Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

San Diego, CA 92132-5190

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Matt Spencer

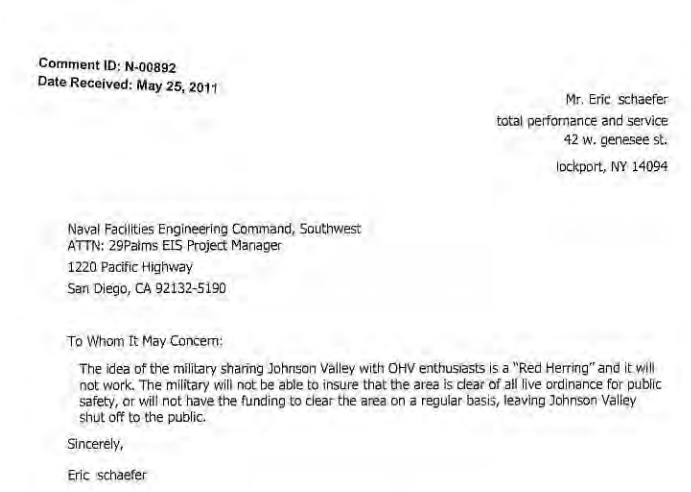
The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 – Cell

Sincerely,



Wade Leishman

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

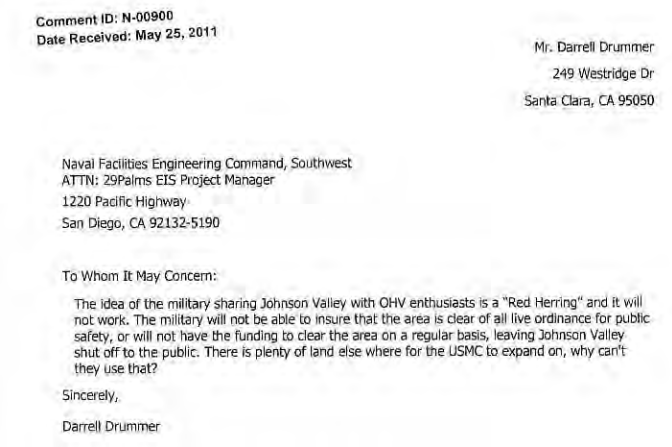
The OHV community is consistantly loosing open public access all across America. Why should we continue this trend.

Sincerely,



Thomas Heath

Response to Comment N-00899:

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

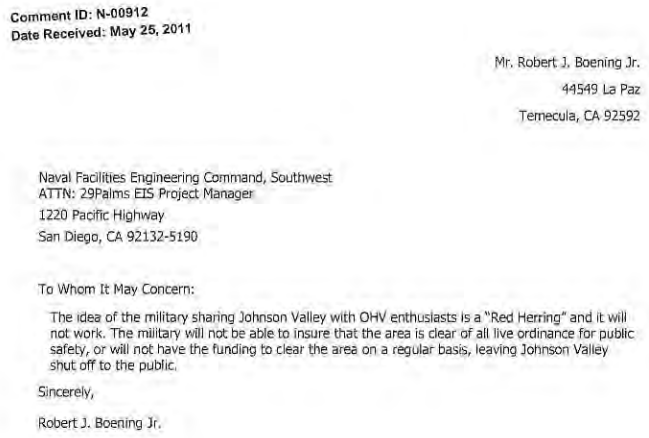
Going east just makes more sence you would not have to share it you can have it use it as much as needed with no issues regarding the public.

I use these lands and want my kids and grandkids to use them as well so please take what we the people are saying and expressing in these letters seriously.

Sincerely,



Mike Stewart

Response to Comment N-00911:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Robert J. Boening Jr.

To Whom It May Concern:

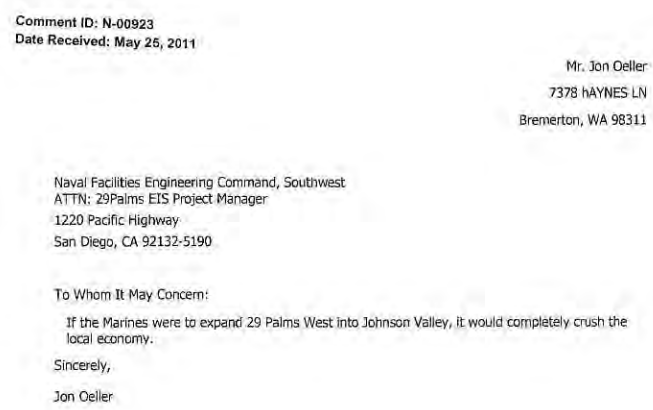
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. The users of the Johnson Valley OHV area spend money on fuel, food, and other supplies required for camping in the wilderness. This money adds significantly to the local tax base. Without the additional revenue the local towns would suffer.



Sincerely,

Aaron Peters

San Diego, CA 92132-5190

To Whom It May Concern:

Regarding the expansion of the 29 Palms Marine Base, if it expands west into the Johnson Valley recreation area, the economy of the towns directly around Johnson Valley will be greatly affected. Personally, my family spends multiple thousands of dollars per year in the local economy.

We recreate in the Johnson Valley area more than 15 weekends per year, going so far as to spend 14 days straight there during the time of the King of the Hammers Off Road Race, plus another couple of one week stretches throughout the year for race practice and/or family recreation time with my wife and two school-age sons.

Each time we arrive, we do so with no groceries and empty fuel tanks. We fill over 100 gallons at local gas stations EVERY VISIT WE MAKE...on longer visits, we fill over 200 gallons, with most of it being premium fuel. Then, we head to the local market to buy groceries. Also, if we need spare parts, we purchase them locally, plus we attend weekend fundraiser barbecues and pancake breakfasts, plus get camping gear and other supplies locally on a regular basis. Add it all up and the dollars taken away from the local economy from recreationalists like me is a HUGE sum of money. Big money in small towns that rely on our tourism dollars.

Don't take money out of the local community by moving west into the Johnson Valley Recreation Area.

Sincerely,

brandon Lowry

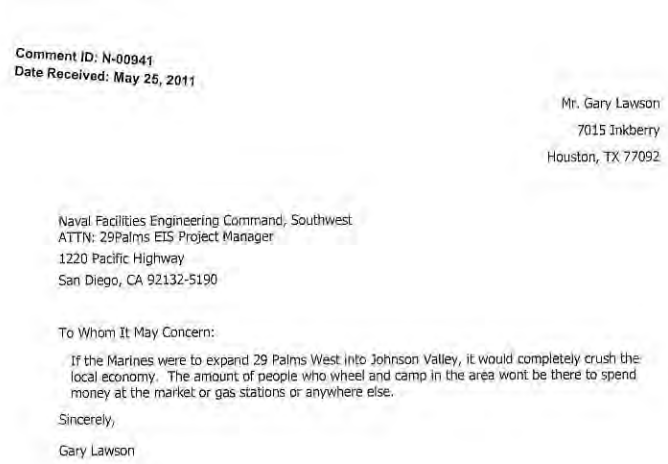
41107 russet lane
plymouth, MI 48170

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.



Sincerely,

william zhmendak

Response to Comment N-00940:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

San Diego, CA 92132-5190

To Whom It May Concern:

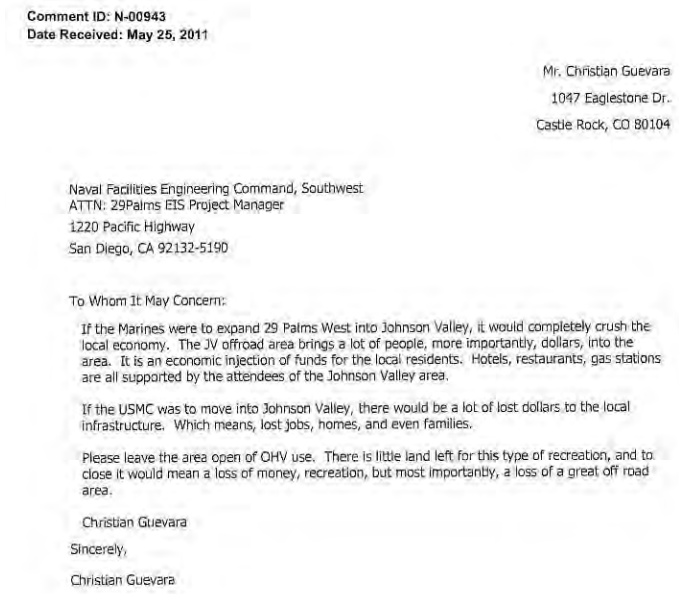
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Each year, we, as wheelers, riders and trail riders spend 100's of dollars each in local communities. Be it gas, propane, food, parts, tires, or other things.

You would literally be almost killing 2 local communities with this expansion.

I'm not against the military, quite the opposite really, however, i feel that in this case, the will and good of the people outweigh the military.



Sincerely,

Shaun Bootsma

Response to Comment N-00942:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

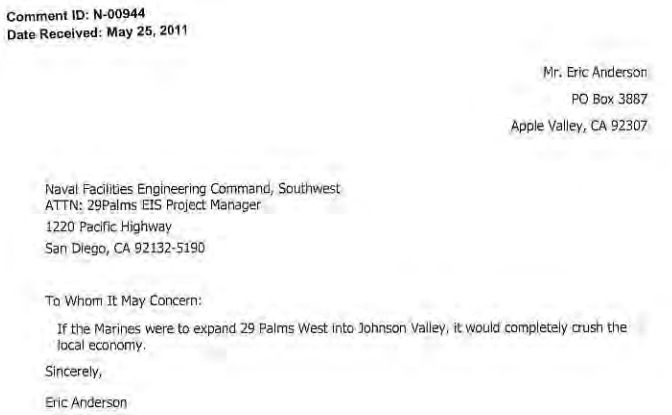
To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. The JV offroad area brings a lot of people, more importantly, dollars, into the area. It is an economic injection of funds for the local residents. Hotels, restaurants, gas stations are all supported by the attendees of the Johnson Valley area.

If the USMC was to move into Johnson Valley, there would be a lot of lost dollars to the local infrastructure. Which means, lost jobs, homes, and even families.

Please leave the area open of OHV use. There is little land left for this type of recreation, and to close it would mean a loss of money, recreation, but most importantly, a loss of a great off road area.

Christian Guevara



Sincerely,

Christian Guevara

Response to Comment N-00943:

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Johnson Valley is one of the few if not the only open and legal OHV area in southern California that offers the varied terrain loved by OHV'ers in general. Closing Johnson Valley would be a tragic loss to the sport. OHV land is closing daily while the number of people enjoying the sport increases annually. The result is more rigs in smaller areas, congestion and of course, damage to the environment easily avoided by actually adding OHV area vs taking it away, not to mention the impact of money spent locally by OHV enthusiasts locally. Take a look at the economic impact of the closing of Tellico OHV on Murphy NC. No fewer than 5 businesses closed already and many more are teetering due a huge loss of revenue.

Sincerely,

Joe Piojda

Response to Comment N-00960:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Our company traveled from Bellingham Washington all the way to Johnson Valley California, we stopped in many towns along the way for supplies but waited until we reached Victorsville to stock up on groceries for 12 people during our week long stay. Needless to say this is not an isolated event, many race teams, companies, and individuals converge on Johnson Valley throughout the year for off-road events generating massive amounts of revenue for the local economy. Besides the supplies many RVs are needed on the Johnson Valley lake bed and they can be rented locally, again boosting the local economy.

Please review your options and consider all those that will be affected if you expand into the Johnson Valley ORV area.

Sincerely,

Alex Riedo

To Whom It May Concern:

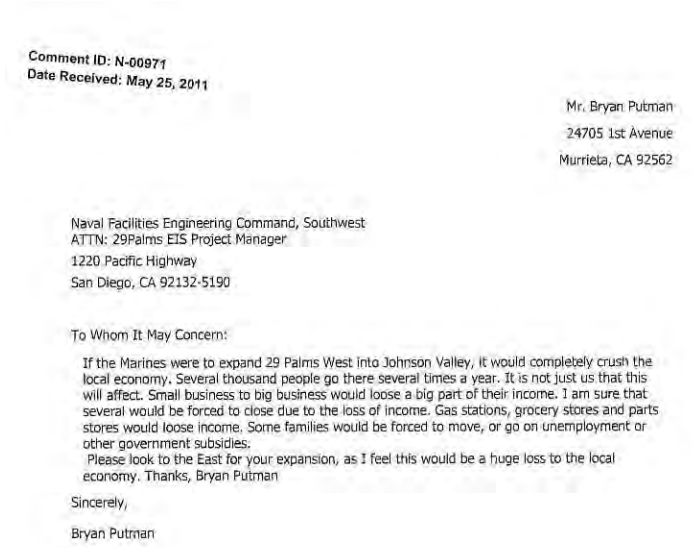
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Thousands of people flock to JV every year to enjoy the great outdoors. It is a Beautiful area to spend time with friends and family and get back to the basics. We all buy our groceries from local towns. We buy supplies, gas, and go eat dinner and the near bye towns. These local economy flourishes during the King of the Hammers Race every February. This alone is a huge boost for the local economy. I hope you will reconsider.



Sincerely,

Matt Myrick

Response to Comment N-00970:

San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Several thousand people go there several times a year. It is not just us that this will affect. Small business to big business would loose a big part of their income. I am sure that several would be forced to close due to the loss of income. Gas stations, grocery stores and parts stores would loose income. Some families would be forced to move, or go on unemployment or other government subsidies.
Please look to the East for your expansion, as I feel this would be a huge loss to the local economy. Thanks, Bryan Putman

Sincerely,

Bryan Putman

Response to Comment N-00971:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). San Diego, CA 92132-5190

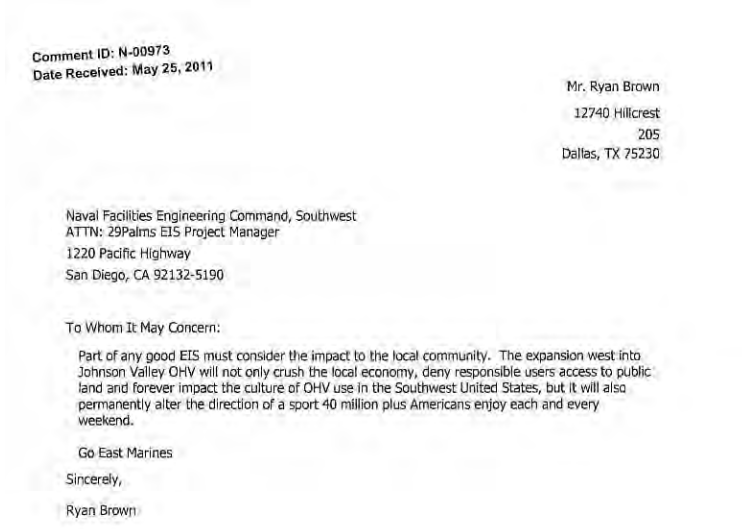
To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. This would limit if now stop the recreational ohv community and deney them the right to use public lands. I would like this are to stay open to the public. It is such a great area that I have driven across the country, from Virginina several times to vacation in the area or an entire week. I am sure this helps out the local business from hotels to resturants to fuel stations. I can only imagine if I travel from coast to coast how many people much closer than me travel there multiple times a year and spend thousands of dollars in the local community. Please keep this land open for public use.

regards,
Robert Matzell



Sincerely,

Robert Matzell

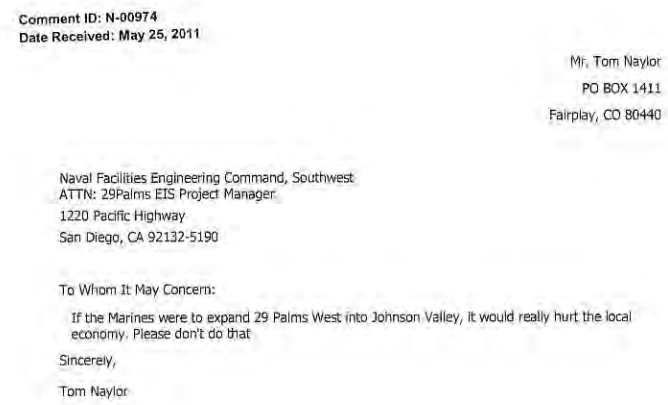
To Whom It May Concern:

Part of any good EIS must consider the impact to the local community. The expansion west into Johnson Valley OHV will not only crush the local economy, deny responsible users access to public land and forever impact the culture of OHV use in the Southwest United States, but it will also permanently alter the direction of a sport 40 million plus Americans enjoy each and every weekend.

