The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.

Sincerely,

Steve Rhoades

Response to Comment N-02258:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability and with the ever expanding need to reduce government spending, the idea of expanding 29 Palms is not viable. Technology expands every day. I have trained on artificial live fire ranges and they have nearly the same training value as live fire drills, but cost significantly less, do no damage, and protect equipment and Marines.

Sincerely,

Kyle Irvin

Response to Comment N-02288:

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

Steve Rhoades

Response to Comment N-02295:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

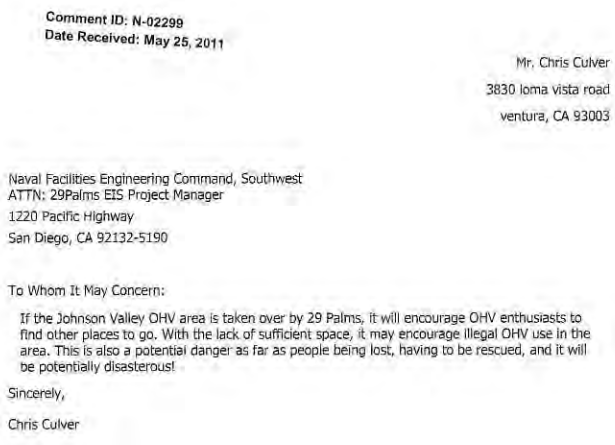
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.
The OHV community is already under fire for illegal wheeling that is the fault of the few, while the rest get blamed for it. Shrinking one of the last OHV areas open would effectively force many individuals to off-road recreate in spaces that are not designated for use.
Please realize that expansion into JV OHV area will have detrimental effects that extend far past the borders of this one OHV area...



Sincerely,

Brad Buter

San Diego, CA 92132-5190

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

Don Arter

Response to Comment N-02313:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

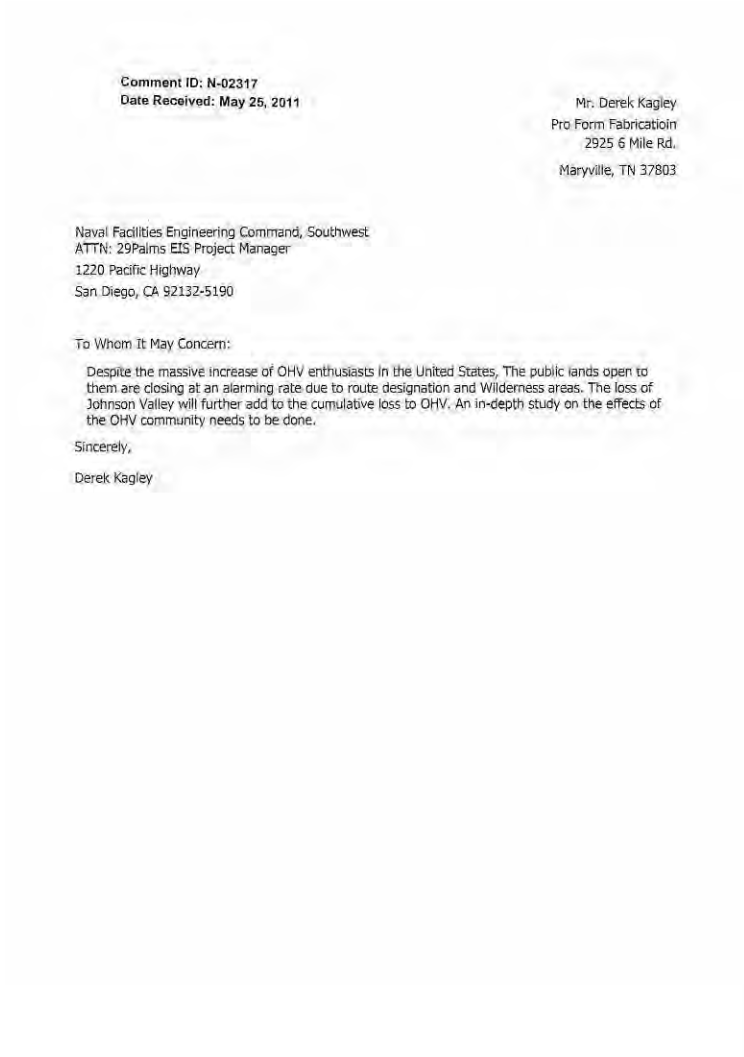
I have first hand experience with land closures. In my state of Washington many areas have been closed down, That is one reason why going to johnson valley is soo important to me. I can no longer go to my favorite area in my state. I have a large passion to recreate so if i am going to do so i want to get the most return of my efforts.

Johnson valley orv area always delivers. The incredible scenery, The smells and the way the air relaxes me is contageous! I visit as often as i can, Mind you this requires a thousand dollars of fuel, as well as several hundred dollars of fuel and food once in the area to be able to enjoy my time there. The economical impact would be significant.

Sincerely,



Joseph Bunker

Response to Comment N-02316:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Sincerely,

Derek Kagley

Response to Comment N-02317:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

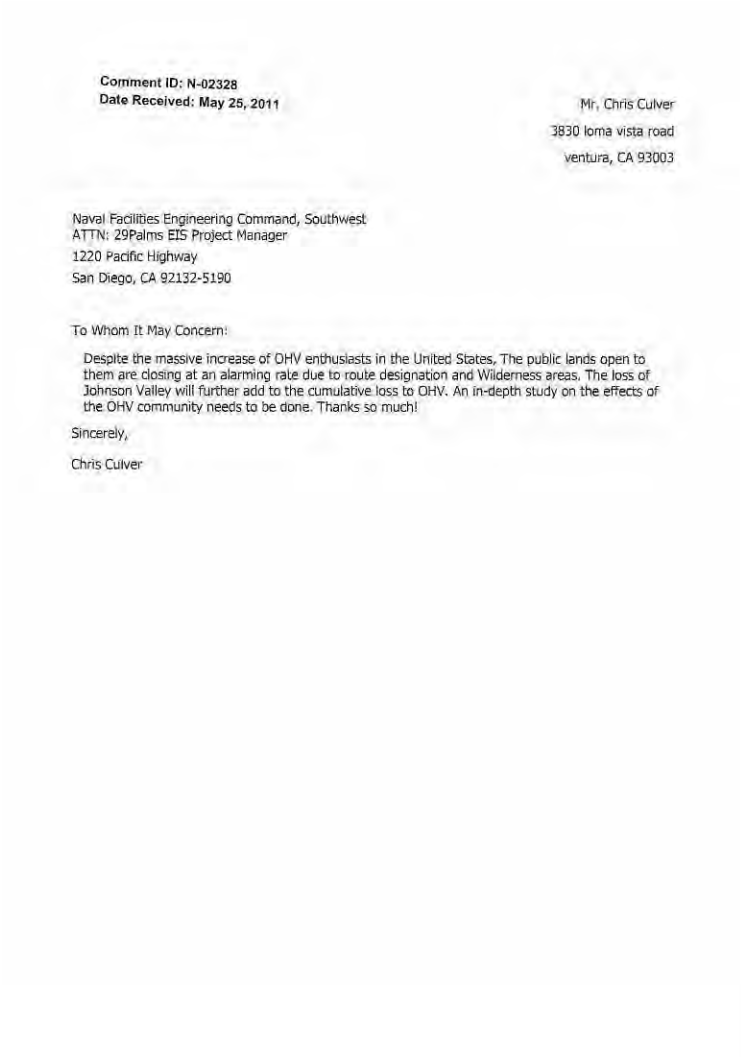
While I respect the US Marines and what they do for our country, their expansion into the JV OHV area would be a crucial blow to those Americans who enjoy off road activities and exploration. Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.
It is not fair to take one of the only areas in the country where OHV are legal in the high desert. The off road community has a huge positive impact on the local area. If JV is closed to off roading, crowding and over use will occur at all other California OHV areas. JV is critical to the OHV community, please understand the importance of this land to the citizens that enjoy it. It exists as one of the few remaining public lands open to OHV use, and the elimination or shrinking of it would land a crucial blow to the lives of Americans who enjoy its use.



Sincerely,

Brad Buter

Response to Comment N-02327:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

To Whom It May Concern:

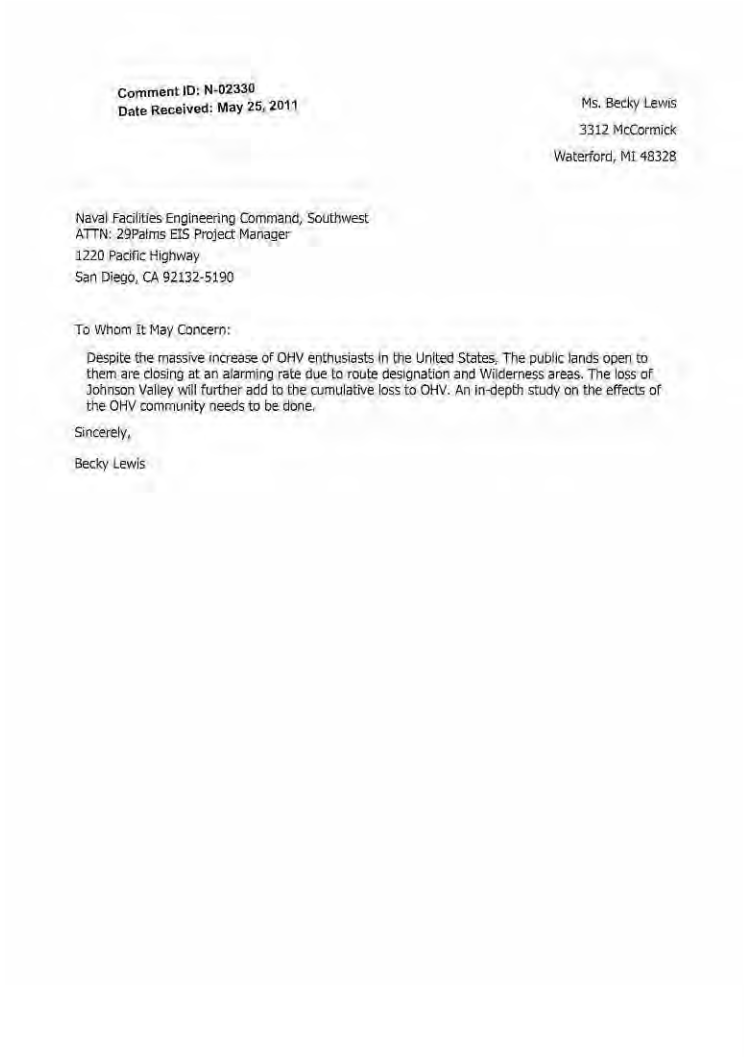
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Andy Johnson

Response to Comment N-02337:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

San Diego, CA 92132-5190

To Whom It May Concern:

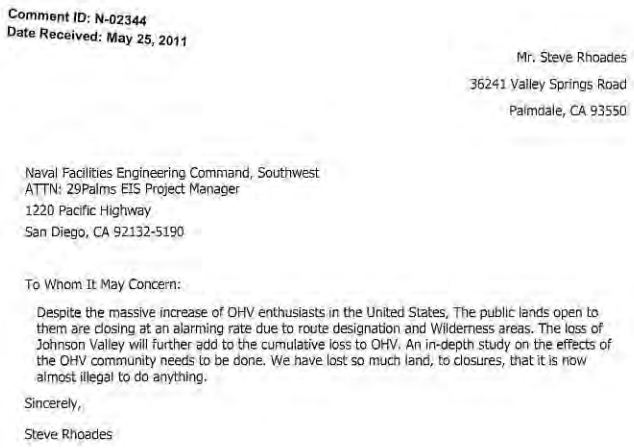
I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

Despite the massive increase of OHV enthusiasts in the United States, the public lands that are open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley - a premier location - will further add to the cumulative loss to OHV users without a suitable replacement. An in-depth study on the effects of the closure to the OHV community needs to be done.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,



Thomas Bank

Response to Comment N-02343:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). Tempe, AZ 85281

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

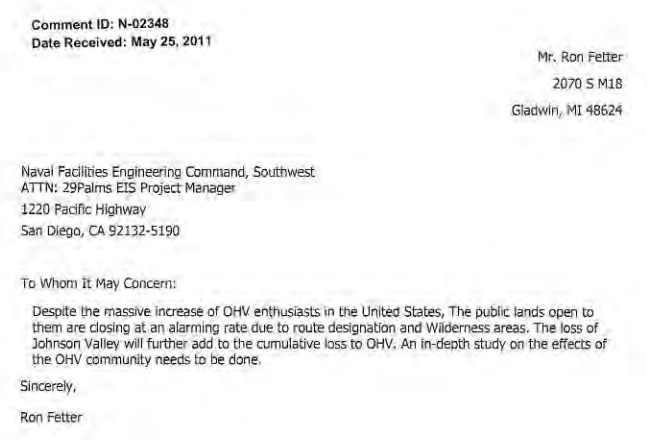
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Whitaker Behrens

Response to Comment N-02361:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

San Diego, CA 92132-5190

To Whom It May Concern:

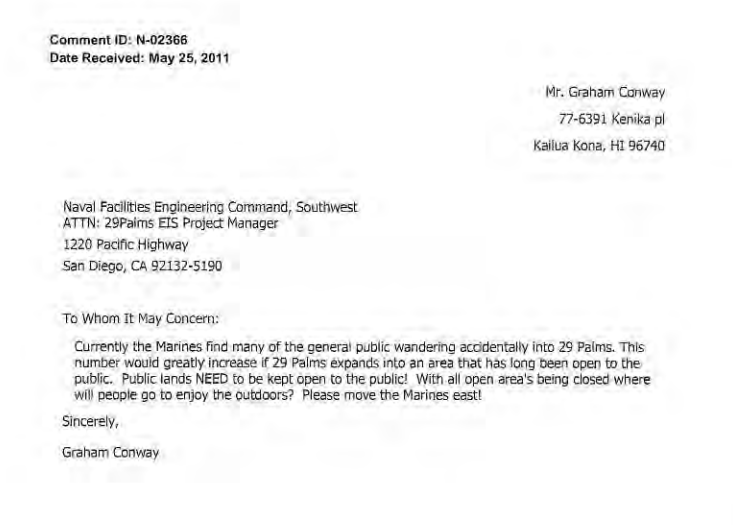
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. Unless 29 Palms enjoys corraling regulars citizens on their property, it would be much more benificial to move east, away from areas that are heavily used by OHV users.



Sincerely,

Brian Whitford

Response to Comment N-02365:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

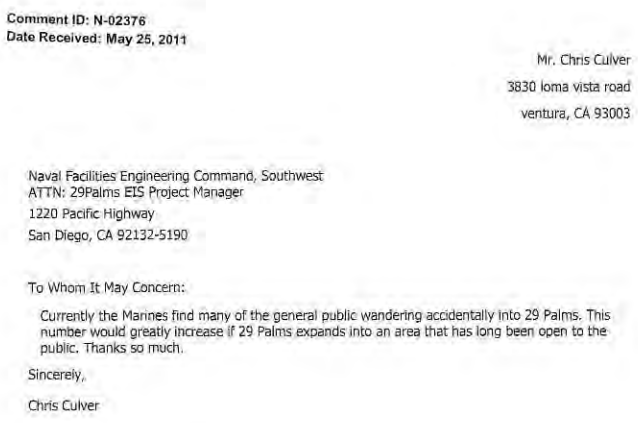
While I respect the US Marines and what they do for our country, they are potentially harming many OHV area users by expanding into traditionally used territory.
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. This could result in injuries and death to US citizens.
Please consider expansion to the East, an area with much less traditional use, to keep potential harm to citizens from occuring.

Sincerely,



Brad Buter

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

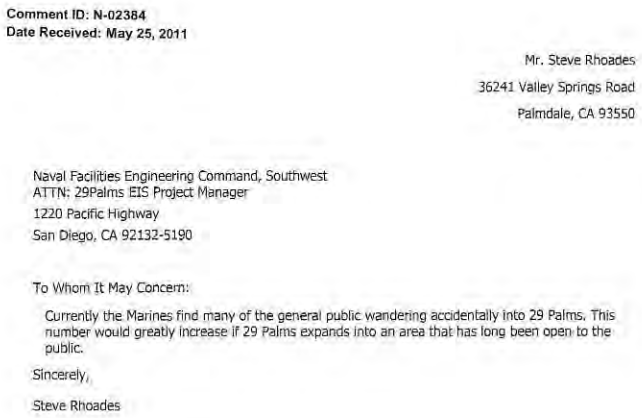
The Johnson Valley OHV area is a mecca for the general public. Utilized by the OHV community as well as people who enjoy the rugged beauty of the area. This area has been open to the public use for years. If the marines expand East into instead of into the Johnson Valley OHV area, they are expanding into an area that has long been closed to the public. The threat of security and safety breeches will be significantly reduced because the public isn't accustomed to utilizing this area, and they will still have the Johnson Valley OHV area open for their use.

GO EAST MARINES

Sincerely,



Ryan Brown

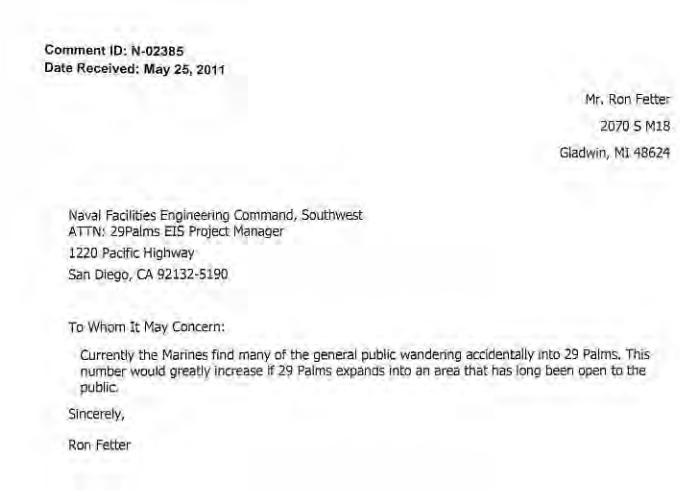
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.



Sincerely,

Brandon Cordova

Response to Comment N-02386:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

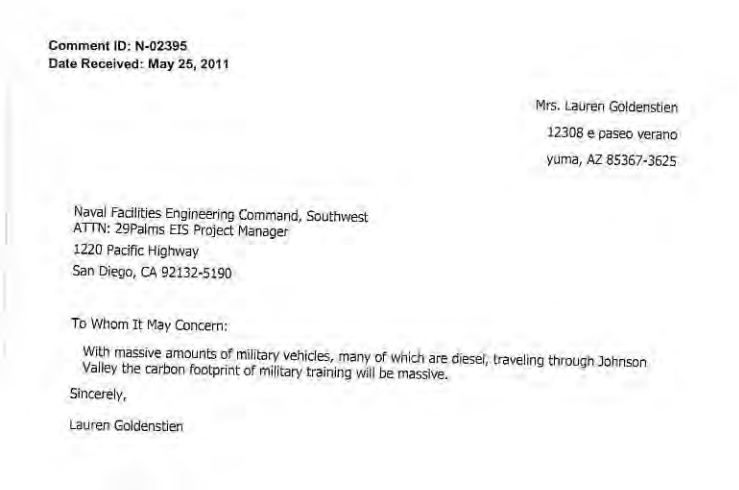
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

Lauren Goldenstien

Response to Comment N-02394:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

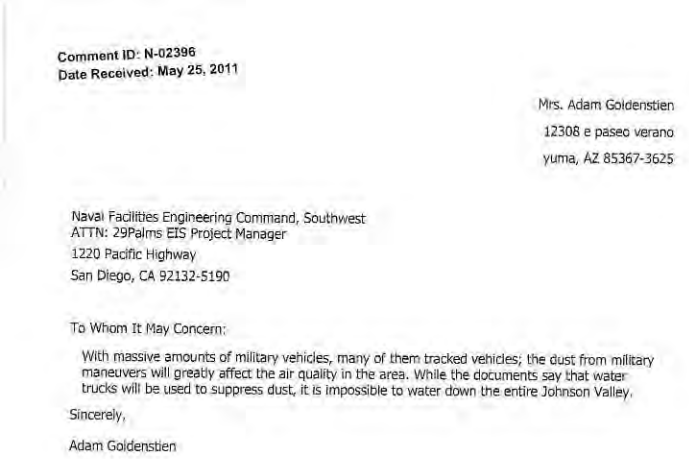
To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

Lauren Goldenstien

Response to Comment N-02395:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. All one has to do is look north at the irrigation project for the dry lake bed near Olancha CA. Watering to keep dust down to ensure air quality is not a financially sound solution. Especially when faced with the fact that Southern California relies on Northern Californias' snow pack each year.
Currentl it is difficult for Central valley farmers to get water for thier crops and the military is considering watering a desert to keep dust down.
A better solution must be found!

Sincerely,

Rick Bailey

To Whom It May Concern:

While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. This is rediculous and will be detrimental to the surrounding areas. Please reconsider this are for your use and find someplace better suited to the negative effects of Marine maneuvers.

Sincerely,

Brad Buter

Response to Comment N-02412:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

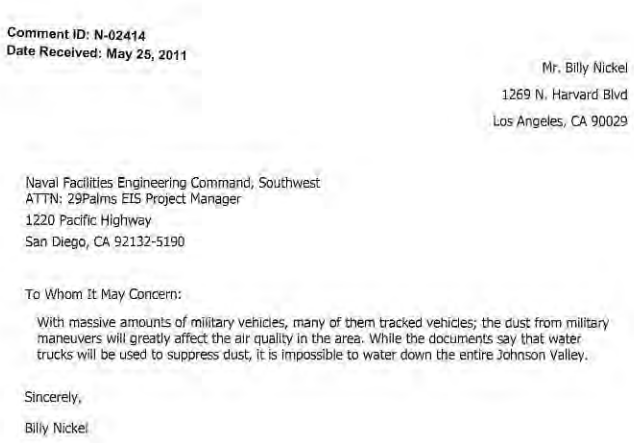
To Whom It May Concern:

While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.
As such, the entire area and surrounding communities will be affected and subject to air quality changes to the negative.
Please reconsider the use of JV OHV area and instead search for areas with less detrimental effect on surrounding citizens.

Sincerely,



Brad Buter

Response to Comment N-02413:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

Public comments on the Draft EIS are an important part of the decision-making process. OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Sincerely,

Brian Whitford

Response to Comment N-02434:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

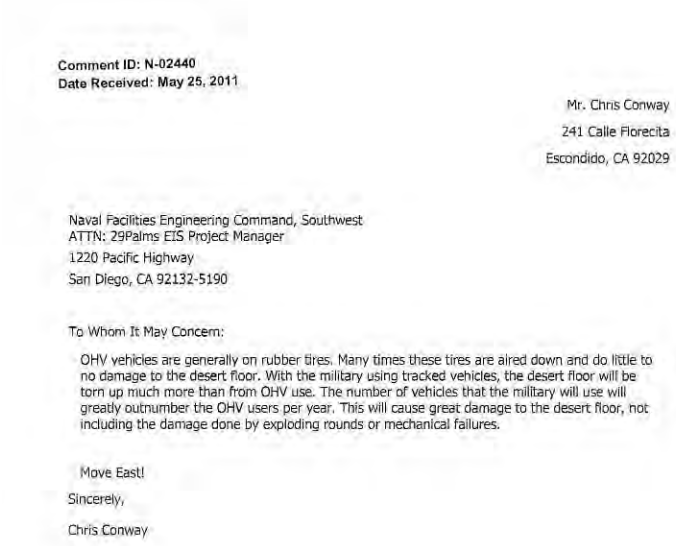
OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. The OHV community has spent many hours and dollars ensuring that the areas open to our use are maintained so as to be available to our children, our children's children, etc. Should the marines be granted the area contained Johnson Valley, many efforts to preserve the area will be lost to the heavy tank tracks. Won't somebody think of the children!!!



Sincerely,

Jacob Bevill

Response to Comment N-02439:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

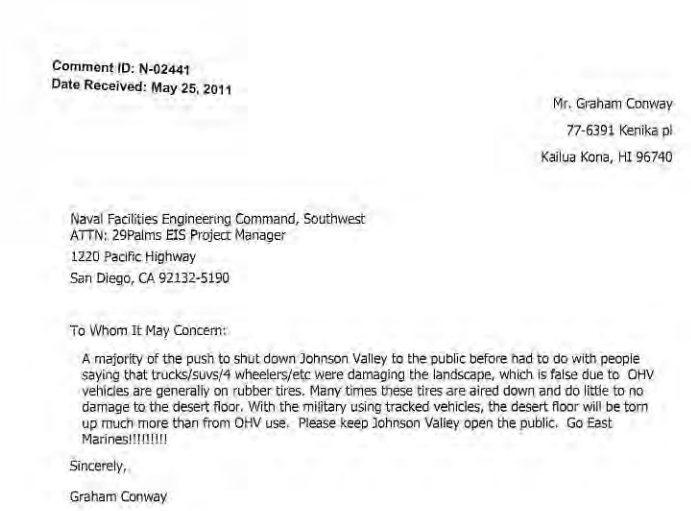
To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. The number of vehicles that the military will use will greatly outnumber the OHV users per year. This will cause great damage to the desert floor, not including the damage done by exploding rounds or mechanical failures.

Move East!



Sincerely,

Chris Conway

Response to Comment N-02440:

To Whom It May Concern:

A majority of the push to shut down Johnson Valley to the public before had to do with people saying that trucks/suvs/4 wheelers/etc were damaging the landscape, which is false due to OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. Please keep Johnson Valley open the public. Go East Marines!!!!!!!!

Sincerely,

Graham Conway

Response to Comment N-02441:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

While I respect the US Marines and what they do for our country, their expansion into the JV OHV area will be much more detrimental to the natural desert terrain.
OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use, causing problems for the plants and animals that live here.
Please reconsider the use of this environment for expansion, the military would be extremely more damaging than the OHV community that has stewarded this area for nearly 30 years.

Sincerely,

Brad Buter

Considering the extent that environmentalists have attacked OHV groups for damaging fragile environments with offroad use, how can the use of ordnance and tracked vehicles be considered environmentally friendly. OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. In addition, live ordnance does many times the damage in a single events that years of OHV use. We need a place such as Johnson Valley for our use as well.

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

John Bergacs

Response to Comment N-02465:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

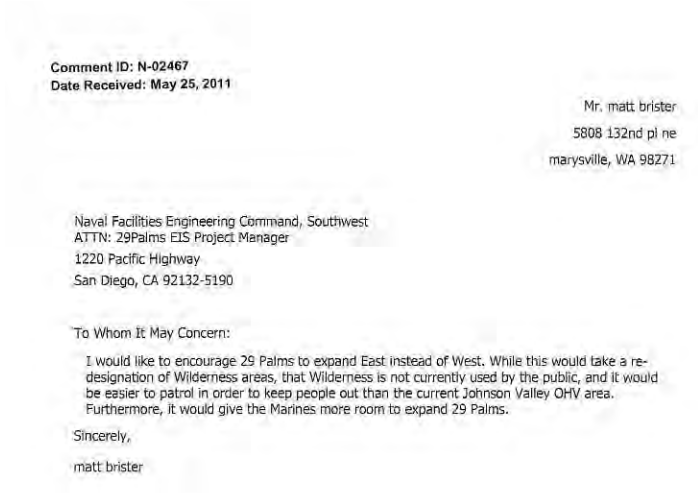
To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

matt brister

Response to Comment N-02467:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

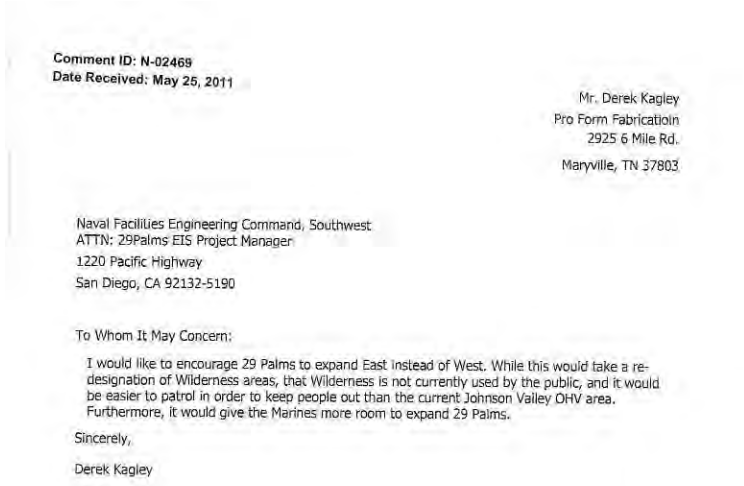
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. We are running out of OHV areas as it is, please let us keep our "Mecca," if you will, of desert rock racing. Johnson Valley is a truly unique recreation experience and it would be unjust to take that away from the American public. Please find other areas to expand 29 Palms!

