sport" of enjoying the out doors. Being able to take our vehicles, families and have full access to what is already established OHV park (Johnson Valley) and please leave it alone. We do this because we love this sport and to take our families on vacation, camping, exploring, general love of freedom of the outdoors. Every-time a group will step in and attempt to block or limit our "Pubic Lands For Public Use!" I am a taxpaying US citizen and I feel we have a right and say in what is happening here! If it's not the "Sierra Club" now it's the Military! We give to you (US Forces)our children to defend this great country. Now, can "Our great country give this small amount back?" Another thing my friend works for a contractor that goes in and clean up ammo from various military forts and it takes years and billions of taxpayer dollars to clean up after US forces tanning grounds. The military loosely leaves spent ammo that is much more hazardous and environmental is huge and takes years centuries to clean up. The impact of "OHV Park" is nothing compared to what the military does to the environment. The government has land elsewhere that will do the same if not a much better job at what (military) is using it for. Remember it was the Jeep WWII that was credited for helping win the WWII. In addition the equipment we run may be your next great fighting vehicle and we are putting these vehicles through the tests for you (at no cost) to the military. I ask you, is there anyone on this committee that loves this sport? If not, come out with us, have some fun and then you'll see why we fight for the use of land that is taken all the time from us by various groups. You (Military) have unlimited options for land use. We the Off Road individuals have vary little and then the Military wants to take even more. Please do more research, you have unlimited resources beyond

anyones belief and the(off road community)have very little and we want to keep what we have. This is like taking a playground from a little kid, or eliminating a sand box for a public park! Please all we ask is for from you "The Great Marines" is the best option in our favor. Just let us have it our way this time, you know the power you posses...all we are asking for is a break here one time.

Thank you for your time!

**Date Comment Received** 4/16/2011

**Response**

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one

of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Regarding the expansion of the 29 Palms base, I am against any decision that would take any land from the current Johnson Valley OHV area. In speaking with a few of you this Wednesday night, you say there are more challenges in moving to the East, but in doing so, you will not be taking the recreational activities from hundreds of thousands of people. Should an expansion to the West be deemed necessary, we (OHV enthusiasts) would request that the military put in findings that an acre for acre mitigation plan is the only appropriate alternative for the OHV community. Lastly, in many of the maps currently being circulated, there is no representation of the courses motorcycles use for racing. We would like to have these added to the maps because it will graphically show just how much of the region we use on a week to week basis for our races. The attached courses are just examples. Each and every course is different, we do not use established trails on a week to week basis like the Hammers or the truck courses. Each individual club puts on an event of their own. These .pdf may not be good enough for you to upload and use, should you want to original GPS tracks, please let me know.

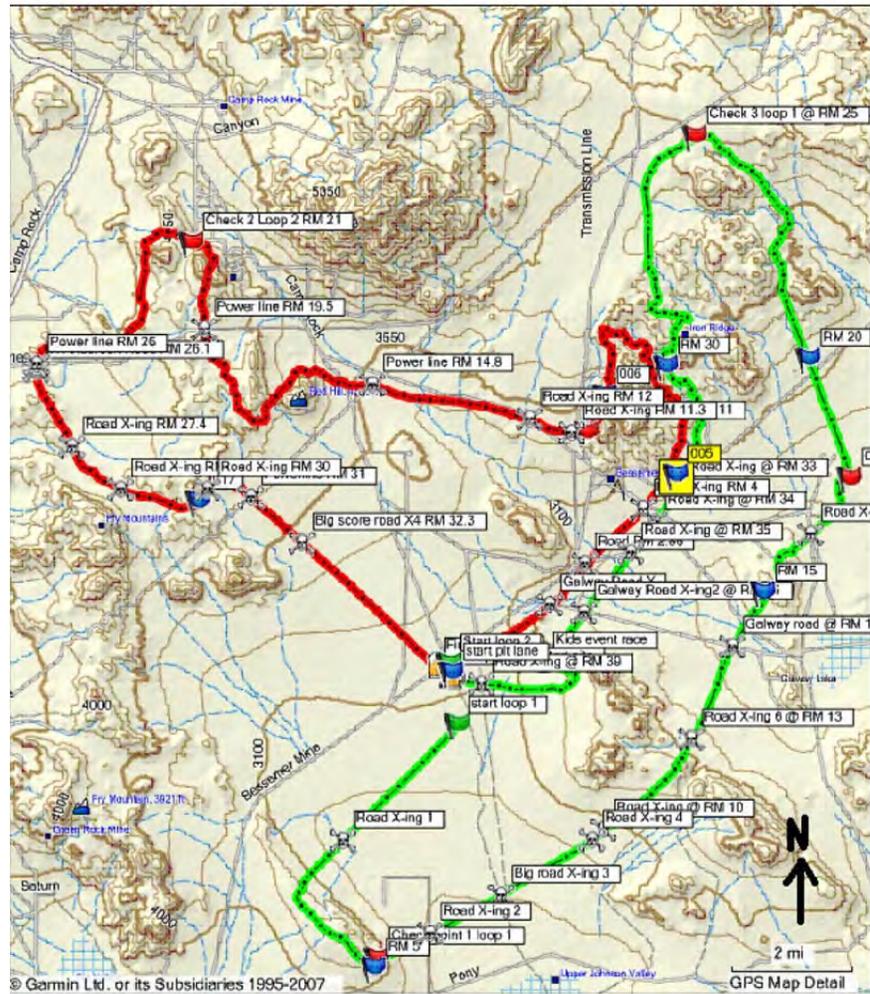

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The Draft EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Johnson Valley is a very special place. I know people who have traveled not only from all over the United States, but from countries far abroad as well. It is imperative that in this economy we keep areas open that draw people into California and the USA. The OHV industry represents a large sector of the economy, not only for the vehicles themselves, but the ancillary items as well: fuel, food, camping supplies etc. With responsible use of state and federally provided open space dedicated specifically for off highway vehicle usage, we can ensure that this sport will continue to grow and provide a healthy future both for the environment and the people who enjoy it to the fullest. Thank you for your consideration and please, keep Johnson Valley open!

**Comment** Many years ago, public lands in California for off road use were plentiful, but through the years we have been steadily compressed into smaller and fewer areas. Johnson Valley is one of our last remaining areas and one of only three designated competition areas. This land has been used by off

roaders for three generations now and is a vacation and recreation spot for millions of Americans throughout the year. Go take land that is already not being used for anything else. Why deprive those of us who utilize this land every day of the year? 99% of all off roaders fully support our military and a large majority of us have been or are currently serving in the military and find this action treasonous and politically motivated. The enviroMENTAList are using the Marines like a puppet to further their agenda of making ALL motorized off road activities extinct. They hate you as much as they hate us, but cannot stop you, we are the easier target. So I urge you to NOT take away what little land we have left and take land that isn't being used for anything but 'show' please.

**Comment** I my self understand how important the u.s. military is and why they need more land but I think the best thing for all of us would be to expand eastward and not take our ohv areas away. As of now there are not many

ohv areas and I know the state doesn't want any illegal wheeling or riding but that gets harder and harder everytime our ohv areas are impacted. Also with all the people that head up to means lakebed for the big events and even just to wheel for the day help the economy from hwy 15 all the way to boone road by purchasing food, drinks, fuel, propane, etc. But if its taken away I think that would have a significant impact on the economy in those communities. Also, the whole wheeling communitie would be impacted because if there's no place 2 wheel then there's no reason to buy parts which will affect the economy all over the states. Lastly I've grown up riding and wheeling since I could remember and I've seen plenty ohv areas taken away and impacted from environment and military but as they keep disapearing I fear that one day I won't be able to share the experience of wheeling/riding with my children and grandchildren so I'm not saying don't expand the military testing area I'm just saying the best compromise would be to expand the base eastward so you still get your land and we get to keep our ohv area open to the public.

**Date Comment Received** 4/16/2011

**Comment** While at the meeting in Victorville i talked wit some people from the Marine base and they told me that one of the problems with alternative 3 was that Amboy road would have to be closed. Why not use that road as part of the training and build some bridges across it that will support the military vehicles? Disruption to traffic on Amboy would be minimized. That would be like killing 2 birds with one stone. The private property that is in the area could be purchased at market value and adversely affect way less people than moving into Johnson Valley. They also told me that there were gas pipelines and railroad tracks that would cause problems with training. Wouldn't these types of things be realistic problems that you would have to deal with in a real military action somewhere? It seems that these obstacles SHOULD be incorporated into a military exercise. You could also make Alt. 3 larger by de-listing part of the Sheephole Wilderness area as mentioned in the letter from San Bernardino County First District Supervisor, Brad Mitzelfelt. Using alternative 3 will negatively affect less Americans than alternative 6.