Go East Marines

Sincerely,



Ryan Brown

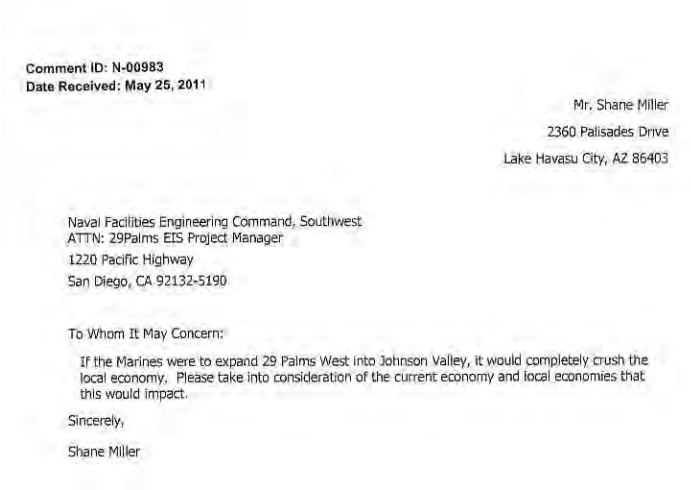
I make the trip out every year with my family to see a sibling and his family that is stationed in the area and a big part of that trip is our families camping there. We also stay in a hotel for a majority of the time and eat at restaurants, shop for perishables for our camping. I also know that as part of this plan you will be removing a MWR area that is used by thousands of active duty and retired military every year. Look around the 29 Palms/SD/Pendelton military housing and every pickup with a dirt bike, or off road vehicle you see will be an indiviual or family goes there and spends money in the area.



Sincerely,

David Galvagno

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

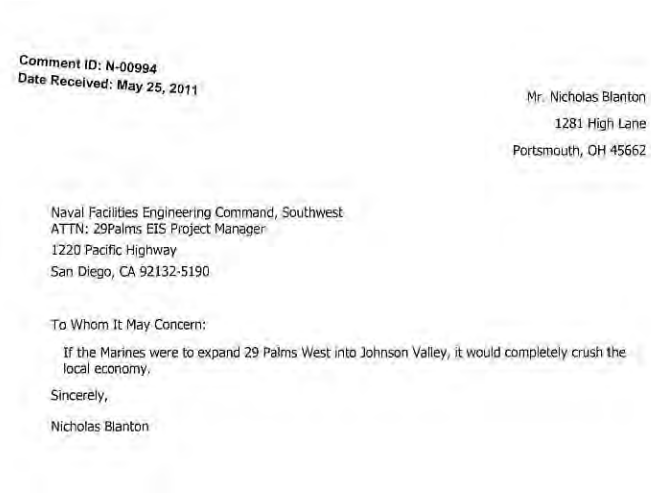
My husband was a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

We whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, we firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Dewana Leishman

Sincerely,



Dewana Leishman

To Whom It May Concern:

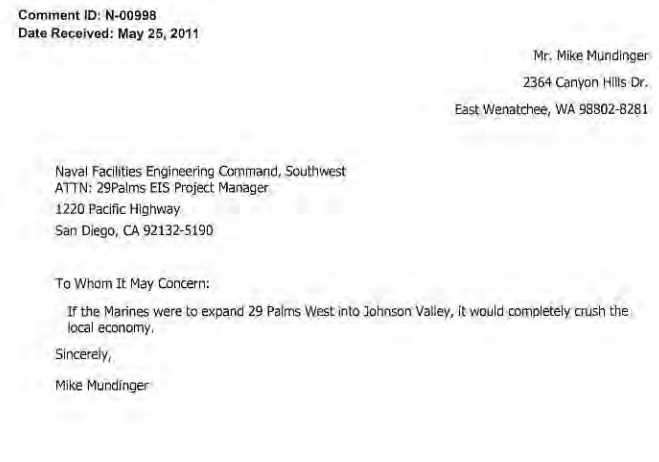
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Do you realize the loss of revenue to our area? Motels, restaurants, gas stations, repair and parts shops as well as vendors who participate in the off-road events. Before reacing their Johnson Valley destination people stop in our communities to stock up on food etc. NOT just for events but basically every weekend.



Sincerely,

Karren Purnel

Response to Comment N-00997:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Sincerely,

Wade Leishman

To Whom It May Concern:

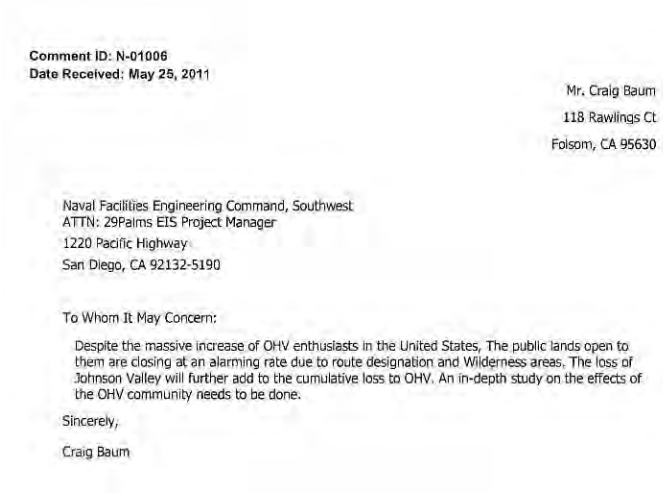
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Every year the OHV community looses more land. While I do consider myself as a OHV user I am much more than that. I enjoy the outdoors in many ways. Right now I am limited in my mobility from an accident at work, without the use of ohv's I would be limited on my ability to go out into the outdoors in a very great sense. While our military needs training I do not feel that this type of expansion is necessary.



Sincerely,

Sam Schiffler

Response to Comment N-01005:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. The closure of Johnson valley to the public will have a devastating affect on the OHV community. Some much of the sport revolves around Johnson Valley. Every hundreds of thousands of people visit Johnson Valley to use its unique landscape. The impact of closing Johnson Valley to the public needs to be taken into account before a decision is made. Going East would have almost zero effect to the public.

Sincerely,

Daniel Rider

San Diego, CA 92132-5190

To Whom It May Concern:

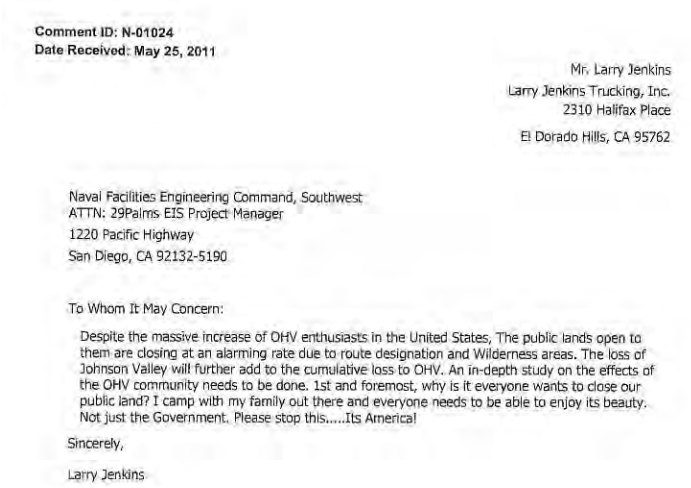
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Please keep Johnson Valley ohv area open to the public.



Sincerely,

Robert Matzell

Response to Comment N-01023:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

You risk forcing more and more people into smaller and smaller off road use areas. There are already too many people in cities. The thought of overcrowding off road areas is becoming a reality in many areas. Please look to the East. Thanks,Bryan Putman

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

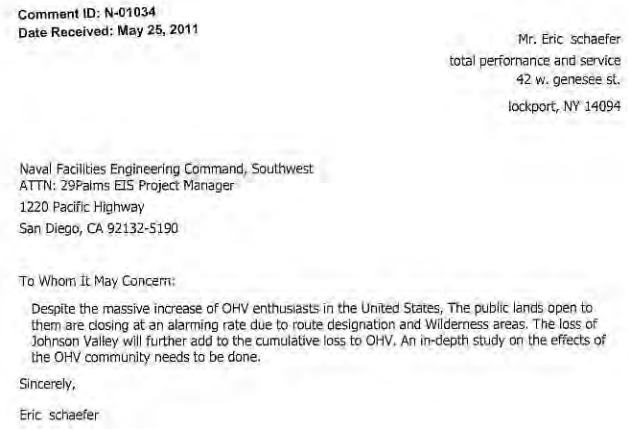
My husband was a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

We whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, we firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Dewana Leishman

Sincerely,

Dewana Leishman



Response to Comment N-01033:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

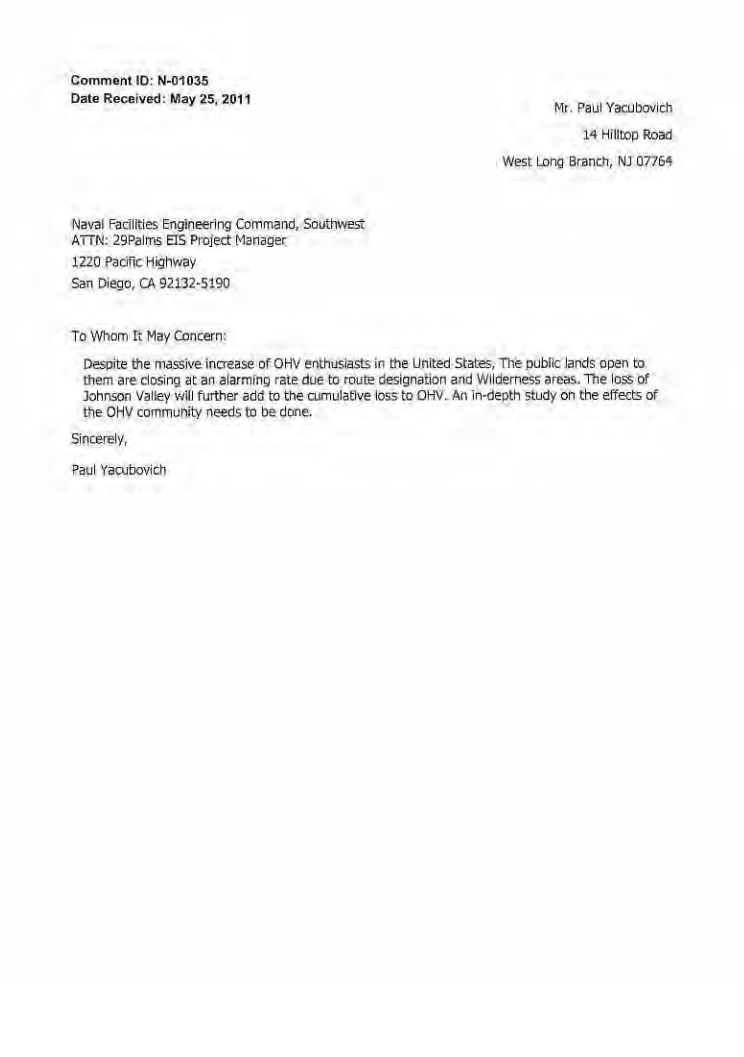
San Diego, CA 92132-5190

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Roxanna Duncan

Response to Comment N-01046:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

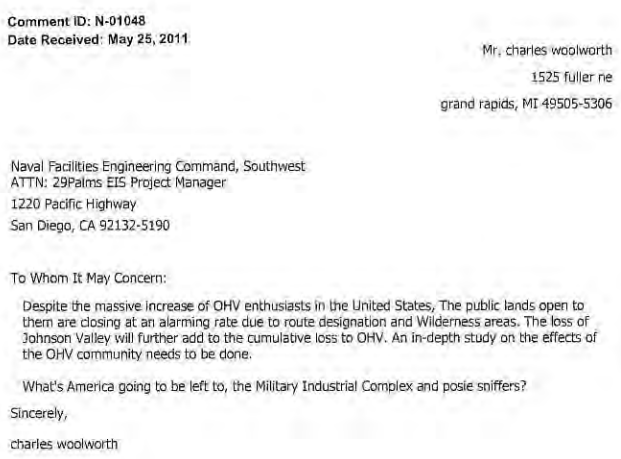
To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. In this economy families need a place for staycations and family experiences.

Sincerely,



Charles Pedigo

Response to Comment N-01047:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

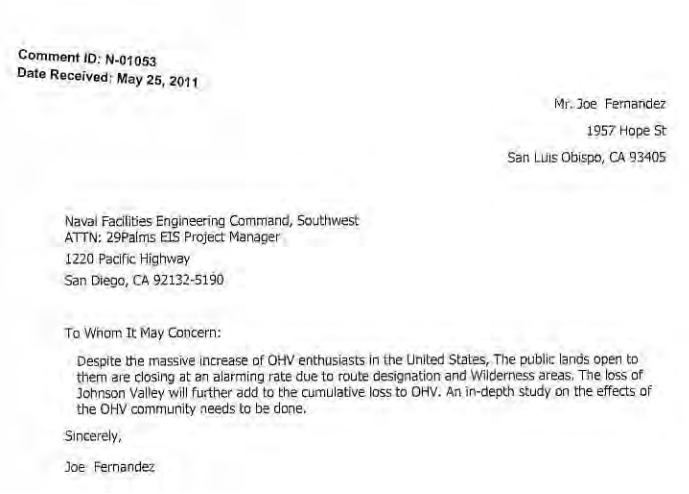
Dedicated OHV areas is critical to the maintanence of not only the family memories experienced in these areas, but also to the unspoiled areas we have fought so hard to protect. The fewer and fewer legal areas there are the more the "renegades" will be willing to violate the law. Dedicated open off road areas benefit everyone.

Sincerely,



Mike Billups

The off road community has grown exponentially in the past 30 or so years. The amount of public land where it is legal for the public to legally recreate is shrinking. This increases the impact on the remaining OHV areas. Please consider the alternatives to taking over the Johnson Valley OHV area.