Sincerely,

Darrell Drummer



Response to Comment N-02468:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

Furthermore, it would give the Marines more room to expand 29 Palms.

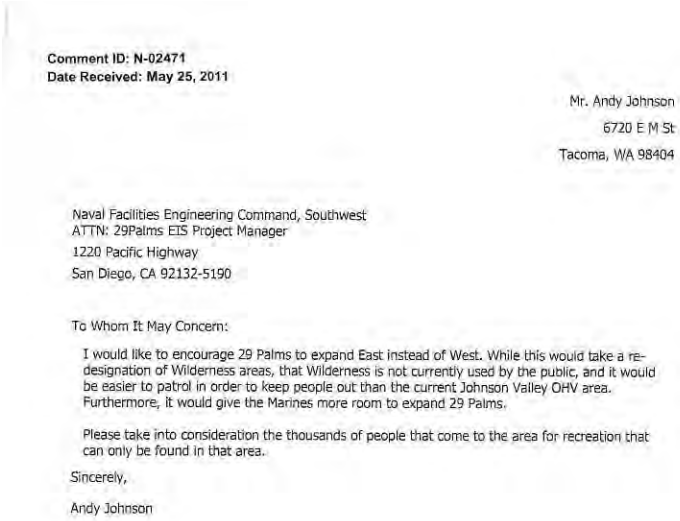
Also by expanding east it would show that 29 Palms is concerned with public opinion and their own enlisted troops who also use that area for recreation. Let use this area together, Marines expand east and let the public stay in the west where we get to enjoy one of our last open OHV areas.



Sincerely,

Jason Gray

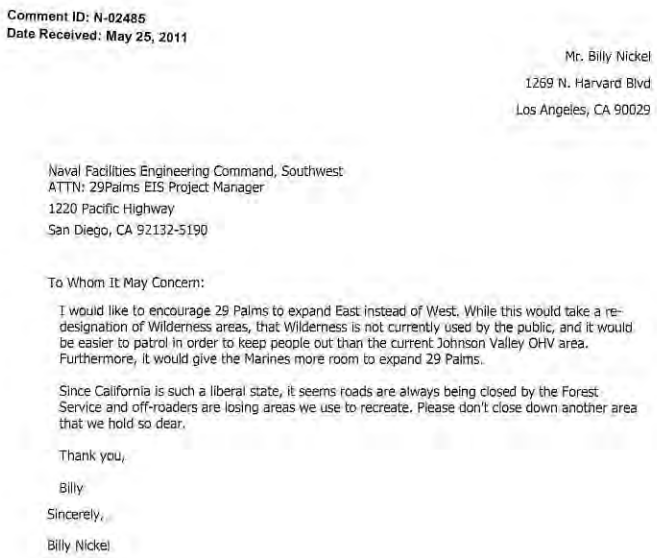
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area.
Furthermore, it would give the Marines more room to expand 29 Palms.
If space is needed, please consider re designating a low use area, to the East. This option would be beneficial to all involved and deserves a hard look.



Sincerely,

Brad Buter

Since California is such a liberal state, it seems roads are always being closed by the Forest Service and off-roaders are losing areas we use to recreate. Please don't close down another area that we hold so dear.

Thank you,

Billy

Sincerely,

Billy Nickel

Response to Comment N-02485:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

I am writing this letter in hopes to disuade the Marines from destroying a great Mecca in the 4x4 comunity.

Johnson valley is not just another OHV area. It is a destination that people travel from all over the world to come visit, spend money, and enjoy. All of this travel into Johnson VAlley helps support local businesses, that may be hurting in this poor ecomonmy. The main event each year is King of the Hammers, which brought enough people and money to the lakebed, to cause a waste management company to call in their competitors to help with demand. how often do competing companies help another gain a buck?

Not just is the local econmy in danger if JV is lost to the marines, but the offroad industry will also suffer greatly. There are many 6 figure race cars built for soley one purpose, to race at the hammers. and its not just big budget racers at the hammers, its everyday people, families, friends just having fun doing what they love, 4wheelin. Its destinations like the hammers that drive the offroad industry to continue to grow and improve, the trails are rugged and not for the faint of heart, cuasing people to always strive for something more out of their vehicle.

In my personal experience I have never been to a wheeling spot in my life that could even compare to the Hammers. Out at the Hammers its about having fun and foregeting the griefs of reality for a couple of days. I am sure there are countless others like me who are always looking forward to that next trip out to the Hammers and would be devastated to see it closed off to the public.

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Madison Weaver

Response to Comment N-02486:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

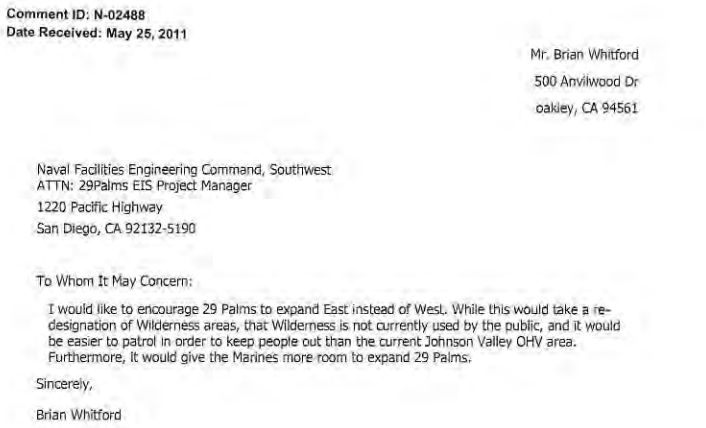
To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. Plus there's that band, remember Head East? Think about it. It's like an omen. It would be better for all involved to expand east. The Wilderness area is perfect for the marines, as people are not used to frequenting the location, therefore the marines would have less problems with people accidently becoming lost and entering their base which is a public safety concern as well.

Sincerely,

Jacob Bevill



Response to Comment N-02487:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Public comments on the Draft EIS are an important part of the decision-making process. Furthermore, it would give the Marines more room to expand 29 Palms.

Johnson Valley, home of the Hammers OHV trails, represents the mecca of off-roading on the west coast. Every year, more public land is taken away from outdoor enthusiasts and this is one of the most crucial times to encourage the Marines to expand elsewhere. We are all in support of our military, but please don't take away what so many hard working Americans are fighting for; keeping public lands open to the public.

Sincerely,
H. Scott Winsor
President, Poly Goats Off-Road Club

Sincerely,

H. Scott Winsor

Response to Comment N-02499:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. And on top of that, Johnson Valley is the greatest rock crawling place on this planet. Just look to the success of the King of the Hammers race! With spectators traveling from all over the world, as well as competitors, this is a world famous off-roading area. People drive from all over the country to enjoy the uniqueness of Johnson Valley outside of the race.

We are a community who supports the Marine Corp., please support us!

Sincerely,

darren gill

Response to Comment N-02506:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

OHV use is expanding in this country and the areas to use and enjoy OHV's is shrinking. This puts more pressure on the areas that do remain open. The majority of OHV users are responsible people, we clean up after others and tread lightly. Unfortunately there is the minority that ruins it for everyone.

I encourage you to explore other options so that we can all continue to enjoy the Johnson Valley OHV area.

Sincerely,

Bryan Bagwell

Response to Comment N-02511:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,

Steve Rhoades

Response to Comment N-02512:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

Response to Comment N-02528:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

Response to Comment N-02533:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.

It is a fact of life and the world we live in that our Military needs additional area to train. It is also completely necessary for our Military to give the public adequate time to evaluate the studies done on the expansion into the Johnson Valley OHV area. There simply has not been adequate time for the users who come from all over the country to evaluate and comment on this proposal. A short review and comment time yields commentary with very little value because the public hasn't had time to fully review the documents and methodology used to make the decision.

Additionally, many of the fighting men and women in the military enjoy OHV activities, and on any give weekend you'll see countless marines enjoying the Johnson Valley OHV area to unwind, relax, and enjoy this wonderful country the fight to defend. You must go East. Spare Johnson Valley OHV, and leave this area open for the use of the american public and the recreational use of our military.

Sincerely,

Ryan Brown

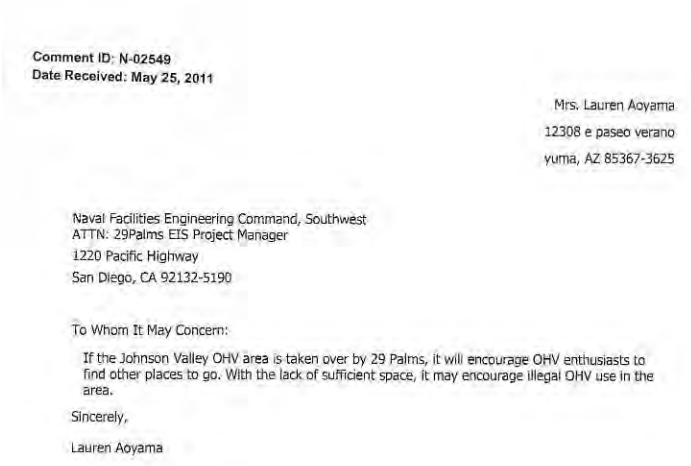
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.



Sincerely,

Steven Rector

Response to Comment N-02548:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Response to Comment N-02552:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

with so many of this countries beautiful lands being closed to the public human population, it is an ashame to limit the public from viewing the greatness of JV. if the air force wanted exclusive use of the grand canyon the people would be up in arms about it but to many this natural wonder of JV is just as important. The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area. if we allow this beautiful land to be closed and damaged, then we start down the slippery slope of closing all natural beauties to the public.

Sincerely,

tyler Gowans

To Whom It May Concern:

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.

Sincerely,

Nick McMurray

Response to Comment N-02579:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

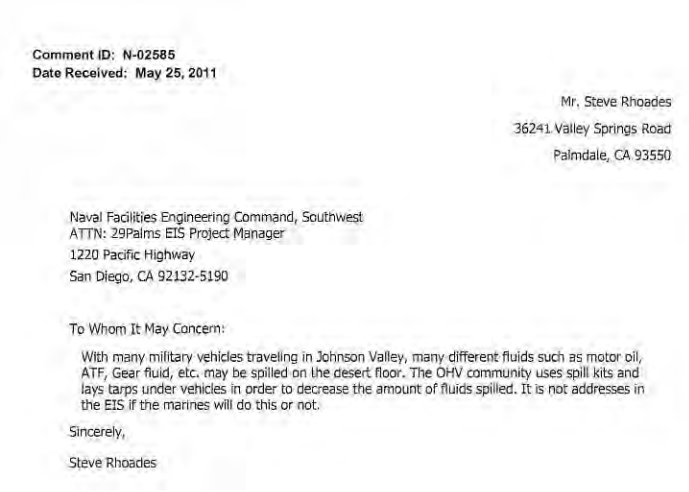
With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not. Please allow the OHV users to maintain this area as we have been. We have been working hard for years to maintain this area.. please don't take away what we have tried so hard to keep.



Sincerely,

Brian Whitford

Response to Comment N-02584:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

San Diego, CA 92132-5190

To Whom It May Concern:

The proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions has been on my radar since it became an issue.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor as part of the training exercises. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. I have not seen it addressed in the EIS whether the Marines will do likewise or not.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,

Thomas Bank

To Whom It May Concern:

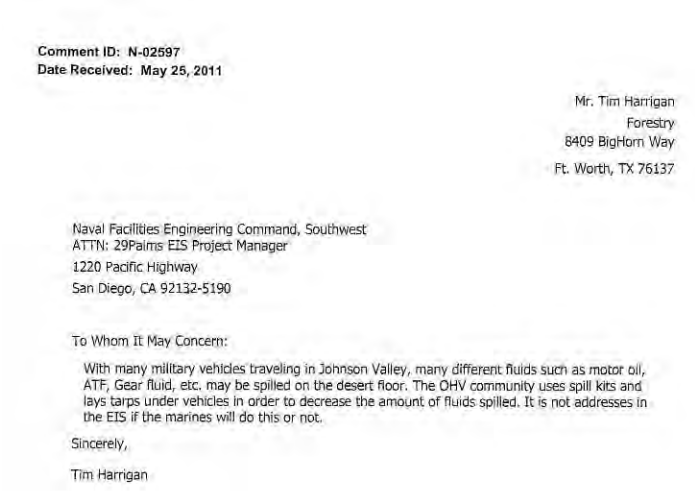
While I respect the US Marines and what they do for our country, I feel they will harm JV OHV area in a huge way with their maneuvers.
With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not.
If the EIS is to comprehensive and truly study the impact of Marine expansion into the area, please place them under the same rules that OHV users have been happy to embrace for protection of our OHV environment. Military vehicles are not subject to the same environmental standards as civilian registered vehicles and will be much more detrimental to the area. Please allow the EIS to show the true impact of this proposed expansion.



Sincerely,

brad buter

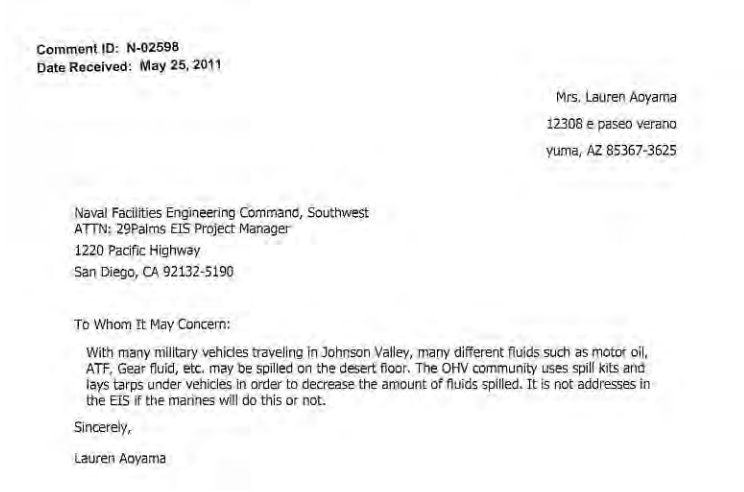
Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.



Sincerely,

Lauren Goldenstien

Response to Comment N-02602:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

The marines are not going to clean up after themselves and preserve this area like off-roaders do. in the past we may have had bad track record, but with nearly all of our land taken away due to improper safeguarding and care we can no longer afford to be so careless

please keep Johnson Valley a recreational area, not for use as a military training area when many other locations will suffice.

Sincerely,

Taylor Wade

Response to Comment N-02605:

Response to Comment N-02611 (Page 1 of 2):

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range

San Diego, CA 92132-5190

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

Sincerely,

Steve Rhoades

Response to Comment N-02615:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

Even temporary use of the Johnson Valley OHV area as a live ordinance training area by the marines will make this area permanently off limits to any public use. The public should not loose any more access to public lands. These areas are fewer and farther between each and every year. PUBLIC LANDS SHOULD BE OPEN TO THE PUBLIC. Do not close an area that is currently open.

GO EAST MARINES

Sincerely,

Ryan Brown

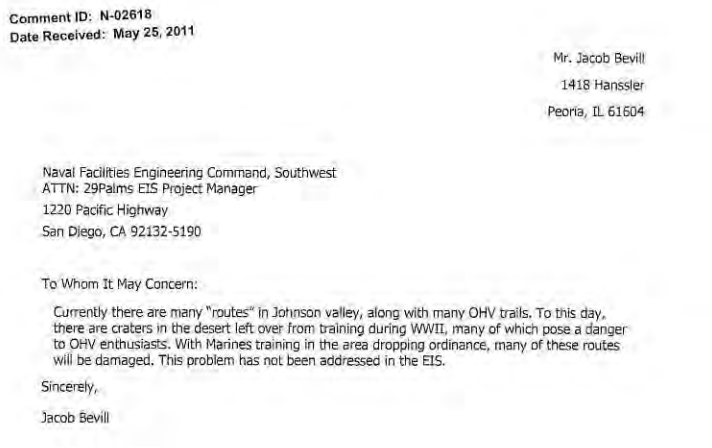
To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.



Sincerely,

Brant Willis

Response to Comment N-02622:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

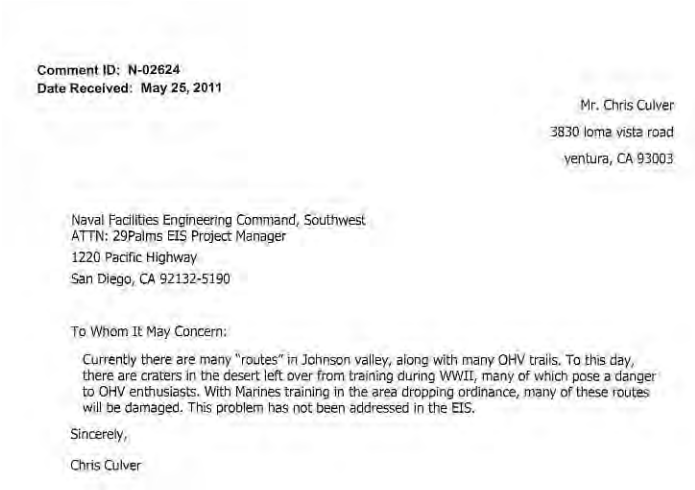
To Whom It May Concern:

While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.
For an accurate assesment, please address this type of issue and look for other suitable expansion plans that do not so negatively effect the OHV community of citizens and taxpayers.

Sincerely,



Brad Buter

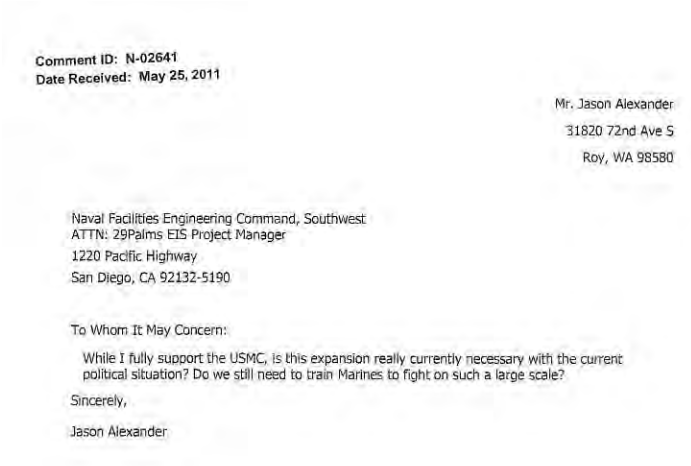
While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?



Sincerely,

Steve Rhoades

Response to Comment N-02640:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

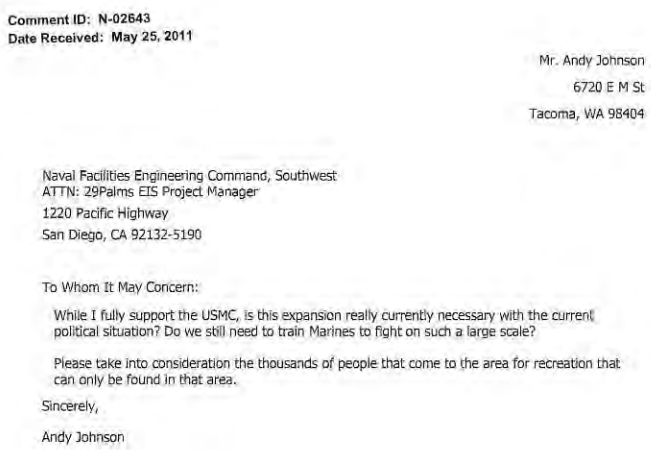
While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? Futhermore is a location already in posession of the USMC not suitable for such training, should the large scale training be deemed necessary. The way combat has been trending toward guerilla warfare over the past 50 years, to rob the OHV community of an irreplacable OHV area in order to train the marines in a manner which could be compared to the red coats lining up shoulder to shoulder is a great injustice to many whom go to great lenths that they may practice their hobby, passion, and lifestyle legally. Lastly, the area to the east would be much better suited for this type of training.

Sincerely,



Jacob Bevill

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Chris Conway

Response to Comment N-02644:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

At the same time, we as wheelers or outdoor people are loosing public land. I have been out to Johnson Vally once for the KOH race. And would love to actually take time to enjoy it for my self one day with my own truck. Im hoping you understand how many people you will be affecting form this land clouser and give it another thought. All the down south from Texas please keep this open for the locals as well as every one else that plan or still visit there.

Steve

Sincerely,

Steve Earnest

Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?
The need for such large areas to train seems to not be needed in todays type of warfare. Please study the actual needs of the forces and scout viable alternatives if necessary that wont negatively effect the lives of so many OHV using Americans.

Sincerely,

Brad Buter

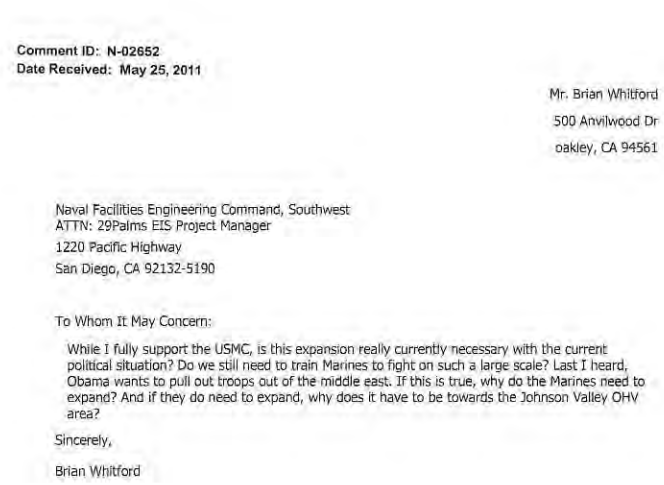
I suggest a expansion either due east or north. Ft. Irwin Is a fine area to use also. Why can't the Army and Marines work together on training?

Sincerely,

Martin Pierce



Response to Comment N-02651:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Sincerely,

Steve Rhoades

Response to Comment N-02664:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

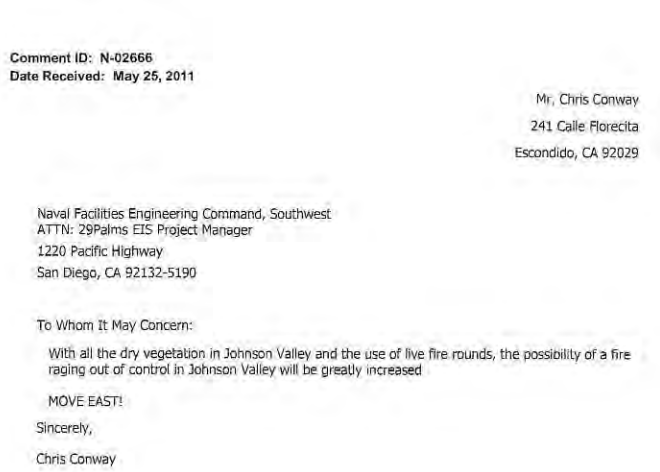
To Whom It May Concern:

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.



Sincerely,

Jacob Bevill

Response to Comment N-02665:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

To Whom It May Concern:

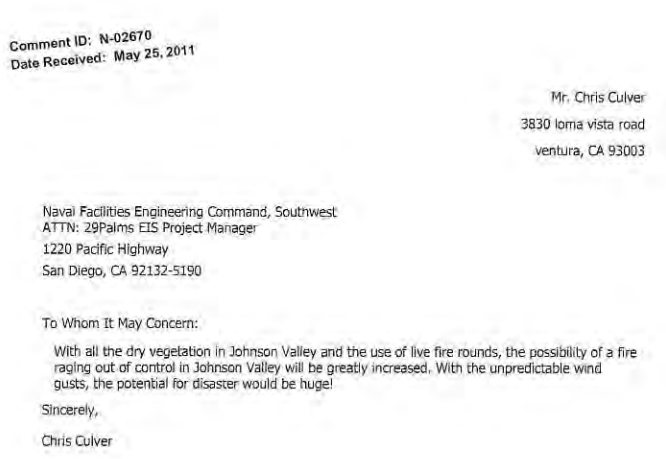
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.
This would have a terrible effect on the area and cause increased erosion.
Please reconsider expansion into the area and instead work to find alternatives tha will not have such a negative effect on the area.



Sincerely,

Brad Buter

Response to Comment N-02669:

Thank you for your comment. Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

Sincerely,

Steve Rhoades

Response to Comment N-02684:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

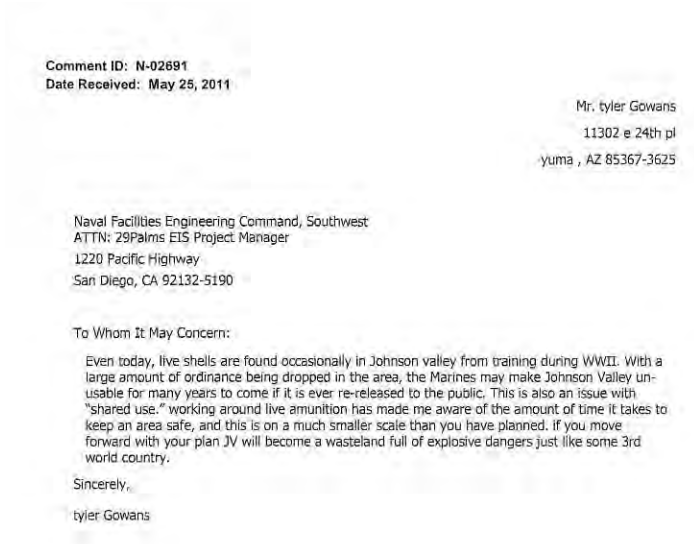
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."
Please reconsider the use of this area, as maneuvers here would be dangerous to the public and harm OHV users now and in the future.



Sincerely,

Brad Buter

Response to Comment N-02690:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

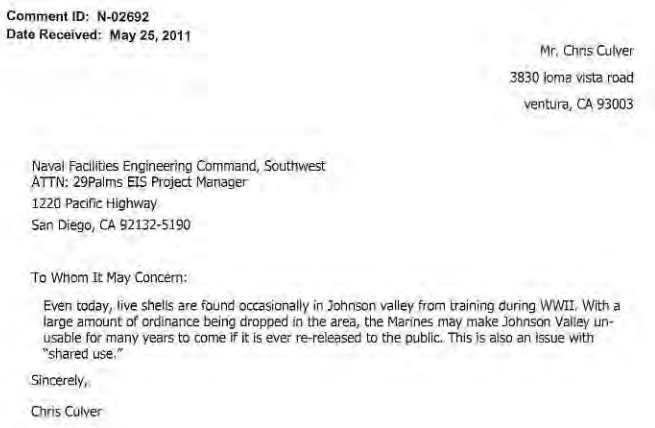
To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use." working around live amunition has made me aware of the amount of time it takes to keep an area safe, and this is on a much smaller scale than you have planned. if you move forward with your plan JV will become a wasteland full of explosive dangers just like some 3rd world country.