**Comment** I want to vote for Alternative #3 leaving the johnson valley ohv area pen to the public. Alternative #3: This option leaves Johnson Valley OHV area untouched. Rather, it states the Marine Corp would have to move the proposition to the East of their current boundaries. This would mean that the Government would need to de-designate wilderness area. Note this particular 'wilderness area' was used by General Patton to train military before it was designated as wilderness. The other Alternative de-designates

OHV areas that are being used by Americans for recreation, living, income and more. The following are "comments" for Alternative #3: (reasons to expand to the East by 200,000 acres) - No impact to OHV opportunities in Johnson Valley - More compatible areas with the proposed action - Less impact to local business owners - Less impact to recreational opportunities - Less populated - The area has already been used by the military in the past - Economy will be less affected Reasons against expansion to the West - Reduction in area for off-road and outdoor recreational opportunities - Reduction in area for the film industry - Negative impact on the economy - May impact public health and safety of surrounding communities - May affect Southern California Edison (SCE) electric transmission facilities and/or distribution facilities - May promote illegal riding - Potential impact on groundwater supplies and quality - Potential impact on biological resources (e.g., desert tortoise and prairie falcon) Keep in mind that the King of the Hammers event draws over 30,000 for their one week event and the total comments received during the first comment period was less than 20,000 IT'S TIME TO BE HEARD IF YOU WANT TO DRIVE & CAMP IN JOHNSON VALLEY WITH YOUR KIDS /GRANDKIDS.

**Comment** I would like to see option 3 of the proposed land acquisition and airspace establishment be passed. As I love my country and do agree that our marines do need land to train, I also believe we should leave land alone for the citizens who live free in this great country. I myself race, camp, and truly enjoy time with my family and friends spent in Johnson valley. We are working people who pay taxes, obey laws and respect the land and nature. Our government spends our money on so many things in other countries. When are the voices of the people of this very land going to be heard? We use this area respectfully as a place to see our children smile and laugh as they spend time outdoors. Imagine that, children outdoors now days! We spend money on food, gas, and many other things before we

head to this desert area, therefore moving money into the economy. I hope another way can be found to preserve what little land we have left to enjoy. Thousands and thousands of people use the proposed land every year. Not just the racing community, but huge groups of campers, dirt bike riders and desert enthusiasts alike. Again, I want to stress that I support our U.S. military and respect their sacrifice, but do also believe that taxpaying, law abiding American citizens should have a voice in the taking of our land that we enjoy to relax in after working hard and paying bills. There must be an amicable solution here to employ. Thank you for your time.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** It has come to my attention that the Sheephole/ Cadiz (WSA 305) wilderness area was never recommended for wilderness in the first place because that area had been impacted by military training during WWII. It was mistakenly included in the wilderness plan.? We need to get that area de-listed and use it for training on the east side of the base. Also doesn't the military have the ability to request a "right of way" in the "Cleghorn Lakes Wilderness" area? Can you also request that right of way and use it for training also?

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** I am retired Navy so I understand the need for space for training. We the people are paying the bills for the military as well as the rest of the country. We off roaders have a limited amount of area we are allowed to use in the first place. The military can take land where ever they want, let us "We The People" keep this OHV recreational area.

**Date Comment Received** 4/16/2011

**Response** The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in Section 2.7 of the EIS, the Marine Corps considered other

alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** Johnson Valley has been a off road Mecca for many years. It is the perfect getaway for families, friends, off-roaders. Most of us in the world of off-roading have been and always will be conscientous to maintaining the trails and areas that we use. Johnson Valley has been one of the best areas we have to enjoy our recreation events. The military does not need to turn this area into another military exercise area. We want to keep this area open to the public for the enjoyment of everyone.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

**Comment** I have grown up in the high desert and my family and I use the OHV areas for recreation and racing. Over my 32 years of life I have watched the government take more and more desert land away. If you take the Johnson Valley OHV area, we will almost be squeezed out of the desert. The other OHV areas will become more crowded and create dangerous situations from overcrowding. I also believe that more and more people will begin to recreate on protected lands creating problems for protected animals. If you take Johnson Valley you must open up another area. I believe taking Johnson Valley is the worst thing you could do.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources. The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** The financial burden on the off-road community will be felt in the surrounding communities. Johnson Valley is my family and friends favorite place to recreate. If this is taken away there will be many physical and emotional damages. This sort of action would put serious doubts about our government in the minds of many people. I strongly urge that this action not take place. Save the money and pay down the debt.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** The military should not require the entire population of Lucern Valley to be subjected to this takeover of public and private lands. There are other places where this type of activity can be conducted without causing any adverse conditions. Leave Lucerne Valley alone.

**Date Comment Received** 4/16/2011

**Response** Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action,

including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

<b>Comment</b>	What idiot thought that Lucern Valley would be a good place to train using live ammunition. This type of military installation belongs in an area with very scarce population and certainly not in an area so close to a major residential and business area. Has the noise factor been taken into consideration of planes and live fire. Tell the military to look elsewhere, they are not wanted in Lucern Valley.

<b>Comment</b>	I'm opposed to the taking of the public land in the Johnson Valley. This area is a major recreational area that also contributes to the income of cities and business's in all the surrounding areas. If this land if taken so the public can not freely travel and enjoy the recreation activities they have in the past this will force everyone to the Barstow desert area. This will create a unsafe situation due to overcrowding. The public has no other options but the Marines do so please leave Johnson Valley untouched or no worse than option #3. Thank you

<b>Comment</b>	<p>To Whom It May Concern: I would like to comment on the draft Environmental Impact Statement (DEIS) for the propose acquisition of portions of Johnson Valley by 29 Palms Marine Corps Base. Bottom line up front: I prefer Alternative 3 as a primary choice, or No Action as a secondary choice. My reasons for this follow three main points; (1) Recreation Areas for Military Personnel, (2) Availability of Joint Military Training Areas, and (3) Difficulty of Range Clearance for some proposed Alternatives. In addition to frequently using the Johnson Valley OHV area for recreation, I am also a Navy Explosive Ordnance Disposal (EOD) Officer stationed in California. 1. Recreation Areas for Military Personnel. As stated, I am an active duty military officer stationed in California. My NUMBER ONE reason for seeking a duty station in the state of California is the availability of unique recreation areas. I am a veteran of multiple combat tours. The need for areas that are available for OHV recreation is very important to me. I am willing to perform any duty asked of me by my service, but I also expect the opportunity to relax and recreate when I have</p>

the luxury to be near home. I use Johnson Valley OHV area as a place to bond with my family and with fellow active and veteran military members. Removing these areas of Johnson Valley from public use would be not only remove a treasured recreation area for the general public, it will remove a recreation area from many military members as well. 2. Availability of Joint Military Training Areas I do not believe the DEIS has adequately explained why existing training areas at other bases are not adequate or available. For example, there are training areas at Ft. Irwin, NAWS China Lake, and many in Nevada that could be used by the Marine Corps. 3. Difficulty of Range Clearance As an Explosive Ordnance Disposal Officer, I know that the ability to clear an area for public use where live ordnance is used will be impossible for the alternatives that propose dual use. For example, Alternative 6 proposes that areas will be available for public use 10 months out of the year, and that the areas will be used for training the remaining 2 months. If realistic training is conducted with live ordnance being used, the USMC will not be able to clear this land as safe for public use. Such a clearance will be prohibited by the time, cost, and liability of declaring the area clear. It simply cannot be done to the level required to make safe for the public without extreme cost of contracting to a private ordnance company, or by tasking military EOD personnel who are already tasked too thin by current wartime obligations. Respectfully submitted, Kevin Gamble San Diego, CA

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which

includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

<b>Comment</b>	Have been riding in the desert for 45 years. Am life member of AMA (American Motorcycle Association) and Prospectors MC Club. I have raced, trail rode and vacationed in the desert with club, friends and family. I have paid off- road license fees for the last 25 years and in return, open riding areas have been closed forever forcing the racing and riding population into small, worn-out, dangerous areas. Please vote to keep the few remaining areas open to off-road use. The closure of any off-road areas now will impact the frail economic and financial gain that is currently happening due to the use of off-road vehicles and their needs.

**Comment** I fully understand the Marines intentions for wanting to expand their training area. As a retired military member, I fully support our military and any training that they require. I do not support the acquisition of the Johnson Valley area though, as I firmly believe that the military has sufficient military training areas in the Southern California area, to include, 29 Palms, Fort Irwin to the North of 29 Palms. Fort Irwin just completed an expansion of land that they took from the public lands of the Mojave desert. I understand that the lands to the East of 29 Palms is also suitable for the increased training area, and as this land is already wilderness area, it has no problem with people using it currently. Johnson Valley and the trails of this area are a national treasure that we in the recreation world treasure very much. The lands around the Johnson Valley area are currently multiuse and we would very much like for them to continue to remain as such. If the Marines need help in acquiring the lands to the east of the current training area, I know you would have the full support of those in the off-highway recreation world. Thanks Todd Ockert

The Johnson Valley OHV area is the source of affordable recreation for thousands of families every weekend all year round. With the high, and rising, cost of fuel, Johnson Valley is the only affordable destination for 75% of these families. Again we use the land year round. The military, Marines, plan to use the land two or three weeks a year and keep it closed year round, (except for staging areas along Camp Rock) I can't see how this is, in any way, a reasonable plan. There is wilderness, no trees and no more endangered wildlife than in Johnson valley, that can be opened up for two week, long, exercises, once a year. The Marines say that after the exercises that they are going to clean up and restore the area to pristine condition. This sounds perfect for the unused areas, East of Twenty Nine Palms.