Sincerely,

Darryl Merrin

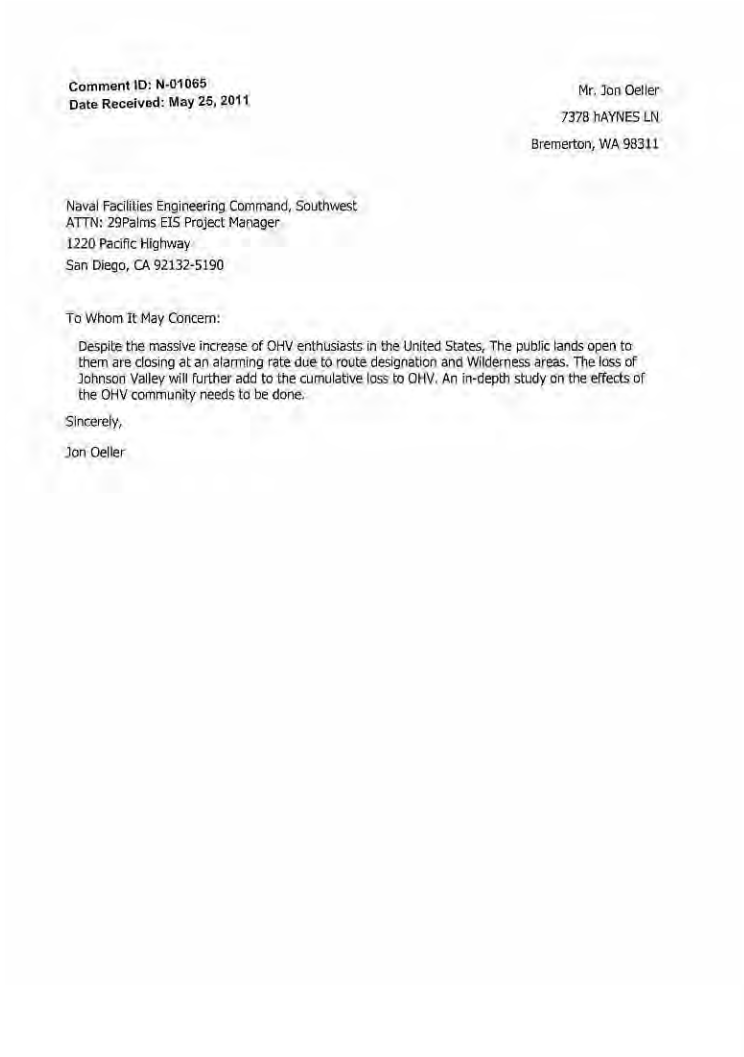
Too many OHV areas have been closed already without just cause. Tellico OHV area in North Carolina is a prime example. Some of the best wheeling in America was lost due to poor studies and mis-managed information. All OHVs should be given due process and all options should be thoroughly and carefully examined. Please do not close down Johnson Valley unless it is absoultely 100% the only option, and if properly researhed, Im sure you will find that its not.

Sincerely,



Duane McKay

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

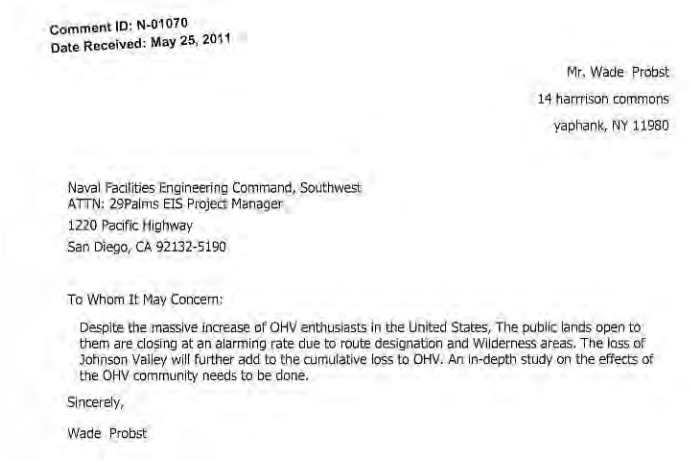
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture".

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,



Justin Raducha

Response to Comment N-01069:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

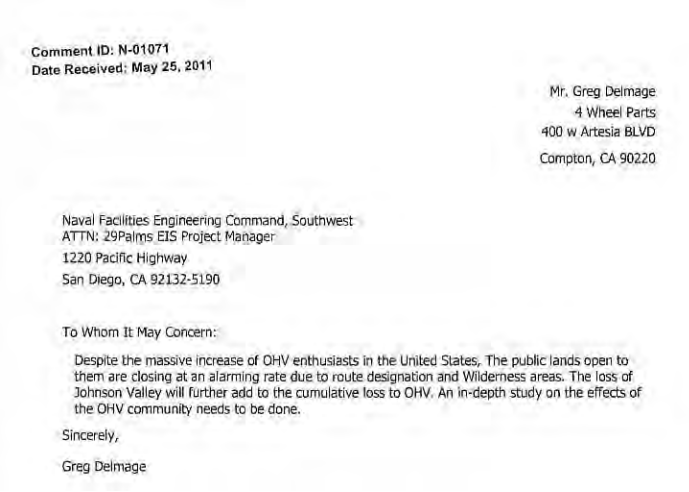
yaphank, NY 11980

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.



Sincerely,

Wade Probst

Response to Comment N-01070:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

San Diego, CA 92132-5190

To Whom It May Concern:

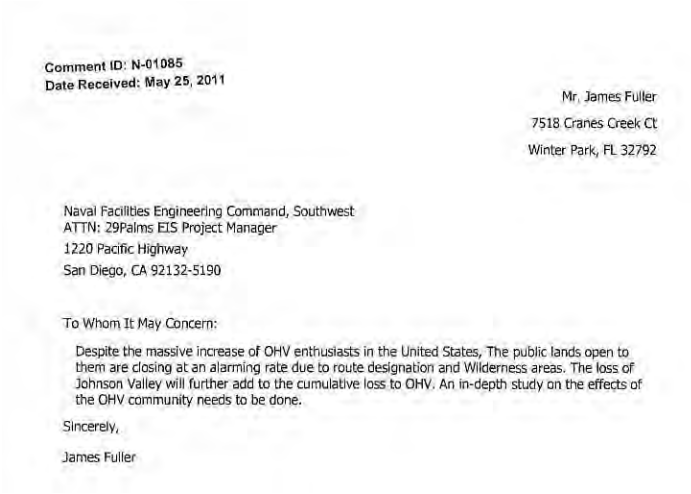
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

Philip Brock

Response to Comment N-01084:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

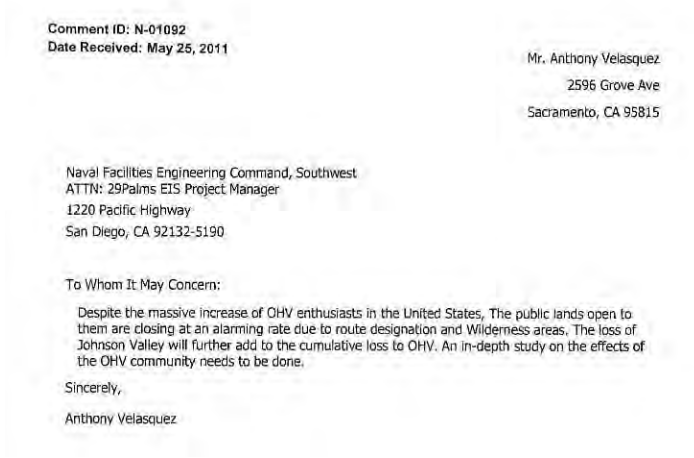
The OHV community as a whole does so much to the economy of our country. Millions of dollars are spent each year to participate in this sport. The closure of Johnson Valley, an iconic area in the sport would likely lead many people to stop participating in OHV activities, which leads to less money spent. Please consider what will happen to the OHV community if you take this area from us.

Sincerely,



Brandon Lowry

Response to Comment N-01091:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Response to Comment N-01093:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period for the next 99 years.

Sincerely,

Jayson Mitchell

Response to Comment N-01096:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

My husband was a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

We whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, we firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Dewana Leishman

The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Matthew Hazel

Response to Comment N-01144:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

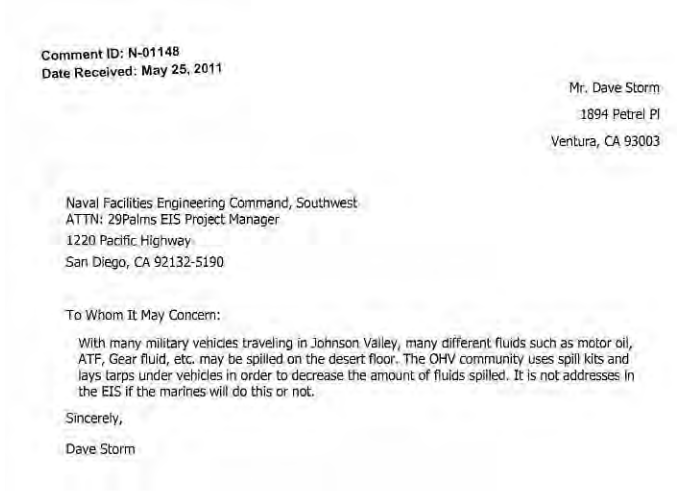
The BLM has hammered on OHV recreationists and OHV event promoters to protect the desert floor from spilled vehicle fluids. Motor oil, Automatic Transmission Fluid, Gear Oil, brake fluid. We take pride in our ability to minimize the risk of spills in the first place, to respond to an accidental spill, and to keep the desert clean.

Will the influx of military vehicles traveling in Johnson Valley be similarly responsible or ethical? The EIS does not state this.



Sincerely,

Shawn Baker

In My experience in the military, the enlisted men will do most anything to keep from having to do things that they feel are not necessary and I feel most will feel there is no reason to worry about such "trivial" things as fluid spills!

Sincerely,

John Brock

Response to Comment N-01167:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not. Please GO EAST MARINES!

Sincerely,

Marie Hauser

As offroaders, we are very cautious to not leave fluids where we offroad. Everyone in the community tries to prevent leaks, and clean up where incidents occur.

Sincerely,

Brandon Lowry

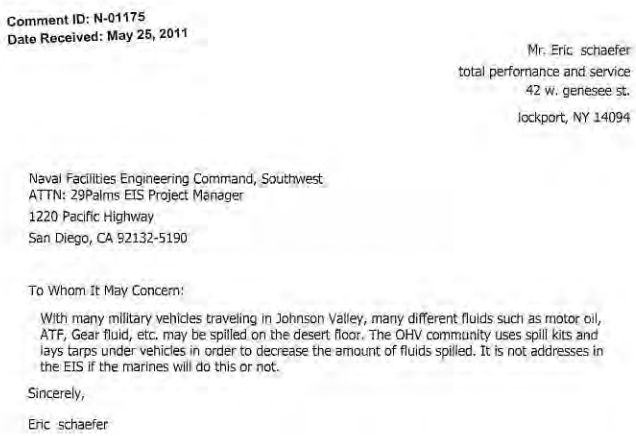
My husband was a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

We whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, we firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Dewana Leishman

Sincerely,



Dewana Leishman

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

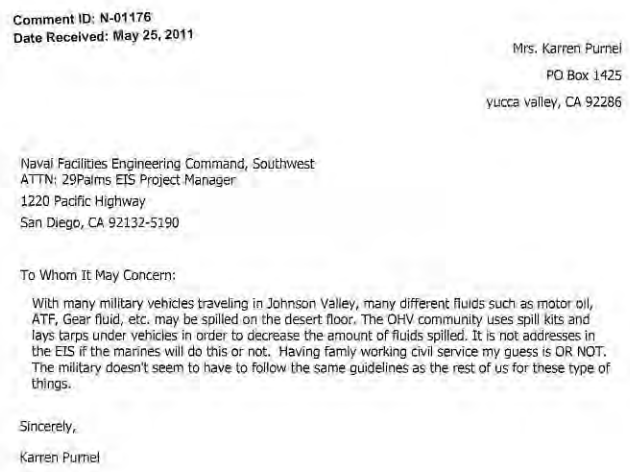
To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.



Sincerely,

DJ HARMON

San Diego, CA 92132-5190

To Whom It May Concern:

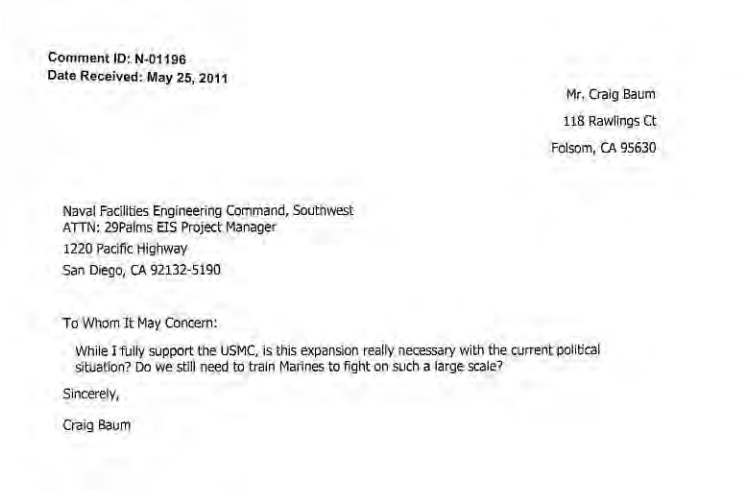
While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?



Sincerely,

Rocky Hill

Response to Comment N-01195:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

I'm a soldier, have been for 12 years, I fully understand the need to train for war, and I 100% support ALL our fighting forces, but I feel that, given the size of the training area already, that expansion really isn't necessary. PLEASE don't take away one of the few areas in southern California that's still accessable for OHV use.

Respectfully
SGT. Russell Telker

Sincerely,

Russell Telker

Response to Comment N-01207:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

San Diego, CA 92132-5190

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Anthony Velasquez

Response to Comment N-01212:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

While I fully support the USMC, is this expansion really currently necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 – Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

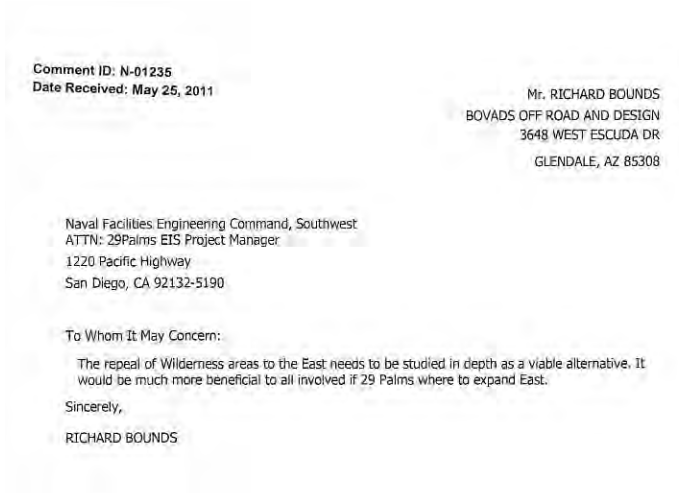
The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

Melvin Joiner

Response to Comment N-01234:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.

My husband was a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

We whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, we firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Dewana Leishman

Sincerely,

Dewana Leishman

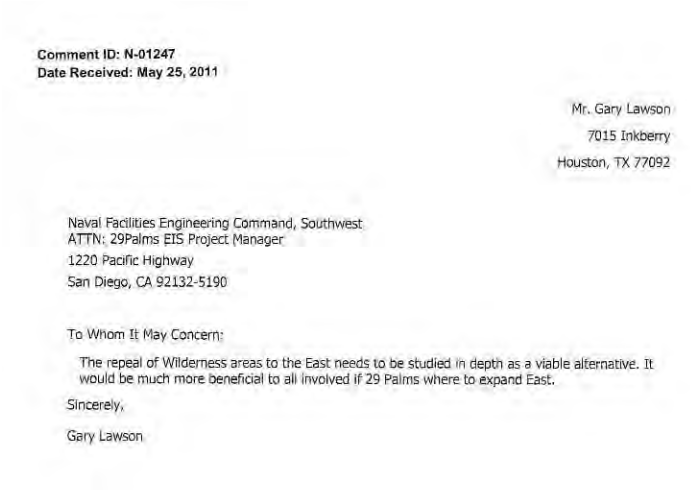
We have Millions of acres of 'wilderness' in the US. we don't have much area of OHV access like in Johnson Valley.

if the need to expand is so vital, then using some of the wilderness land should be considered since they have already locked people out of the area, the effects to the people and communities around the area will be minimal.



Sincerely,

Shaun Bootsma

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.