Sincerely,



tyler Gowans

Response to Comment N-02691:

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

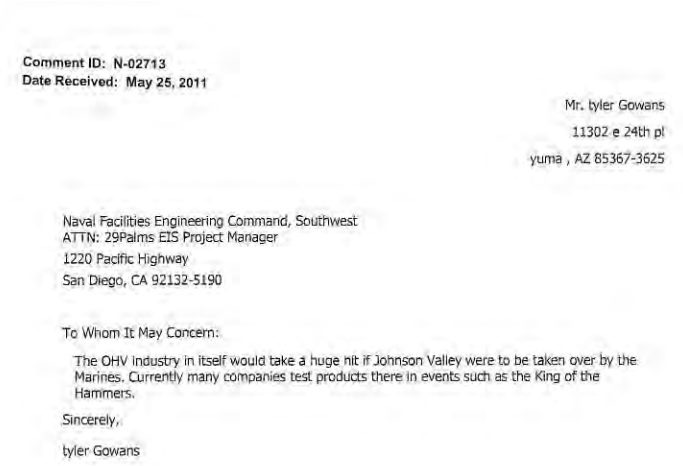
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers.
This is literally the most important OHV area in the country and the most used. The entire community and the industry that supports it would feel the negative effects of expansion into the JV OHV area. Please consider other less damaging alternatives that affect these businesses and citizens less.

Sincerely,



Brad Buter

To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. And after the parts are tested in Johnson Valley, the users are more willing to purchase these parts, and then take them to Johnson Valley, and recreate in the desert with their families. The less OHV area's there are, the less products will be purchaced to use in these OHV areas, which will lead to more failed small business's, and a worse state of our economy.

Sincerely,

Brian Whitford

To Whom It May Concern:

As a former Marine, I understand the need for training areas, but I also understand the need for both the community and Marines stationed at 29 stumps to have Johnson Valley open to OHV traffic. Not only does Johnson Valley create events that bring in tourists, but they have created industry in surrounding areas; offroad shops, stores, gas stations, etc. The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers.

My great uncle was stationed in 29 Palms and still lives in Joshua Tree. I take the opportunity to visit him during King of Hammers each and every year and I believe it's an opportunity to incorporate the Marines: mud runs, military events, etc. Join us, don't fight us.

To Whom It May Concern:

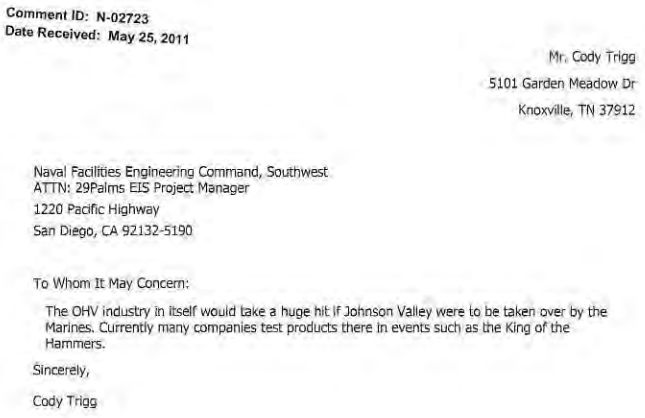
Expansion to the West into Johnson Valley would be a hit to the OHV industry itself. At the present time, many major companies use events at the OHV area to test their products.
Along with the OHV industry, the tourism industry for the local economy would take a huge deficit in revenue. Many of the events, like the King of the Hammers, bring in thousands of visitors to the area. These visitors spend quite a bit of money in the local community in the way of food, fuel and lodging.
While fully supporting our Armed Forces, it is my hope that the Marine Corp will consider the alternative of expansion to the East rather than overtaking Johnson Valley.

Sincerely,



Richard Wilson

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

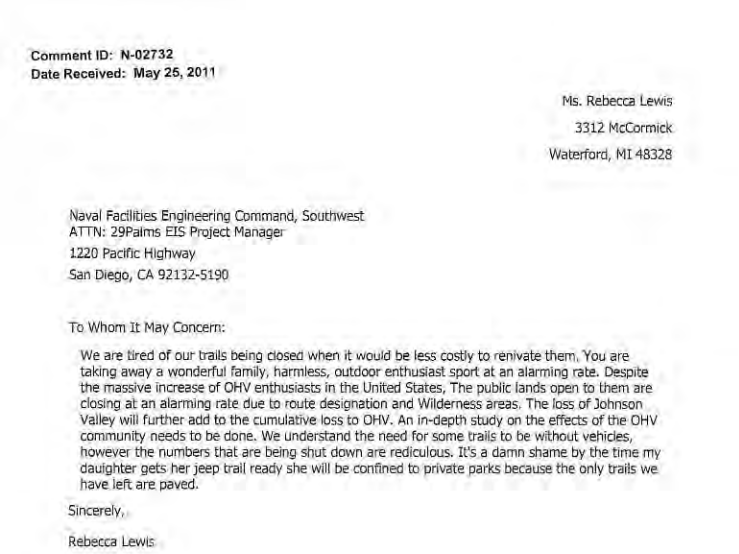
I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as a prime off-highway area – home to the famed King of the Hammers race.

Beyond the typically defined OHV user, there are many other groups of people that access Johnson Valley - hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc.

All of these groups need to be made aware of the proposed changes and given the chance to add their input on the base expansion. To the best of my knowledge, 29 Palms has not made the effort to reach out to the full diversity of user groups who access Johnson Valley.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,



Thomas Bank

Response to Comment N-02731:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

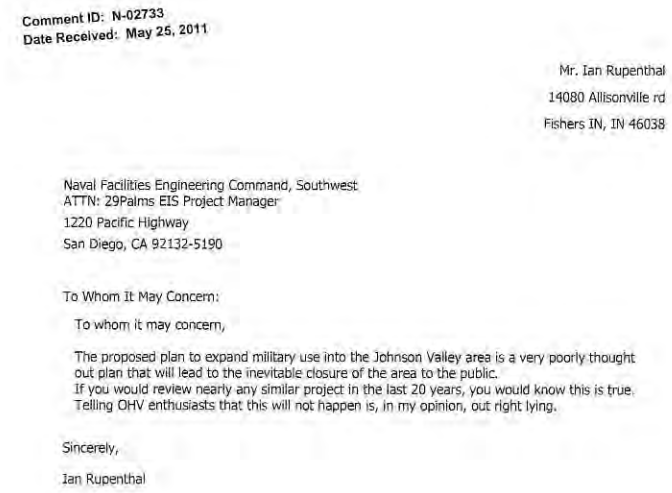
San Diego, CA 92132-5190

To Whom It May Concern:

We are tired of our trails being closed when it would be less costly to renivate them. You are taking away a wonderful family, harmless, outdoor enthusiast sport at an alarming rate. Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. We understand the need for some trails to be without vehicles, however the numbers that are being shut down are rediculous. It's a damn shame by the time my daughter gets her jeep trail ready she will be confined to private parks because the only trails we have left are paved.



Sincerely,

Rebecca Lewis

Response to Comment N-02732:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

San Diego, CA 92132-5190

To Whom It May Concern:

To whom it may concern,

The proposed plan to expand military use into the Johnson Valley area is a very poorly thought out plan that will lead to the inevitable closure of the area to the public.
If you would review nearly any similar project in the last 20 years, you would know this is true. Telling OHV enthusiasts that this will not happen is, in my opinion, out right lying.

Sincerely,

Ian Rupenthal

Response to Comment N-02733:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

While I greatly respect the men and women of our military, i disagree with the proposed expansion into the Johnson Valley OHV area.
Similar to my own, many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.
I began going to JV in the late 80's with my father and his flat fender Jeep. My two brothers and I would look forward to our 3-4 trips there per year as a time to explore the natural desert and connect with eachother and our father. I have continued to visit JV OHV area about 8-10 weekends a year ever since those days. I now take my jeep with my daughter, and typically meet up with other families with similar interests for a weekend of off-the grid family recreation.
In addition, every thanksgiving, my brothers and I, as well as our families, meet in Johnson Valley for a week of off roading and exploration, as a way of honoring my late father who ushered in our love of the outdoors with our many trips to Johnson Valley.
JV is a special place not just for me, but for countless off road enthusiasts. It exists as a desert oasis that allows us to leave the sprawl of So Cal and get back to the natural world while testing our vehicles and family bonds.
It would be a real shame to take this place from families like mine. Our traditions and link to our fathers' love of the desert and JV would be lost. Please consider other areas of expansion that would not be so detrimental to the off road community that has been so under fire lately. We salute you, Marines, but please let us be Free to do what we love, where we have been doing it for nearly 30 years.

Thank you for your consideration--Brad Buter

Sincerely,

brad buter

Response to Comment N-02734:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

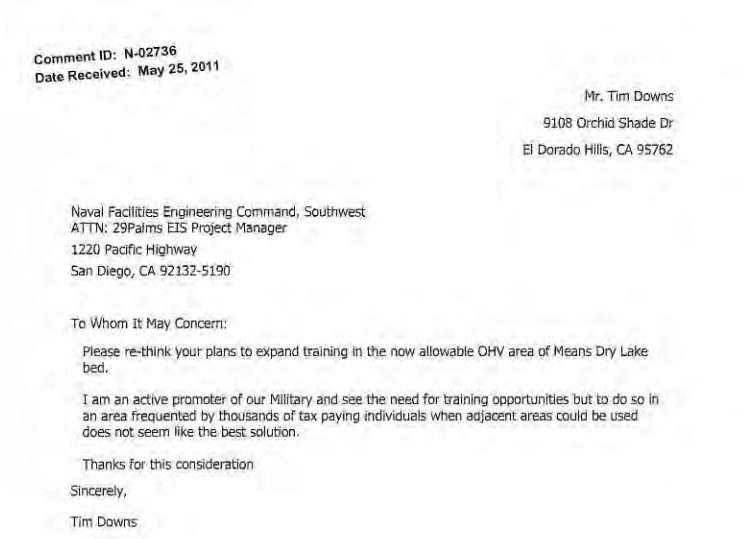
To Whom It May Concern:

As a former "ordie" I understand the long term threat of live ordnance being used in Johnson Valley for decades to come. Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordnance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use." The liability issues alone would cause commanders to say no to any future use.

Too much risk, not enough reward.

Sincerely,



Kyle Irvin

Response to Comment N-02735:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Please re-think your plans to expand training in the now allowable OHV area of Means Dry Lake bed.

I am an active promoter of our Military and see the need for training opportunities but to do so in an area frequented by thousands of tax paying individuals when adjacent areas could be used does not seem like the best solution.

Thanks for this consideration

Sincerely,

Tim Downs

Response to Comment N-02736:

Thank you for your comment and suggestions for project alternatives. As discussed in Section 2.7 of the EIS, the Marine Corps considered these and other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

Sincerely,

Matthew Whitley

Response to Comment N-02738:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

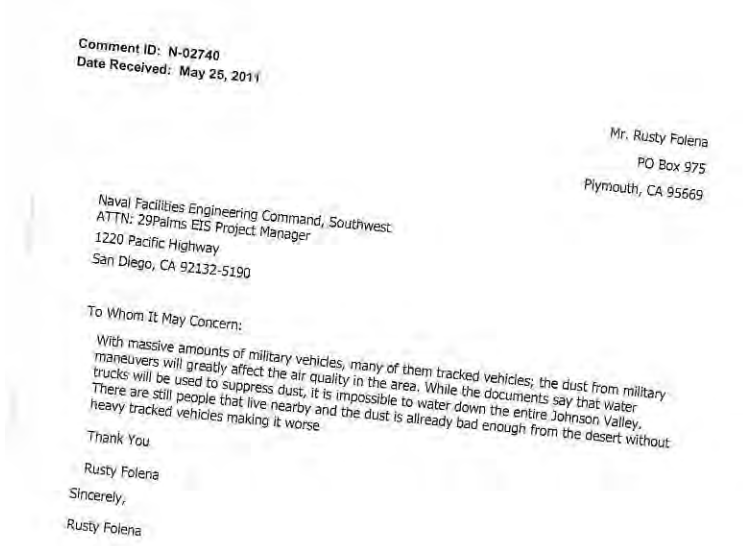
To Whom It May Concern:

The proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions has been on my radar since it became an issue.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

I would suggest that the repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all stakeholders involved in Johnson Valley if 29 Palms were to expand East.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.



Sincerely,

josh lombardo

Response to Comment N-02739:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

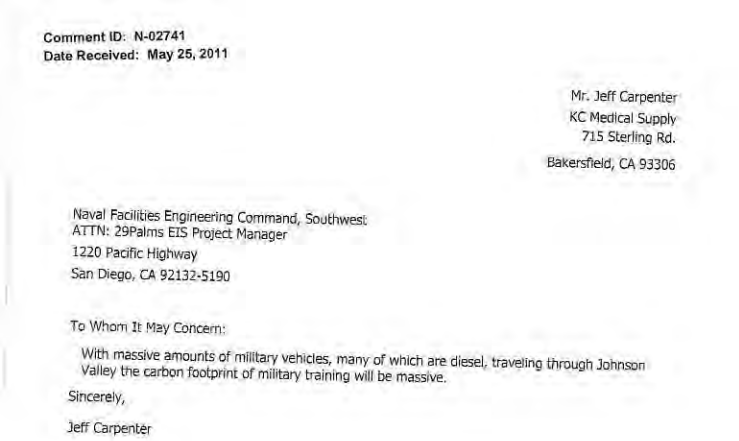
To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. There are still people that live nearby and the dust is allready bad enough from the desert without heavy tracked vehicles making it worse

Thank You

Rusty Folena



Sincerely,

Rusty Folena

Response to Comment N-02740:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

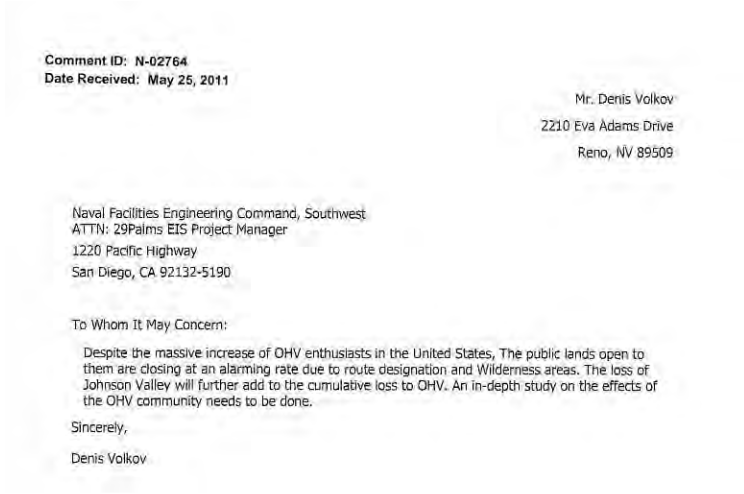
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Please leave the land available to thsi huge community of entusiasts! There are plenty of other areas that could be utilized by teh Marines for training and would not leave thsi huge of a void!

Sincerely,

Gui Eberhard

Sincerely,



Gui Eberhard

Response to Comment N-02763:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The Marines do not need more land to take over for bases and exercises. The government should have thought about the need for space when BRACS were being carried out.

I would like to point out that within the armed forces there is a vast amount of base land. The armed forces should work together to share space.

Sincerely,

Christopher Conners

Response to Comment N-02768:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

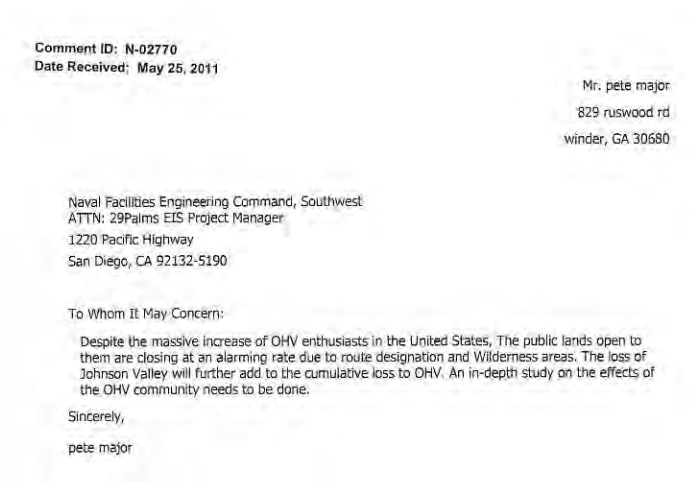
Why close more land to OHV users?
Too much land has been closed off to us already!
Every time we turn around, we are getting slapped in the face by one group or another! We are fed up with all of this!



Sincerely,

Andy Angell

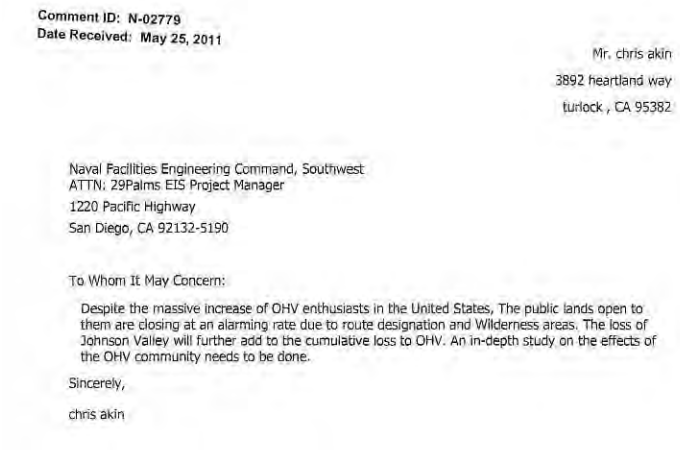
I think it that the closing of Johnson Valley OHV is a terrible idea. It will further destroy a disheartened segment of the wheeling community. Those who use the park are losing land almost daily. Dont take away one of the last remaining great parks in the United States. It is home to one of the largest events in the 4X4 community; bringing in competitors from all over the world.

This is public land and thus should remain open to the public. How dare you tread on us.

Sincerely,



Sean Reddy

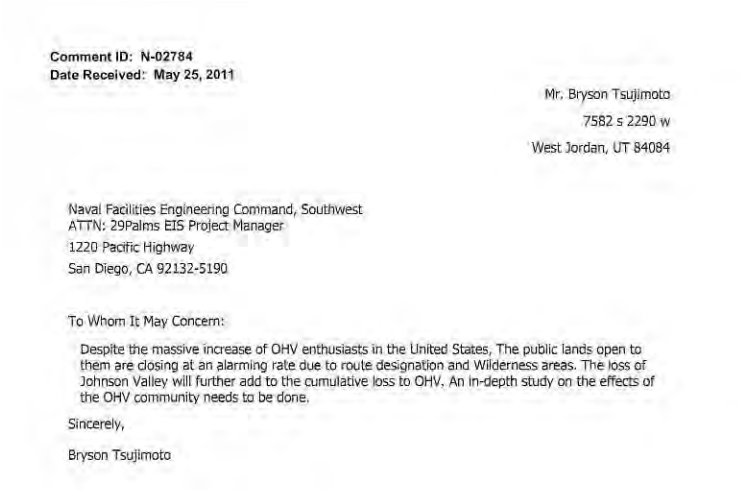
Johnson Valley
Johnson Valley in Southern California is the home of the Hammers trail system, and home to the famous King of the Hammers. It is a mecca for hard-core off-roading, and is much harder than the Rubicon trail, and just as important to the OHV community. People from all over the world literally travel to the hammers to wheel. Furthermore, many 4x4 companies also test their products at the Hammers.

29 Palms Marine Corps base to the East of Johnson Valley wants to expand in size. Instead of expanding east into useless wilderness areas, they want to go West into Johnson Valley with the hopes that the OHV community will not put up much of a fight.

The loss of this area would hurt the entire OHV community. We can't let them expand West.



Sincerely,

Kris Coleman

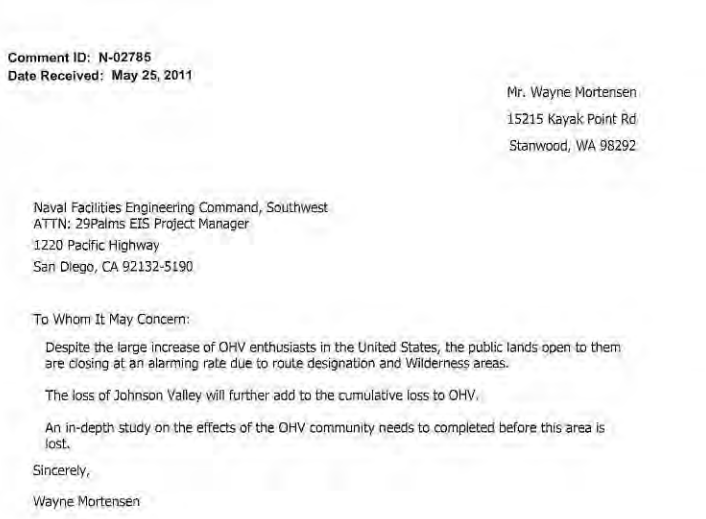
To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Rick MacDuffie

Response to Comment N-02786:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

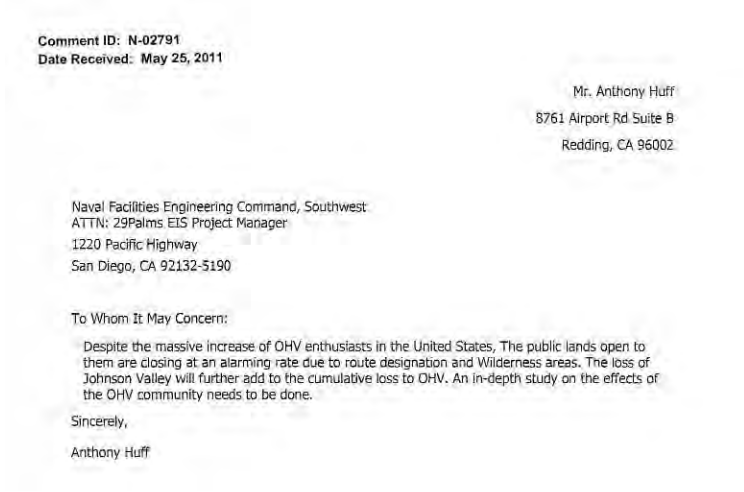
The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Of the Johnson Valley area gets closed that will put more demands on other area's and give even more reason to close them down to over use, Johnson valley is unique becuase it is located in an area that OHV use will not hurt the land. I urge you to take a look the the east for expansion.

Thank You

Rusty Folena



Sincerely,

Rusty Folena

Response to Comment N-02790:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

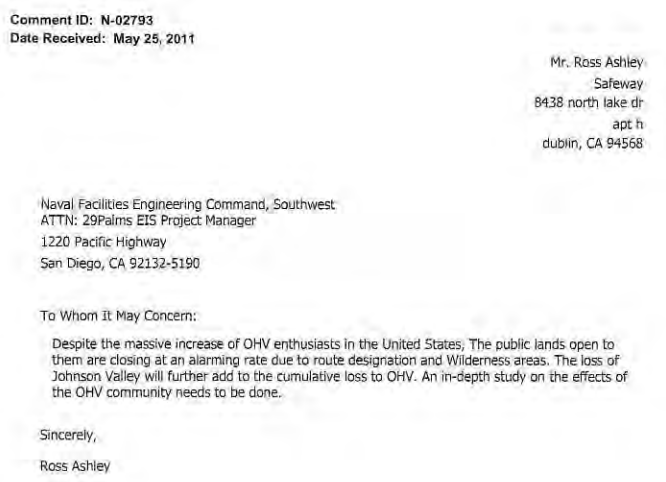
The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.



Sincerely,

Randy Charpentier

Johnson Valley is also home to one of the largest OHV events in the world, the King of the Hammers. There are less and less places all over the country to enjoy our sport. People have to travel farther and with the price of gas that just isn't always feasible. The result is either people breaking the law or just giving up the sport altogether.

Sincerely,

Bryan Bagwell

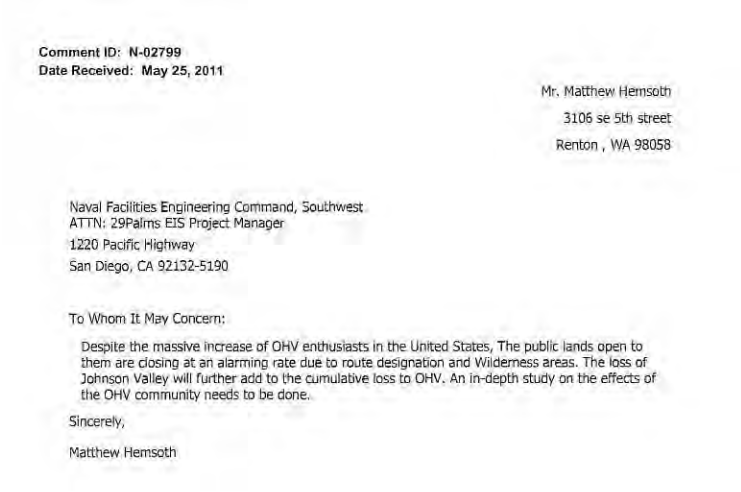
I am amazed that there are actually people think that think this is a major ecological issue. Secondly, lets not push more and more of our families back inside their houses. Lets not make every piece of land use private. Lets not close down a major part of the U.S. culture. Regulated OHV land use is far better than illegal trespassing on our tax dollars. What is the lesser of the two evils? Give us a break already. It is a cleaner sport than the alternative that's being offered by closing public OHV trails. Prove me wrong before you rashly close down public land.



Sincerely,

Chris Glass

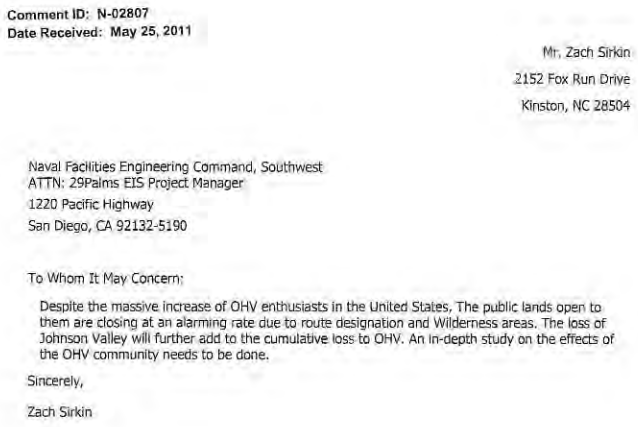
At the rate of closures in another generation or two families like mine will be unable to enjoy the great outdoors whether it be for camping or OHV. I would like for my kids and grand kids to be able to enjoy the outdoor life and not be limited to camping in their own back yards.

Please reconsider the not closing the Johnson Valley OHV area.

Sincerely,

Craig Laughrin



Response to Comment N-02806:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

I think it is in the best interest for the state of california, the government, and the offroad community to look into every option. this property has a lot of history behind it. and is one of the few remaining legal spots in the usa to go offroad.
I believe you need to leave place like this alone for our offroads of today and the future.
I live in ohio and who has not heard of the "King of The Hammers desert race". I've only read about the race and caught up on current information on the internet. And one day I would like to travel west and see this race/ property in person. but if you take this away I will never have the opportunity to do this. Please come up with an alternative solution.