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** In this new land aquisition you will be taking away PUBLIC lands for military training. OHV areas in southern california are already shrinking enough as it is, I believe that this new aquisition will be the end of southern california ohv use. The real problem is this will create much more illegal off roading, which in turn causes more and more uproar. These areas are used by the public for R&D on off road capable vehicles that the military uses. without the public use of these areas, the military's progression in off road vehicles will slow rapidly. Please expand to the east of the base in land that has no ohv use.

**Date Comment Received** 4/17/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps appreciates your comment and involvement in the NEPA process. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

I am an avid 4-wheel enthusiast, and even though i live far from Johnson Valley, I beg the powers that be, not take this very valuable and highly coveted reasource from the public! The use of public land, for the public, and especially for recreation purposes, is constantly under fire these days. I beleive public lands should STAY PUBLIC! Johnson Valley is an iconic 4-wheeling mecha which I have never been able to enjoy, but really hope I can someday! Please do not take this dream from me, and many others! Surely, there must be other options, with less value to the public, that could be and should be considered for training grounds!

**Date Comment Received** 4/17/2011

**Response**

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps appreciates your comment and involvement in the NEPA process.

<b>Comment</b>	Please do not shut down Johnson Valley. I have never been there, but I've heard about it, and would like to visit one day. The off-road parks in America are slowly being shut down, leaving off-road enthusiasts without a place to go. Don't let this happen to Johnson Valley.

<b>Comment</b>	I am the President of a non-profit organization dedicated to assisting those in the off-road racing community. I am also a racer/crew member and volunteer. Please consider option 3, 4, or 5 in that order as you look at the expansion of the training are for your base. The off-road racing industry is a multi-million dollar industry which provides a huge economic impact to not only California, but the surrounding states in the Southwest United States as well. Races draw participants and spectators from all over the world, providing much needed tourism dollars to the areas where races are held. Restricting one of the few remaining competition areas in California will

hurt this industry and the positive impact it has on the economy. I'm a huge supporter of our military and their ability to train and fight to protect our freedoms and have several family members who are or have served. I ask as a tax-payer, that the expansion considers the abilities of our US citizens to continue using the limited public land available for racing. Respectfully, Jared Tetzlaff President [www.fast-aid.org](http://www.fast-aid.org)

Please refer to Sections 2.5 and 4.2 of the EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

**Comment** Hello, I am a Lance Corporal in the United States Marine Corp, I am writing today regarding the land annex issue for the land surrounding 29

palms and the newly purposed training area. There is a small section of the land, known as "The Hammers". This is a very unique area that has an ever growing world wide reputation for being some of the most difficult terrain to travel in very special purpose built 4 wheel drive vehicles. As an avoid off road enthusiast who did not get bless with a West coast duty station, I long for the days that would allow me to visit the area's surrounding twenty-nine palms for recreational purposes, and not as an infantry Marine going through CAX training. I ask that you please consider one of the other options to leave the land accessible to the tourists and offroad crowds, and thank you for taking the time to read this.

**Comment** As a resident of Pennsylvania it may seem odd that I should be concerned with matters in Johnson Valley. However,as an offroad enthusiast I can not think of one single act that could possibly do more harm to our sport, then the loss of Johnson valley. I am very grateful for all that the armed forces do for all Americans. It is their sacrifice that allows me the very freedom to voice my opinion here. I completely understand our military's need for training, and that some public land will need to be allocated for that training. I hope that they might consider the desert areas surrounding Johnson Valley for the future location of their training facilities. Thank you for your time.

**Comment** I have been going to Johnson Valley for over a decade. It truly is one of a kind and there really isn't anything else like it. While I understand both sides, it would be a shame to lose such an amazing off road spot. As rock crawlers, we have limited terrain as it is. Johnson Valley is the center of our sport and to lose it would be a devastating blow.

**Date Comment Received** 4/17/2011

**Comment** My family and I are avid off-highway enthusiasts. During the forty plus years that I have been enjoying the outdoors I have seen available space to recreate get more scarce with each new year. I strongly oppose any action to further eliminate access to off-highway recreation. This includes the Johnson Valley area, currently included in the proposal for expansion of the Twenty Nine Palms Marine base.

**Date Comment Received** 4/17/2011

**Response** Thank you for your comment. **Comment** As our population increases, there are more citizens using the outdoors. When we start limiting the areas we can use, more citizens will be compacted in the areas that remain open, thereby degrading those areas more. Our country was developed on a basis where there is equal opportunity and usage. Taking away land which has been used by citizens for years without consideration for their needs is not the American way. I think there are several other alternatives that will work just as good without impacting ordinary citizens.

**Date Comment Received** 4/17/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement.

**Comment** Your western and southern expansion is a little too close for comfort to Lucerne Valley. I mean, you are coming right in to northeast Lucerne Valley. That is ridiculous that you should come so close to a community. Come on !!! There is quite a large rural community here and your expansion will have a negative economic impact on this area.....not to mention quality of life.

**Date Comment Received** 4/17/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis

conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

While I may be as far from Johnson Valley as one can be in the United States it is still important to me. It's a dream and a goal to test the machine I've built in an area created by god and nature to be the epitome of Off Highway action, a place unlike anywhere else. I'm very hopefully this area, and others like it in the West coast will be available to myself and my family, in particular my 2 daughters, who adore the rock crawling we partake in. While they may be to little to enjoy the hammers now, someday they won't be and I hope they'll be right there with me enjoying the thrill. I am pleased to see that the military is willing to listen and work with the Off road community on this and I truly hope an agreement is reached that makes everyone happy and provides an area to train our troops the the best of human abilities.

**Comment** One of the most important and cherished parts of being an American is our freedom to pursue what makes us happy and that's not only in terms of recreation but financially as well. As of late, this guaranteed freedom seems to be quickly disappearing, taken by an ever growing government to meet its own needs. I understand the need of a strong military to protect our country and way of life however, it seems hypocritical to me when it's the military which every citizen pays literally thousands for each year is the entity that poses a threat to these guaranteed freedoms. Johnson valley is public land that has brought me much "happiness" over the years. My family and I regularly go out and spend vacation time bonding and enjoying ourselves while supporting the local economy. With so many other vast areas open in US deserts, it's hard for me to understand why this area would be taken, which is so important to many diverse groups of people and local communities. Please consider alternate areas besides Johnson Valley if the military needs to add to it's already massive accumulation of land and allow tax paying American citizens many of whom are veterans themselves to pursue their happiness on our public lands.

**Comment** It's frustrating that more and more areas are being closed - even though more of the population is attempting to use public lands. Once an area is closed, they seem to never be reopened again. There is a significant amount of available and not controversial land north of Hungry Valley that can be used, and it just seems like it would be a better public response for the Marines to use non controversial areas, and leave popular RV, OHV and camping areas open to the public, and instead use other non popular areas for military exercises. Working for the US Gov, public perception, and public support are crucial - alienating the public, and taking away popular recreational areas will only serve to alienate the public, and undermine future support for necessary projects. I heartily recommend that you pursue other, less controversial areas.

**Date Comment Received** 4/18/2011

**Comment** I object to public access lands being closed and used exclusively by anyone. With 38 million people in the state of CA, we need as much public access land as possible. The Marines should use land (millions of acres fall into this category) already closed to the public. If the Marines should find no other alternative, than they should open up comparable closed land and make it publicly open. THIS SHOULD BE as it is on private property owners a 2:1 ration. for every acre of open land that is closed, it should be replaced with 2 acres of closed land made open.

**Date Comment Received** 4/18/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). The Marine Corps does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to Recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance.

**Comment** Johnson Valley OHV area is a one of a kind place and the premiere rock crawling destination in America. It is here that the sport is pushed to it's limits and continually being reinvented. Johnson Valley OHV area is far more than just open "BLM land" and should be excluded from this land acquisition.