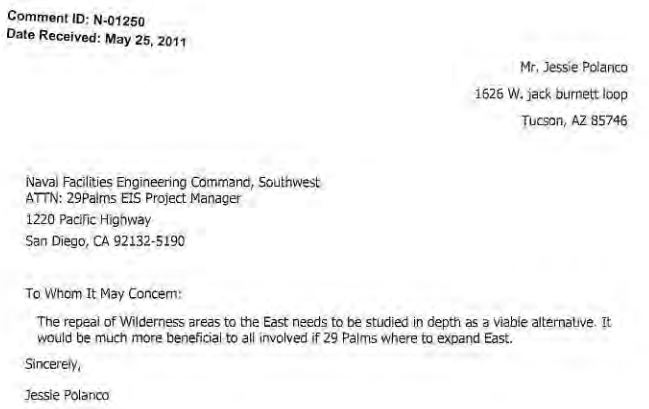
The Wilderness is not currently being used by anyone. It is dead land. Furthermore, it would be much easier for the USMC to keep people out of the training area since most people do not travel into the wilderness areas.

Expanding west would also give the marines more room for training.



Sincerely,

Kurt Schneider

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Response to Comment N-01280:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,

Craig Baum

Response to Comment N-01295:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public. The ammount of resources necessary to close access to this area would be impossible to meet, meaning the potential of injury to innocent members of the general public would rise rapidly. Does the budget allot for the additional costs necessary to secure the area?

Sincerely,

Michael Boyle

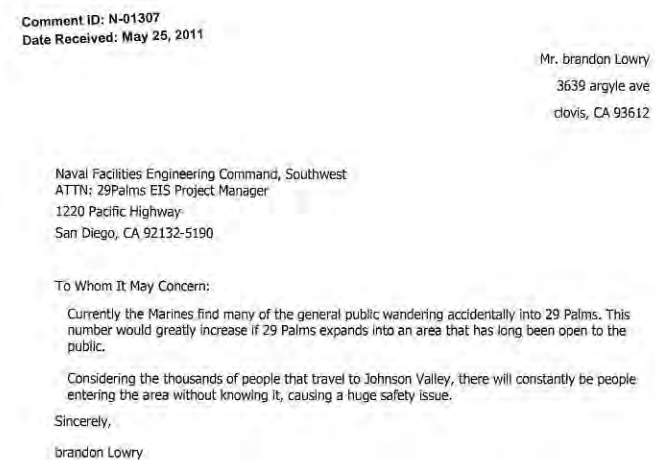
Morgan Hill, CA 95037

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.Please Keep our public lands open

-Mike Johnson



Sincerely,

Mike Johnson

Response to Comment N-01306:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

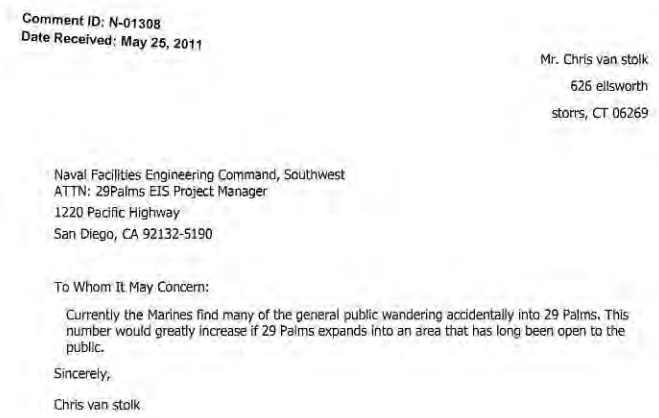
To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Considering the thousands of people that travel to Johnson Valley, there will constantly be people entering the area without knowing it, causing a huge safety issue.



Sincerely,

brandon Lowry

Response to Comment N-01307:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

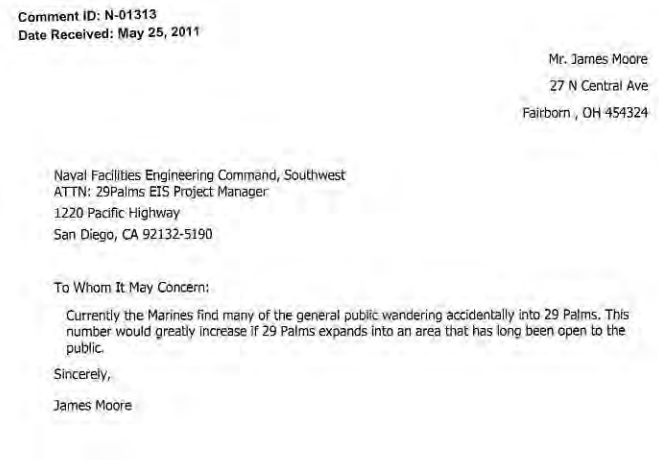
People wander in the desert. It is fun to explore. People currently wander onto the existing 29 Palms base.

Many more people would wander onto an expanded 29 Palms if the base expands into an area that the public has been long accustomed to using.

The public does not much use the area East of 29 Palms. This area would be ideal from a safety standpoint for a base expansion.

Sincerely,



Thomas Heath

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman

San Diego, CA 92132-5190

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidently into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,

Richard Clark

Response to Comment N-01330:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

To Whom It May Concern:

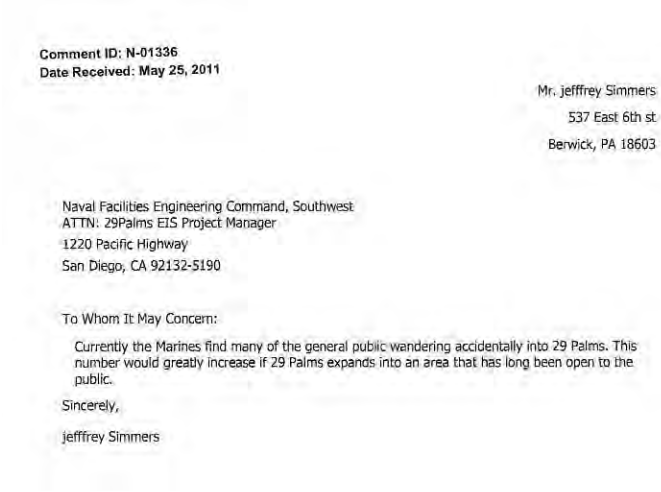
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.



Sincerely,

Michael Giuliano

Response to Comment N-01335:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

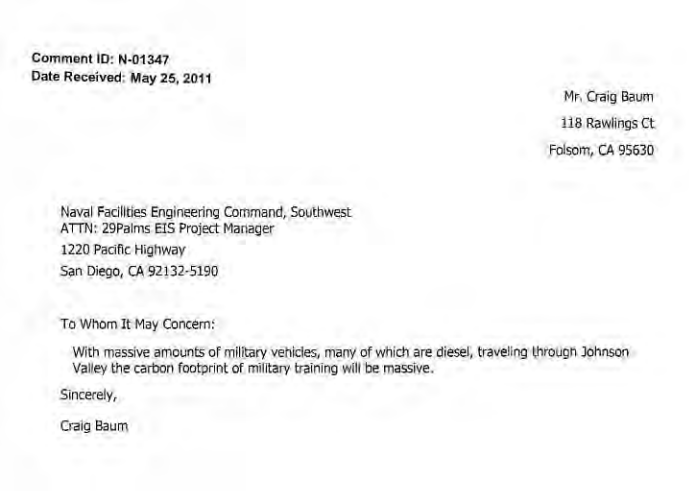
With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

Rocky Hill

Response to Comment N-01346:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

Sincerely,

Rocky Hill

Response to Comment N-01348:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

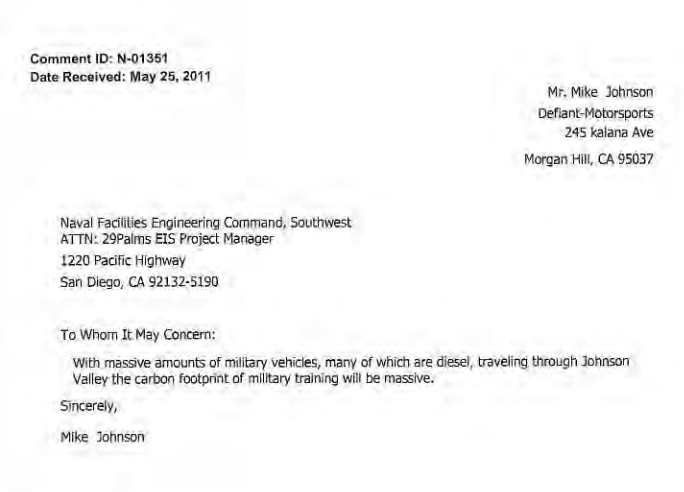
The Environmental Impact Statement has not considered the Environmental Impact of the increased wheeled and tracked military vehicle traffic and the airborne dust created.

Air quality will be negatively impacted.

The EIS does not state how many water trucks will be necessary to cope with the dust created by a single MEB.

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

Thomas Heath

Response to Comment N-01350:

Ventura, CA 93003

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

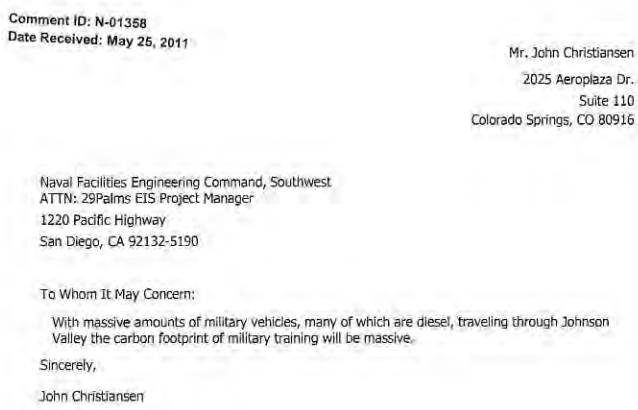
With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

Dave Storm

Response to Comment N-01357:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

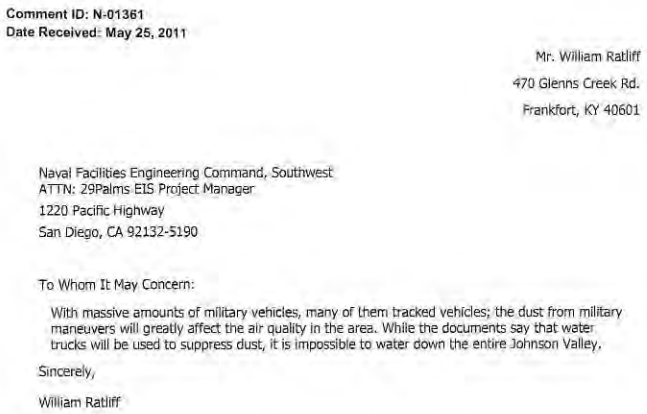
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

Tank tracks cause major amounts of dust and accellerate erosion massively



Sincerely,

Jayson Mitchell

Response to Comment N-01360:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

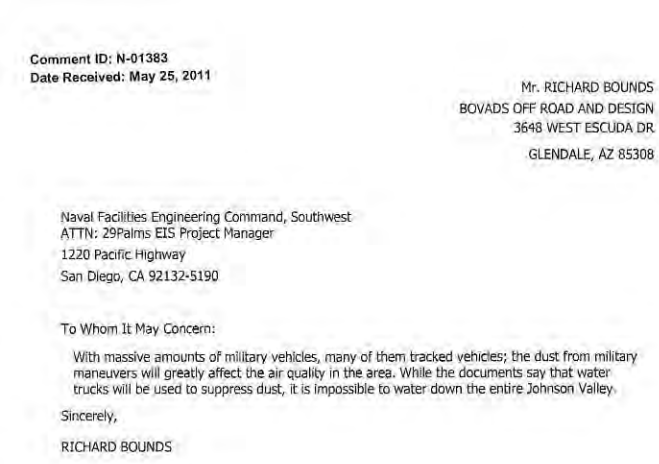
plymouth, MI 48170

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

william zhmendak

Response to Comment N-01382:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

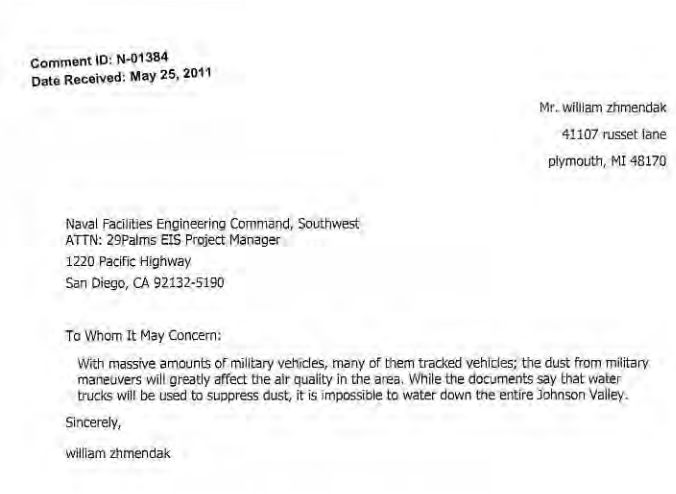
Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

RICHARD BOUNDS

Response to Comment N-01383:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-01409:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

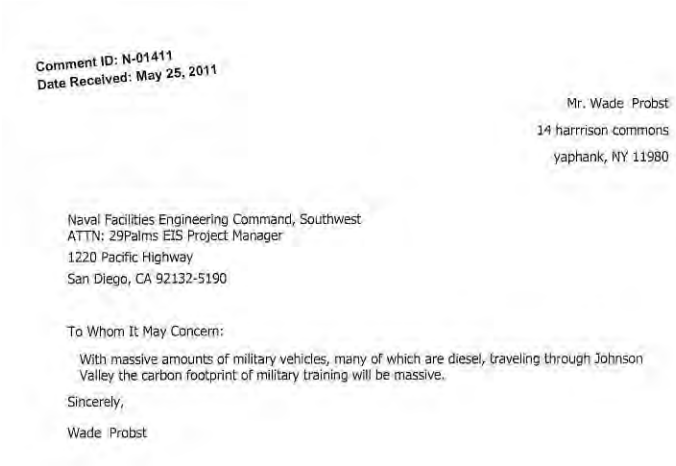
To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

Scott Schechter

Response to Comment N-01410:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. As outdoor enthusiasts we are extreemly concerned with our impact on the environment. This does not seem to be the case with the military. We don't need to turn one of the last remaining open access areas of public land into a battle field. Please reconsider the location of the base expansion.

Sincerely,

Michael Boyle

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Responsible OHV users know that airing down our tires gives us better flotation in soft sand, and better grip on rocks.

We also find that our aired-down tires do little damage to the desert floor.

The EIS fails to note whether wheeled military vehicles will be similarly aired-down for less impact to the desert floor, and fails to note that using tracked vehicles will absolutely have a greater impact on the desert floor.

Sincerely,

Thomas Heath

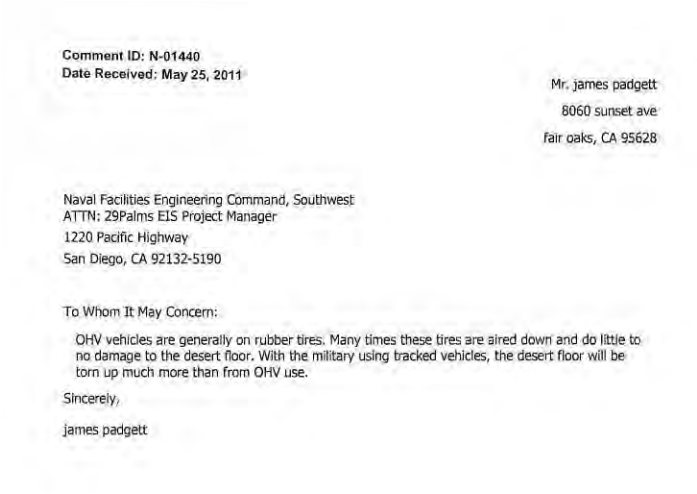
Defiant-Motorsports
245 kalana Ave
Morgan Hill, CA 95037

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.