Thanks,
Andrew Powalie

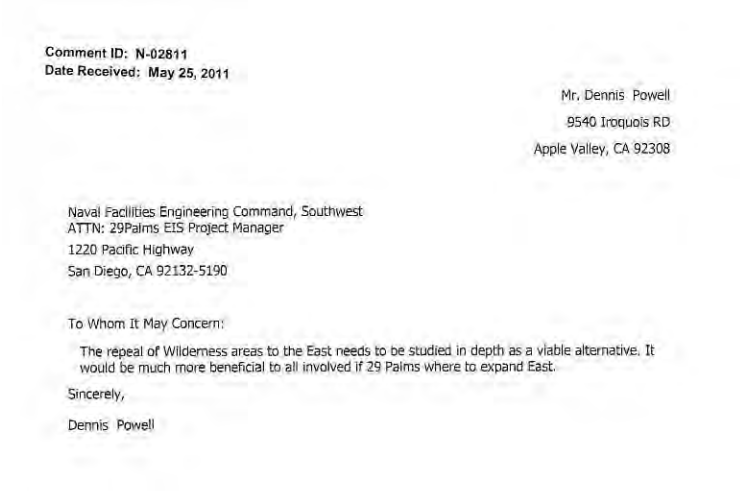
To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,



Frederick Bunkley

Response to Comment N-02810:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

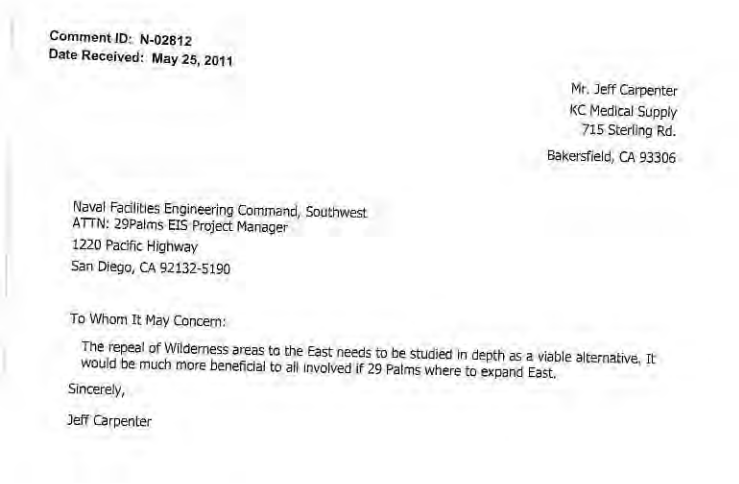
The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

Dennis Powell

Response to Comment N-02811:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

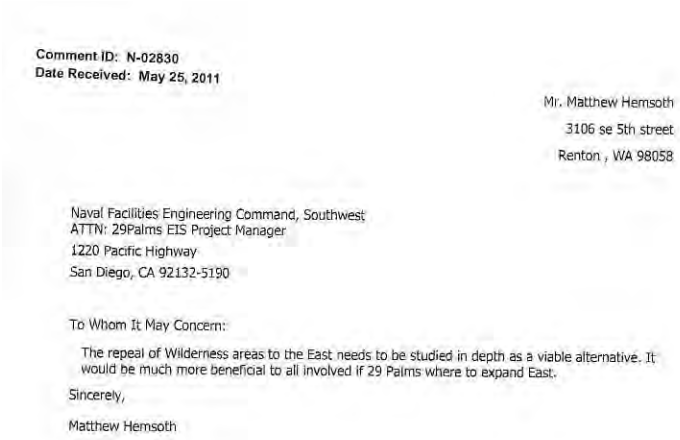
Also, With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,



Phil Rock

Response to Comment N-02829:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

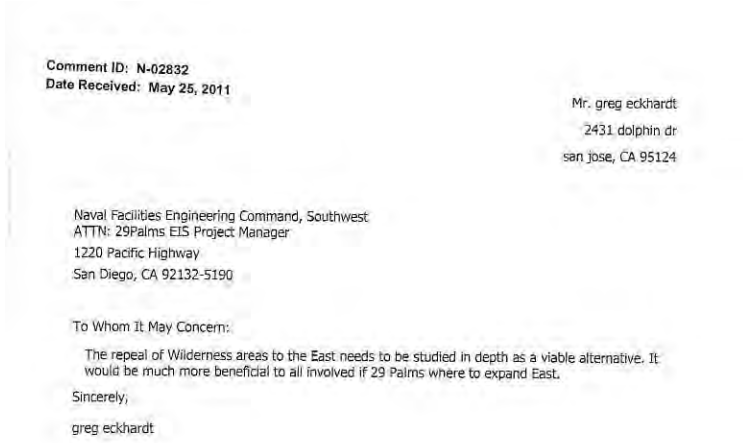
To Whom It May Concern:

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

John Woodmass

To Whom It May Concern:

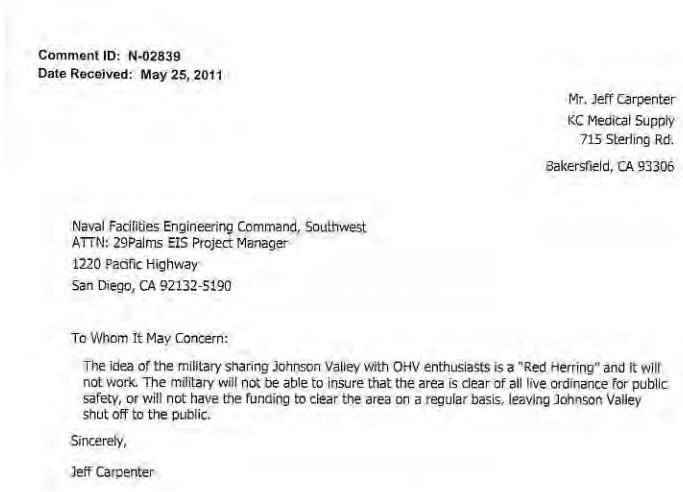
The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.



Sincerely,

Alyssa Todd

Response to Comment N-02838:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

To Whom It May Concern:

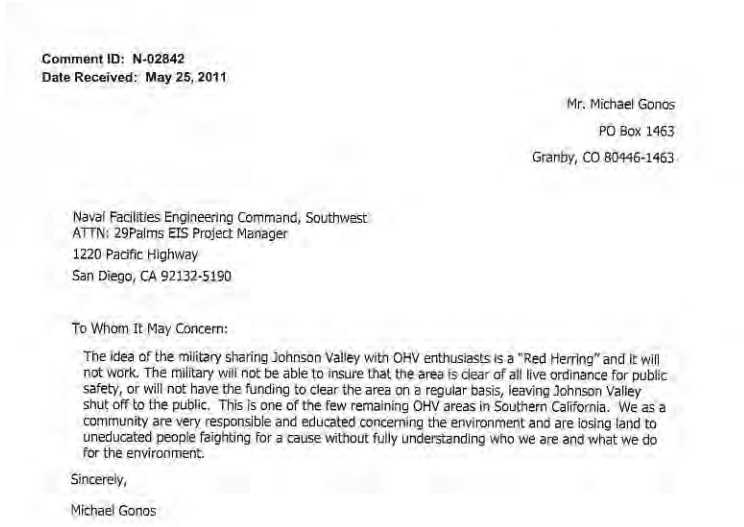
I've looked forward to the use of "the hammers" for the last 6 years. Finally I have the means to drive on a competitive level for the KOH race and look forward to being able to experience some of the toughest off road terrain in the country. I've been to 29 palms before during my term with the military. The base is HUGE! During our stay a soldier was lost and found only after it was too late. My point is that there is a lot of land to use there and I couldn't possibly see any reason for expanding it to include the proposed area. The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public. That would in turn mean more illegal wheeling due to an already dwindling resource for off-road enthusiasts. Please make the best use of the land you have available without removing this valuable resource.

Sincerely,



William Gilbert

Response to Comment N-02841:

The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

I used to live in Texas and several years ago, at Fort Hood, many OHV groups took advantage of the "Public Access" program offered there at the HumVee training facilities. This program was successful until expansion of training facilities at Ft. Hood were reapportioned to include areas where live-fire ordnance was detonated and the "Public Access" program suddenly ceased as the base authorities "could not assure the safety of the public" due to the possibility of unexploded ordnance.

This idea of shared use is an example of government/military attempts to deceive the public into giving up their right to the lands they have traditionally enjoyed.

Please, separate yourself from the stereotype of takers and be a good neighbor. Find another sandbox!

Thank-you!

Sincerely,

Sherman Mathieu

Response to Comment N-02843:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

Response to Comment N-02846:

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

Shreveport, LA 71106

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Michael Yeatts

Response to Comment N-02853:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

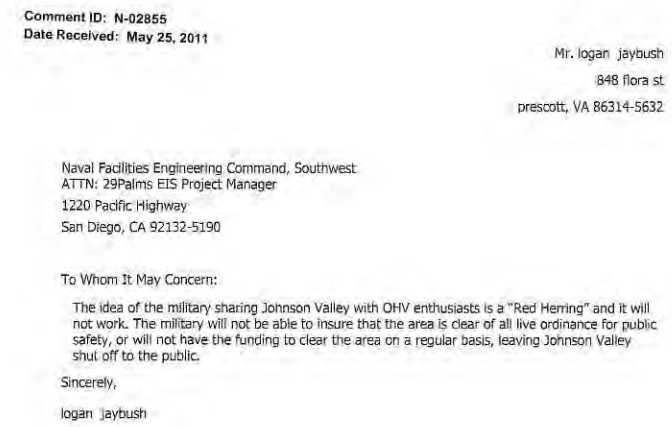
I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier



Response to Comment N-02854:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

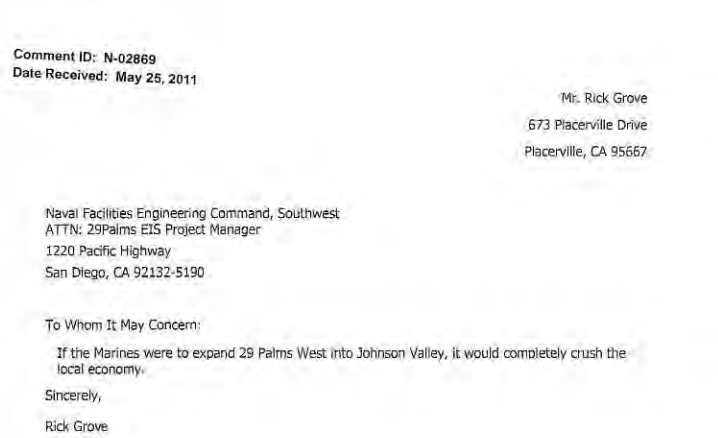
I have been frequenting this place for years and have have greatly boosted the economy with purchases from local merchants for food, gas, parts. This place was empty when I fist started going down there and now there are all kinds of chain stores. Look at how the military has abandoned bases and ruined economy's in the past. Also where will all the marines take their trucks/atv's amd other toys to play. This is the best area in the entire USA for rock crawling. Where else can you take trucks over $100k and have them not finish a race because the environment is too tough on them. Do not close this area keep bombing the hills looking for bin laden as practice. Pull the troops out like you promised so they don't need more training ground.



Sincerely,

Tim Richards

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. In addition, with the tough economic times, visiting these areas and exploring public lands is a low cost alternative to other activities. A family of 4 can drive, camp, and explore for almost 25% the cost of a trip to a theme park. We also enjoy interacting with other campers and OHV families.

Sincerely,

Aaron Lasley

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

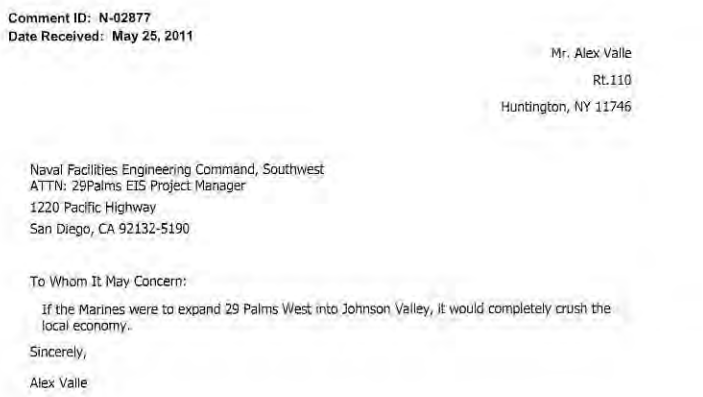
We spend a lot of money in to the local economy when we go down to Johnson Valley. The food, supplies, fuel and rental of an RV are all provided locally and help my friends and family make the Johnson Valley a great experience.



Sincerely,

Lance Hamilton

Response to Comment N-02876:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

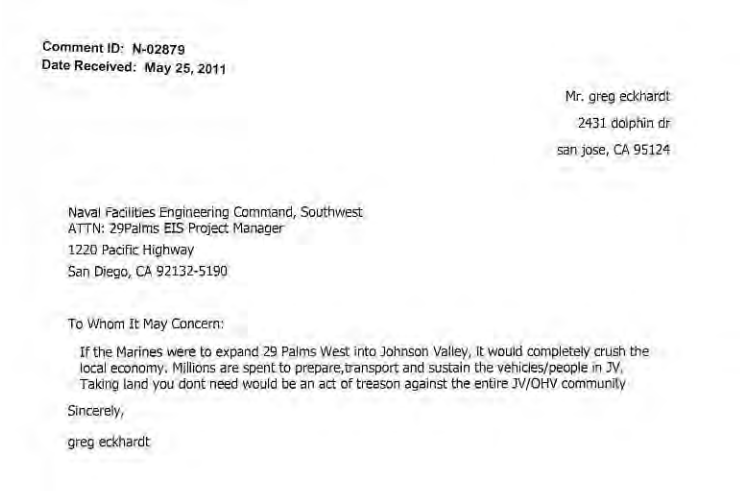
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Sincerely,



Phillip Vieira

Response to Comment N-02878:

As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Mr. Christopher Rea
US NAVY
2802 Cascade View
Bremerton, WA 98310

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The marines seem to think that expanding into the Johnson Valley OHV area is the best possible way to train our military for it's current conflicts. Obviously I am a supporter of the military (current active duty US Navy) and want nothing more than to have our soldiers/sailors/airmen/marines as well trained as humanly possible. But I am whole heartedly AGAINST an expansion into the Johnson Valley OHV area to do that when there are better suited options available.

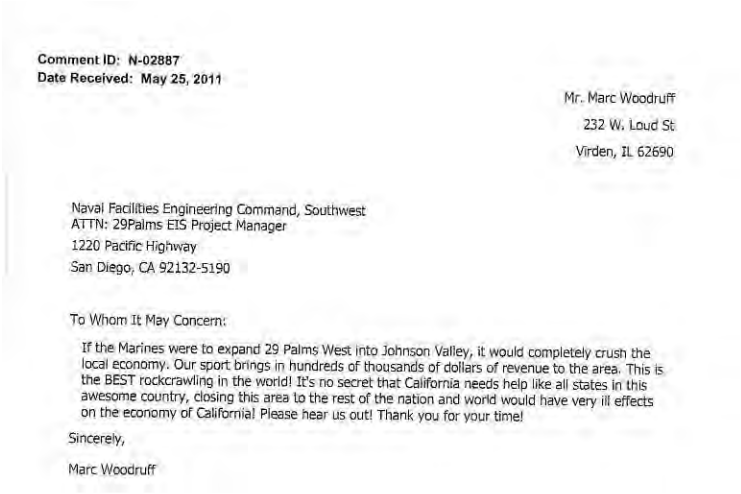
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Just a few months ago I helped run the King of the Hammers(KOH) off-road race, put on by HammerKing Productions, by performing the tech inspection for all of the vehicles participating. I have read figures that our week long event brought over 1 million dollars to the local economy (which is the low estimate, there are other figures that say as high as 5 million). If the Marines take over the Johnson Valley OHV area KOH will not be able to run again, which means the local economy will be losing out on a lot of money. Add in all the money from average users that will be lost and it does not look well for the local economy.

But, it isn't just the local economy that will be affected by the loss of the Johnson Valley OHV. Many users of the OHV area travel hundreds, or like myself thousands, of miles to recreate there. The loss of this premier OHV area will lead to the loss of potential sales in communities across the country. Just a couple months ago I made two treks from the Seattle, WA area down to visit Johnson Valley. All told I spent roughly two thousand dollars in fuel alone. Add in all the other costs of my trips like food, camping supplies, etc and you can see how other communities besides those around the Johnson Valley OHV area can be affected.

Also, we must keep in mind the affect the loss of the Johnson Valley OHV will have on the many companies that produce products that are used in the area. I do not have exact figures, but I would guess that millions of dollars are spent on products used in the area. with the loss of the johnson valley OHV area, how many of those companies would still be in business and what would the overall effect end up being?

Due to these factors I believe it would be too much of an economic burden if the Marines expand into the Johnson Valley OHV area and recomend they find another option.

Sincerely,



Christopher Rea

To Whom It May Concern:

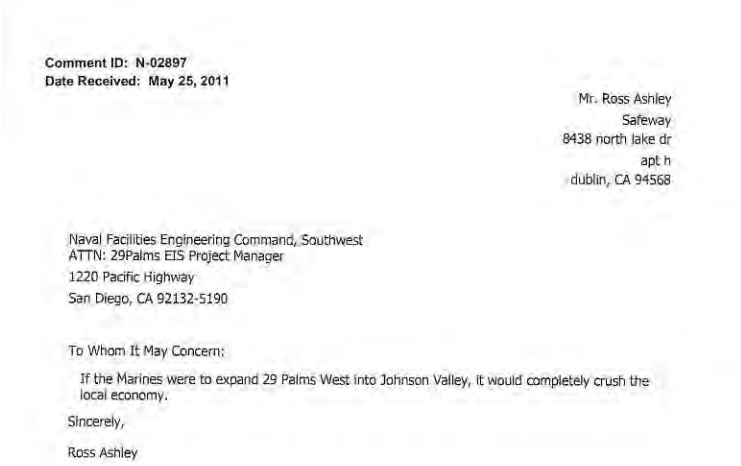
Over the years, if I were to have saved up the money spent in the surrounding towns of Yucca Valley, Lucerne, and Apple Valley on each of the trips taken to Johnson Valley OHV my 401K's and retirement funds would have higher balances. However I would not have the experiences and memories of great trips with great friends, experiencing our great outdoors. Instead I spent this money in little towns in the California desert. Towns that depend heavily upon the OHV crowd for revenue. I urge you to reconsider your decision to expand 29 Palms into the Johnson Valley OHV area. If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.



Sincerely,

Jeremy Farrell

Response to Comment N-02903:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

San Diego, CA 92132-5190

To Whom It May Concern:

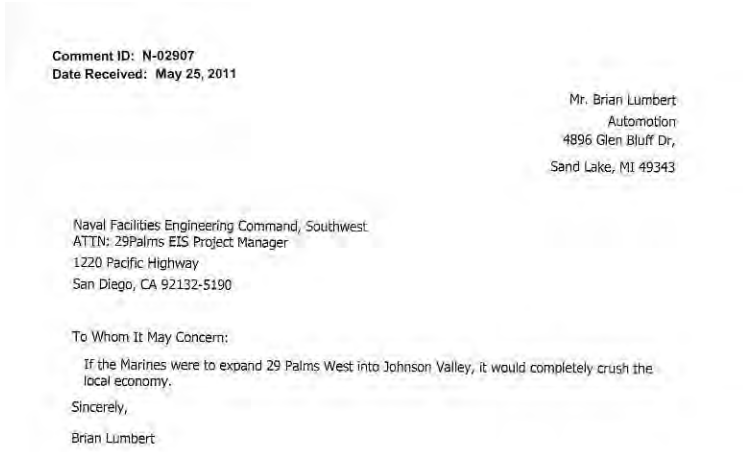
With all the talk these days involving the economy, it would be a serious error to expand 29 Palms into Johnson Valley. The loss of revenue to the local economy would most likely result in the failure of local businesses in the area.
Many families, mine included, plan yearly vacations with utilizing areas like Johnson Valley OHV in the plan. With the area closed to the public, we would most likely choose another destination, as would others, resulting in revenue lost.
With the utmost respect for the Marine Corp, I would like to request that they seriously consider expanding to the East rather than into Johnson Valley.

Sincerely,



Richard Wilson

Response to Comment N-02906:

As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

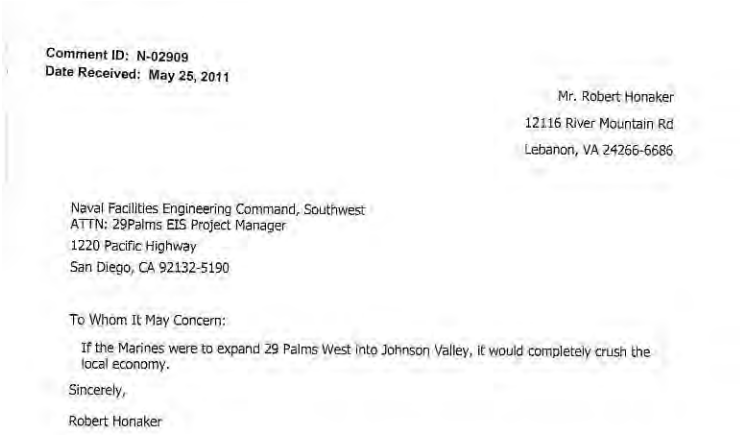
I've seen it before where I live and 4 wheel. A similar situation happened in Pennsylvania with one of the largest east coast OHV parks, Paragon. The local economy is now starving for business that onced thrived on the weekends with travelers from in and around Pennsylvania.

Don't let this happen to you guys out in California, our economy can't keep taking these kind of small negative hits.

Sincerely,
Rob Isoldi
A concerened 4 Wheeler



Sincerely,

Robert Isoldi

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.

Sincerely,

Michael Gonos

Response to Comment N-02916:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. I've only had the opportunity to visit Johnson Valley once, back before I had a little family of my own. I'd really like for it to be there in a few years when my daughter is old enough to go out visit. Closing the recreation will prevent many families like mine from being able to get together and enjoying the outdoors and our off road vehicles together. Since my vehicle is only a two seater, a venue like Johnson valley is ideal, as we can run multiple trails from a single "camp" and trade out passengers as the day progresses. Please take these things into consideration in your decision making process. Please help keep this public land open to the public.

Sincerely,

Ryan Eklund

Response to Comment N-02924:

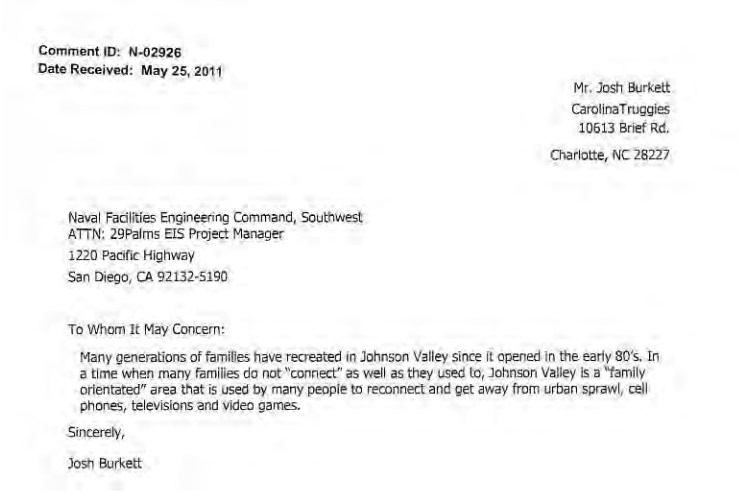
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,



Frederick Bunkley

Response to Comment N-02925:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

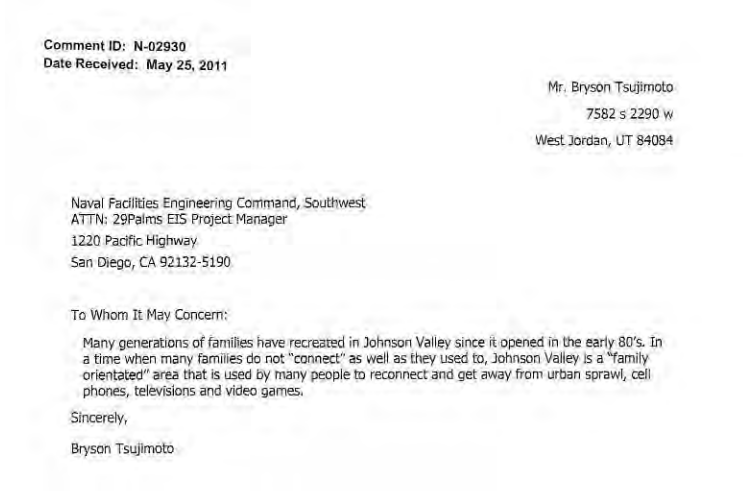
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. If the expasion were to happen, it would take away from future generations being able to "reconnect" and experience the outdoor recreation of Johnson Valley. I myself have not had the opportunity to visit Johnson Valley, but am looking forward to visiting.If this expansion were to happen, the experience will not happen and this will end up being the third outdoor recreation location I have not been able to visit due to governmental closures.
Please reconsider the expansion for the people who have not experienced the valley and for the future generations.



Sincerely,

Zachary zentz

Response to Comment N-02929:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

It would be a shame to lose the right to access this part of California. My family has went to Johnson Valley since the mid 1990's, I would like my 4 year old son to have that same right. I understand that the marines need to train and all that I'm asking is to train in another part of the Desert.

Thank You
Rusty Folena

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

San Diego, CA 92132-5190

To Whom It May Concern:

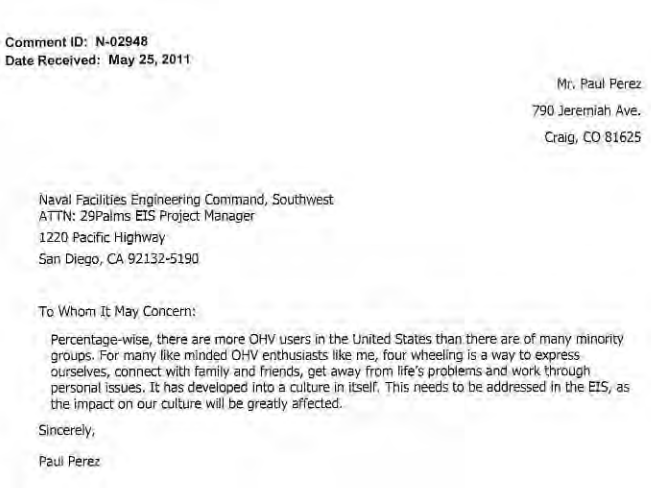
Growing up in Rapid City South Dakota, off-roading was a family affair. So much so, my career turned to metal fabrication to build off-road machines. For years, my life was about going out and challenging my driving skills and making my rig(s) better. With the Black Hills only being so big, other OHV areas had to come into play and Johnson Valley was on the top of my wheeling "bucket list". Now that I live in Southern California, it is the one place I choose to go and test myself and my projects. It is a place where my family in their old age will come to visit; I can push the limits in driving and building skills; compete with the best of the best; and still feel like I am at home with the terrain.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Please allow the thousands of us who use Johnson Valley for the many different reasons we use it for, to continue to enjoy one of our favorite OHV spots ever. Thank you!



Sincerely,

Jessi Combs

To the Marine in charge of handling this e-mail initially, THANK YOU FOR YOUR SERVICE!

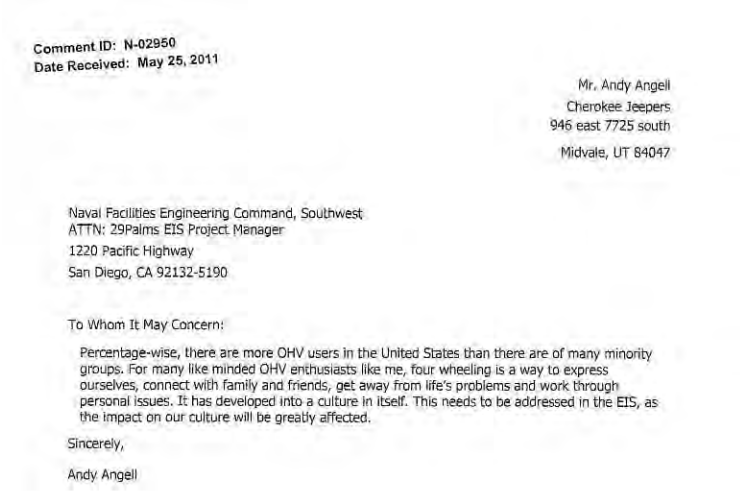
To the Marine that will ultimately be a part of the decisions of the 29 Palms Marine Base expansion, PLEASE, GO EAST!