**Date Comment Received** 4/18/2011

**Response** Thank you for your comment. **Comment** I HAVE BEEN RIDING DIRT BIKES FOR OVER 30 YEARS IN SOUTHERN CALIFORNIA. THAT IS THE REASON WE MOVED CLOSER TO JOHNSON VALLEY IN 1985. THE AREA WHERE THE D.E.I.S IS CONSIDERING CLOSING DOWN OUR PUBLIC LAND FOR THE MARINE TRAINING. IF THIS AREA IS CLOSED DOWN TO PUBLIC ACCESS AND FOR COMPETATIVE OFF-ROAD RACING THAT WOULD BE THE WORST THING TO HAPPEN TO THE PUBLIC THAT RECREATES ON THESE PUBLIC LANDS. THE CITIES THAT LEAD TO THIS AREA WILL LOSE A GREAT AMOUNT OF INCOME GENERATED BY THE OFF- ROAD COMMUNITY STOPING INTO THE BUISNESS'S ON THE WAY TO JOHNSON VALLEY TO PURCHASE FROM THESE ESTABLISHMENTS. NOT ONLY WILL THEY LOSE MONEY, BUT THE OTHER OPEN AREAS THAT WE USE TO OFF-ROAD IN, WILL BE OVERLLY CROWDED, THIS WILL THEN INFORCE THE BEAURER OF LAND MANAGEMENT TO SPEND MORE \$ TO INFORCE THE LAND ISSUE RULES IN THOSE AREAS. MAKING IT ILLEGAL TO RIDE IN JOHNSON VALLEY PER. THIS TRAINING FACILITY, THIS WILL CAUSE ALOT OF PEOPLE TO RIDE ILLEGALLY, MAYBE HARMING THEMSELVES OR OTHERS IN THE PROCESS. THE MILITARY HAS MANY OTHER OPTIONS OF LAND THEY COULD USE. PLEASE DO NOT TAKE AWAY OUR "PUBLIC RIGHT" TO USE OUR PUBLIC LANDS TO RECREATE IN. NOT ONLY WILL THIS BE A DOWNFALL OF ALREADY SMALL AND LESS SUCCESSFUL SMALL CITIES IN OUR SOUTHERN CALIFORNIA DESERTS, BUT THE OFF-ROAD INDUSTRY BUSINESS'S WILL TAKE A HUGE HIT WHEN PEOPLE ARE NOT ALLOWD TO USE OUR OPEN LANDS TO PLAY ON, BECAUSE THOSE OFF-ROADERS WILL NOT BE PURCHASING NEEDED EQUIPMENT,DAFETY TOOLS,AND OTHER GOODS NEEDED TO DO THIS SPORT SAFELY.WITH THE GAS PRICES OF TODAY, JOHNSON VALLEY IS THE CLOSEST AREA FOR MOST SOUTHER CALIFORNIA OPEN AREA TO OFF-ROAD IN. PLEASE COME TO A BETTER CONCLUSION FOR THIS TRAINING FACILITY. THE MILITARY ARE VERY WELL RESPECTED AND WE DO UNDERSTAND THE NEED TO TRAIN TO KEPP OUR COUNTRY SAFE, BUT PLEASE LOOK ELSEWHERE TO PROVIDE THIS TRAINING. THANK YOU

**Date Comment Received** 4/18/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS). As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Comment** I spend about two weekends a month in Johnson Valley with my family, participating in recreational OHV riding as well as racing. Not only is this something valuable to me as an individual, having grown up riding the desert with my family, this has an economic impact on those communities around Johnson Valley. I spend a lot of time in Johnson Valley, enjoying my time with family and friends, and hope to be able to bring my children out there someday to experience the same, love for the desert and the OHV community. This land is valued the same for a lot of people that regularly visit and enjoy all the landscape and scenery it has to offer. It means a lot to us, as many have spent their entire lives, and raised their families in this lifestyle. Johnson Valley is where much of this takes place. As I mentioned, there's an impact outside the OHV community as well. The economic support that the OHV families bring to the surrounding communities is

substantial and steady. From my own routine, I spend hundreds of dollars a month in Apple Valley and surrounding towns. Compound that by the large number of OHV families making that same trek and spending, in a lot of cases more money in these same areas, and you have a significant source of income to these areas. Lastly, there is the issue that brings this entire situation around, and that is the Marines philosophy behind this land grab as an initiative to "train as we fight". What military engagements does the US military undertake now, or in the foreseeable future, that will involve "Three Battalion Task Forces abreast converging onto a MEB objective"? What enemy to the American people would be a candidate to confront the US military on such a scale? It's a shame that in California, where not only the cost of living has become so high, state regulation on business, emissions, taxes, and so on, has become so stringent and unforgiving, that on top of that, we must now also deal with the military attempting a land grab away from our recreational lands. Enough is enough, we don't need or want this expansion. The military has extravagant resources as it is now, and they should learn to use them efficiently. Thank you.

**Date Comment Received** 4/18/2011

**Comment** Hello, My name is Dennis I am 39 years old. I have been off roading with my family since I was 5. My most fond memories growing up were out in the desert. Therefore, now that I have my own family of five, I want my kids to be able to create memories of there own. My family and I enjoy off roading at least twice a month. This enables my family to spend quality time together in a rather secluded atmosphere. My parents, sister and I are extremely close to this day thanks in part to the time we spent together when we were younger. I want the same for my own family. Due to the limited amount of off roading space within drivig distance, weekend getaways are becoming more and more difficult. The Johnson Valley OHV area remains one of our favorite spots due to the terrain and its relative proximity to our house (about a 2 hr. drive). It's vastness also prevents overcrowding which is why we discontinued trips to other areas, for safety reasons. I understand and support the need for training a strong military but,with all of the open desert in Riverside and San Bernardino County, wouldn't it be possible to aquire land for training futher to the East? Please reconsider other areas before you take away my families source of entertainment and togetherness. Thank you for taking the time to read my response. Dennis Beyle Son of two, Husband of one, Father of three & Friend of countless off roaders who share these veiws.

<b>Comment</b>	Once again our government is flexing it's ability to take what ever they want and going the easist route. Why not take the WILDERNESS area that no one uses? Because that would take more work, so go for the soft target. The off roading community is large, but because not everyone is a member of some type of orginization they my seem smaller. On any given weekend the off road community actually USES there open lands for recreation, I thought that was what they are for! As for the shared use concept, how long will it be after this starts that it is deemed to dangerous for the public to use do to what ever you may come up with.
<b>Date Comment Received</b>	4/18/2011
<b>Response</b>	Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because

they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

I would like to state my opposition to the marine base expansion into Johnson Valley OHV area. The offroad, hiking, camping, bird watching, and other recreational communities that share this area may not enjoy their sport where they wish - it must be done on designated land. Taking this designated land away from us will create overuse in the few areas that we have left to ride in and hurt the communities surrounding Johnson Valley. By closing this area, you will be stealing the memories and past times of generations of families. Please preserve our PUBLIC land.

**Date Comment Received** 4/18/2011

**Response**

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement.

**Comment** Regarding the 29 Palms Marine Base expansion into the Johnson Valley area, I understand there are several options that are being considered. Option 3 appears to be the most benign however I have strong concerns that this option includes loopholes that will extend the timeframe for closure indefinitely. Therefore I oppose any option to expand the base in the direction currently targeted.

**Comment** I support the military in every way except this. My family and I have been camping and driving OHV for my whole life and I see our open land being closed and becoming smaller and smaller every year. I feel the military should look elsewhere and leave Johnson Valley open to the public. If the government continues to close more public land where do we take the next generation camping and off roading? Pretty soon there will be no open spaces all because of the greed of our monster government. LEAVE JOHNSON VALLEY OPEN TO THE PUBLIC!

**Date Comment Received** 4/18/2011

**Comment** I'm concerned about the negative impact if you expand into Johnson Valley. It will affect more than just those who live there and use this area for recreation, it will affect many of us around the country who travel great distances to enjoy such beautiful recreation, such as myself. Short term it may be economical, but the long term negative impact on recreation far outweighs any short term benefit of using Johnson Valley. There is NO replacement for this area. You can't just take this beautiful recreational area elsewhere to enjoy. It only exists in Johnson Valley. Expansion here will alter and affect many lives around the country!

**Date Comment Received** 4/18/2011

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4,5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** To whom it may concern, First off, I very much appreciate everything that our military and armed service men and women do for our country. Thank You for all of your sacrifices!!! I have been riding out in the Johnson Valley area forover 7 years now. Most recently was during this past "King of the Hammers" race where myself and 5 fellow riders recieved \$125.00 citations for being 1200 meters in the Marine base border, (that was not clearly marked by any fence or signage. the marines that stopped us could not even locate a sign). We were all taken back by this as we were in an area that we have ridden across many times and saw no signs posted saying otherwise. Apparently things have changed and are looking to change even more. The land acquisition suggested will not only imapct the local economy for Landers, Yucca Valley and surrounding cities and towns, it will also impact OHV green sticker sales, and offroad vehicle sales at dealerships in the state of CA, further restricting the growth that our state economy needs. 100's of jobs are created and sustained by OHV use in Johnson Valley. I make roughly 6-8 trips a year out there and spend close to 300.00 each time in fuel, food, and other items. Thats a minimum of \$1,800 dollars per year that I bring to the local economy...think about the overall imapct in loss of revenue & jobs. It will be in the millions...

**Comment** Please, please, please do not close the Johnson Valley OHV area. My mother and father raised me in the desert on the weekends enjoying the beauty of the area. I now am raising my three children on the weekends in the area. It is important for them to be able to enjoy OUR open land and it is a benefit of being an American. Without these open space to recreate on we are resigning our children to stay at home and live on video games. The Armed forces enjoy the largest training facilities in the world, not to mention all the countries we now are occupying. It is ridiculous. Another government land grab is not the solution. Please do not take this land away from my children and their children.