Sincerely,

Mike Johnson

Response to Comment N-01439:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Sincerely,

Wade Leishman

To Whom It May Concern:

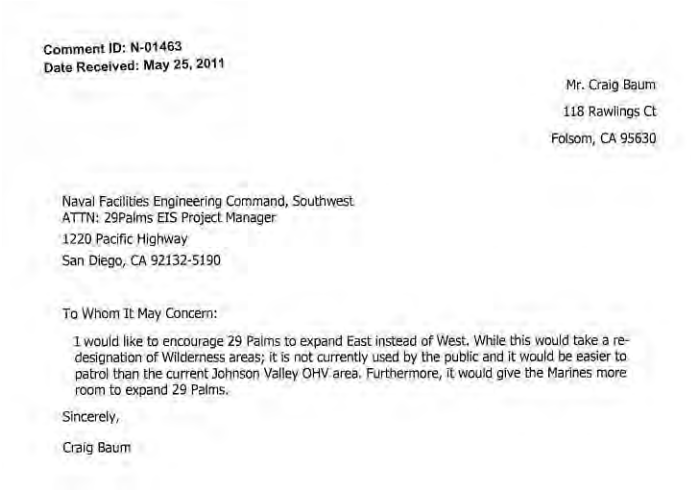
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

James Moore

Response to Comment N-01462:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

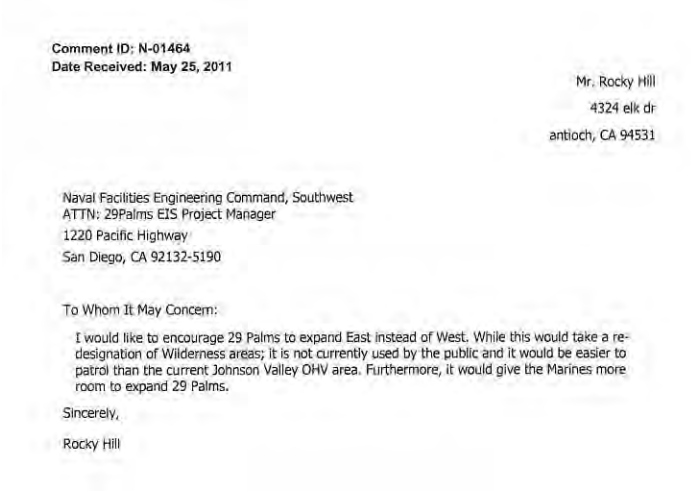
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

Steve Plissken

Response to Comment N-01467:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Furthermore, it would give the Marines more room to expand 29 Palms. I also feel that by closing the Johnson Valley area to OHV many people wouldn't be able to do what they love to do, Johnson Valley is among the largest OHV areas in CA and by closing the area down many of the smaller OHV areas would be over crowded and that would cause many other problems. Please re-consider the options to expand east.

Sincerely,

Michael Ward

Furthermore, it would give the Marines more room to expand 29 Palms. Expanding to the west would mean taking away a sacred land for thousands of people. As defenders of the free, we as you to please leave our land alone. The offroad vehicle community suffers great loses every year and we would love for the USMC to step up and avoid taking land from us. My offroad group organizes care packages for Marines overseas at our club meets, and have always been extreme supporters if not members of the Unites States military. We would feel crushed if westward expansion took place.

Sincerely,

Matthew Strasser

Furthermore, it would give the Marines more room to expand 29 Palms.

I believe that expanding the other direction can and will have a serious detrimental effect on the local economy that depends on OHV users. Please consider expanding East, for the benefit of those.

Sincerely,

David Surmann

Response to Comment N-01485:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

Colorado Springs, CO 80911

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

Robert Foster

Response to Comment N-01488:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

It would be good for the economy and for all the families that have used Johnson Valley for many, many years! Please reconsider and look to the East. Thanks, Bryan Putman

Sincerely,

Bryan Putman

Furthermore, it would give the Marines more room to expand 29 Palms.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

Sincerely,

william zhmendak

Response to Comment N-01509:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

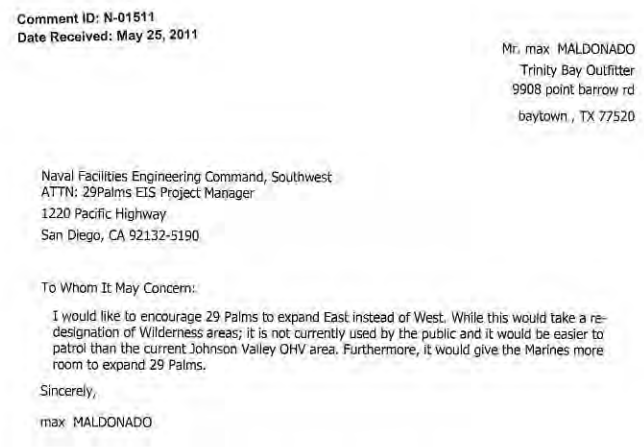
San Diego, CA 92132-5190

To Whom It May Concern:

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas; it is not currently used by the public and it would be easier to patrol than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

Jacob Wright

Response to Comment N-01531:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Furthermore, it would give the Marines more room to expand 29 Palms.
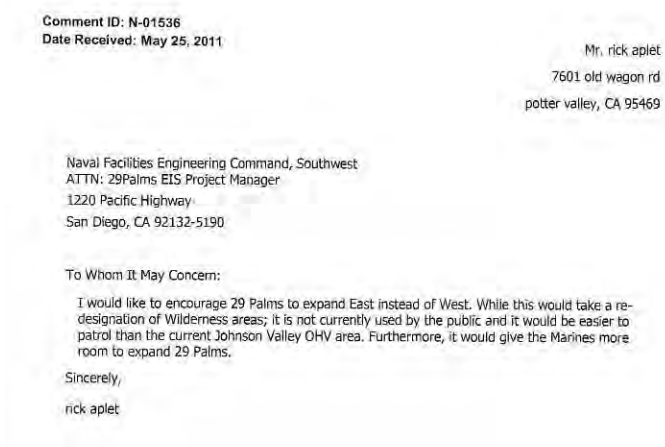
It is of the utmost importance that our Marines have the best training possible, of this there is no doubt. 29 Palms serves a vital role in the preparedness of our forces, and its expansion is necessary.

What isn't necessary is the expansion westward instead of eastward. Expanding west into the Johnson Valley OHV area only serves to punish responsible users of our public lands. Expansion east would utilize idle land that is ripe and ready for the training of our Marines.

I have the highest respect for our armed forces, and can't begin to express my gratitude towards them for the sacrifices they make for my own freedoms. One of those freedoms is the responsible enjoyment of our public lands. GO EAST MARINES. Expand to the east and utilize land that is not currently being enjoyed by the citizens of this great country. GO EAST MARINES. Expand east and give our men and women the best training possible so they might continue to be the best fighting force in the world. GO EAST MARINES. Expand east, and know you can count on the support of everyone that loves to use and enjoy our public lands.

GO EAST MARINES

Sincerely,



Mike Stewart

To Whom It May Concern:

Johnson Valley is an important area to off-roaders, it has terrain unlike any other anywhere in our country. The amount of use from the off-road community is vital to the surrounding towns which rely on the commerce and revenue generated by so many unique visitors going to the area.

I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.

-Alex

Furthermore, it would give the Marines more room to expand 29 Palms.

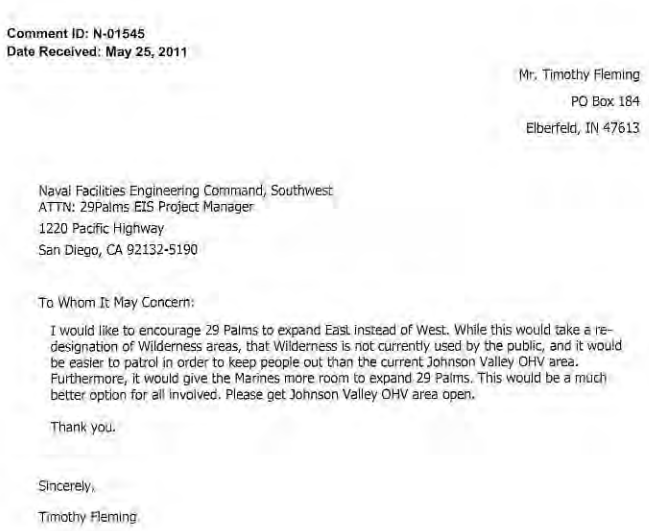
As a member of the off-roading family, we've seen way too many OHV parks closed in the past few years. We desperately wish to keep Johnson Valley open for public use! This is a very important past-time to a lot of good people, and we truly want it to remain around for future generations to come.

PLEASE EXPAND EAST! Please, please, please. (PLEASE??)

Thank you for your time & consideration,

Kimberley Hire

Sincerely,



Kimberley Hire

Response to Comment N-01544:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. The Marine Corps appreciates your comment and involvement in the NEPA process.

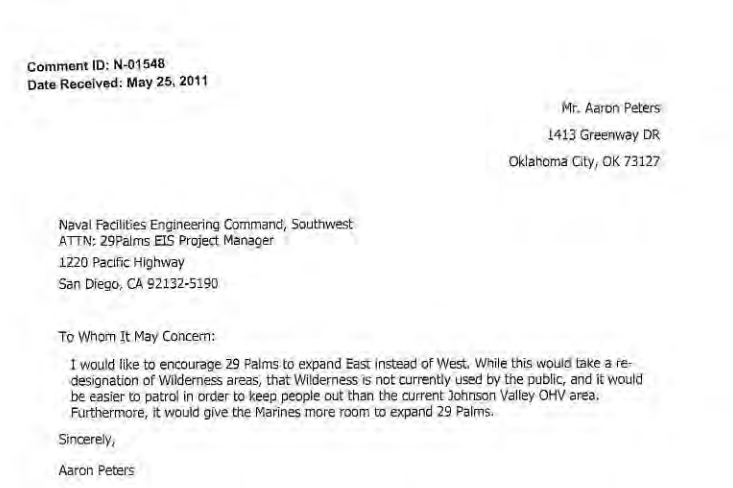
As an OHV area user I appreciate the United States Military fighting and training for our freedom. I also appreciate the ability to have the freedom to take my Jeep into an open OHV area. Johnson Valley is one of the few open OHV areas left in California. I would appreciate it if the United States Marine Corp. could find a way to keep a little more of the land they fight for open to the public. Please look further into expanding East.

Sincerely,



Charles Dana

Response to Comment N-01550:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,

Craig Baum

Response to Comment N-01551:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

Jon Morelock

Response to Comment N-01556:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

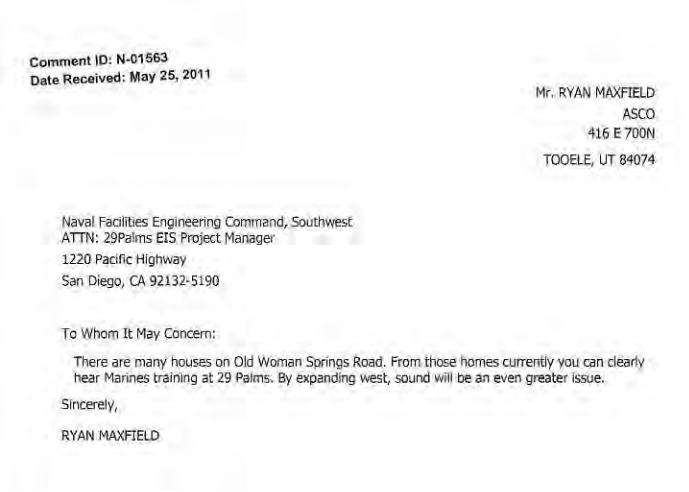
The EIS does not state the impact of an expanded 29 Palms to the residents on on Old Woman Springs Road.

The current 29 Palms west boundary is over 10 miles away, and exploding ordinance can already be heard. With a westward expansion into Johnson Valley, the noise impact to Old Woman Springs Road residents will be terrible.

Johnson Valley OHV area makes a great buffer between the current Base and nearby residential areas.

GO East Marines



Sincerely,

Ryan Brown

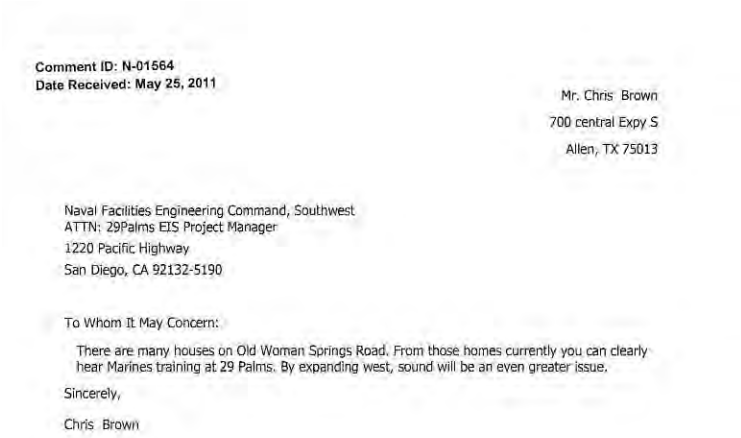
San Diego, CA 92132-5190

To Whom It May Concern:

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.



Sincerely,

William Garza

Response to Comment N-01576:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

To Whom It May Concern:

There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

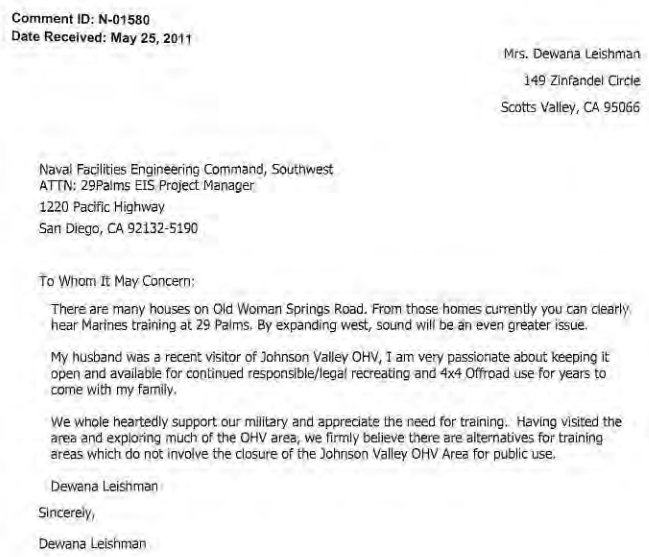
As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Sincerely,



Wade Leishman

Response to Comment N-01579:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

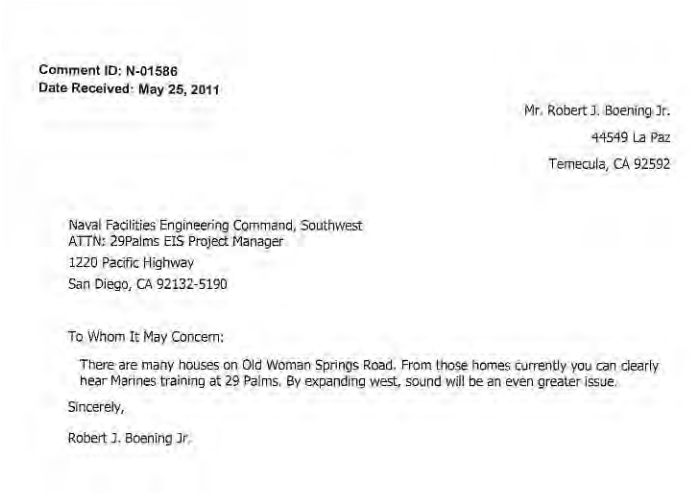
There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue. Current residents could see their quality of life decrease due to increased noise pollution. The land value may also depreciate based on the location of the training area.