The off road grounds to the west are one of the few "open designation" areas still available in the entire US. The areas of the Johnson Valley have been not just an important area to our sport, but also to hundreds of different activities. Regarding the offroad activities specifically, Johnson Valley and "the Hammers" are hallowed ground to OHV users and cannot and will not be replaced. By overtaking those lands with the base expansion, you are basically putting a huge nail in the coffin of our sport, which happens to be an entire industry that supports a large amount of people. Not to mention, you will be hurting the towns nearby in a big way as they will no longer receive our heavy doses of tourism dollars.

Please, GO EAST MARINES!
Regards,

Sincerely,

Bobby Morley



Response to Comment N-02949:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

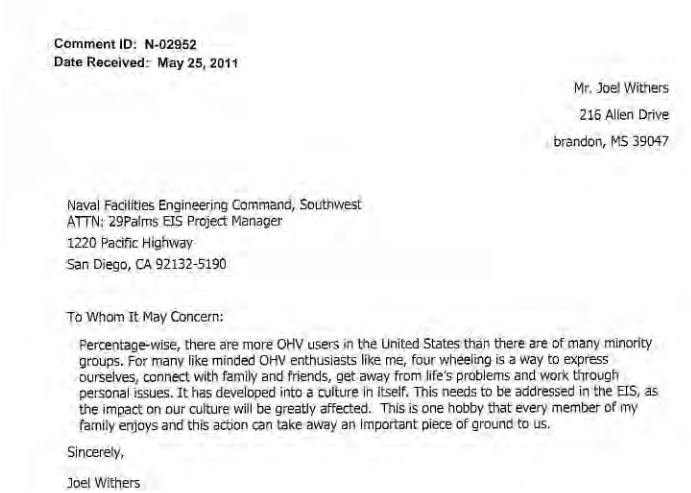
It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.



Sincerely,

Michael Gonos

Response to Comment N-02951:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. This is one hobby that every member of my family enjoys and this action can take away an important piece of ground to us.

Sincerely,

Joel Withers

It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. In addition, with the tough economic times, visiting these areas and exploring public lands is a low cost alternative to other activities. A family of 4 can drive, camp, and explore for almost 25% the cost of a trip to a theme park. We also enjoy interacting with other campers and OHV families.

Sincerely,

Aaron Lasley

Please don't move into the Johnson Valley area. We have very little OHV areas left to recreate. My family and I have been coming here for years and use this as a great family trip and bonding with my family. There are not enough open OHV areas that let us drive off-road and get away from the streets and traffic.

Sincerely,
Domenic Fisher

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Sincerely,

tom trouerbach

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

As a full time working male here in the US, I look forward to spending time with my kids in outdoor recreational areas. Instead of heading to the beach or playground my young boys and I try to go offroad to see the terrain and join like-minded people in exploring the public and private (with permission) owned lands in this great country. Please consider this while considering turning a mecca of our pastime into more military training grounds. Or please consider trying to work out some way to keep the land open to the public when not being used for training. I have always dreamed of taking my boys to cali to watch the races in this park, and then take them out in our jeep which we build together of many long nights.

Thank you.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. To Whom It May Concern:

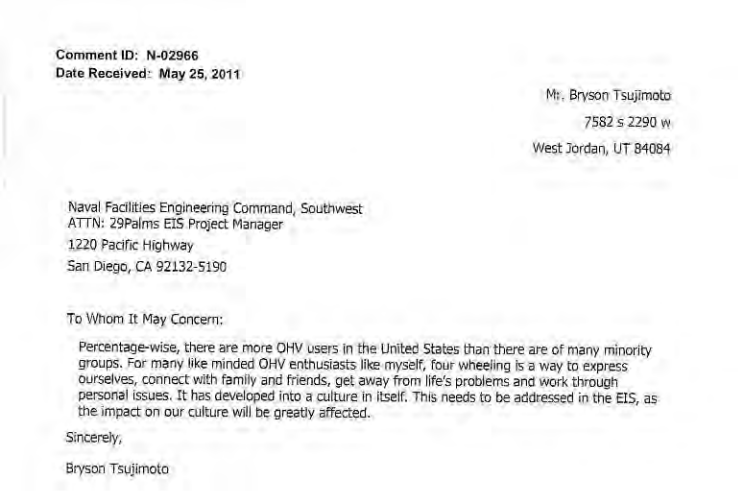
To whom it may concern,
I am writing in reference to your possible relocation of the 29 palms marine base. This area of land is home to OHV, mountain bikers, hikers and various other uses. The most notable is the "king of the hammers" off road race, the only race since the Baja 1000 to gain national recognition. This has helped boost the local economy and has become a staple in the off road community.Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected. I believe there could be a realistic resolution to keep this property public to the community and those that travel cross country to experience it while still allowing the 29 palms marine base to expand. Please take this into consideration and thank you for taking the time to read this.

Sincerely,
Kaelen Barden

Sincerely,



kaelen barden

Response to Comment N-02965:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,

Scott Sroufe

Response to Comment N-02972:

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.

Sincerely,

Michael Gonos

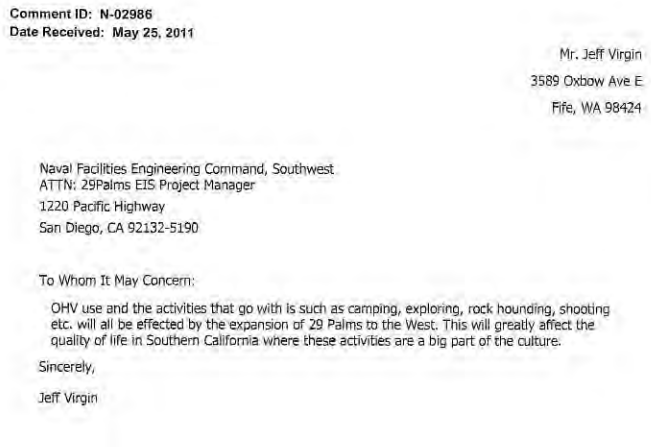
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Johnson Valley is the closest and safest place for me and my team to go test and practice in our race car. It is also a very good place to go camp with family and friends and enjoy what the desert has to offer. I personally know numerous military personell that also go out to this area to enjoy the terrain and atmosphere I am begging you to refrain from taking more land from us. This will also have a massive impact on local economy as well as the entire offroad communities businesses! It will hurt my business directly!
Thank you for your time- Jake Wreesman

Sincerely,



jake wreesman

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Whats next expanding all the way to Az.NV.CO. I mean Im all for a secure country but seriously how much room do our bases need.Here in Co.we have more land dedicated to the forces than to recreation.This contributes to illegal offroading,and big problems with the imprint on wilderness factor.Wher our we suposed to utilize our freedoms that our familys and friends fight and die for! Its our land too,not just just for the military.

Sincerely,

Jesse Wienke

To Whom It May Concern:

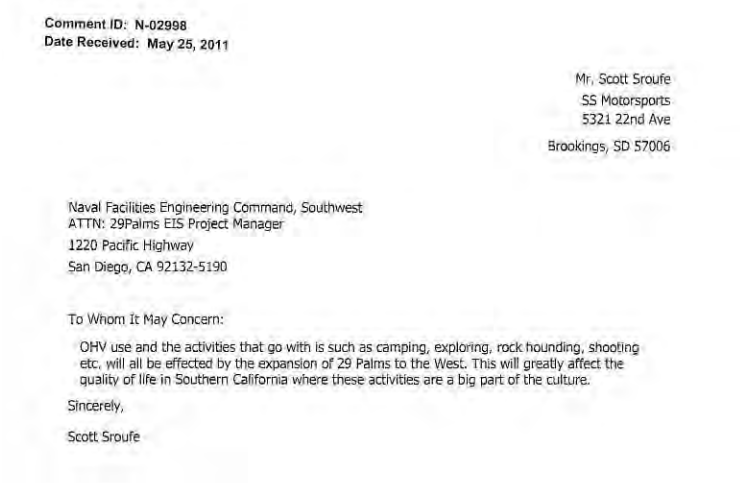
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,



Randy Charpentier

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

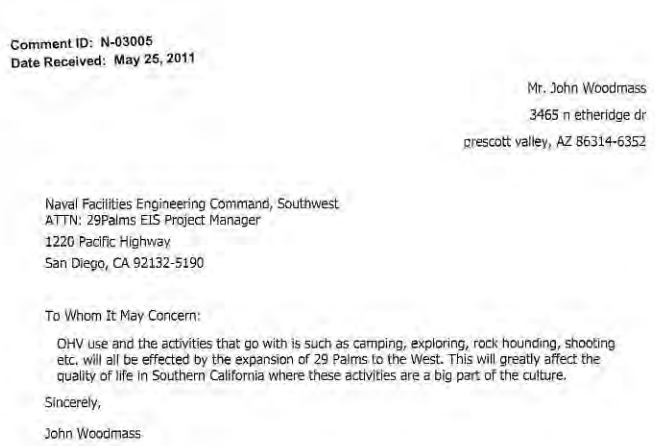
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life across the nation where these activities are a big part of the culture.

For me quality of life is meant buy freedom. I suffer from savior anxiety that came on after a horrible anxiety attack over 6 years ago. Getting out rock crawling is a total release from this. I become totally relaxed and do not have the bad thoughts and racing thoughts in my mind. I grew up (I'm 39 years old) in northern Ca. town of about 250 people and have wheeled at the hammers/Johnson Valley. I hope and plan to again in the future. I grew up hunting, fishing, camping and 4wheeling. Modifying trucks to get me where I need to go for hunting. Hunting became less enjoyable and too much stress for me. I started extreme rock crawling over many years ago but 4wheeled my whole life. I find mental ease the more I wheel. On the trail I find myself enjoying life again, relaxed, and it puts my mind at ease. Every time we turn around something is being taken away. Americans have fewer and fewer ways to escape. People are getting pushed to our breaking points more now then ever. More than once a week I ask myself how much more can I take. I have an incredible wife that helps me take one moment at a time, and stands with me. Our public lands have always been a huge part of my life. Now what seems to be the only thing keeping my mind from killing me is being taken away one trail at a time. In your decision please consider people like me and other like me. Where the only thing keeping me from complete mental disaster is the US public lands. This is no joke I have a list of over 5 years and 7 different government approved anxiety, depression pills I have used. (crazy pills I call them) to account for. I am drug free right now. But, battle everyday with anxiety. I have once again found peace in the outdoors in the form of 4wheeling/rock crawling. Please listen to us all and allow us to keep our land and sanity.

Thank you, Phillip King



Sincerely,

Phillip King

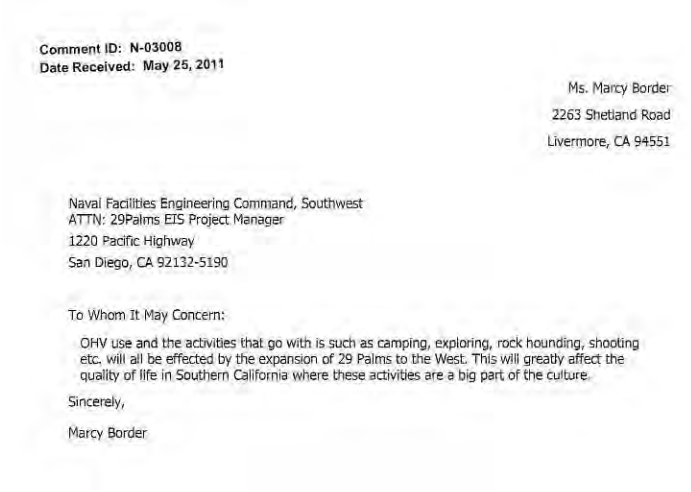
This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

Sincerely,



Brian Lumbert

Response to Comment N-03007:

Thank you for your comment. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Response to Comment N-03021:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

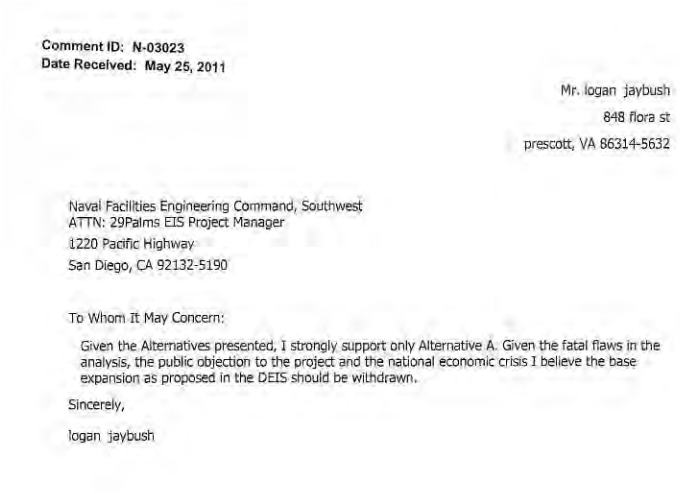
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.



Sincerely,

Will Gentile

To Whom It May Concern:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

Sincerely,

Alyssa Todd

Response to Comment N-03029:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Rusty Folena

Response to Comment N-03043:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

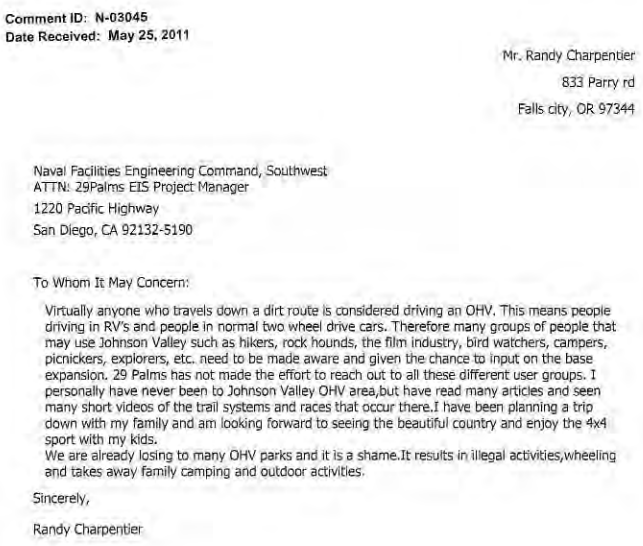
To Whom It May Concern:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.



Sincerely,

Derek Jackson

I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
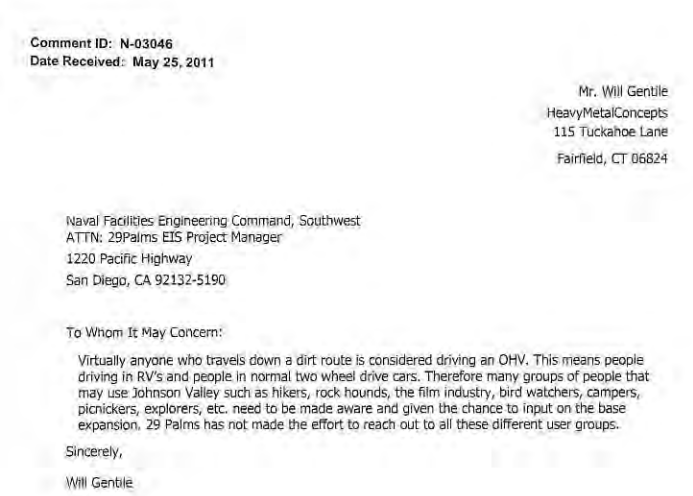
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,



Randy Charpentier

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

My family and Friends go down there at least once a year and it is about 20 hours of travel time. We enjoy everything the Johnson Valley has to offer. Most importantly the time we spend with our families and friends. Not including the new people we meet there every year enjoy the same activities as we do.

Please keep this area open to the public so that my kids can pass this get past time down to there kids.

Sincerely,

Lance Hamilton

To Whom It May Concern:

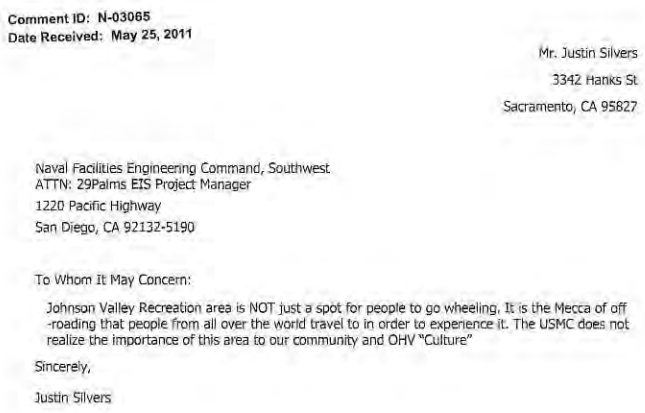
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture".

I am from Canada. My parents winter in La Quinta every year throughout the months of January, February and March. This past February I took a one week holiday to visit with them. One of my goals was to meet up with some local offroaders who I had met on the website Pirate4x4 and take a trip with them to the "Hammers" trail at Johnson Valley. As a 4x4 enthusiast for 20 years, you could say it was a dream of mine to go there. Unfortunately the weather brought rain and snow to the area in the days leading up to our trip and we had to cancel. So my dream is yet unfulfilled. As I get older and begin to look towards retirement I envision myself spending winters in the Palm Springs area much like my parents. However it will not be golf that brings me there but my Jeep and the the desire to explore trails such as those in Johnson Valley. Please don't close this area to OHV use.



Sincerely,

Ray Lafreniere

Response to Comment N-03064:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

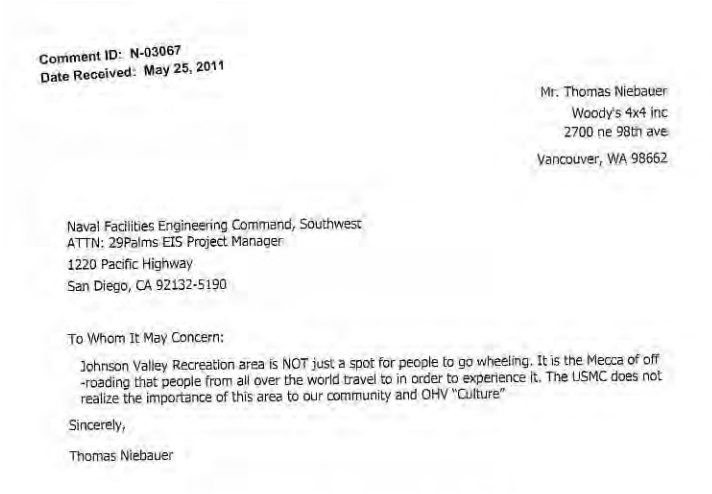
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". Johnson Valley is the location of a budding technology that is mating hardcore off roading and desert racing, pushing the limits of the machines and promoting competition and growth. If this gets taken away, and turned into barracks, the off roading community will be without one more location, headed toward zero locations very fast. Please re-consider.

Sincerely,

Adam Knolla



Response to Comment N-03066:

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

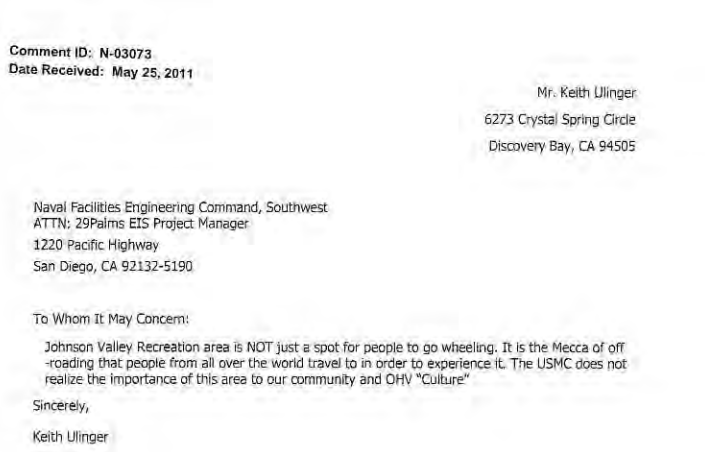
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture".

Unfortuantely many public land areas are being closed down due to irresponsible behavior. Johnson Valley is one of the biggest and most well known lands in the world. Having many friends that were/are United States Marines, they are also disagreeing with the fact of closing Johnson Valley OHV area to expand 29 Palms. This is not a slam against the USMC, but as my good friend told me about the current size of 29 Palms, why do you feel the need to expand? It's already the biggest military base in the world.

Johnson Valley brings in people from all over the world. It brings in revenue, talent, wicked rigs, and just enthusiasts that share the same love of our sport. Please don't close this area. This would be a nail in the coffin to us! We put thousands and thousands, if not millions of dollars back into the economy every year with buying parts, building rigs, traveling, and just turning this "hobby" into a profession! Please rethink what you're doing, this is NOT the way to go! Thank you for your time and hearing all of us out!

Sincerely,

Marc Woodruff



Response to Comment N-03072:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

I personally have been there only once, for 2011 King of the Hammers. I brought down my buggy and an ATV and paid for both passes for the year, regardless of the fact I was there for only a week.

After this years trip I plan to make the race an annual thing for sure. I also now have many more friends from Canada that what to come down and spend some time exploring the area.

I hope that with the large response of letters etc that you would rethink about expanding in that direction.

sean

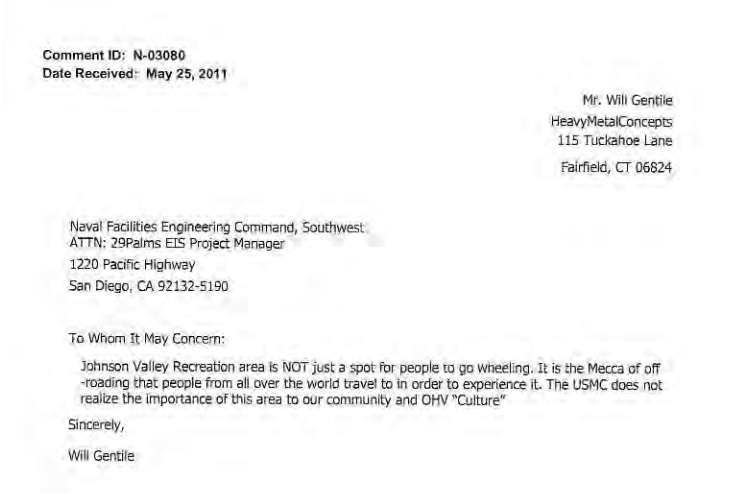
I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,



Randy Charpentier

for us off road enthusiasts this is a way of life. we treat these places as a sacrad ground to share our hard work and skills in the trill of exploring our boundries. people from all over this country share this park as a proofing ground of getting ourself through tough obsicles with hand biult machines. its a place where any person, weather you have sponsors and a 100,000+ dollar rig or a 1000 budget truck, can go to have fun with friends and family. for some of us it is offensive to think we could lose our given right to use public land. if we keep losing these ohv parks, think of all the revinue this country will lose. there are so many small fabrication shops biulding customizing parts for the vehicles that we use in parks just like johnson valley. small businesses that would have never had a chance if people had nowhere to use there product ideas. they pay there taxes as do i and i would be very disgusted to se a place like that demalished with more biuldings and and stuctures.
i support our military and our troops and think of them every day and how there countless efforts effect my life every day. they fight, sweat bleed and die for our freedoms. to speek freely. to live freely. for use to enjoy our lives to how we feel is good and true. and to conflict these to subjects is a horrible place to put any american citizen. but the truth is there is plenty of desert to be extending bases. and there has to be some way to do this without personally effecting such a great amount of people and there free interest

Sincerely,

tom pardini

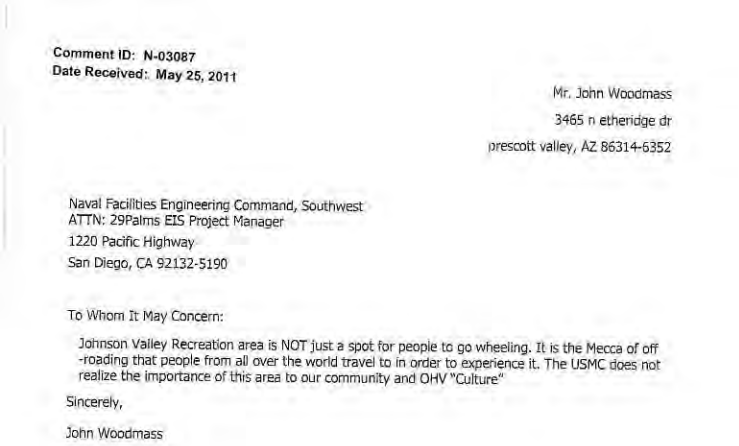
To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"



Sincerely,

Jeff Virgin

Response to Comment N-03086:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

I travel at least twice a year to Johnson Valley for OHV use. This land is important to the recreational off road community from across the country and probably the world at this point with the KOH race. Closing this area will effect more than southern California.

In Ohio, we do not have designated OHV areas. Please do not do this with southern California.

Thank you,

Thomas Yash

My brother and I flew from coast to coast just to witness the beauty this spot of land has to offer our off road community. I would devastated to see it be destroyed or maimed by the likes of military training. Where I live I'm surrounded by military and have the utmost respect for the 4 bases that literally surround me, but the IDEA of one of them just taking land that the government has so nicely provided our community would just be an outrage. Please chose another spot.

Thank You,
Zach Sirkin

PS

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

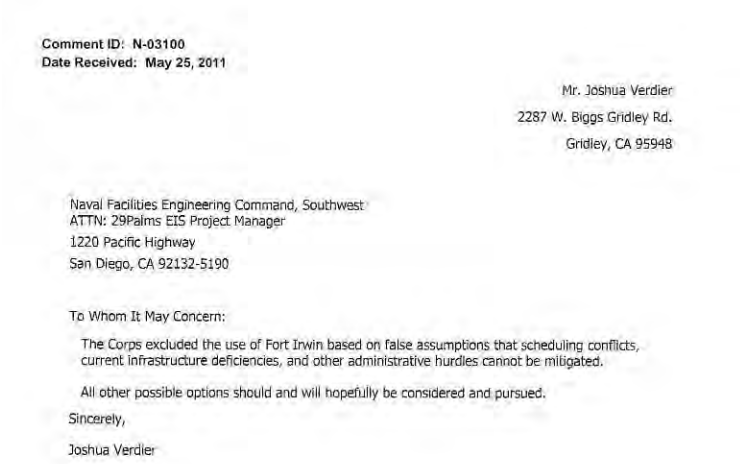
The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.



Sincerely,

Jeff Virgin

Response to Comment N-03099:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

Response to Comment N-03101:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

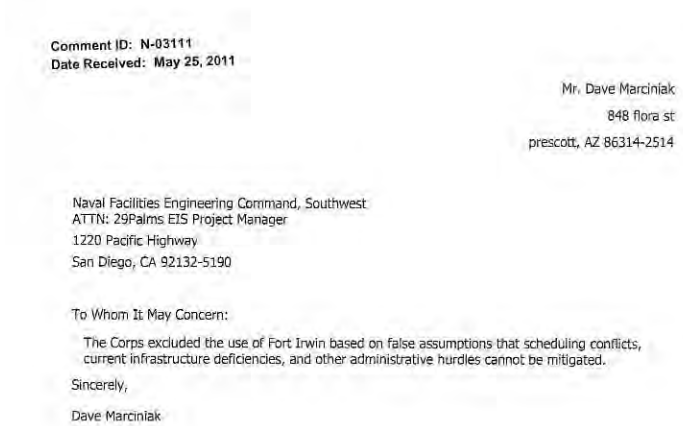
I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,



Randy Charpentier

Response to Comment N-03110:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

Response to Comment N-03115:

In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

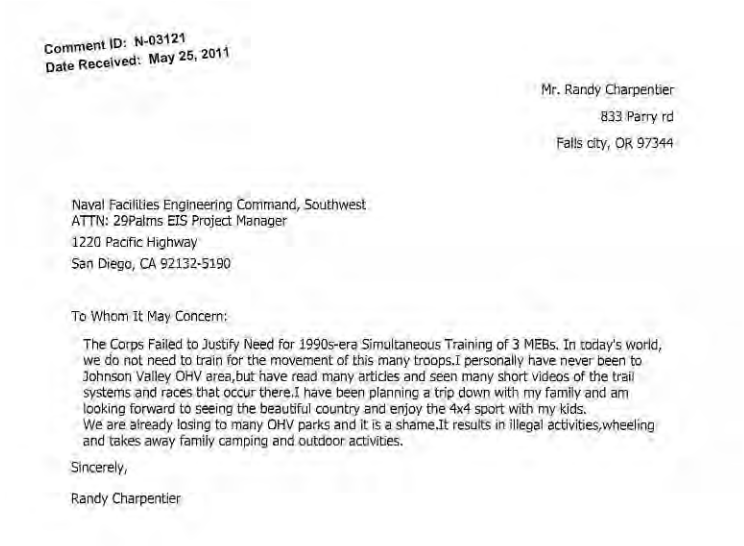
The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. it has been proven time and time again that conventional warfare is a thing of the past. guerrilla warfare has become the norm since vietnam. practicing large battles encompasing massive troop movements are over. we are no longer fighting other large countries, it is small groups that are emboldened when they can strike at the mighty U.S. Military and get away with it. as such, there is no reason that the marines need this public relations nightmare dream of expanding an already huge military base. destroying a family recreation area just to get an EVEN LARGER PART OF THE DESERT is ludicrus. start showing more results than finally getting 1 guy after TEN YEARS OF LOOKING, then we the public might see a need to expand a training area. i support our military, but public opinion is waning on a military that WASTES BILLIONS OF DOLLARS with little to no results. you have a place to practice, its called Afganistan. show us some results there and maybe you'll get your wishes.