**Comment** I live in Apple Valley and work in Lucerne Valley. The entire High Desert area here benefits from these lands about to be confiscated by the government. In particular, Johnson Valley is one of few places of its kind open to the public and designated for off-road recreation not only in San Bernardino County, but in the world. I meet and talk with people who travel from Europe with German, Russian, and British accents just to take part in the racing activities of the area as well as enjoying a taste of the old back-country, wild-west style America and good ol' Route 66. The only reason the Military is stealing this land from the people and local communities and businesses that benefit from it is because the EPA wants all land that people are already not living on to be off-limits to everything and everyone. I have seen a map. There is plenty of room for base expansion in the OPPOSITE direction of populated communities and American citizens. I don't want bombs being dropped all over my backyard just because some environmental yahoo wants to trash MY neighborhood, MY community rather than some rat or coyote's vast vast VAST habitat. For some people, this land being stolen from us is their fun. To me, it is my livelihood. No soldier died to have land stolen from the people. This land belongs to the people. We send our sons and daughters to fight for this country, we pay our income taxes, we pay our business taxes and fees and permits and fines, we pay our property taxes, we pay our sales taxes, we pay our fuel taxes, WE FUND this government and its cronies like the EPA. WE DESERVE to have a voice and those Marines are fighting for a country in which the government respects us.

**Response** As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live- fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** Don't Tread On Me. And stay off our land. My father was a Navy Veteran. He was in the Korean Conflict after the Second War. I remember him telling me about seeing nuclear bomb testing some miles away when he was stationed on Wake Island in Alaska. We all know about the testing that was done in the Mid West. Who knows? Maybe that's why he and SO many people are now dieing left and righth from cancer. We don't LIVE FIRE exercises and government theft of the people's land here in our beautiful desert communities (or anywhere near it for that matter). I believe I speak for a lot of people when I say, "BACK OFF!"

**Comment** Please, don't take away any more of our public lands! Our desert area for recreation keeps getting smaller and smaller. I love taking my family to the Johnson Valley Off Road area, we always stop spend money for fuel and supplies at the local stores in Apple Valley and Hesperia, and know the

impact of us, and many others, not spending our dollars, will hurt that local economy. Please, move it to east!

**Date Comment Received** 4/18/2011

**Comment** For those of us who actually live in this area, most of us find the desert beautiful, peaceful, and serene. We love the off-roaders for the most part, they are usually only here on weekends and holidays and most are very respectful and clean up after themselves. A military base with live ammo and such would be an everyday intrusion on the desert and the creatures that live in it. I have seen the ugly scars left in the dry lakebeds from previous

military training and it makes me sad. I don't understand why this area is needed for expansion. I would like to see statistics and measurements from other bases backing up the claim that there isn't another base that would be sizable enough for their extensive training. It would definitely be a misuse of this tranquil area, in my humble opinion.

**Date Comment Received** 4/18/2011

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live- fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

**Comment** I am also a racer/crew member and volunteer. Please consider option 3, 4, or 5 in that order as you consider the expansion of your base. The off-road racing industry has a large economic impact to not only California, but the surrounding states in the Southwest United States as well. Restricting one of the few remaining competition areas in California will hurt this industry and the positive impact it has on the economy. I'm a huge supporter of our military and their ability to train and fight to protect our freedoms and have several family members who are or have served. I ask as a tax-payer, that the expansion considers the abilities of our US citizens to continue using the limited public land available for racing. Donald Bundy L&L Motorsports

**Comment** The 29 Palms Marine Base is attempting to encroach on one of the Wests premire OHV areas,Johnson Valley OHV. I strongly disagree with the descision to add this land to their already massive training facillity. Why is it necessary to expand toward the population centers other than to create a SUPER military training ground which connects the Navy's China Lk. facility, Edwards AFB and Ft.Irwin/MCLB. I VOTE NO!!!

**Date Comment Received** 4/19/2011

Johnson Valley may seem like just another featureless typical desert area, but to many from throughout the U.S. and indeed beyond U.S. borders, it is a completely unique and beautiful area that is unlike any other. Families and recreationists from far and wide flock to enjoy Johnson Valley and the endless recreational activities it provides. Visit the area and you'll find its visitors have license plates from across the U.S. Talk with more visitors and you'll discover that many of them come from as far away as Australia and Europe, and they are here solely to enjoy what Johnson Valley offers. Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how

much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us.

**Comment** Please do not take over Johnson Valley and other desert that will close forever our public lands for OHV use. This is a major family recreational and professional racing events area and it would devastate the OHV usage in southern califonia. We already are losing land usage and have very limited areas to ride, race, play etc. This would not help. I do love and support our military but there has to be a better way than to take our public OHV area like this. Please do not take this away from us. Sincerely, Jason Coleman

Johnson Valley is that unique. In fact, even many of the surrounding desert communities depend on those visitors for their very livelihoods and that if the visitors stopped coming, some of those communities simply may not even survive. Johnson Valley hosts many events throughout the year including one of the fastest growing and toughest off-road competitive events in North America called King of the Hammers. That event alone drew over 15,000 visitors including TV and radio coverage that brought much needed revenue to the surrounding communities. One of the largest groups of visitors includes the offroading community. Offroaders are completely supportive of the US military and especially our Marine Corps. We believe in the mission of the Marines and would do nothing to jeopardize the training that is so vital to the Marine Corps mission. With that in mind, we believe there is more than enough suitable terrain outside of and adjoining the Johnson Valley recreational area for the Marines to conduct their training in. There are certain areas within the Johnson Valley recreational area, particularly inside the canyons, that simply cannot be duplicated anywhere else. To lose those valuable recreational resources that are, truly, so unique would be tragic to a huge number of families and recreationists. We believe few within the Marine Corps knew just how much Johnson Valley meant to so many and just how important of a national recreational resource that it has become. We believe that you do now understand its importance and because of that, we simply request that you give the most possible consideration to expanding your training areas to adjoining desert terrain that does not take our Johnson Valley away from us.

**Date Comment Received** 4/19/2011

**Response**

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** I STRONGLY OPPOSE the Johnson Valley Training Land Acquisition your organization proposing. The public lands of Johnson Valley in which my family and friends frequently use many times a year are a prosperous public and open place because of its terrain variety and range. I take my children there and the OHV area provides solid recreation for me and my growing children to enjoy. I have enjoyed Johnson Valley for over 22 years. There is no place else like Johnson Valley despite what other, and much smaller, riding areas may exist in the region. The major slice of what you're proposing to take and minor slice you're "letting" the public keep (the last proposal offered) does not offer a balanced solution. The best solution for

the public off-road and Lucerne Valley community is for the expansion to head east, ALTERNATIVE #3, and leave Johnson Valley in tact. The People and businesses of Lucerne Valley will greatly be affected by the loss of business, and employment, the off road community brings to the area if it is lost to the military. From an environmental standpoint, 3 brigades of rolling tanks and armored vehicles through the land will do harm to the wildlife and land than any group of off road riders. How can a tank brigade charging at 30 mph possibly see a desert tortoise inching along - it can't and is a false assumption that they will. Sincerely, Colin Granger

**Comment** I am very disappointed to hear that the Johnson Valley area may be closed to off- road recreationists. I have spent many weekends in the area attending, and participating in, AMA District 37 events, and camping with my family. This is an area where our family gets together with others who share a love of desert racing/riding. Not only do we ride, but we explore the wide expanse of open areas. My children have learned about the animals, flora and fauna, and the previous inhabitants of the area, and have gained a better understanding of the Mojave Desert and have learned that without this great treasure, we would not have become such a close family that loves everything the Mojave Desert has to offer. I can only pray that the military will leave this area open to the public so that other families can experience what mine has. It would be a shame to lose this area when there are so many other areas that are already closed to public recreation that the military can, and should, use. The other issue that the military needs to address is the economic situation that towns like Lucerne Valley will face if Johnson Valley is closed. I have personally spent thousands of dollars in this small town during all my weekends of riding/racing in Johnson Valley, since this is the last place to buy gas and food. I have also made trips to Lucerne during my weeknds because I forgot something. If Johnson were to close, there is a good chance that Lucerne will soon follow. Please take into consideration the towns, people, and families, that will be effected by your

decision. There are other options, especially areas that are already closed to the public, that will suit your needs and still keep Johnson Valley, in its entirety, open to the public for off-road recreation, racing, camping, hiking, horse-back riding, and a plethora of other adventures for those that truly love the area. Thank you, Ann Chestnut

**Comment** The Marines do not need Johnson Valley. They need to train like they fight. We do not have large scale "Patton like" battles anymore. If you need to train like that then you can go over to Ft. Irwin. They need to train in urban environments.

**Date Comment Received** 4/19/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by

members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

**Comment** As a lifelong Californian and former Hi-Desert resident for over 20 years I am dismayed at the prospect of shutting down the majority of Johnson Valley to recreation, especially off-road recreation. My family and I have recreated in the area since my father was stationed at the former George Air Force base in the '60's. The area must be kept open for recreation as it is if not expanded to its' former boundries. All of the proposals put forth are not only detrimental to recreation but also to the economy of the area, especially the City of Lucerne Valley. If the US Marine Corps needs to expand desert training activities I would humbly suggest partnering with the US Army to conduct training at the existing Fort Irwin facility. As a former employee of the facility I can tell you that there is more than ample oppertunities for training at Fort Irwin for members of the US Marine Corps and i believe that joint exercises may be mutually benifitial to all members of the Armed Forces. In closing- do not take away any public land from Johnson Valley. For the sake of the community, the residents, the economy, and those that recreate in the area please stop this massive land grab!