Sincerely,

Ryan Higgins

Response to Comment N-01585:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use under the proposed action may be periodically detected by residents and other members of the public from a distance, and may sometimes be an annoyance. Although proposed training activities would increase noise levels in adjacent land areas, noise levels would not exceed the threshold criteria outside of the proposed acquisition boundaries. The results of additional single-event noise modeling have been added to Section 4.9 of the EIS to contribute to the evaluation of noise impacts.

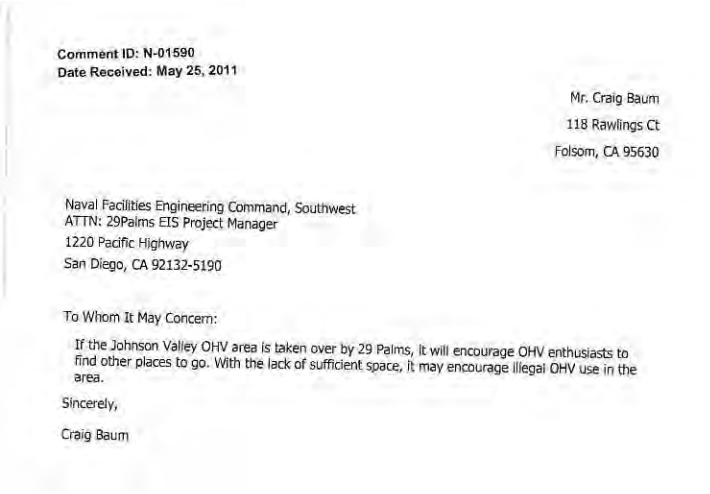
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.



Sincerely,

Rocky Hill

Response to Comment N-01589:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

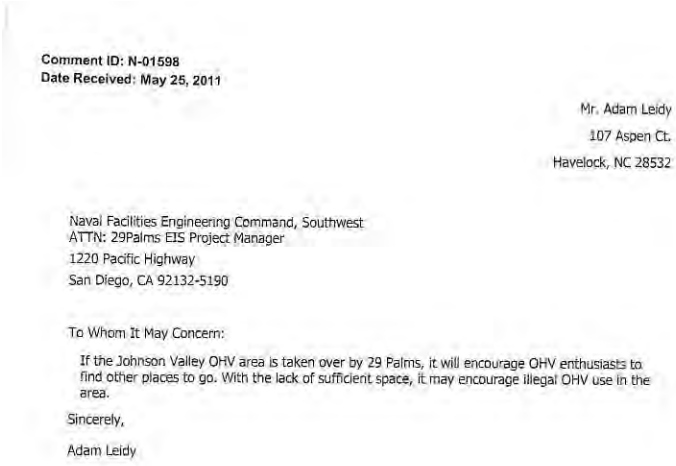
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. We are loosing access to open public lands at an alarming rate. Closing this area to OHV is creating a new class of criminal, the outdoor loving american that is barred from accessing the land that we love. The legal system in this country is already struggling to deal with "real" criminals, do we really need to make more? Please reconsider the location of the base expansion.



Sincerely,

Michael Boyle

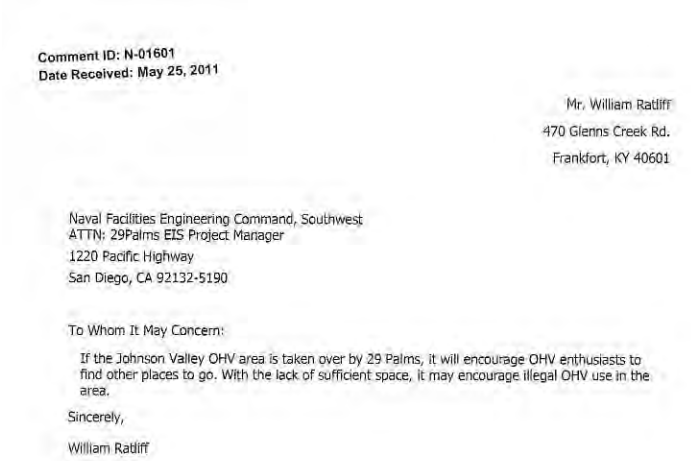
KATY, TX 77449

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.



Sincerely,

JOHN JORDAN

Response to Comment N-01600:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman

To Whom It May Concern:

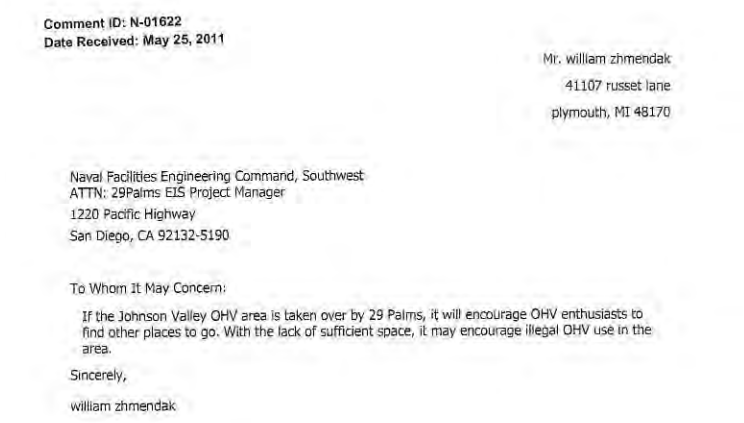
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.As a resident of the east coast we are not privileged to public OHV areas to enjoy and the possibility of one of the largest public OHV areas closing is not something i want to see ever happen. Here on the east coast where you have to pay private land owners to use their property it causes people to use other land for OHV recreation, illegally. Please think about everyone involved in the sport of rock crawling and off road racing.
Thank you for your time

Sincerely,



Shawn Vangasbeck

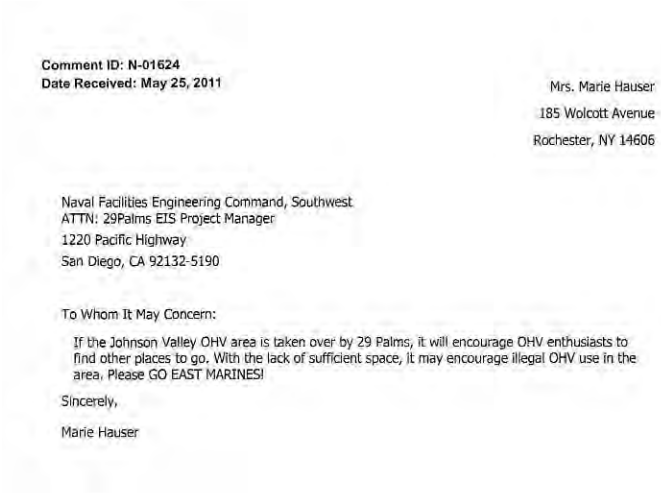
Lincoln, CA 95648

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.



Sincerely,

Philip Provience

Response to Comment N-01623:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

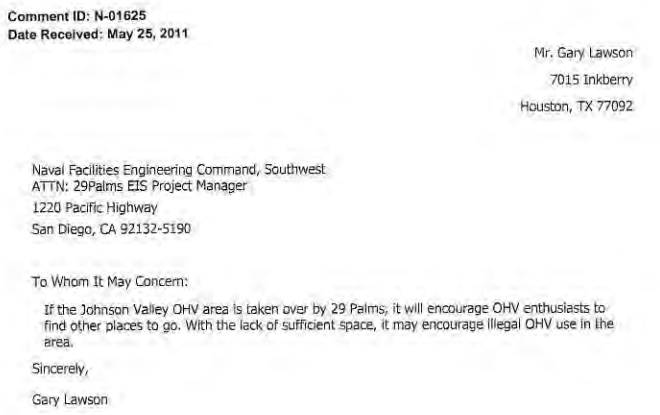
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. Please GO EAST MARINES!

Sincerely,



Marie Hauser

Response to Comment N-01624:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

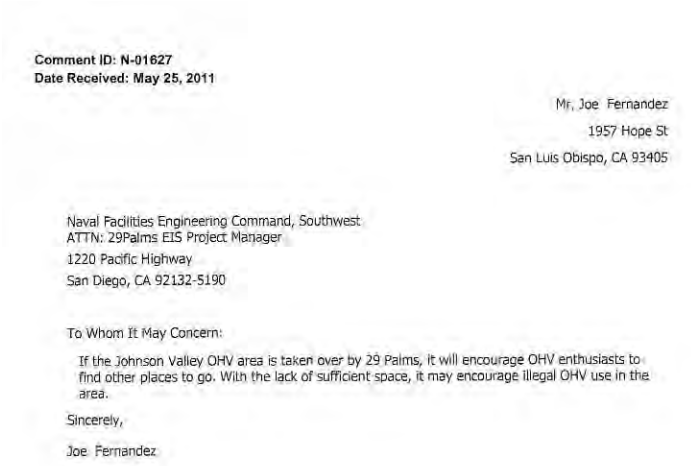
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. While most wheelers will not illegally wheel, there are those that will. Closing more land to OHV users just encourages use of other areas, legal and illegal.



Sincerely,

Ryan Higgins

Response to Comment N-01626:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Sincerely,

Wade Leishman

Response to Comment N-01658:

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-01685:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

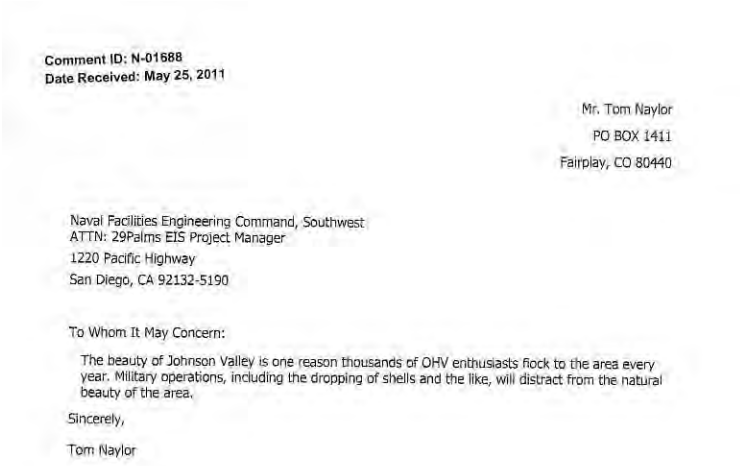
To Whom It May Concern:

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.



Sincerely,

Robert J. Boening Jr.

Response to Comment N-01716:

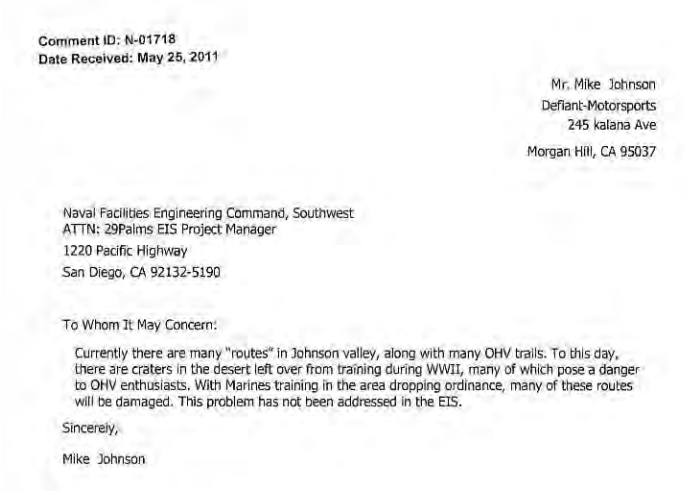
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts including myself flock to the area every year. The desert is a precious resource in itself, especially when it is void of any signs of human activity.

Military operations, including the dropping of shells, damage from tracked vehicles and the like, will distract from the natural beauty of the area.

I would like to encourge the marines to move East instead of into Johnson Valley where less people tend to go to experience the desert.



Sincerely,

Kurt Schneider

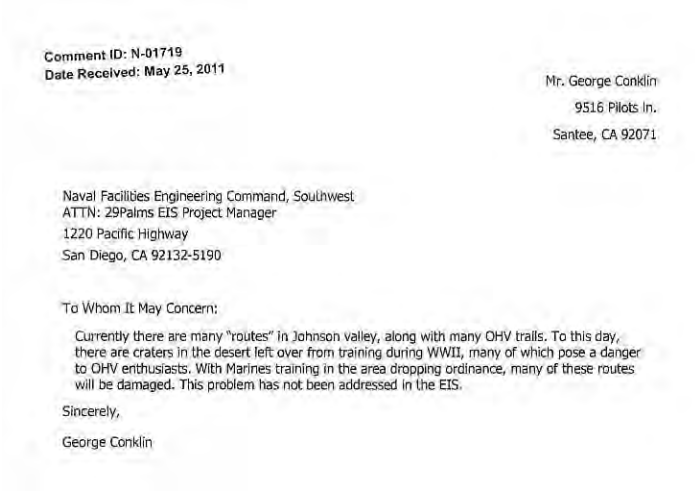
To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.



Sincerely,

Mike Johnson

Response to Comment N-01718:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

Santa Clara, CA 95050

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

Sincerely,

Darrell Drummer

Response to Comment N-01739:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Sincerely,

Wade Leishman

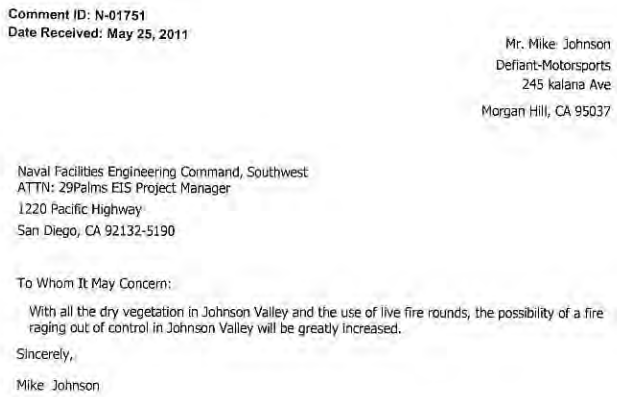
With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.



Sincerely,

Craig Baum

Response to Comment N-01750:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

Response to Comment N-01763:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

To Whom It May Concern:

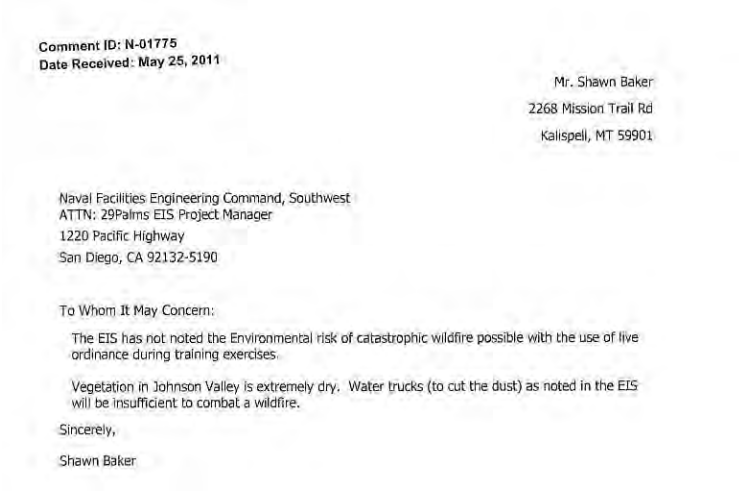
A question of fire, and its impact to the surrounding area.

The EIS has not noted the Environmental risk of catastrophic wildfire possible with the use of live ordinance during training exercises.

Vegetation in Johnson Valley is extremely dry. Water trucks (to cut the dust) as noted in the EIS will be insufficient to combat a wildfire.