Sincerely,

justin bunch

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

To Whom It May Concern:

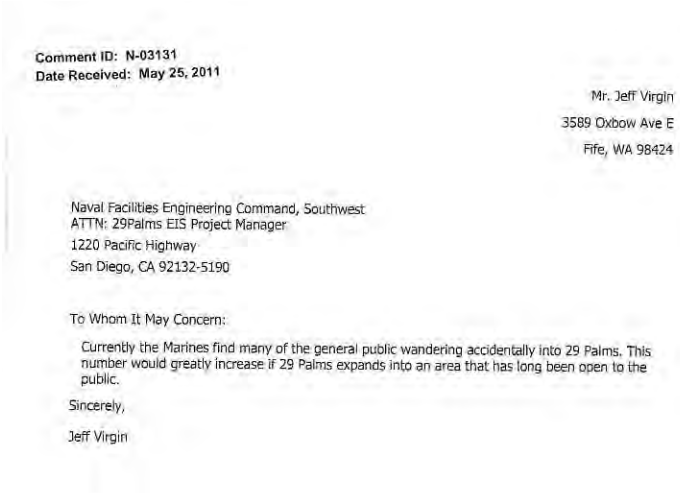
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. As a person that attends offroad events in Johnson Valley I have found myself on the edge of the base boundry many many times. I come to the area and are aware of the where the boundries are located. What would happen if the marine base would move into other areas that have long since been open to the public. Is the government going to take into consideration marking the boundries again to keep the general public safe?



Sincerely,

Doug Bigelow

Response to Comment N-03130:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

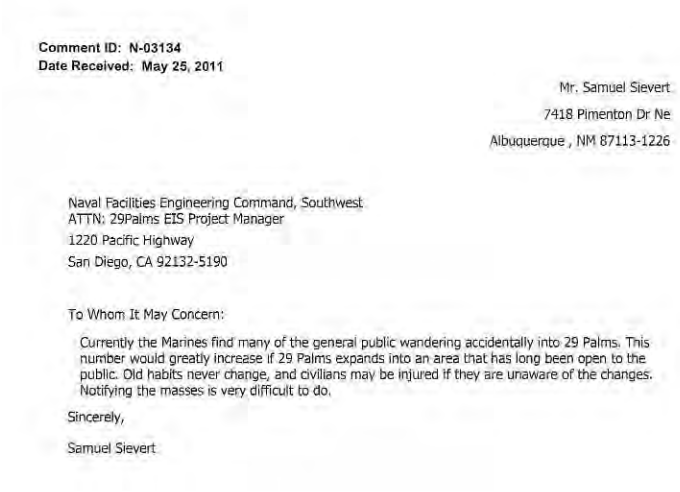
The risk to the general public will increase if the USMC is allowed to move into the Johnson valley area. People already wander into the existing 29 Palms area accidentally. This would only increase the number of incidences of the public encountering un-exploded ordinance, or encountering military vehicles moving at high rates of speed.



Sincerely,

Kirk Humphrey

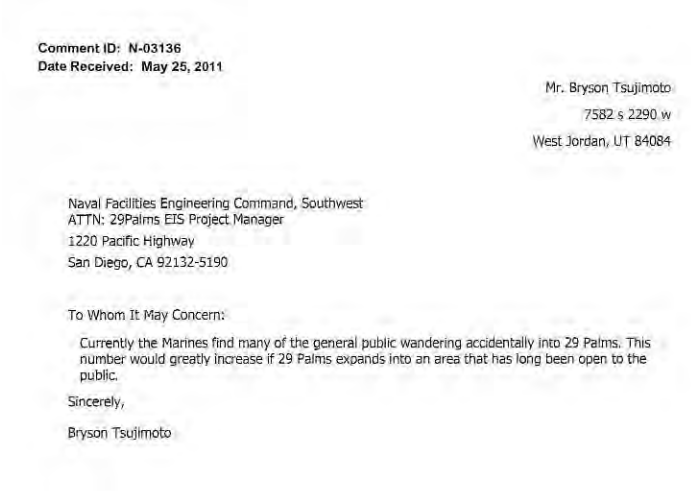
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

As a member of a specialized search and rescue group geared toward motorized recreation, the more land taken from the public will result in continued overcrowding of existing off-road areas. This resulting in more serious injuries.

Sincerely,



Kim Carpenter

Response to Comment N-03135:

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the Draft EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

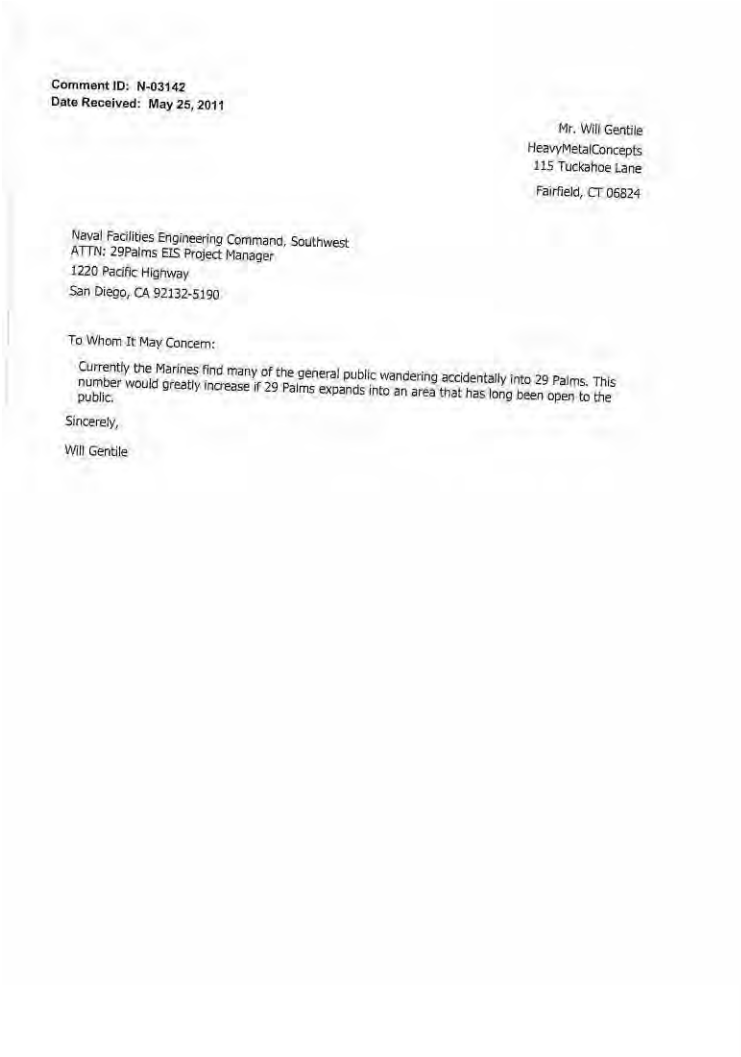
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,



Randy Charpentier

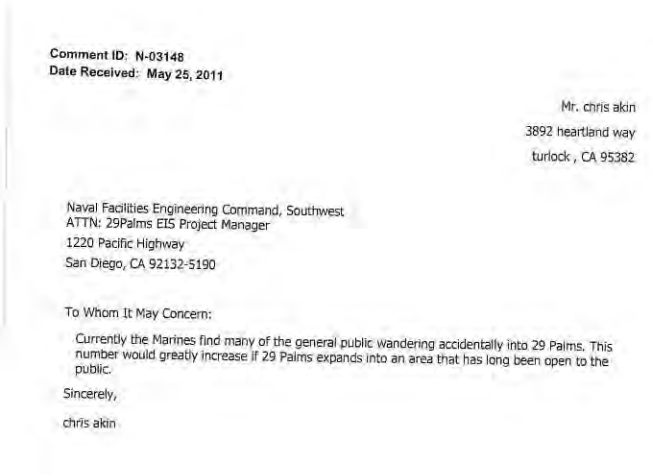
with Johnson Valley currently open to the general public for various activities, the Marines currently find people accidentally wandering into 29 Palms.
Under the proposal to expand the base into Johnson Valley, this situation will most likely escalate as people will be traveling in areas open to public access at this time. With the possibility of live ordinance in the area, the safety of the American public will be compromised.
It is my hope that the Marine Corp will seriously consider the other viable alternatives to expansion into Johnson Valley.

Sincerely,



Richard Wilson

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.

Sincerely,

Michael Gonos

Response to Comment N-03150:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

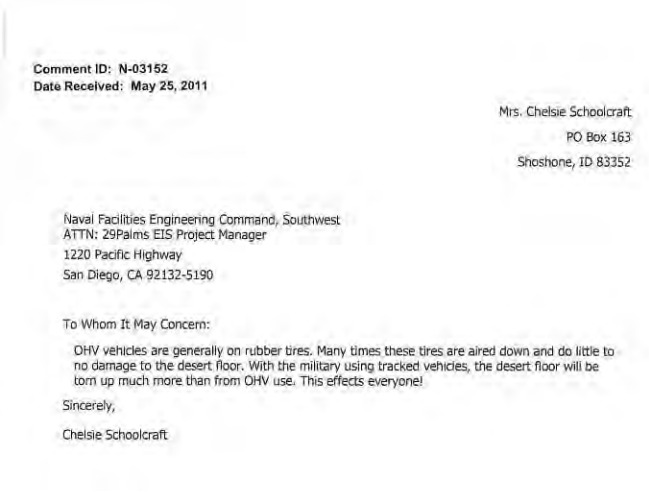
To Whom It May Concern:

I'd like to bring up the idea of tracked vs. non-tracked vehicles. OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.



Sincerely,

Derek Lasini

Response to Comment N-03151:

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. Military vehicles are also generally much heavier than OHV vehicles. Heavier vehicles compact the dirt which makes it near impossible for many plants to grow. It is important for plants to be present because plants help prevent top soil erosion. Less top soil means less plants that grow, which will cause this to turn into a positive feedback loop and eventually lead to the loss of most, if not all, vegetation in the area.

Sincerely,

Jennifer Benz

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

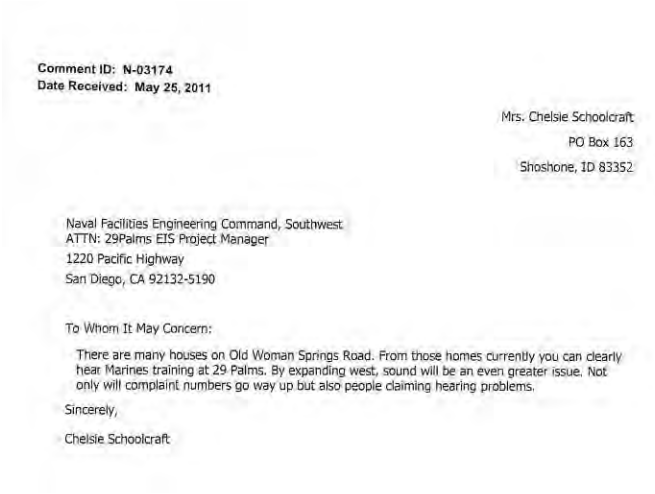
To Whom It May Concern:

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.



Sincerely,

Bryson Tsujimoto

Wicth is even a better reason to move east to get farther away from people. The desert can be a nice quite place to relax it is clear that there is no noise pollution from OHV use, but with the Marines there would be noise pollution.

Thanks

Rusty Folena

Sincerely,

Rusty Folena

I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

Response to Comment N-03184:

To Whom It May Concern:

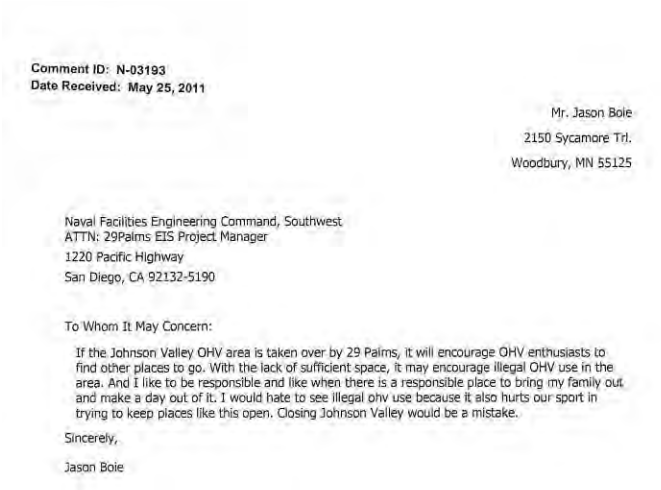
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Phillip Vieira



Response to Comment N-03192:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS. The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. I recently moved to the Riverside area and have first hand heard concerns from neighbors and local businesses that the reduction of land in Johnson Valley for OHV use would impact them in a negative way.

Sincerely,

jess kellogg

Response to Comment N-03197:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS. The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

prescott, AZ 86314-2514

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

Dave Marciniak

Response to Comment N-03201:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS. The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Tim Richards

Response to Comment N-03224:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

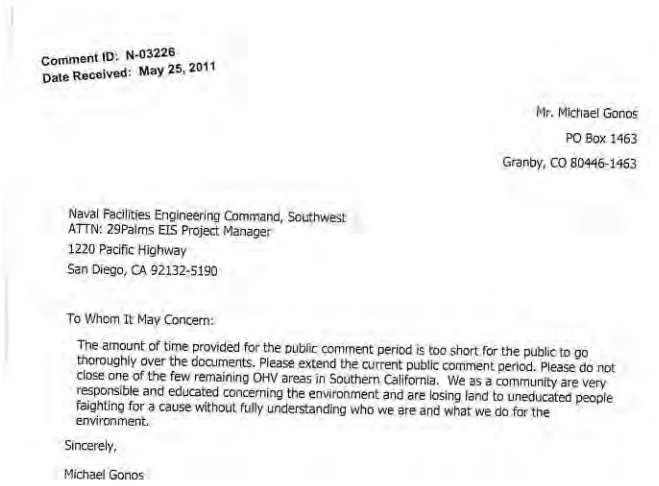
To Whom It May Concern:

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.



Sincerely,

Bryson Tsujimoto

Response to Comment N-03230:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period. I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

Response to Comment N-03233:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

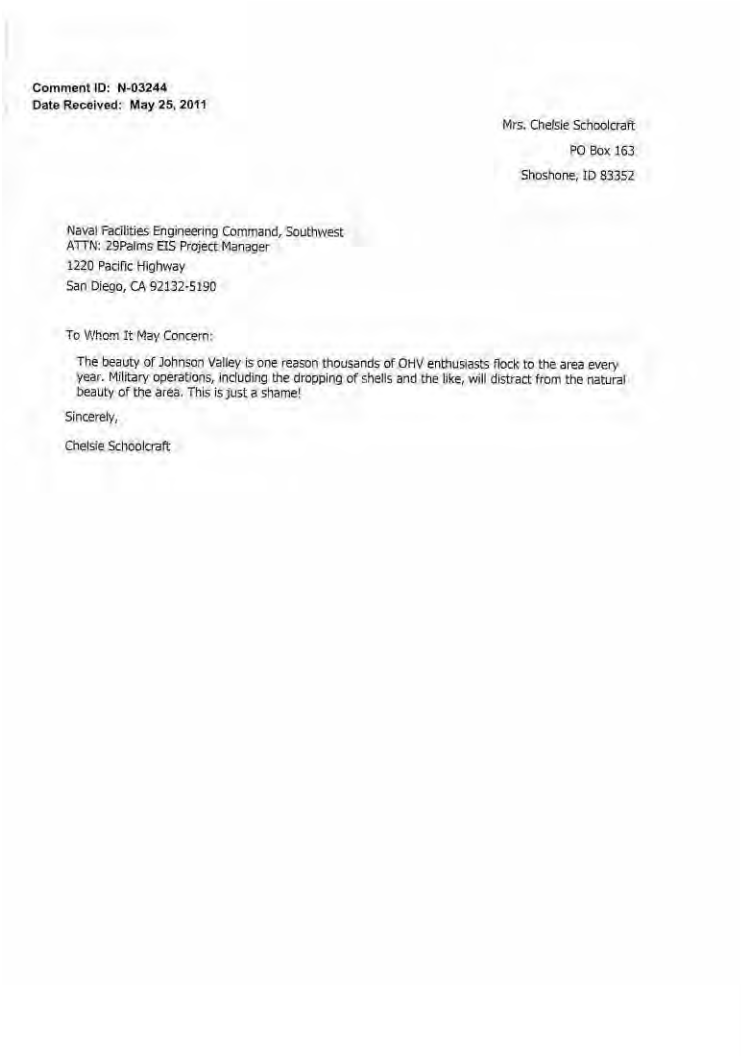
I'd like to bring up the point of the land quality decrease that will occur if the Military expands West. The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area. PLEASE expand eastward.

Sincerely,



Derek Lasini

Response to Comment N-03243:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

San Diego, CA 92132-5190

To Whom It May Concern:

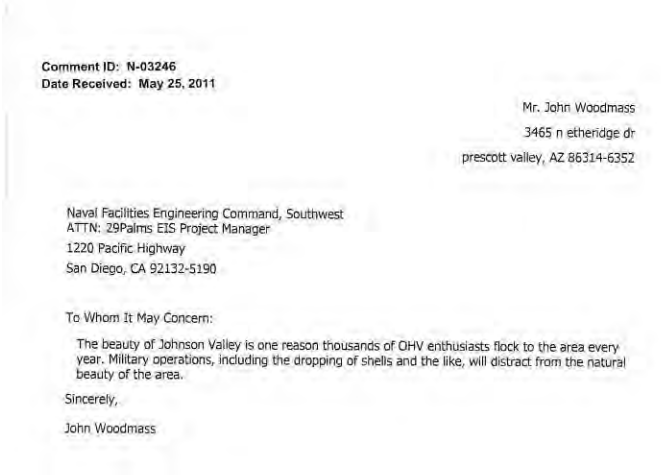
The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.



Sincerely,

chris akin

Response to Comment N-03256:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

To Whom It May Concern:

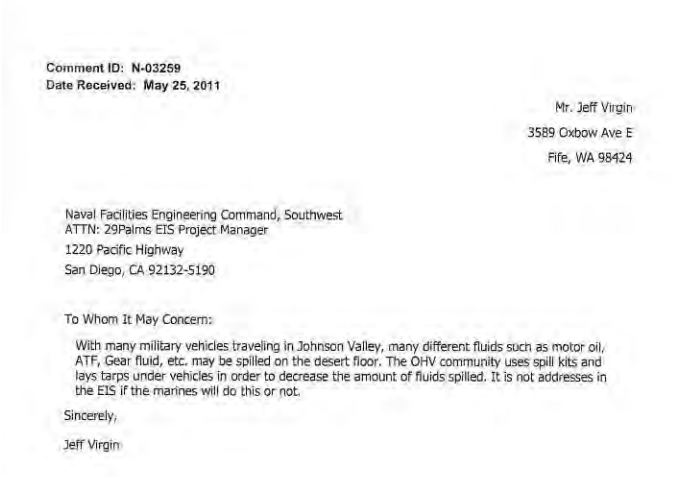
With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not.



Sincerely,

Corinne Haynes

Response to Comment N-03258:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

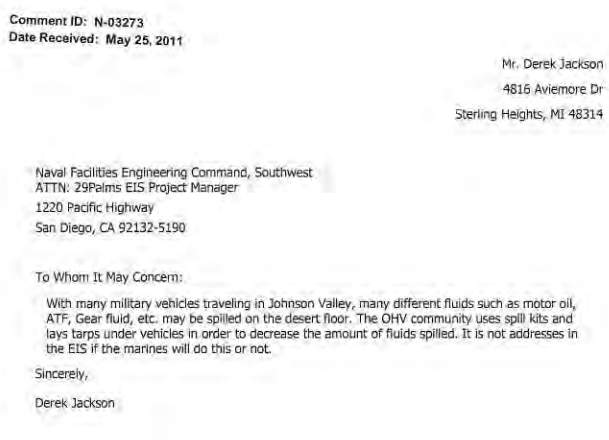
The OHV community cares very dearly about about our sport and the terrain we drive on. We try and make sure our vehicles are in top working condition and always like to plan for the worst, including fluid spills. We have the knowledge and tools deal with such incidents. Many of us also participate in reguiar area clean-ups to ensure our land we use looks as good as it does today for generations to come.



Sincerely,

Colin Ciecior

The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addressed in the EIS if the marines will do this or not.

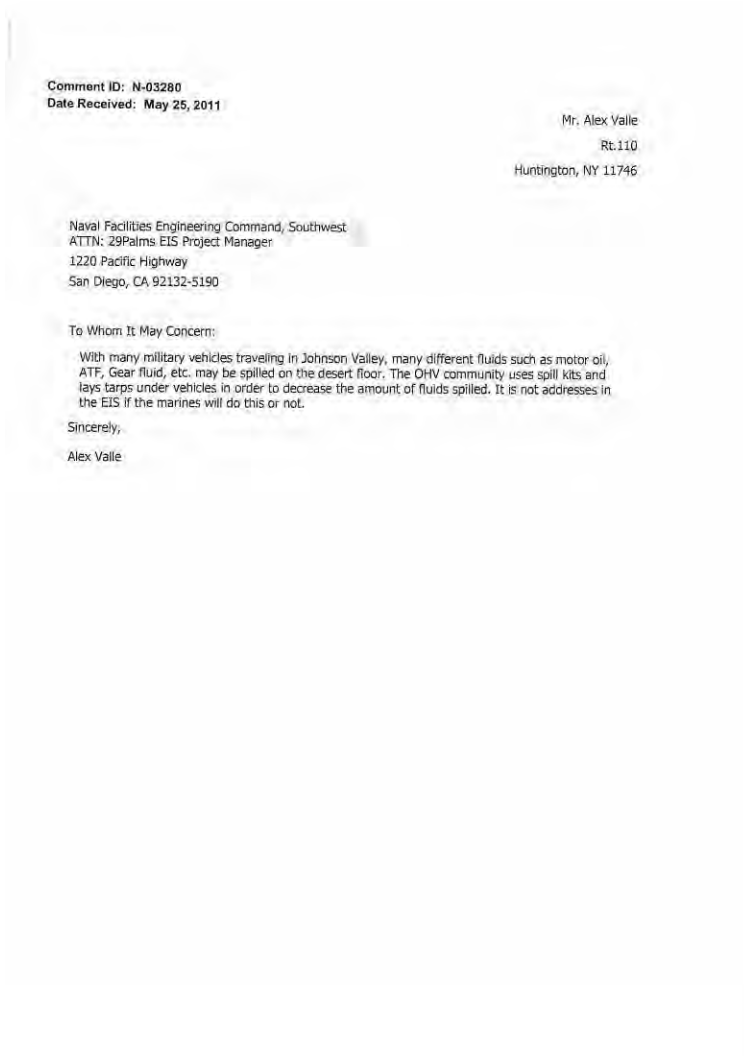
Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,



Phillip Vieira

Response to Comment N-03279:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

San Diego, CA 92132-5190

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Alex Valle

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS. This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.

Sincerely,

Michael Gonos

Response to Comment N-03282:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

chris akin

Response to Comment N-03293:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

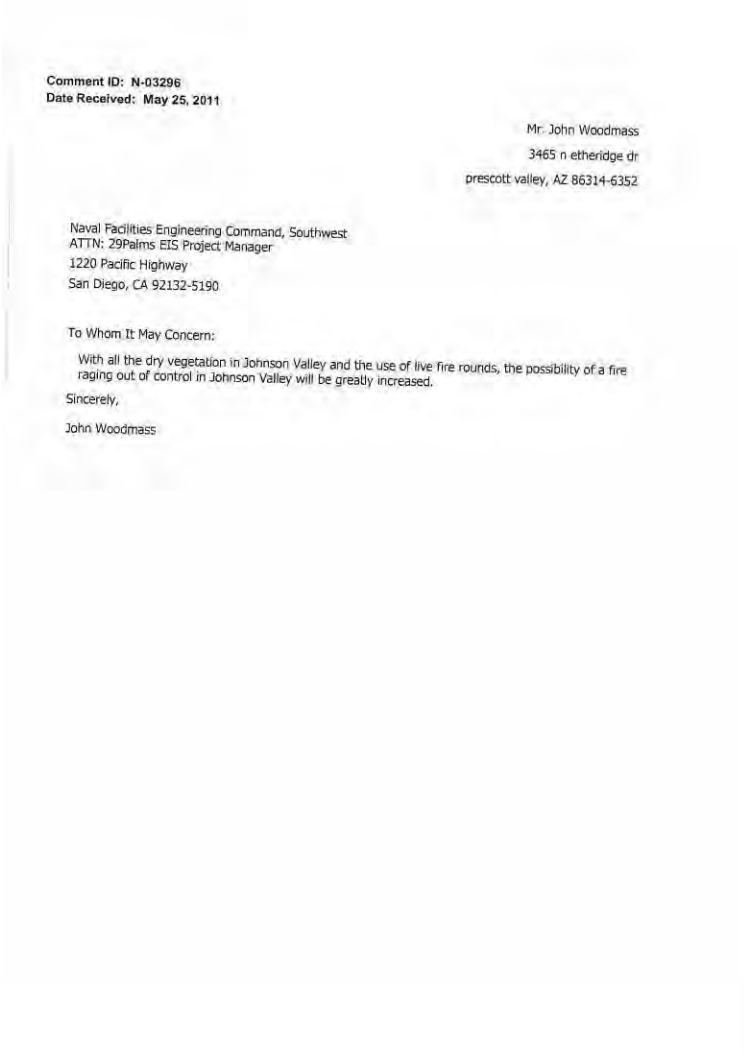
To Whom It May Concern:

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.



Sincerely,

Bryson Tsujimoto

To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use." This is one of the few remaining OHV areas in Southern California. We as a community are very responsible and educated concerning the environment and are losing land to uneducated people faighting for a cause without fully understanding who we are and what we do for the environment.

Sincerely,

Michael Gonos

Response to Comment N-03304:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.

Sincerely,

Randy Charpentier

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Alyssa Todd

Response to Comment N-03316:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

While I fully support the USMC, is this expansion really necessary with the current political situation? With all the military bases through out California, Nevada, Arizona there are plenty of locations for this type of training. Please consider another location or expand east into the desert that isn't alocated to OHV use.
Thank You

Sincerely,

Michael Baker

Response to Comment N-03318:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Truckee, CA 96161

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Daniel Kennedy

Response to Comment N-03324:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? I can understand the need for additional training area, but I must ask that you consider the impact that the expansion will have on the community. Families and others have used the Johnson Valley area for decades. Holidays, birthdays, organized events and races are held there year round. An expansion into this area would negatively impact the surrounding community and economy. Each year, the King of the Hammers race is held there. This single event alone brings in millions of dollars of revenue to the surrounding area. Restaurants, hotels, and vendors will suffer if the area is closed to public use.