**Date Comment Received** 4/19/2011

<b>Comment</b>	Johnson Valley is a great place for family camping and riding. Shutting it down to public use is an absolute shame. The Marines absolutely need an area to hone their skills to protect us but they have been doing a great job for the 200 plus years with what land we have already given them. This is a travesty and will not be forgiven if this area is closed to public use.

**Comment** I am opposed to the expansion of the 29 Palms Marine base as we stand to lose our Johnson Valley OHV area. I have been off roading in the Johnson Valley OHV area since 1987 and as a 3rd generation off road enthusiast, and avid off road racer, I cannot support this move by the Marine Corps. The Johnson Valley OHV area is the biggest, and closest OHV area that we have near Los Angeles area. The economic impact that the town of Lucrene will suffer and the basic shut down of one of our largest off road areas will cause many racers, businesses, and manufacturers to go out of business. I vote NO on the Marine Expansion!!!

**Date Comment Received** 4/19/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost

sales and tax revenue related to reduced recreational and film industry spending.

**Comment** If you take this land from us, we will go out of bus. Also my club Monrovia Rock Hounds will not get to go out and look for rocks. I race for the cure of cancer, brain, and breast cancer, you see I have both, and racing is my life. Think about all the people that will lose their jobs. I love the U.S. and this just is not right, I know that we have to have the best in our men and women that keep us safe, but can we go some where else. It is a big world. I vote No.!!

**Date Comment Received** 4/19/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. **Comment** Regarding the acquisition of the Johnson Valley. I feel very strongly again the acquisition of Johnson Valley. My family, friends and I use the area regularly and feel it would be a great loss to the people of California. As our access to other areas dwindles the loss of the Johnson Valley is just wrong. The people who have vowed to protect us are now going to try and restrict our own land. Please don't take Johnson Valley. If you have to expand then please consider proposal number six, the that goes to the east. Thank you.

**Date Comment Received** 4/20/2011

**Comment** This is one of the best and only places left that is available to us to off road in the high desert. People come from all over the United States just to go to the Hammers. There are no trails that come close to the ones you can find in Johnson Valley and because of this it is a very popular place. Everyday more and more off roading trails are being closed. In the High Desert the designated place for off roading is Johnson Valley and now the Marine Corps and the Government want to take this away from us, U.S. Tax Paying

Citizens. Please Save Johnson Valley and leave our children with a great place to enjoy some Off Road Recreation. Don't let these Off Roding trails become a memory to us, and a dream of something that could of been for our children that they will never be able to experience.

**Date Comment Received** 4/20/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** To Whom it May Concern: I do not believe that the Marines do not need anymore land because you, "The Marines", are the best trained already. Not too many branches of the military can fight in the water, on the land, and in the air; and win. But you do just that. The Compromise: Close only land north of "the Hammers" and east of Bessemer Mine Road. Also, take the land east of the base toward the south. That will give you plenty more to train on. If that is not suitable for you, then you need to deploy your time and energy toward the east to the Wilderness Lands. You have the lawyer, the manpower, and taxpayers' money to make this happen. Thank you for your time, Charles Hoover

**Date Comment Received** 4/20/2011

**Response** Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large- scale training area for live fire and maneuver training of a

Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

<b>Comment</b>	To Whom it May Concern: The more land that you close to the Public the more the surrounding communities will be hurt and dislike the "Base" as their neighbor. The towns rely on off-roaders for service to survive financially. We buy gas, have lunch and dinner, sometimes even ice cream, and on our unlucky days, we buy car parts, get towed, and see a mechanic. A lot of people will be financially hurt if we are forced to stop off-roading in the place that we have loved for over 35 years. Please expand the Base to the east or take No Action at all. A move to the east would allow the off-roaders enjoyment of their recreation and continue to support the neighboring communities. Thank you for your consideration, Charles Hoover

**Comment** Please don't take away one of the few places we have to enjoy with our families. Johnson Valley has been for some time our favorite place and also the closest to us to go to the desert. Racing is also a big part of our culture and we enjoy it as a family activity. My wife for the first time did a timed enduro and finished second, she had the biggest smile it was great to see. We've made also many friends and enjoy going to certain places on the way

there near the ridding places. Which I am sure will suffer economical impact once most of the off- roaders stop going. Thanks for listening, Allen (35), Nicole (36), Tyler (8) and Arianna (3) Thanks

**Comment** I understand we have to train our military & thank God for everyone of them, but why do you need the Johnson Valley ? Seems to me you already have huge military bases in the Mojave area and if you need more space I suggest anywhere in the middle of Nevada. There's nothing out there for many many many square miles. Please leave the Johnson Valley alone.

**Date Comment Received** 4/20/2011

**Comment** Taking all or part of Johnson Valley OHV area may be deadly! IF you take JV for 2 months of training, how will public safety be assured the other 10 months? How will unexploded ordnance be handled? What is the permit process and how realistic is it for organizations and individuals/families? What is the safety impact of relocating the tens of thousands of OHV families from JV to the surrounding OHV areas? What is the expected increase in accidents and deaths from increased population density in these surrounding OHV areas? What is the financial impact on Lucerne, Johnson Valley, Yucca Valley, surrounding areas when families and event organizers are forced out of the area? What is the financial impact to the state from lost revenues as event organizers and families travel to AZ and NV for OHV activities? IF the USMC expands into JV OHV area, how far in advance will a schedule be available showing closed periods? What is the procedure to change closed dates? Will the public have input into changing of closure periods? Who will be responsible for maintaining JV OHV area and where will the financial liability rest if used by the USMC two months out of the year? We have very limited OHV areas in our State. Please don't take the largest one around. The USMC has other options, we do not! If you need to expand, go East or North into non-OHV areas of open desert.

**Date Comment Received** 4/20/2011

**Response** Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The Marine Corps understands the public’s concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM’s management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). The specific details on management of the RPAA in regards to permitting process, permits and fees for events in the RPAA, etc. have not been formalized at this time. If the alternative selected is one that would involve an RPAA a Recreation Management Plan would be developed that would address these details (see Section 4.2.5.4). While preparing the Recreation Management Plan, the Marine Corps would solicit input from the public, BLM, and other agencies.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

I'm writing in response to the proposed closure of the Johnson Vally area. I feel this is not a good idea and will have negative impact on not only the local JV area but small businesses in so cal, and OHV safety in general. By closing this area down it limits the economic impact OHV usage put's into the local area. This closure and others are causing more and more families

to be confined to smaller areas and with more people in a small area it's not as safe and more accidents/injury's and possible deaths are going to happen due to this, we need more areas not less! Southern California is a hot bed for desert racing and because of this it has allowed several small home grown shops to be come large company's and provide much needed jobs for the community. It has also given alot of kids with no direction a place to focus there energy in a positive way to better not only themselves but others and the community around them. Please consider another options that leave JV open for OHV use. Chris

<b>Comment</b>	<p>I am OPPOSED to any expansion into the Johnson Valley OHV area. I recognize the need to train properly however the Johnson Valley area is one of the last remaining LARGE areas of desert that the OHV community still has available. OHV recreation is a FAMILY sport and one that provides a steady stream of income to the High Desert area and to Southern California in general. As a Veteran, I understand the need to train adequately. I suggest you look to the EAST,even if some roads need to be re-routed. That way the Marines can have a larger area and the OHV community can maintain what is one of the last great OHV areas in the west coast. Thank you for your consideration.</p>

**Comment** To whom it may concern: I live in Apple Valley and regularly visit and enjoy the Johnson Valley OHV area. By regular I mean at least 12 weekends a year and approximately 8 day trips a year as well. I am a fervent supporter of our military and consider myself a patriot. However, it should be noted that I am strongly opposed to the proposed 29 Palms Marine base expansion to the west. I feel this area should be used by the American public for recreational purposes for generations to come. I would urge you to consider other options before you take our OHV area away from us. Thank You for your time and consideration in this matter. I also want to thank you for your service to our country. Be safe.

**Date Comment Received** 4/20/2011

**Response**

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding.