Sincerely,

Ryan Brown

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

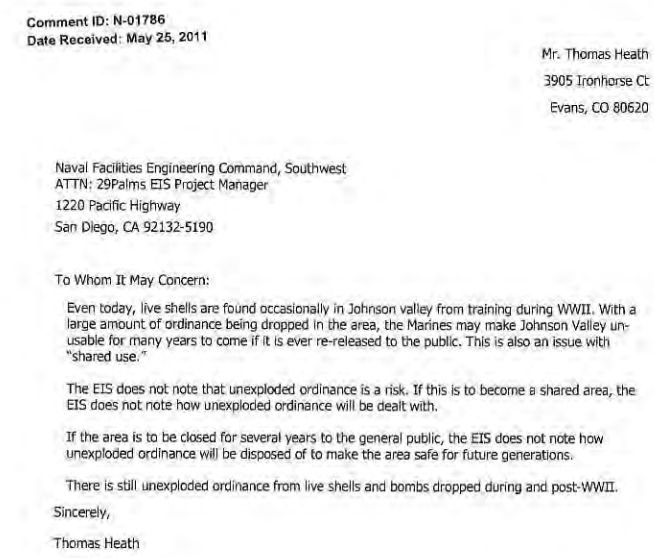
Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."



Sincerely,

Craig Baum

Response to Comment N-01785:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

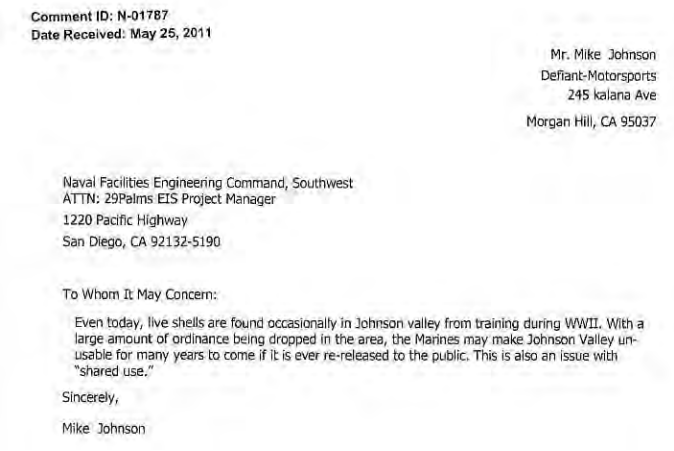
This is also an issue with "shared use."

The EIS does not note that unexploded ordinance is a risk. If this is to become a shared area, the EIS does not note how unexploded ordinance will be dealt with.

If the area is to be closed for several years to the general public, the EIS does not note how unexploded ordinance will be disposed of to make the area safe for future generations.

There is still unexploded ordinance from live shells and bombs dropped during and post-WWII.



Sincerely,

Thomas Heath

Jayson Mitchell

Response to Comment N-01788:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

John Christiansen

To Whom It May Concern:

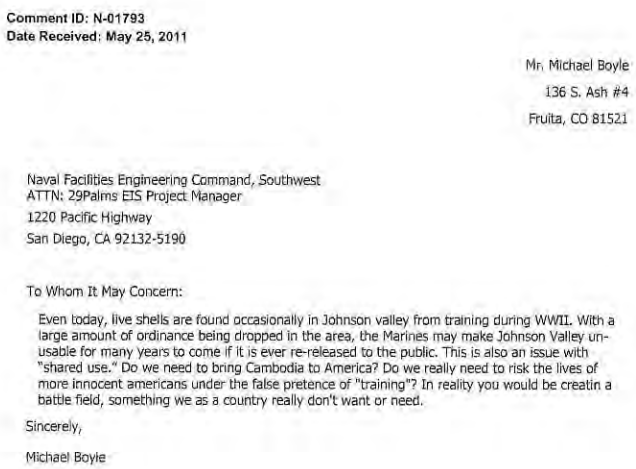
Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."



Sincerely,

Dion McCaslin

Response to Comment N-01810:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

The EIS does not note that unexploded ordinance is a risk. If this is to become a shared area, the EIS does not note how unexploded ordinance will be dealt with.

If the area is to be closed for several years to the general public, the EIS does not note how unexploded ordinance will be disposed of to make the area safe for future generations.

There is still unexploded ordinance from live shells and bombs dropped during and post-WWII.

Sincerely,

Shaun Bootsma

This is also an issue with "shared use."

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

Wade Leishman
President 2011/2012 - Santa Cruz 4 Wheel Drive Club (831) 332-8264 - Cell

Response to Comment N-01834:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. The OHV industry is important to the livelihood of so many Americans, and shutting down Johnson Valley would be a very big blow to the industry. With so many other OHV areas shutting down, losing Johnson Valley is not something that anybody in the 4x4 world wants to think about. Please consider expanding the military base to the east, where there would be more room and it would not impact Johnson Valley. The OHV community strongly supports our military and we all want the troops to have the best training available, but please keep in mind that the OHV community is responsible for developing a lot of technology that the military uses or could use in it's vehicles. Thank you for your consideration.

Sincerely,

Danny Gaston

Response to Comment N-01852:

As a recent visitor of Johnson Valley OHV, I am very passionate about keeping it open and available for continued responsible/legal recreating and 4x4 Offroad use for years to come with my family.

I whole heartedly support our military and appreciate the need for training. Having visited the area and exploring much of the OHV area, I firmly believe there are alternatives for training areas which do not involve the closure of the Johnson Valley OHV Area for public use.

To Whom It May Concern:

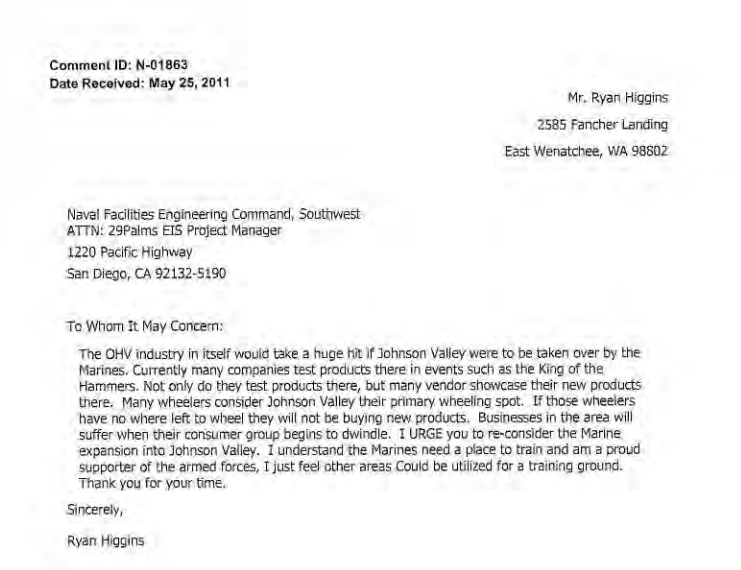
The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. It would make a horrible impact on my life as i am an 4x4 fabricator and my business needs Johnson valley!



Sincerely,

Matthew Wilken

Response to Comment N-01862:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers. Not only do they test products there, but many vendor showcase their new products there. Many wheelers consider Johnson Valley their primary wheeling spot. If those wheelers have no where left to wheel they will not be buying new products. Businesses in the area will suffer when their consumer group begins to dwindle. I URGE you to re-consider the Marine expansion into Johnson Valley. I understand the Marines need a place to train and am a proud supporter of the armed forces, I just feel other areas Could be utilized for a training ground. Thank you for your time.

Sincerely,

Ryan Higgins

To Whom It May Concern:

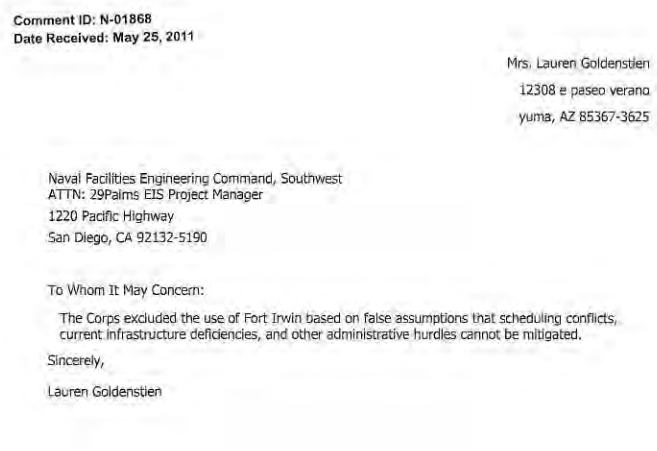
The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated when in fact such issues can be easily resolved. Please reconsider this alternative.



Sincerely,

Derek Kagley

Response to Comment N-01867:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

While I respect the US Marines and what they do for our country, I feel their proposed expansion into the Johnson Valley OHV area is a terrible idea.
Suitable areas for additional Marine use already exist and should be considered.
The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.
The Marines owe it to the US taxpayers to explore options that will have less detrimental effects on the citizens' lives. Please reconsider Ft Irwin and leave JV to the american people.

Sincerely,

Brad Buter

As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Dallas, TX 75230

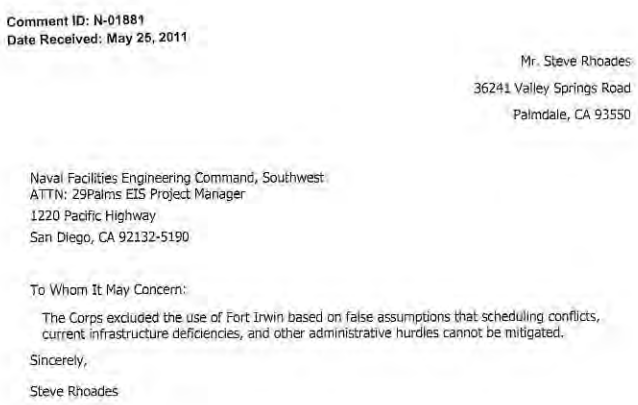
Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

I feel confident that given more time to make the decision there is a way these hurdles can be overcome.

Sincerely,



Ryan Brown

Response to Comment N-01880:

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

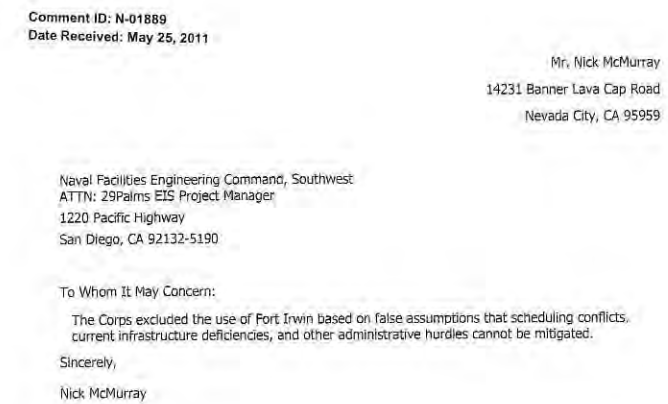
The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. Reusing previously used military areas protects private citizen use, decreases spending and provides the additional space requested. Though it may be deficient in some areas, current infrastructure does add value.

Sincerely,



Kyle Irvin

To Whom It May Concern:

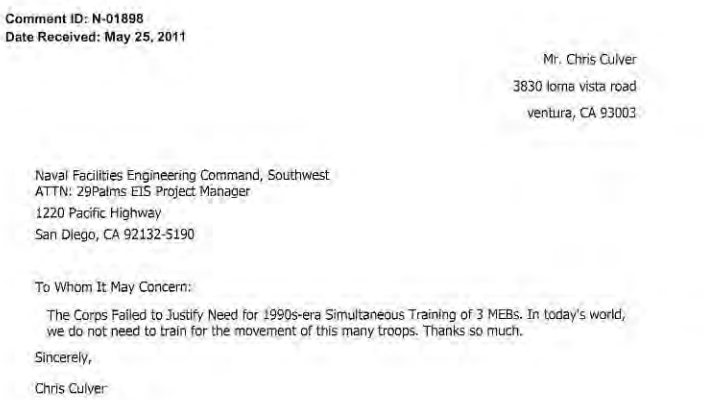
While I respect the US Marines and what they do for our country, their needs are not being represented accurately.
The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.
Our ops in modern times rely more on technology and planning than incredible amounts of force.
I do not agree with the proposed expansion into JV OHV area, and feel that a more accurate needs' assesment shall be made by the Marines before they try to negatively affect the lives of those who use JV OHV area and the communities that depend on them for their livlihoods.



Sincerely,

Brad Buter

Response to Comment N-01897:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Johnson Valley OHV area is irreplaceable.

Not only is the terrain durable enough for our rubber-tired vehicles to give us a healthy challenge; it is filled with gorgeous desert flora and fauna.

The area was used for a short time after World War II, and some of the bomb range scars are still healing.

Today's munitions have much more power than WWII-era munitions, and will scar the terrain for an even longer time.

Sincerely,

Thomas Heath

Response to Comment N-01921:

Thank you for your comment. The EIS evaluates impacts to biological resources under each of the action alternatives (see Section 4.10). The Marine Corps is currently undergoing consultation with the USFWS service in regards to impacts to the desert tortoise and other wildlife species.

The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

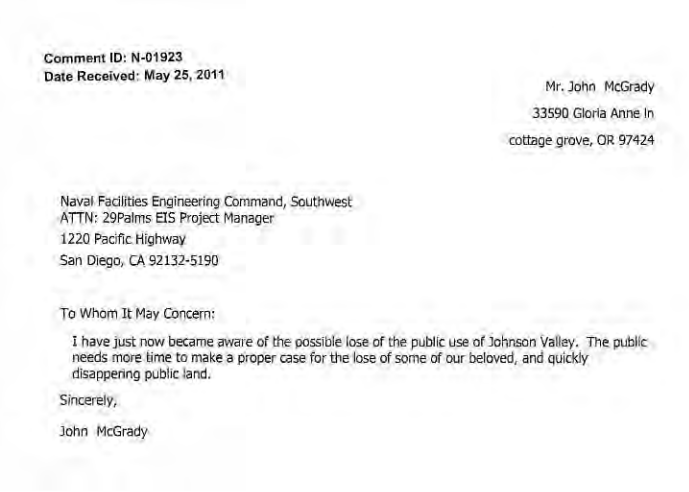
To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

The new Commadant of the Marine Corps is bringing the Marines back to their roots, not having them fight like a 2nd Army like they have been for the past 10 years.

It shoots down the whole purpose and need for the expantion.

Why should our armed forces need 2 LARGE training areas?



Sincerely,

Thomas Heath

Response to Comment N-01922:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

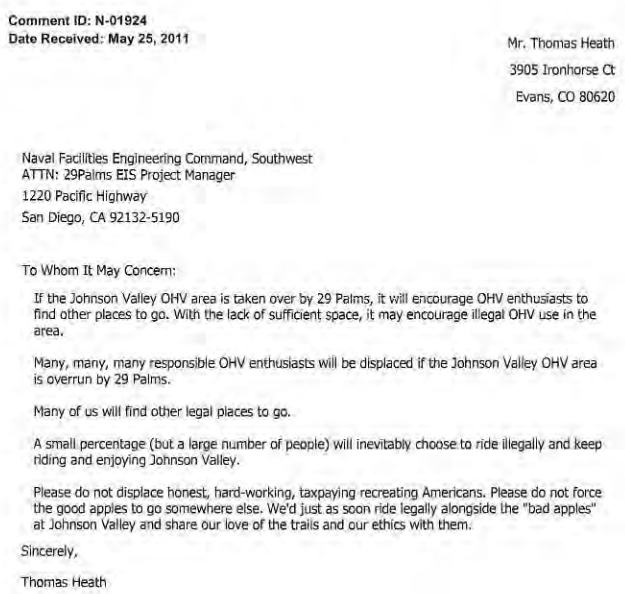
To Whom It May Concern:

I have just now became aware of the possible lose of the public use of Johnson Valley. The public needs more time to make a proper case for the lose of some of our beloved, and quickly disappering public land.