Sincerely,

Frederick Bunkley

Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. Additionally, the OHV industry has seen a number of manufacturers shut their doors in these tough economic times. It pains me to think that the USMC would contribute to the possible failure of any more of these companies. The livelihoods of a number of American families depend on keeping this area open for public use.

Sincerely,

Donald Nywening

Response to Comment N-03350:

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

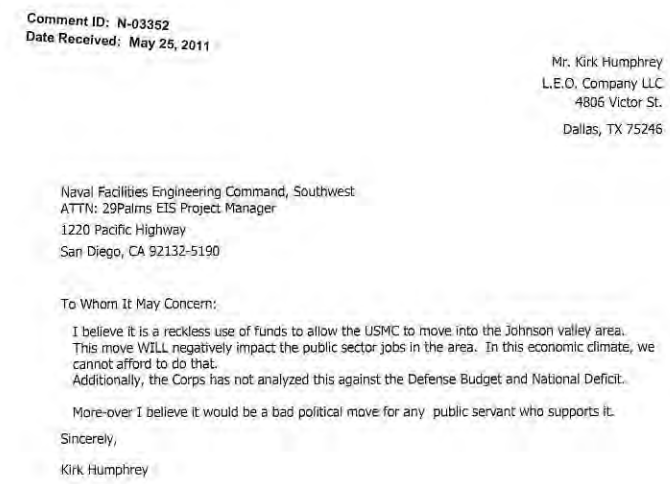
To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. What we do is finally being recognized for being more than a hobby, instead it's being viewed as a sport. That has been mostly because of events like King Of the Hammers, which now with the internet has become viewable to everyone in the US. The dramatic impact would be worse than whats happened to us on the east coast with the closing of Tellico OHV. Please take these things into consideration. This is the "land of the free"...please don't take our land and allow it stay that way.



Sincerely,

Josh Burkett

Response to Comment N-03351:

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

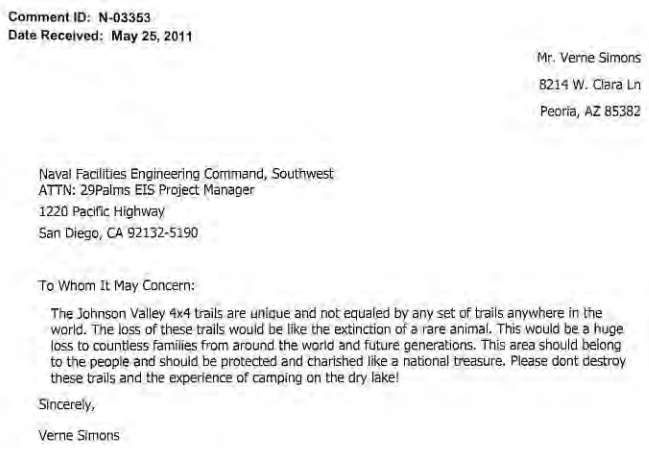
To Whom It May Concern:

I believe it is a reckless use of funds to allow the USMC to move into the Johnson valley area. This move WILL negatively impact the public sector jobs in the area. In this economic climate, we cannot afford to do that.
Additionally, the Corps has not analyzed this against the Defense Budget and National Deficit.

More-over I believe it would be a bad political move for any public servant who supports it.



Sincerely,

Kirk Humphrey

Response to Comment N-03352:

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The Johnson Valley 4x4 trails are unique and not equaled by any set of trails anywhere in the world. The loss of these trails would be like the extinction of a rare animal. This would be a huge loss to countless familiies from around the world and future generations. This area should belong to the people and should be protected and charished like a national treasure. Please dont destroy these trails and the experience of camping on the dry lake!

Sincerely,

Verne Simons

Response to Comment N-03353:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Over the last 15 years my family and I have been traveling to Johnson Valley for camping, four-wheeling, and many other adventures. I can say we have folders of pictures and great memories of our time spent here. I believe some of our best family memories are spent in one of the most beautiful unique areas in the United States. Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". I have personally meet individuals from 4 different states traveling to this mecca to experience the same thing my family has experienced. This area has become unique and iconic as Moab and the Rubicon. I believe each part of the United States needs an area to attract wheelers and develop the culture of four-wheeling. For this area to be taken away will destroy Southern California's most sought after and traveled four-wheeling spot. Please go east instead of West. Thank you

Sincerely,

Brett Hayes

Response to Comment N-03354:

To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it.

I am a SSgt in the United States Marine Corps and have just recently gotten into the sport of Offroading and spend most of my time doing it at Johnson Valley OHV. All of the people I go with are also Marines that I'm stationed with here at 29 Palms.

Spending time at Johnson Valley not only affords me the opportunity to get off base and explore the great areas of desert that surround the base, but gives me a chance to spend some recreational time with family and friends. I think Johnson Valley OHV is a great place and gives many other Marines a chance to enjoy this desert that many dislike.

A lot of people will tell you that they don't like being stationed at 29 Palms. There is nothing but desert, and and it's hot all the time. The economy in the area is below average and there's nothing fun to do here.
I disagree. I think being stationed in 29 Palms affords you the opportunity to enjoy what you make of it. The Marine Corps teaches us to adapt and overcome. My friends and I have done just that. We have found a way to enjoy the environment that we live in and to help make it better by policing those that don't police themselves.

If the Base expands to take over Johnson Valley OHV I feel that many Marines that enjoy the area and the opportunities that it affords will find somewhere else to offroad and drive their off highway vehicles. Without a designate place to do this like Johnson Valley it could become an even more dangerous sport that has little to no regulation.

When we go to Johnson Valley OHV we know that we're going to a place where people enjoy their vehicles offroad. We expect to see others doing the same thing we're doing and we plan for it. If you go to a random place in the desert that isn't regulated people will be all over doing crazy stuff that they probably shouldn't be doing. Many people that enjoy these other areas won't be expecting OHVs and it could create some extremely dangerous situations.

Many people spend a great deal of money to enjoy this OHV lifestyle. They will not stop "offroading". Make it save for everyone and leave Johnson Valley OHV the way it is. It will be better for the community, the environment, the economy, and the welfare of those who enjoy the area.

Sincerely,

Response to Comment N-03355:

Thank you for your comment. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, the economic impact must be considered. Not only has this area specifically become the crowned jewel and most significant race of the off-road community, but it has invigorated an area to provide services that were not previously offered. It has provided livelihood to many families. It has also invigorate the national off-road community to host similar type events and provided necessity to a specialty automotive industry. By doing so, not only are more companies becoming a part of this... but true capitalism for advanced performance and lower cost products are being put on to the market. This is then translated into general consumers interest for the same products across the nation. Losing this area would stiffle a growing industry and leave many families searching for different venues.

Sincerely,

Ian MacKenzie

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. Several studies regarding the current trend in government to change public land management policy from "open unless posted closed" to "closed unless posted open" have been performed by various user groups. Those studies reveal that the most prevalent reason for closures of previously open public lands is encroachment by various government agencies on these lands. The various branches of the armed forces have been active in seeking to expand their training facilities and expanding on those areas that have been traditionally used by user groups whose activities require remote, rugged terrain for enjoyment. While these areas may also fit the needs of the military, it is my opinion that the current expansion is more politically motivated than needed for training. I live in Colorado where the US Air Force recently appropriated land that included several very well known OHV trails and in doing so, closed these areas for public recreation. Since that time, no activities such as building, training of ground troops, or ordinance detonation has taken place. The land is now vacant and useless to anyone!

Having been raised in a US Army family, I know that the military exists at the whim of Congress and expansion is necessary to justify current budgets and ensure the continued disbursements of the Ways and Means committee.

I would ask, as a member of several public land user groups, that the US Marine Corps (Semper Fi!) look elsewhere for appropriation of property on which to expand their training facilities. Johnson Valley, California has been a traditional area of recreation for many generations and many people have not yet had the opportunity to enjoy what this area has to offer. If you take it, it will only be one more thing the government has taken from the citizens of the country it is supposed to be serving.

Sincerely,

Sherman Mathieu
Montrose, CO

Sincerely,

Sherman Mathieu

Response to Comment N-03359:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. I'm a 20 year old 4000 miles away in Chesapeake Virginia and yes i have participated in illegal 4x4. I don't anymore however. "BUT" shrink and take away all our "public" land and ohv areas/parks(Paragon, Tellico) then enthusiasts such as myself may start going to the alternative. What right does authority have to take "PUBLIC LAND." Authority wonders why we wheel illegally and go against the grain when they're the ones slowly steeling from us and pushing us to break the law. I'm so sick of opening a new magazine and seeing another ohv park or section of public land at risk. Like i said, I'm 20 years old and i live in Virginia, quite a ways away from the issue I am writing about. But some of my hopes and dreams have been washed down the drain, such as the issue of Tellico and Paragon. Two iconic OHV areas on the east coast. I grew up reading magazines about how great of places these were will i ever get to visit them? NO!!! And it really gets my hate flowing to hear that someone else wants to take more public/OHV areas and make something "productive" out of them. And I'll stand in front against this and the people involved because its wrong. What reason does 29 Palms have for wanting to expand? What would they possibly need miles of desert, rocks, and 4x4 paradise for? That land has 10 times the value to four wheel enthusiasts then the military. They probably wouldn't do anything with it once they got it anyways except put up more "No Trespassing" signs.

Sincerely,

Jamie Henson

Response to Comment N-03360:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I am writing you this letter to express my concerns with the possibility of the Marines expanding the 29 Palms military base into the Johnson Valley OHV area, home of the King of The Hammers desert race.

I travel from Tucson Arizona yearly to enjoy this unique OHV area. What looks like wilderness waist land In a very hot windy dry desert is very unique to OHV recreation. Loosing some or all of the Johnson Valley area would kill the King of the Hammers rock race event that tens of thousands enjoy.

Johnson Valley is an icon of how OHV recreation parks should be managed.

Please consider the uniqueness and understand the public interest in continued use of Johnson Valley as an OHV park.

Thanks
Dave Ashman

Dave Ashman

Response to Comment N-03361:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The marines seem to think that expanding into the Johnson Valley OHV area is the best possible way to train our military for it's current conflicts. Obviously I am a supporter of the military (current active duty US Navy) and want nothing more than to have our soldiers/sailors/airmen/marines as well trained as humanly possible. But I am whole heartedly AGAINST an expansion into the Johnson Valley OHV area to do that when there are better suited options available.

As someone who stands to lose the right to recreate in the Johnson Valley OHV area, I feel there has not been enough time for the public to adequately asses the impact the Marine expansion into the area will have. Obviously the idea to expand west into the Johnson Valley OHV was not made over night but it appears the general public will not be given what I feel is an adequate amount of time to review the submissions by the Marines. For well over 2 years the Marines have talked about expanding, but we will have had less than a half a year to read through thousands of pages and respond with our opinion. I feel that this is not enough time and am asking for an extension so that every option is adequately reviewed and that a hasty decision is not made.

Sincerely,

Christopher Rea

Response to Comment N-03362:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

We are a family that has had a vacation home in the Johnson Valley Community for over 20 years. We have seen this area grow into a Mecca for the OHV world. Seeing families every weekend driving from all over the U.S. to recreate and spend their hard earned money in the surrounding communities. As a young man starting a family with just a wife and 16 month old daughter I urge the powers that be to reconsider their decision to expand 29 Palms into the Johnson Valley OHV area.

Just as my wife and I have grown up in the area, I look forward to sharing the same experiences with my young daughter and future children. If 29 Palms expands into Johnson Valley OHV these places that have created life long memories will be off limits to them.

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Sincerely,

Jeremy Farrell

To Whom It May Concern:

While I fully support the USMC, is it not possible to expand to into a different area? The Johnson Valley OHV Recreational Area is irreplaceable to the OHV community.

Sincerely,

Andrew McRory

Response to Comment N-03366:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The analysis presented in Section 4.2 acknowledges and discusses the impacts that reduced access to recreational lands in Johnson Valley would have on increased usage in other areas and potential overcrowding. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS.

To Whom It May Concern:

I would encourage the Marines to expand East instead of West, this was an area previously used by them, so they should be familiar with it. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area.

Also, the purpose of the plan seems in doubt given the stated withdrawal of troops from Iraq and Afghanistan within the next several months. If we are not in the Middle East then why pursue a plan that is no longer needed.

Obviolusly, the plan lacks vision, consideration of economic consequences, and ignores the impact on the enviorment. Perhaps some planning should actually go into the plan.

Finally, the proposed expansion seems to ignore the pending reduction of the miliary budget that will occur within the next budget cycle, so the entire stated purpose of the plan seems to lack the financial support to ever get off the ground. This proposal appears to be just another waste of taxpayer dollars.

I'm a supporter of the military, but this an idea that has no viable purpose or reason.

Sincerely,

Robert Marshall

Response to Comment N-03367:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

To whom it may concern;

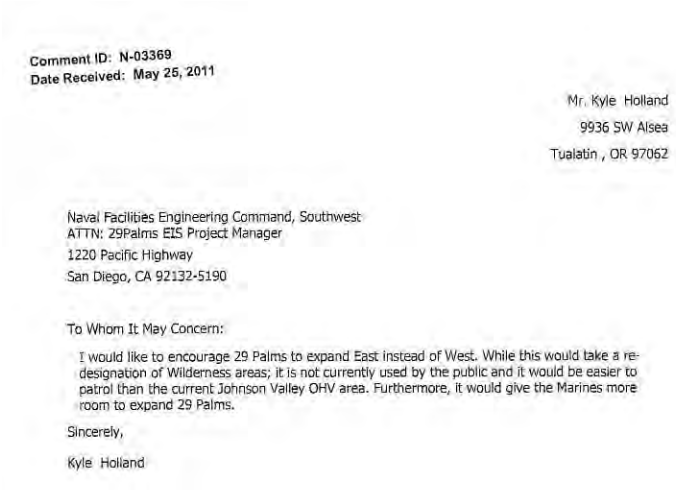
I'm writing this letter in regards to the potential loss of one of the Southwest's greatest destination; Johnson Valley. Like many others from across the world as well as the US, we travel here for the fun, excitement, and beauty the area has to offer. I make the trip from 3000 miles away in Ontario, Canada because of the uniqueness of this area; others I've had the pleasure of meeting there have been from China, the UK, Australia, and the list goes on..

Expanding the military base into this area has really concerned me and I'd like you to know what kind of detriment closing this area would be. This is one of the last great OHV destinations in the Southern US and by closing it down you'd be destroying much of the community that spends their hard-earned dollars on vehicles built to enjoy this majestic terrain.

The OHV community is very much proactive in keeping this area clean, staying on marked trails, and trying hard to conserve the area so that our children will be able to enjoy this area for years to come.

Please do not expand into the Johnson Valley; you'd be taking away from us something that is so very special.

Sincerely,



Anthony Bellotti

Response to Comment N-03368:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Furthermore, it would give the Marines more room to expand 29 Palms.
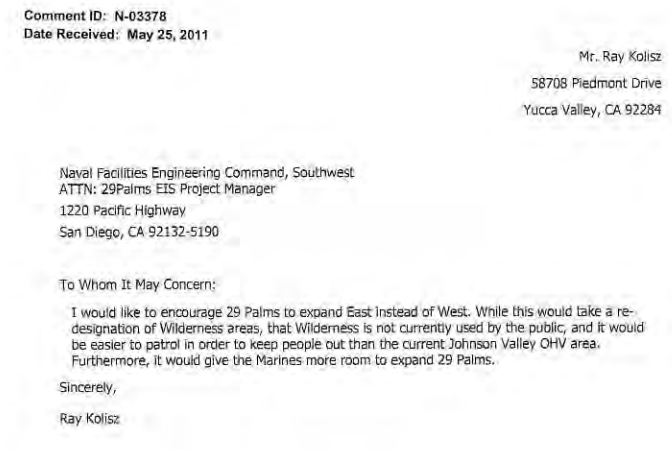
Not only more room to expand but the Marines could help keep one of the best ohv areas in the world alive. Public perception is of great importance to the US military and being a veteran I realize the need of the support from the public.
My biggest question why would the Marines even consider ruining one of the best places for Off roaders in world?
Please reconsider destroying a great family vacationing location.

Sincerely,

Richard Buday



Response to Comment N-03377:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

As described in Section 1.3 of the Draft EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Response to Comment N-03384:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. Please consider this as I would like to bring my family there on day when I am more financially stable.

Sincerely,

scott taylor II

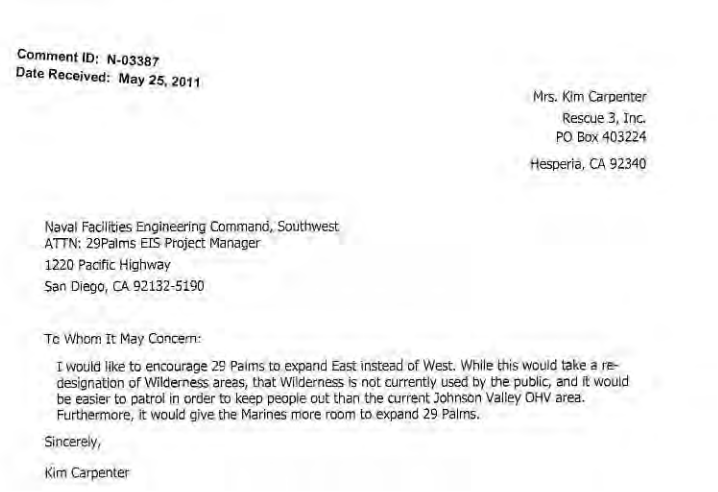
Furthermore, it would give the Marines more room to expand 29 Palms. This would be a win-win scenario for the government and the civilian population. You the government could expand your facilities even further than planned. We, the public, would be able to continue using Johnson valley ohv. If you closed this area down I personally think you would have a lot of people still trying to use it. This would just cause even more of a security issue.



Sincerely,

Andrew Barron

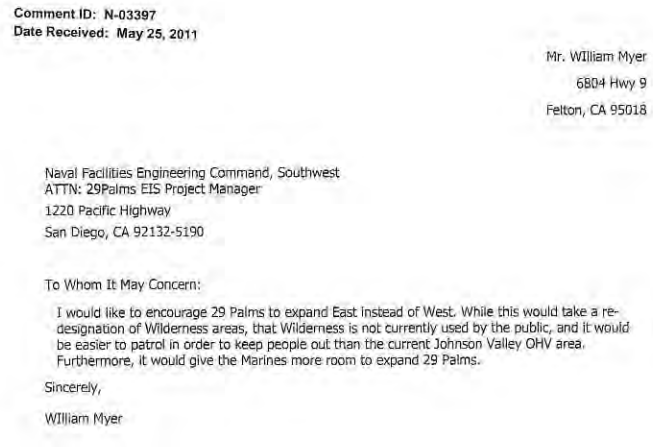
I personally have never been to Johnson Valley OHV area,but have read many articles and seen many short videos of the trail systems and races that occur there.I have been planning a trip down with my family and am looking forward to seeing the beautiful country and enjoy the 4x4 sport with my kids.
We are already losing to many OHV parks and it is a shame.It results in illegal activities,wheeling and takes away family camping and outdoor activities.



Sincerely,

Randy Charpentier

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Aside from the afor mentioned reasons, I strongly encourage 29 palms to expand east because of the negative impact the expansion will have on the ohv community. Everyone from manufacturers to families who live the off road lifestyle and enjoy the hobby will be negatively affected.

Additionaly, California is widely known for its beautiful landscapes and vast desert open for public use. Closing such an important land such as the JV area would be a great blow to California's tourism. As you may know, every year an off road competition called "King of The Hammers" takes place in the above mentioned area and this event draws thousands of people from the other side of the country to California to participate and watch this great race. Closing down the JV area from the public will have dire consequences on the economy of local businesses.

Therefore I strongly suggest the expansion is replanned to head east and avoid all these negative consequences of heading west.

Sincerely,

Govanny Davalos

Response to Comment N-03399:

Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

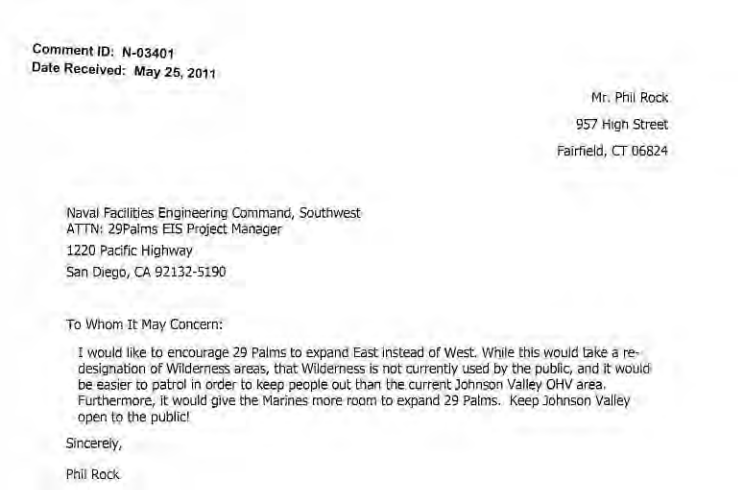
To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

John Woodmass

Response to Comment N-03405:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

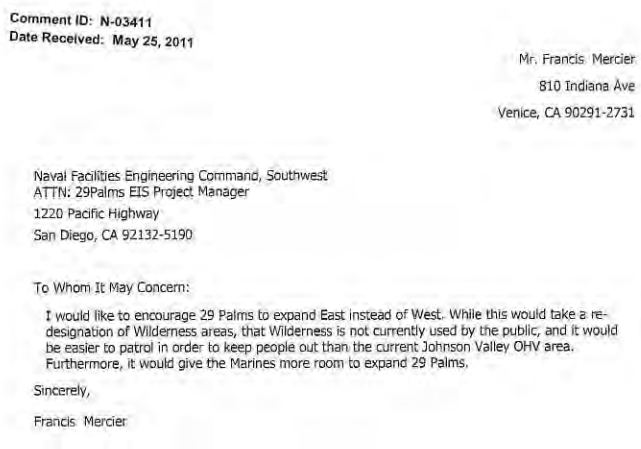
I am also an avid OHV operator, currently living in upstate NY. One of my dreams is to travel to Johnson Valley to experience the unique terrain that has been a centerpiece of of the OHV community for years. There are thousands of families that use this area each year and losing the area would limit the growth of our hobby and even some companies livelihood.



Sincerely,

Aaron Graham

To Whom It May Concern:

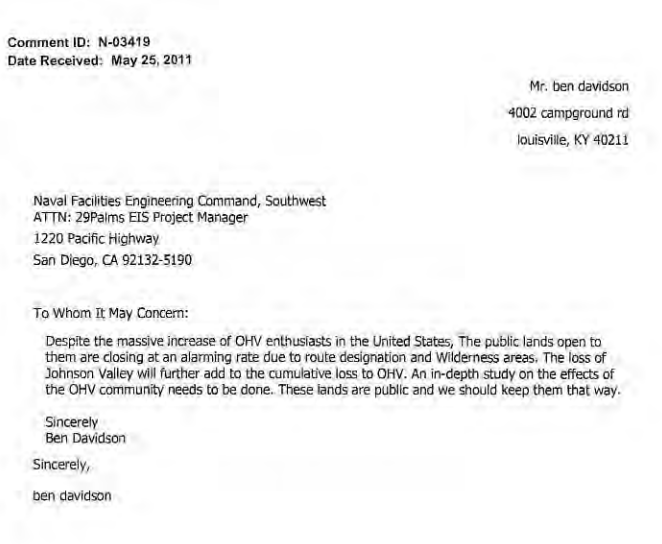
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.
There are becoming fewer and fewer places of wild beauty that can be enjoyed by the off-road community. To take away one of the "Mecca's" of off-roading would be a blow to a growing number of taxpayers that enjoy this area currently.



Sincerely,

Matthew Blain

Response to Comment N-03418:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Sirs,

I am writing today to voice my displeasure with the way that you are taking the O.H.V. area in Johnson Valley. Johnson Valley is one of the few places that families can go to enjoy off road driving in southern California.

You have stated in a public meeting (DAC Victorville) that you would only be actively training in this area approximately two months out of the year but you want to close down off road vehicle access to most of the area twelve months of the year.

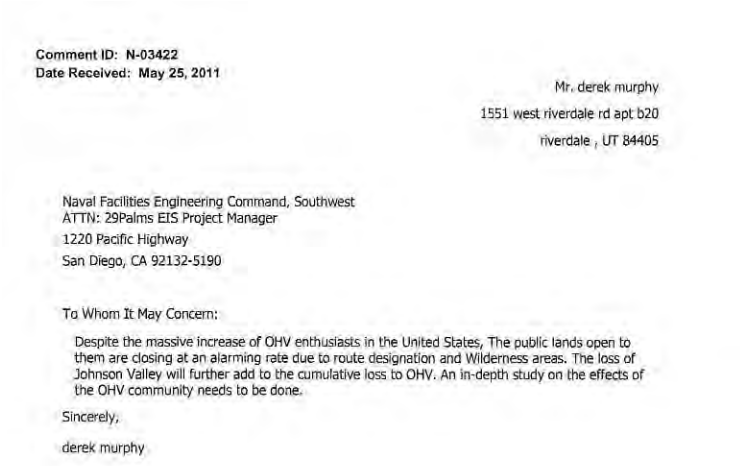
I would propose that you can still use this area for training but that the entire area be left open when not being used, while this would require you to "move in / move out" the support equipment it would also let you evaluate and train the support personnel under real life conditions and not just the fighting units.

I hope that you will look at the whole cost to this project including the income to local business and the vanishing public lands for families to recreate on.

John Dalgleish
Simi Valley, Ca

Sincerely,

John Dalgleish



Response to Comment N-03421:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

San Diego, CA 92132-5190

To Whom It May Concern:

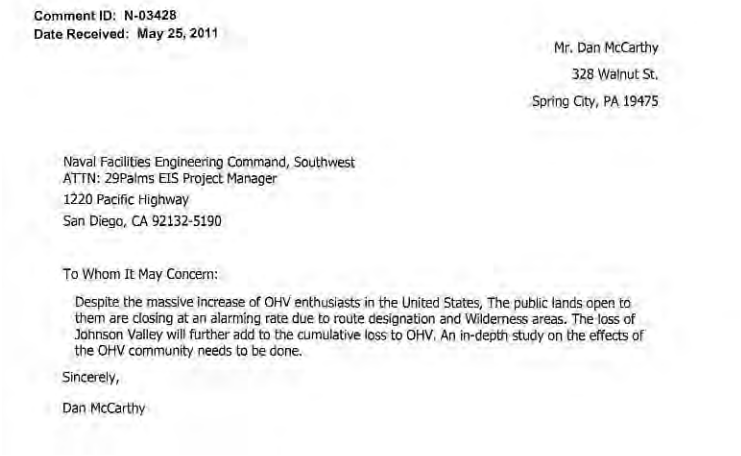
Please reconsider expanding into the Johnson Valley area. Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Heather Naong

Response to Comment N-03427:

Thank you for your comment. To Whom It May Concern:

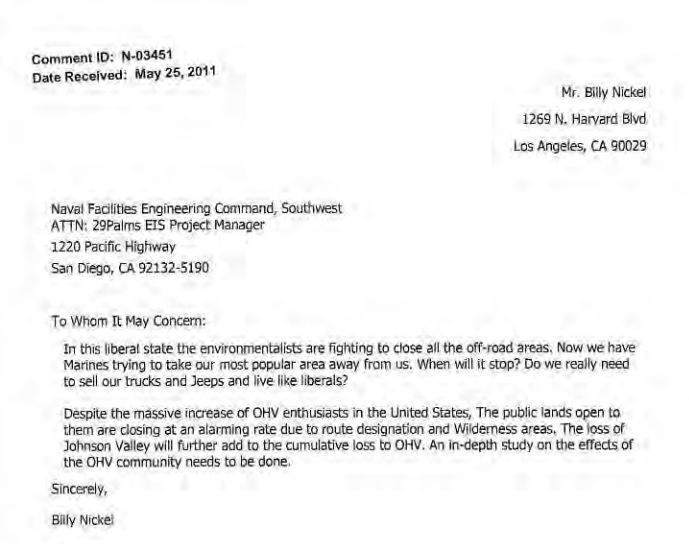
OHV is one of the fastest growing segments in recreation. It's a huge and growing industry and it requires open land for it's continued growth. In addition land is needed just to sustain what's already out there. Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Pushing more and more users into smaller and smaller areas not only adds to the strain on those lands it also leads to much bigger issues. Crime, accidents, conflicts between users, damage to the lands, trash, illegal use of closed land, etc. all go up exponentially when these areas start to get overcrowded. Plain and simple, we need this land just as much as, if not more than, the Marines do. OHV users dont have any more options opening up to them. The Marines DO have other options for expansion besides this very valuable piece of land.