The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

**Comment** Please reconsider your acquisition of the Johnson Valley area for training grounds and use the land east of 29 Palms. I took a 10 day vacation out to Johnson valley this February of 2011, and plan to return on vacation next year. Johnson Valley is a valuable recreation area to the public, and this land acquisition would affect tens of thousands of people that regularly use the area. Kirby

<b>Comment</b>	<p>Johnson Valley is the absolute MECCA of offroading in the US, as well as the largest open area of OHV land available. Please move 29 Palm EAST! Johnson Valley is extremely important to so many, whether involved in Off Roothing or not. Closing all or part of Johnson Valley would have a significant negative impact on many businesses, and the off road industry as a whole. We want the Marines to be able to train first and foremost, but ask that you please move EAST, and allow us to keep Johnson Valley.</p>

**Comment** To whom it may concern: I am a strong advocate of responsible off-highway vehicle recreation. I am also a strong proponent of the brave men and women who fight for our freedom at home and abroad. I feel like the proposal to expand the 29 Palms training area into the Johnson Valley OHV area is needlessly putting two of my biggest passions at odds with each other. I love being free, and I am grateful to the Marines (and other services) who keep my family speaking American English and saluting the American flag. One of those freedoms is outdoor recreation. The Johnson Valley OHV area is THE premier off-highway vehicle recreation area for motorcycles, mountain bikes, trials bikes, desert racing, rockcrawling, ATV's, UTV's, and sand rails. There is no place in the country where I can meet friends from across our great nation and go play legally and ethically quite like Johnson Valley. JV's trails, scenery, and entire ecology is perfect for responsible OHV use. We have frequently been shut out of other recreation areas by the environmentalist movement. We'd hate to be shut out of our favorite area by our friends the Marines. We support you. Please support us. There is room to the east of 29 Palms. I will gladly support a proposal to expand there. Best regards, Shawn W. Baker Kalispell, MT

**Comment** If you must expand you area of operation, please consider the land to the east to avoid any disruption to Johnson Valley. Thousands of Americans use that land for desert recreation every year for safe, family-oriented vacations. California is quickly running out of areas for legal off-road activities. In fact, Riverside County does not have a single authorized location for off-roading even though the state collects millions in gasoline tax every year dedicated to off-highway use. Environmental pressures have closed every off-road area in the county and a reduction in Johnson Valley acreage would be devastating. Please reconsider your proposed expansion and evaluate the potential to expand to the east.

Thank You!

**Date Comment Received** 4/20/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

**Comment** This town's businesses thrive on the weekenders and off roaders. If this goes through it will negatively impact the local businesses and economy of our town. At present there's enough military air traffic that passes through the area. We don't need anymore. At least twice a week, I get buzzed by military aircraft/choppers. The noise is a nuisance. This is not an acceptable area for use. A less populated one would be more appropriate.

**Date Comment Received** 4/20/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

**Comment** Please reconsider taking over the Johnson Valley recreation are. My friends and family have used this area for off road activities since I was a kid and it would be a shame to lose access to said area. The desert has been getting smaller and smaller over the past years and there's virtually nowhere to go anymore. Taking away yet another recreation area seems so unnecessary while there is so many other options for the Marines in other portions of the desert. Possibly take over an area that isn't used frequently by so many.

**Date Comment Received** 4/20/2011

**Comment** Theres no real need to expand the base. The base is huge as is and expanding it will take away a area the responsible parties take care of and enjoy as a recreation area. If the base does expand it will close the area as well as trash it because any one who has been out in the training areas on 29 Palms knows it's full of garbage.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS).

**Comment** I am writing in the hopes of persuading you to keep OHV trails open. I fall into a unique group of environmentalists that also enjoy driving OHV trails in my jeep. I believe there is a fine balance between preserving nature and enjoying it. Far too often we go to extremes and either bulldoze land or lock it up for no one to experience. While I admit not all people enjoy their OHV responsibly, the majority of people I have encountered respect the land and work to educate those that do not. Keeping legal trails open is the best way to encourage responsibility and discourages illegal off-roading. A few members of Congress recently participated in a fishing event designed to get children out and connect with nature. These members felt it was important to encourage children to get outdoors and "unplug" from the 5-8 average hours they spend daily in front of a tv or computer. Nathan Rott, of NPR, covered this story and said that "fishing is the outdoor world's equivalent of a gateway drug: Get a kid outside with a rod in hand and without knowing it, they become the conservationists of tomorrow". I feel the same way about off-roading. Thank you for your time and I hope you will take my thoughts into consideration.

**Date Comment Received** 4/21/2011

**Comment**

I'm writing to show my disapproval of option 6. This option will deeply affect my family as we recreate 20 weekends a year in Johnson Valley OHV area. This is our family time, this is where I teach my kids camping, geology, botany, respect for nature. This is where we ride to the top of a hill turn our bikes off and listen to the sounds of nature, you can't do that in the city! This is where my kids climb on rocks and look for lizards. Please don't take our family's only getaway away from us!! I also disagree with option 6 because of the state of our state's economy. This option will make Lucerne Valley a ghost town. This option will put thousands of people in California out of work and close hundreds of businesses. California is the nation's leading off-road state, there are thousands of companies, dealerships, repair shops in the off-road industry here in California. Closing Johnson Valley will affect all of those families as well. Not only that, but I feel that closing Johnson Valley will affect our sensitive wildlife habitats that are currently closed to off-road riding. When the displaced thousands lose their only local riding area some of them will start riding on closed lands disrupting sensitive areas. Lucerne Valley, Yucca Valley, Joshua Tree, and 29 Palms residents will see increased illegal off-roading around their quiet neighborhoods so it will affect those families as well. Expanding the Marine Base to the west and closing Johnson Valley will affect thousands of families!!! Go east!!!

**Date Comment Received** 4/21/2011

**Response**

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state,

or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Comment** I prefer Alternative 3. Alternative 6 may be the "Preferred" alternative by the Marine Corps, but Alternative 3 is win-win, and should be Preferred by everybody. Benefits of Alternative 3: No impact to Johnson Valley OHV recreation area, which is a benefit to the local and California economies. Less impact to local business owners in 29 Palms, Lander, Lucerne Valley, and Barstow, which is a benefit to the local economy. The Eastern alternative is less populated, so will provide less displacement and conflict to local residents. The area has already been used by the military in the past. While this is true of the western area, too, the western area has been developed and is in frequent use by American taxpayers. The eastern area remains somewhat of a "no man's land". Reasons against Alternative 6  
Reduction in area for off-road and outdoor recreational opportunities  
Reduction in area for the film industry  
Negative impact on the economy  
Potential impact public health and safety of surrounding communities  
Will promote illegal riding. Close Johnson Valley OHV area, and people \_will\_ be displaced. Ethical, legal, law-abiding riders will go somewhere else. Outlaws will be unwilling or unable to go somewhere else, and may continue to ride the area they were accustomed to--even if it's now part of a Marine Base. Please select Alternative 3 as the Preferred Alternative. Best regards, Shawn Baker Kalispell, MT

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

The Marine Corps understands the public’s concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM’s management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

<b>Comment</b>	On top of everything else, how can we afford for them to pay for this? We've used the Johnson Valley for years as a family for our recreation and leisure. I can't express how much I and my family would miss the opportunity to relax in an area that can hold thousands of riders, yet large enough we are not on top of each other. I don't make hundreds of thousands of dollars, so I try to stay close to home when on vacation. This would push us into more crowded conditions staying local, or push us farther from home

costing us more each year to vacation. I feel the government has taken and taken enough, it's time to stop and stop it now.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

**Comment** I am opposed to the acquisition of this land for the use of the Marines. While I support what the Marines do, I also support the use of our deserts for family recreation. The off-road community is constantly losing area to recreate due to either environmental or developemental reasons. Our support of family off-road activity has a large economic impact on the economies of various desert communities through parts suppliers, restuarants, groceries and fuel. Please allow us to continue enjoying family time on our public lands and stop the closure and acquisition.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). **Comment** There is NO reason this expansion should not move EAST, instead of into JV. The "Wilderness" area is no more wilderness than JV its self. The area would be losing serious income by removing public rights from the MECCA of off roading.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

**Comment** The Johnson Valley OHV area is an area that I have visited numerous times. Each time that I visit it I have stayed a local hotels in Barstow, purchased gas and groceries at local markets and eaten at area restaurants. Reducing or closing down this area not only will you be having a direct affect on a hobby that 100's of thousands of people enjoy but also affecting the local business owners and employees by significantly reducing the number of people that utilize their services. I implore you to not expand the 29 Palms training facility to the west and impact one of the most amazing OHV areas in the country.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. **Comment** I've been going out to Lucerne Valley area since the 70's as a teenager riding dirt bikes. Since then I've aged and now 4 wheeling is my passion for the deserts I love so much. Although I am a "Marine Brat" and support them in many ways through fundraising, adoption of the 3/1 Battalion out of Pendleton by my city (my wife is on the 3/1 Board of Directors) and shaking hands of the young heroes I've had the honor of meeting through these events, there has to be a better way than to take a premier offroad area and to close it off for all time just to run war games a few times of the year. I understand the necessity of training and want the best for our young heroes and training is the best insurance for bringing them home alive. Multi-use is the way to go if the Marines "have to expand". I still think between China Lake, Fort Irwin and 29 Palms, there is plenty of opportunities for the Marines to do their war games on established huge parcels of land that are already closed off for all time.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening

criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** April 21, 2011 Naval Facilities Engineering Command, Southwest Attn: 29Palms EIS Project Manager 1220 Pacific Highway San Diego, California 92132-5190 Dear Sir/Madam: As a long time resident of the Twentynine Palms area I am opposed to the proposed expansion of the MCAGCC. Notwithstanding MCAGCC's public relations statements declaring desire to be "good neighbors", adverse impact to rural residential areas from low overflights and explosive ordinance firing exercises at uncivil hours are already taking an increasing toll on residential quality of life. Given my direct experience with MCAGCC indifference to rural resident complaints regarding such concerns, I do not look forward to the realities of a post expansion environment in the base vicinity. Given that the base expansion will likely proceed regardless of any residential opposition, I would like to reiterate and endorse the following concerns as expressed by Mr. Phil Klasky's comments on behalf of Community ORV Watch as follows. Like Mr. Klasky, I am gravely concerned about the likely unintended consequences of base expansion into the Johnson Valley OHV area. Should you decide to annex all or part of the Johnson Valley OHV area, it is my hope that you will see fit to adopt the recommendations set forth in his letter. Thank you for the opportunity to express my concerns, long time resident Twentynine Palms, Ca. Begin endorsed comments by Community ORV Watch: April 12, 2011 Dear Sir/Madam: The purpose of this letter is to offer our comments on the 29 Palms Training Land Acquisition/Airspace Establishment Draft EIS. We are a non-profit community-based organization dedicated to defending our private and public lands from illegal and destructive off-road vehicle (ORV) abuse. Our members reside in the Morongo Basin including Johnson Valley and Wonder Valley. We suffer from widespread and consistent ORV trespass on our private property, public lands off-limits to ORVs, designated wilderness areas,

roads, berms and flood control infrastructure. ORVs are a major problem for law enforcement and code enforcement and produce excessive dust, noise and nuisance. We oppose any decision that will place our communities in harms way regarding illegal ORV activity. We are EXTREMELY CONCERNED that the base expansion into the Johnson Valley OHV recreational area will lead to an increase in illegal ORV incursions into our neighborhoods. In fact, ORV groups have warned that if any of their recreational opportunities are impacted, they will use the surrounding neighborhoods for their recreation. The loss of a significant portion of the Johnson Valley OHV area will result in adverse impacts including: o increased trespass and damage to private and public lands o increased destructio

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

**Comment ID** 1338

**Last Name** Name Withheld by Request

**First Name**

**Comment** I'm urging the marines not to expand their operations to the west into the Johnson Valley OHV area. As a Lucerne Valley resident and Johnson Valley user I feel the move west will hurt the fragile local economy by killing jobs, lower property values and eventually kill the town of Lucerne Valley which gets much business from the Off Highway community visiting the OHV area. As a local resident I'm concerned for elevated noise levels from military planes and live ordinance. The Johnson Valley OHV makes a perfect safe zone between the Marine base and the rural housing west of the OHV area. I have been to eastern edge of the OHV area and have seen bomb shells on the OHV side of the border. I would hate to see live ordinance dropped on Lucerne Valley residents. Again I urge the Marines to move to the east where there would be less intrusion on populated areas and no impact on the local economy.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordinance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

As outlined in Section 3.4, Combat Center Order P35.004F SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every major exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range sweep, and range clearance) that would be implemented under Alternative 4, 5, or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5 of the EIS). If acquired lands were transferred back to public domain, the Marine Corps would be required to comply with range closure procedures (USEPA 40 CFR Part 300), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Base Realignment and Closure Policies (BRAC), Reporting Hazardous Substance Activity When Selling or Transferring Federal Real Property (40 CFR Part 373), and Defense Environmental Restoration Program (DERP) (10 USC 2701).

**Comment** We play really well with each other and not very well with the other services That is what Capt. Nick Mannweiller said. How well are you going to work with us, John Q Public? Are the Marines really concerned about what we want or is this whole process just a Dog and Pony Show? If, for training, you need to a cretain distance why can't you do it in loops? We do it all the time for desert races when there is not enough room for one big loop. In fact the reason we have to do it in loops is that our open land keeps

getting smaller and smaller. Congress closes public land for wilderness, to save a bug or plant and now you want to close more designated land so you don't have to play well with your siblings. When is enough going to be enough? Before long all our liberties will be taken away. Then what will you be fighting for? You should learn how to play well with others, especially when you are playing on the same team. Mr. Proudfoot said that Fort Irwin does not do live fire environments. Well then start doing live fire environments at Fort Irwin or at Yuma. Use existing land at established bases and save the tax payer some money as well as letting the public recreate in Johnson Valley. Why is there not a "nonalternative action"? I am not convinced that the Marines have looked at all their options including playing in their own yard.

**Date Comment Received** 4/21/2011

**Response**

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

**Comment** As an active 4-wheeler and camper of the Johnson Valley Area, I am against the alternatives under the proposed Land Acquisition/Airspace Establishment Project that take away lands in the area known as Johnson Valley. Johnson Valley provides a wide variety of recreational opportunities for thousands of people. Taking away this land is unfair to the people for whom it brings so much joy. I understand that training is essential for a strong military and that certain land must be set aside to meet these training needs. This land, however, does not need to be taken away from people who actively use it already. Although training areas are needed, they should not be taken at the expense of the excitement provided by the Johnson Valley area. Many fun and exciting events are held at Johnson Valley, such as King of the Hammers, which attract several thousand people each year. Please respect and honor the requests to not take over the land that is so valuable to me and thousands of others.

**Date Comment Received** 4/21/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

**Comment** Please don't take away Johnson Valley OHV. I love racing motorcycles, and this is one of the few areas we have left to do our sport in California. Southern California's AMA District 37 is a mecca of Dirtbike racing, and is hosting a majority of the National Hare & Hound Associations races. One side of my family was a original member of the longest standing racing club of District 37, the Checkers. My other grand father was a Marine who lost his legs in WWII. That said... I'm sure Marines race bikes in the Johnson Valley OHV as well as the rest of us. Desert Racing is one of Americas most unique sports and it would be a shame for our greatest defenders to take one of the few areas left for us to race in. Thank you, Kel Postel

**Date Comment Received** 4/22/2011

**Comment** Please keep the Johnson Valley OHV area open like it is now. I go there all the time from LA with my friends and family. It would break the kids' hearts if we couldn't go to their favorite place in the world. Can't the training facility go to the East? That seems to be a better solution for everyone.

**Comment** I OPPOSE ANY TAKING OF OHV LANDS CURRENTLY ENJOYED BY THE OFFROAD USERS IN THE JOHNSON VALLEY AREA. WE CANNOT AND SHOULD NOT DEVALUE THE IMPORTANCE OF THE PUBLIC GOOD DERIVED FROM FAMILY BASED WHOLESOME RACING AND TRAIL RIDING. MY TWO DAUGHTERS ARE THIRD GENERATION ENTHUIASTS THAT WILL HOPEFULLY BE ABLE TO SHARE THE POSITIVE AND HEALTHY BENEFITS OF ALL OFFROAD FORMS OF RECREATION. I HAVE OVER 195,000 DOLLARS INVESTED IN MY OFFROAD HOBBY.

**Comment** Lucerne Valley (Johnson Valley) is where I go to get away from the city, and I do it often. I have been riding/racing out there for 10 years at least. Being in a club I have got to know the place really well. I love this desert and will be just in pain if it ever closes.. I hope there is a solution....

**Comment** Been riding/camping in the Johnson Valley area for 20 years with family/friends. If the Marines take/close that area it will be a crying shame. Not much freedom left in this country anymore. The best I could support would be would be to share the area but I do not believe the Marines will honor that kind of commitment.

**Date Comment Received** 4/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

**Comment** You will be taking the only area to ride in that I care about. I've been coming here the majority of my life and it is the land I love. There are many other options for the marines to choose from. Please choose one of the others and leave Johnson Valley OHV alone.

**Comment** alt. map 3. We currently have such minimal land to camp, ride/race and raise our kids in a healthy enviroment, I hope we can keep this land open for public use. I don't want to see everyone grow-up connected to X-Box while texting indoors. Please keep Johnson Valley Open. Thank you S. Dorsey

**Comment** My family and friends have been using the Johnson valley OHV area for four generations (my father, me, my son, and my grandsons) and it would be devastating to know that that area would no longer be available for OHV use. Please, no one uses the "wilderness" area to the East of the Marine Base. Use that area, not where hundreds of families recreate every weekend. Do not confiscate the OHV area. At the very most, use the #3 proposal

**Date Comment Received** 4/22/2011

**Response** Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

<b>Comment</b>	If you need more area, use Option 3. If this is just a land grab, Option 1 is my position. Just leave the OHV area of Johnson Valley alone and use other areas for your training. Phil

<b>Comment</b>	The Johnson Valley area is one of the few off road recreational areas we have left within the massive LA populous. The off road community promotes closer family relationships.closer relationships with our kids. We love the Marines and what they do for us, but it seems to me that there is a massive amount of desert to the east that could be used and not affect family bonding and the local community of Lucerne Valley. This is just too close.

**Comment** I AM A BIG SUPPORTER OF THE MARINES.MY CHURCH HAS SUPPORTED MARINE FAMLIES HERE IN THE FALLBROOK AREA. HOWEVER ALL OF US THINK THAT TAKING THE LITTLE REMAINING RV LAND AWAY FROM THE MOTOTCYCLE RACERS IN JOHNSON VALLEY IS FLAT WRONG.THIS LAND GRAB COULD BECOME THE RALLING CALL AGAINST THE MARINES FOR THE ANTIMALATARY PEOPLE FOR YEARS TO COME.THANK YOU FOR YOUR CONSIDERATION OF OUR THOUGHTS. BOB BYRD