Sincerely,



Amber Cisneros

Billy Nickel

Response to Comment N-03451:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Please go EAST instead, I'd love to take my family here. Would be a win-win for all involved.

Mike

Mike Mundinger

San Diego, CA 92132-5190

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race and YEARS of other important events.

Despite the massive increase of OHV enthusiasts in the United States, the public lands that are open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley - a premier location - will further add to the cumulative loss to OHV users without a suitable replacement. An in-depth study on the effects of the closure to the OHV community needs to be done. Johnson Valley is SACRED GROUND to our sport and our way of life; please do not take it from us!

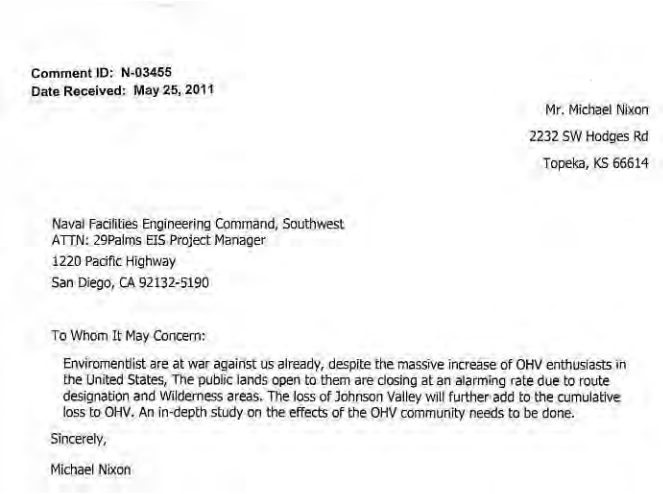
I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go East!

Thank you Marines!!!

Mike

Sincerely,



Mike Mundinger

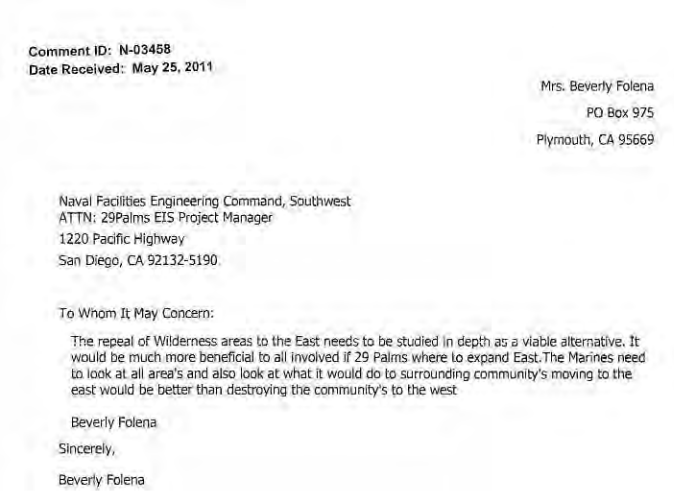
Many creatures live in and around the Johnson Valley. The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

Michael Nixon

Response to Comment N-03457:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

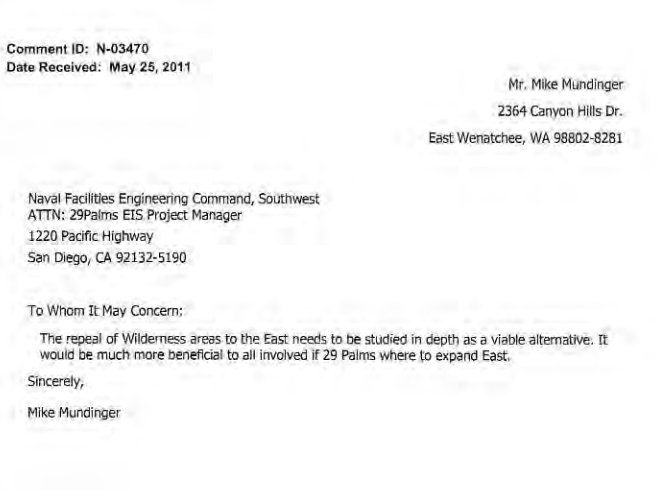
I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.

Sincerely,



Matt Caskey

Response to Comment N-03473:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

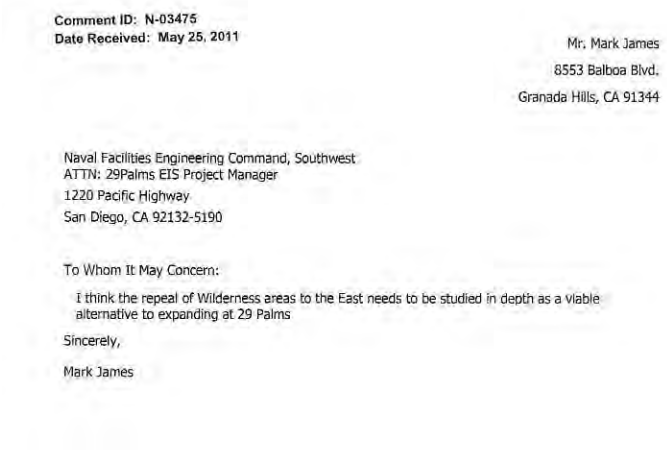
To Whom It May Concern:

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East. What about the tortoise? The Desert tortoise section in the DEIS does not address cumulative impacts and mitigation requirements. There needs to be an in-depth study on the effects on the desert tortoise and its environment and also a study done on how much funding this will take.



Sincerely,

Mike Mundinger

To Whom It May Concern:

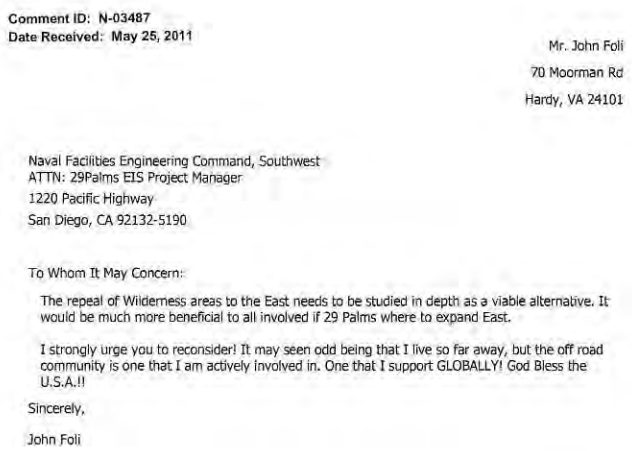
Johnson Valley is not the only open usable land around 29 Palms, there is land to the east as well. It is currently designated as Wilderness, which means that the public is already not using it. Expanding 29 Palms to the East makes much more sense than west into JV for many reasons. Recreation drives the local economy, and it also drives a huge industry that keeps many people employed. Taking JV takes away from a lot of people. Taking empty wilderness land effects almost nobody. The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

Amber Cisneros

To Whom It May Concern:

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East. The proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions has been on my radar since it became an issue.

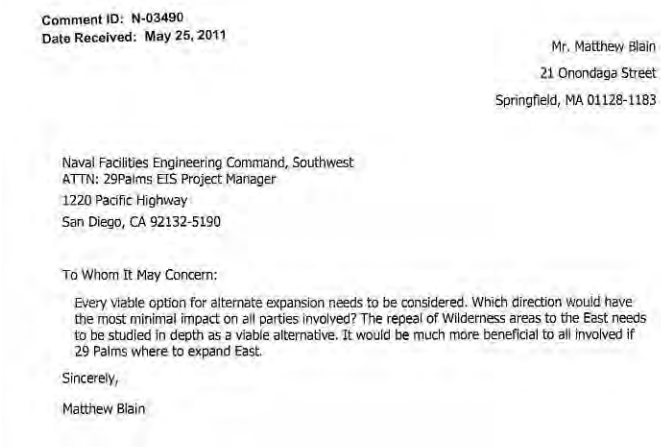
Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race and YEARS of countless other events.

I demand that the repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all stakeholders involved in Johnson Valley if 29 Palms were to expand East.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST Marines! THANK YOU!!!

Mike



Sincerely,

Mike Mundinger

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. I have been aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

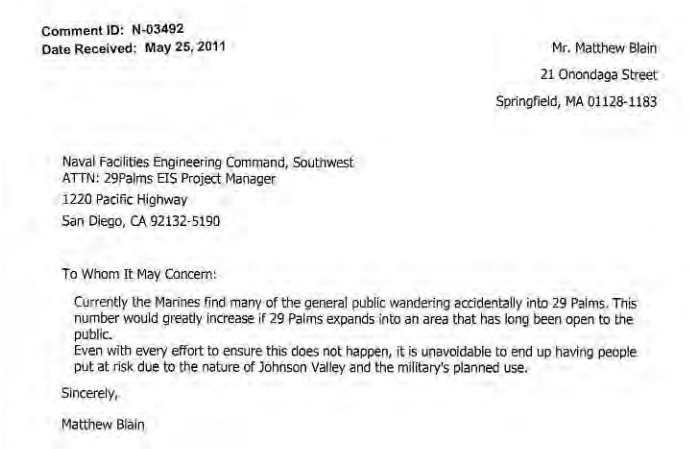
Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race.

Not only during the KOH race, but throughout the year, off-highway and other recreational uses brings thousands of users to the area. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST instead. Thanks Marines!!!

Mike



Sincerely,

Mike Mundinger

Response to Comment N-03491:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,

Derek Murphy

Response to Comment N-03496:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

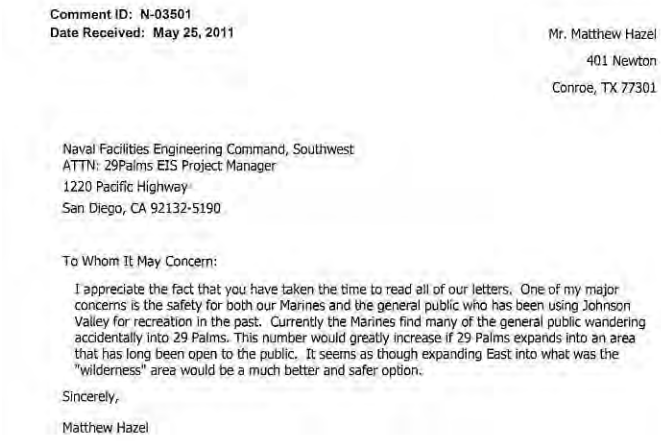
Currently the Marines find many of the general public wandering accidentally into 29 Palms. With the wide use of this area to please outside of the local community, I can imagine that many people will not be aware of it's closure. This will lead to an even great increase in the general public unknowingly and accidentally wandering into 29 Palms. Please consider expanding into areas already unseen by the general public as to avoid these accidents.



Sincerely,

Lesley Smith

To Whom It May Concern:

I appreciate the fact that you have taken the time to read all of our letters. One of my major concerns is the safety for both our Marines and the general public who has been using Johnson Valley for recreation in the past. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. It seems as though expanding East into what was the "wilderness" area would be a much better and safer option.

Sincerely,

Matthew Hazel

Response to Comment N-03501:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

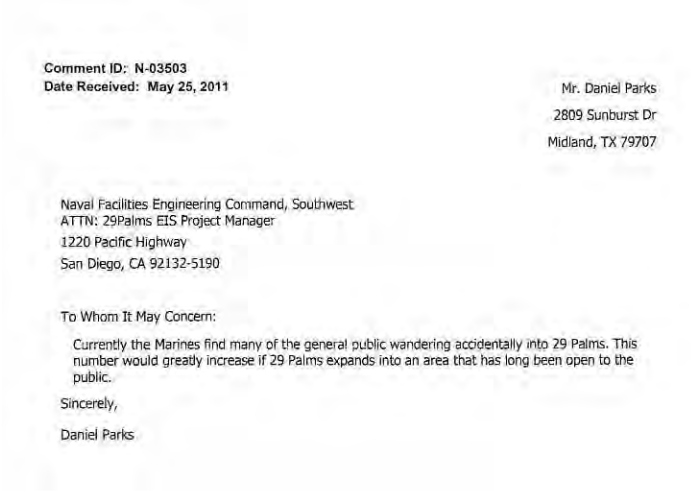
To Whom It May Concern:

I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,



Matt Caskey

Response to Comment N-03502:

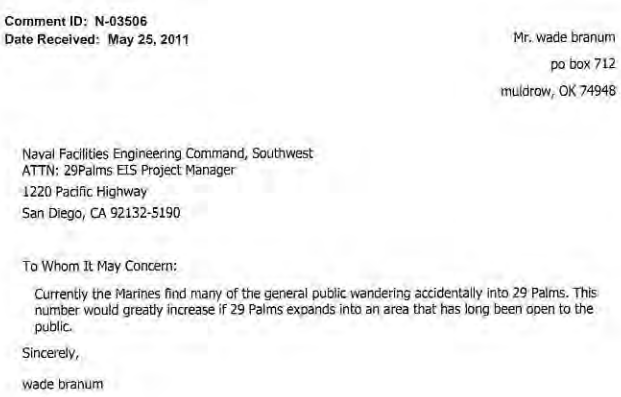
Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. Due to the popularity of the area in the OHV community, I imagine that many people not local to the area will be an aware that this area is closed. This seems like a problem that will plague for many years to come. A solution would be to expand to areas that aren't currently in use to the general public.

Sincerely,



Evelyn Smith

To Whom It May Concern:

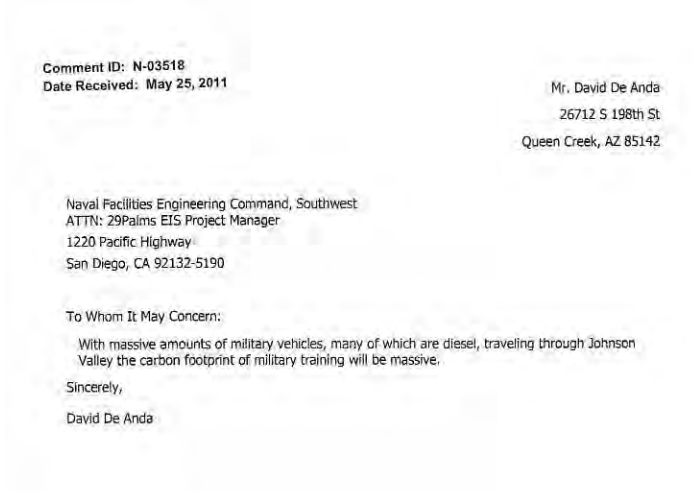
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

David De Anda

Response to Comment N-03517:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Response to Comment N-03520:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

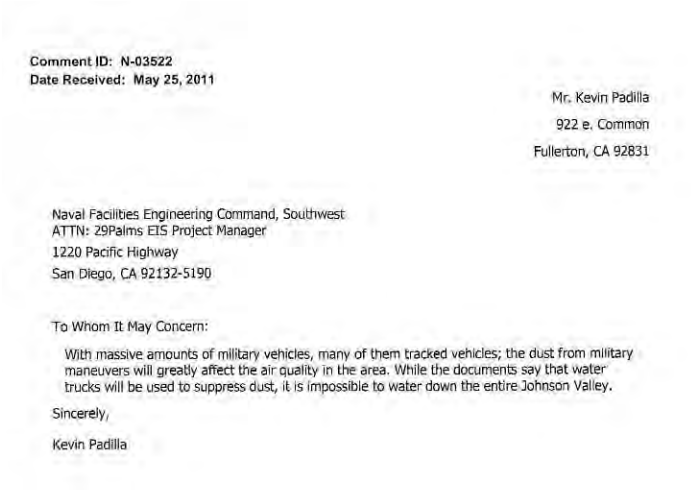
To Whom It May Concern:

First of all, I'd like to thank you for taking the time to read these letters. With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. Not only that, but if it was even logistically possible, the amount of water necessary to successfully control dust in that large of an area would undoubtedly make a huge deficit in the water supply of the area.



Sincerely,

Matthew Hazel

Response to Comment N-03521:

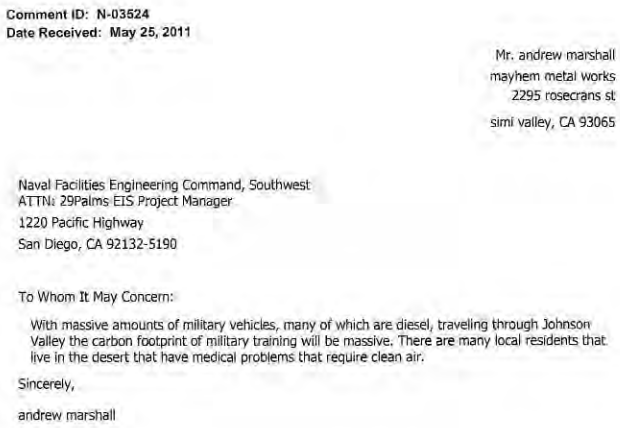
Thank you for your comment. With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

Kevin Padilla

Response to Comment N-03523:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

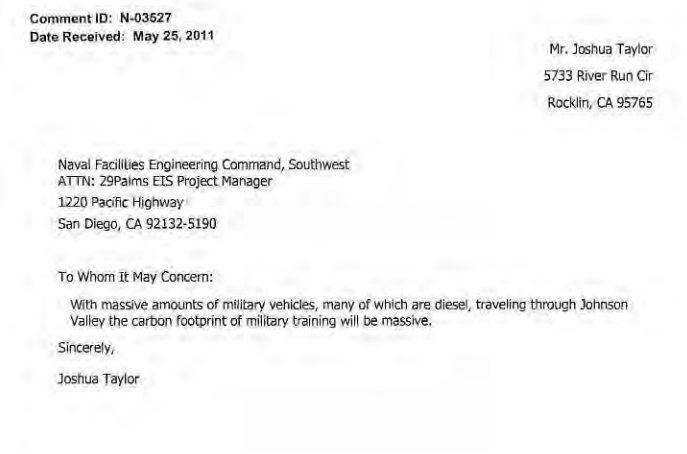
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. Air quality is of specific interest to me lately as I have recently developed a "lung" condition at work, otherwise known as "occupational asthma". I've been in the hospital 3 times for surgery the last 4 years and am not on medical leave for the 5th time in that 4 year span. This is all due to poor air conditions in the plant I work at and has now been proven to be the direct cause. I am forced to wear a half-mask respirator and use a breathing machine at home along with a bunch of other medications just to keep somewhat normal lung function. Stirring up that much more dust in an area like this could spread problems to the valley and effect many other folks than just myself. Please move East instead.

Thanks,

Mike

Sincerely,



Mike Mundinger

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

Sincerely,

Daniel Keller

Response to Comment N-03545:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

I strongly urge you to reconsider! It may seen odd being that I live so far away, but the off road community is one that I am actively involved in. One that I support GLOBALLY! God Bless the U.S.A.!!

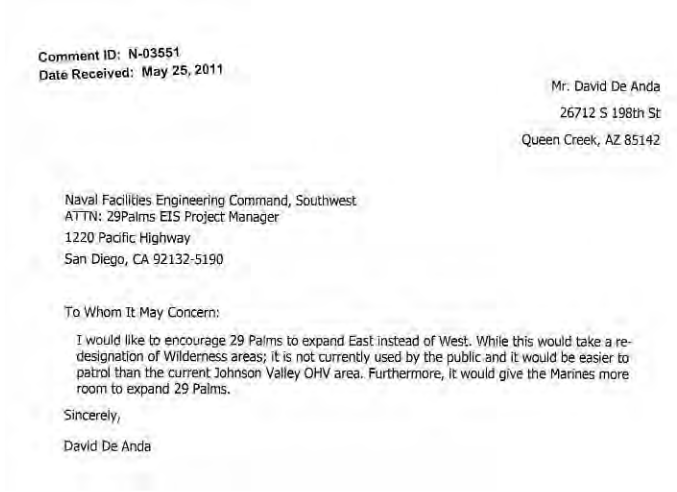
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

Matt Haney

Response to Comment N-03550:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

Go East!
Please study the potential of expanding 29 Palms to the East instead of into Johnson Valley to the west.

Johnson Valley is valuable to hundreds of thousands of OHV enthusiasts.

The Wilderness area to the east is valuable to several dozen people.

The greater good would have 29 Palms expand (if at all) to the East.

Sincerely,

Richard Penniman

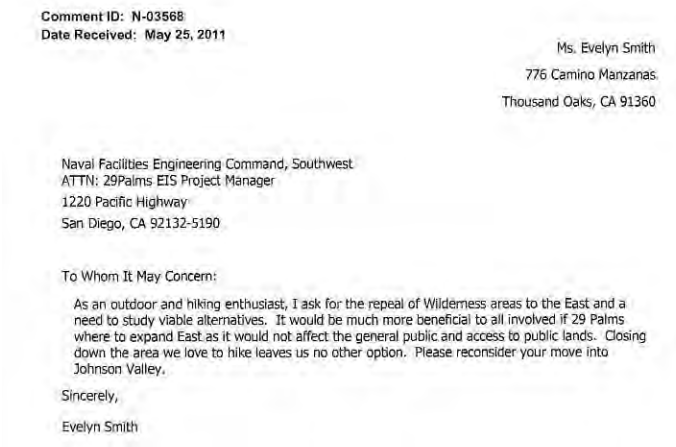
While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms. Moving the Marines EAST if the expansion really is necessary would be a win-win for all involved, benefit the Marines and keep public land open to the public as it should be. Please reconsider and go East instead.

Thanks

Mike



Sincerely,

Mike Mundinger

Response to Comment N-03567:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

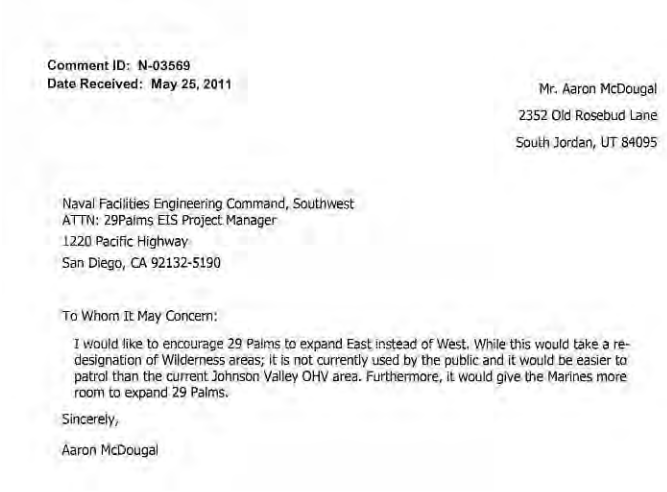
To Whom It May Concern:

As an outdoor and hiking enthusiast, I ask for the repeal of Wilderness areas to the East and a need to study viable alternatives. It would be much more beneficial to all involved if 29 Palms where to expand East as it would not affect the general public and access to public lands. Closing down the area we love to hike leaves us no other option. Please reconsider your move into Johnson Valley.



Sincerely,

Evelyn Smith

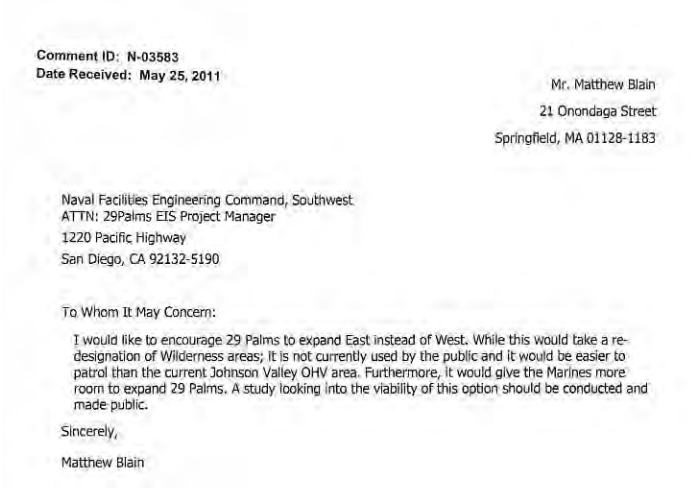
I support and have the up most respect for the USMC and my Brother In Arms. I am a SSgt in the USAF and understand the reason and purpose for training. If you have the resources to expand east then why effect an area that has had such a huge impact on the OHV community? We have already lost so much land over the years, we do not need to lose another great place. If this area gets closed this is one more OHV area my childern will never be able to enjoy. Please go east.



Sincerely,

Bryan Dietz

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Think of the damage that will be done for all future generations.

Sincerely,

Michael Jarchow

Response to Comment N-03588:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

San Diego, CA 92132-5190

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

I have been aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

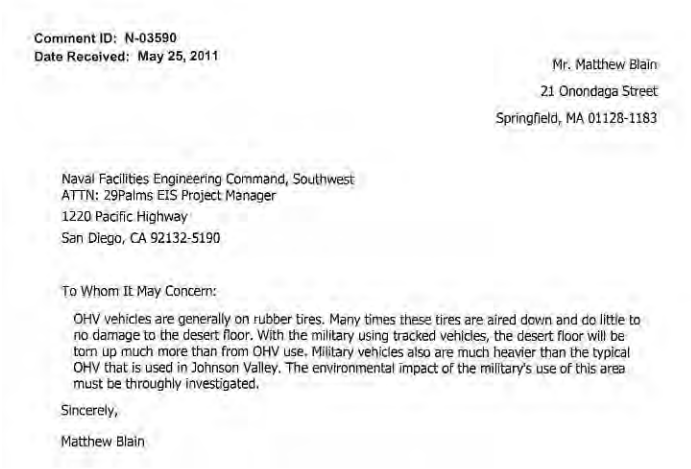
OHV vehicles are generally on rubber tires and stay to specific trails. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go EAST. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03589:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

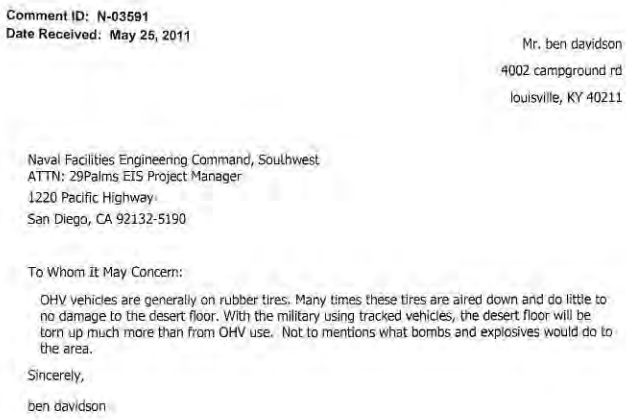
To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. Military vehicles also are much heavier than the typical OHV that is used in Johnson Valley. The environmental impact of the military's use of this area must be throughly investigated.



Sincerely,

Matthew Blain

To Whom It May Concern:

I'd first like to thank you for your time to read my letter. It may seem odd coming from someone in VA, but the outdoor community extends far beyond the boundaries of home for most people. I have never had the please of experiencing your wonderful state's resources, but it is a realistic accomplishment for me and my family. Unfortunately, the outlets for enjoying the off road sport of which I am so passionate are dwindling due to political decisions which seem to be made all too carelessly.

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

I urge you to reconsider your options! Thank you for your time and God Bless the USA!

Sincerely,