Sincerely,

John McGrady

Response to Comment N-01923:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

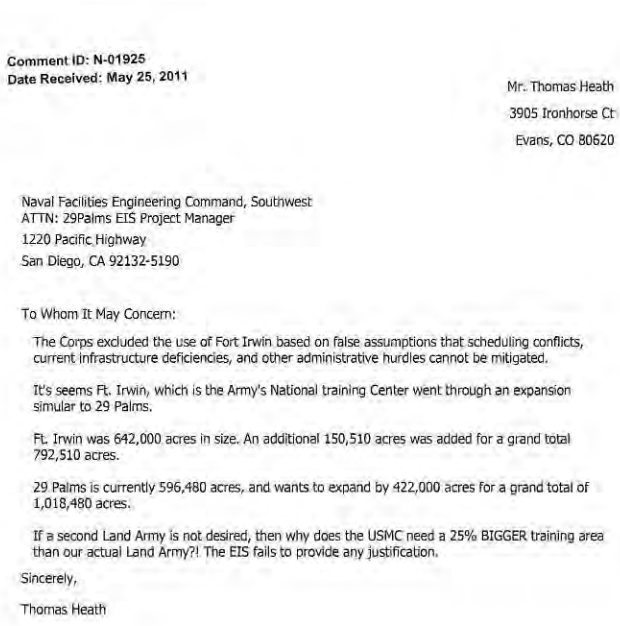
If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Many, many, many responsible OHV enthusiasts will be displaced if the Johnson Valley OHV area is overrun by 29 Palms.

Many of us will find other legal places to go.

A small percentage (but a large number of people) will inevitably choose to ride illegally and keep riding and enjoying Johnson Valley.

Please do not displace honest, hard-working, taxpaying recreating Americans. Please do not force the good apples to go somewhere else. We'd just as soon ride legally alongside the "bad apples" at Johnson Valley and share our love of the trails and our ethics with them.



Sincerely,

Thomas Heath

Response to Comment N-01924:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

It's seems Ft. Irwin, which is the Army's National training Center went through an expansion simular to 29 Palms.

Ft. Irwin was 642,000 acres in size. An additional 150,510 acres was added for a grand total 792,510 acres.

29 Palms is currently 596,480 acres, and wants to expand by 422,000 acres for a grand total of 1,018,480 acres.

If a second Land Army is not desired, then why does the USMC need a 25% BIGGER training area than our actual Land Army?! The EIS fails to provide any justification.

Sincerely,

Thomas Heath

Response to Comment N-01925:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

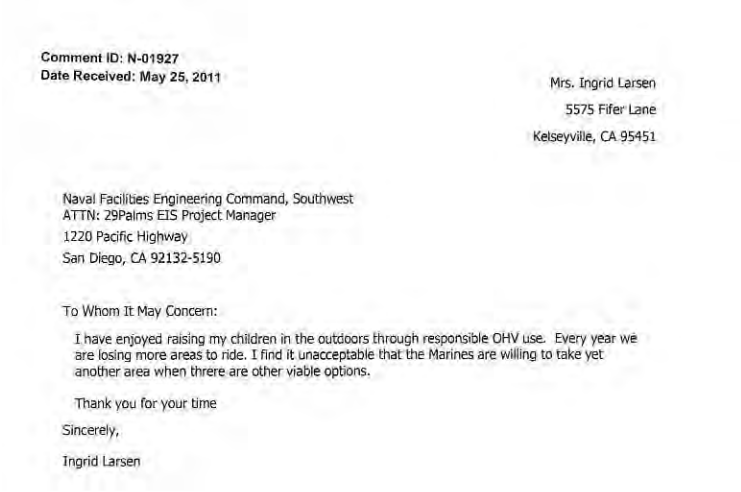
General James F. Amos, Commandment of the Marine Corps, spoke at the Fletcher Luncheon on April 15th, 2011.

General Fletcher spoke about future military actions and where the Marines are going to operate once we come out of Afghanistan, and he explained the "arc of instability." It is within this arc of instability that the Marines will most likely be engaging the enemy. These areas will be our future battlefields over the next two decades.

In speaking about this arc of instability, General Amos says:
"But we see that's probably what the world is going to look like for the next two decades. A lot more information there, but we think that's going to be our backyard because this is primarily the littorals, because these are kind of the nasty missions and things that, quite honestly, don't require 20,000 Marines on the ground."

If the Marines must train as they fight, then 29Palms does not need the capacity to simultaneously train 20,000 Marines.

Please keep Johnson Valley OHV area open to the public--including those Marines--who can come recreate at the OHV area when they are on leave from training, or redeployed home after fighting in that very arc of instability.



Sincerely,

Thomas Heath

Response to Comment N-01926:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. To Whom It May Concern:

I have enjoyed raising my children in the outdoors through responsible OHV use. Every year we are losing more areas to ride. I find it unacceptable that the Marines are willing to take yet another area when threre are other viable options.

Thank you for your time

Sincerely,

Ingrid Larsen

Response to Comment N-01927:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

To whom it may concern,

As an active duty Marine I do understand the importance of quality training areas and the need to expand to allow us to train how we fight more. I also understand the desire for OHV parks as they are closing down all over the country. While national defense comes first, many thousands of people use Johnson Valley for recreation. And while in California we have many OHV parks, many are closing down here and across the country. Johnson Valley is an amazing OHV area that has activites that anyone can partake in, not just rock crawling. I would like to be able to take my children offroading and get them outside instead of playing video games and this is an awesome place to do that. With increasing interest in off-road motor sports, events like King of the Hammers, which are growing our sport at a rapid pace, will be forced to move or cease to exist. If it moves it lwill also take a lot of money out of california. Thank you for your time.

Jordan Meredith

Sincerely,

Jordan Meredith

To Whom It May Concern:

Regarding the expansion of the 29 Palms Marine Base, if it expands west into the Johnson Valley recreation area, the economy of the towns directly around Johnson Valley will be greatly affected. Personally, my family spends multiple thousands of dollars per year in the local economy.

We recreate in the Johnson Valley area more than 15 weekends per year, going so far as to spend 14 days straight there during the time of the King of the Hammers Off Road Race, plus another couple of one week stretches throughout the year for race practice and/or family recreation time with my wife and two school-age sons.

Each time we arrive, we do so with no groceries and empty fuel tanks. We fill over 100 gallons at local gas stations EVERY VISIT WE MAKE...on longer visits, we fill over 200 gallons, with most of it being premium fuel. Then, we head to the local market to buy groceries. Also, if we need spare parts, we purchase them locally, plus we attend weekend fundraiser barbecues and pancake breakfasts, plus get camping gear and other supplies locally on a regular basis. Add it all up and the dollars taken away from the local economy from recreationalists like me is a HUGE sum of money. Big money in small towns that rely on our tourism dollars.

Don't take money out of the local community by moving west into the Johnson Valley Recreation Area.

Sincerely,

Dustin Webster

Response to Comment N-01930:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

Comment ID: N-01931

To Whom It May Concern:

For decades, OHV recreation lands have been eliminated at an alarming rate. If there were no viable options for the Marines to properly train, then of course recreationalists would be sad, but would not fight the expansion. However, considering that there are other alternatives other than moving west into Johnson Valley COMBINED with the fact that the Marines have adapted their missions and training since the decision to expand 29 palms was considered OVER 15 YEARS AGO, it truly makes no sense to take away even more OHV recreation lands.

DO NOT TAKE OUR RECREATION LANDS AWAY for plans that were changed LONG AGO.

Sincerely,

Dustin Webster

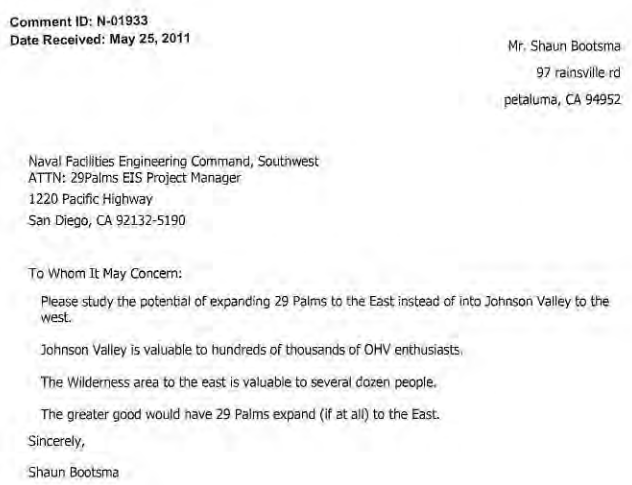
To Whom It May Concern:

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

he US Government (BLM) has determined that fireworks are illegal at the Johnson Valley OHV area due to the risk of wildfire.

How does the US Government (USMC) propose to mitigate the risk of wildfire at Johnson valley with the use of live fire rounds?

There seems to be a huge contradiction in the laws that the US Government wants to impose upon its citizens and the regulations it allows for itself.



Sincerely,

Mike Stewart

Response to Comment N-01932:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

San Diego, CA 92132-5190

To Whom It May Concern:

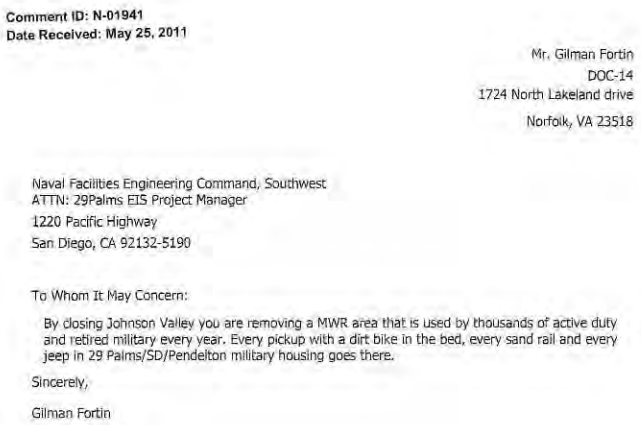
I am a user of the Johnson Valley OHV area. I have to travel 600 miles to enjoy our public land. The amount of OHV users has grown exponentially in the past 30 or so years. However, places where users can legally recreate have been decreased. This creates more impact on the areas that are still open. Please consider alternatives to closing Johnson Valley. Please keep these public lands open to the public.

Sincerely,



Darryl Merrin

Response to Comment N-01940:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the reduction in availability of OHV land would cause significant impacts to recreation under the proposed action as well as a significant cumulative impact. The analyses presented in the EIS acknowledge and discuss the impacts that reduced recreational lands in Johnson Valley would have on increased usage and potential overcrowding in other areas, as well as related impacts to other environmental resources.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. The public involvement process has led to the development of project alternatives (e.g., Alternatives 4, 5, and 6) that would enable the Marine Corps to meet the minimum live-fire and maneuver training requirements for a MEB while also providing public access to as much of the Johnson Valley area as possible for recreational use. Please refer to Sections 2.5 and 4.2 of the EIS. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

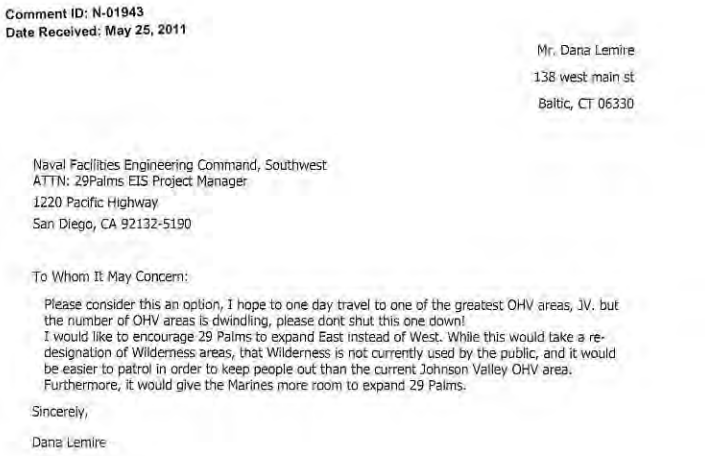
what is the need to expand esp being that the corp is downsizing its active duty members and only taking reserves. also the nation has 14 trillion dollars in debt that needs so be taken care of before any military expansion can happen. the marines are there to protect our freedom, taking over the ohv park would be taking away freedoms not protecting or expanding them.

Sincerely,

John Mandell



Response to Comment N-01942:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

The Marine Corps appreciates your comment and involvement in the NEPA process.

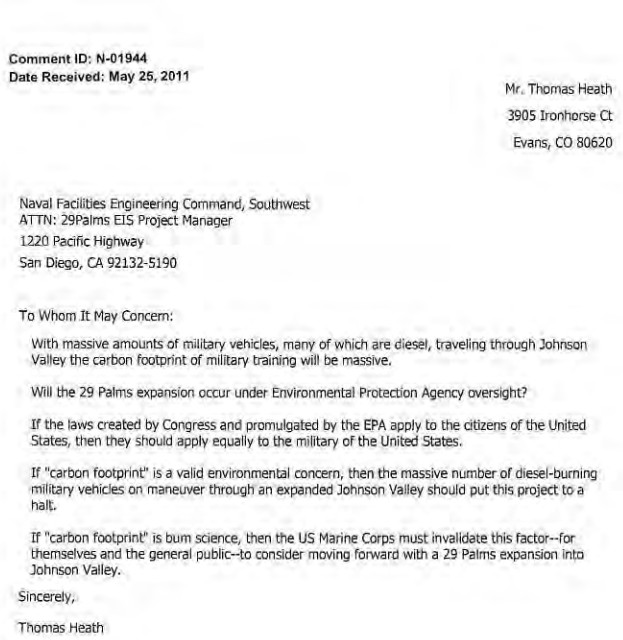
To Whom It May Concern:

Please consider this an option, I hope to one day travel to one of the greatest OHV areas, JV. but the number of OHV areas is dwindling, please dont shut this one down!
I would like to encourage 29 Palms to expand East instead of West. While this would take a re-designation of Wilderness areas, that Wilderness is not currently used by the public, and it would be easier to patrol in order to keep people out than the current Johnson Valley OHV area. Furthermore, it would give the Marines more room to expand 29 Palms.



Sincerely,

Dana Lemire

Response to Comment N-01943:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

Will the 29 Palms expansion occur under Environmental Protection Agency oversight?

If the laws created by Congress and promulgated by the EPA apply to the citizens of the United States, then they should apply equally to the military of the United States.

If "carbon footprint" is a valid environmental concern, then the massive number of diesel-burning military vehicles on maneuver through an expanded Johnson Valley should put this project to a halt.

If "carbon footprint" is bum science, then the US Marine Corps must invalidate this factor--for themselves and the general public--to consider moving forward with a 29 Palms expansion into Johnson Valley.

Sincerely,

Thomas Heath

Response to Comment N-01944:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

To Whom It May Concern:

The EIS has not noted the risk of damage to the existing Boone Lake road, particularly with the use of tracked vehicles.

The EIS has not noted the risk of damage to existing routes with the use of live ordinance.

The EIS has not noted the additional traffic on Highway 247 which will be used by the Marines for mobilization into the eastern portion of an expanded 29 Palms.

Sincerely,

Shawn Baker

Response to Comment N-01945:

Thank you for your comment. Section 4.12 of the EIS discusses impacts to geological resources under each of the action alternatives. As noted in the EIS, there is expected to be direct impacts to soils as a result of military vehicle operations, ordnance delivery, and infantry training.

As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

The EIS evaluates impacts to transportation under each of the action alternatives (see Section 4.6). As noted in the EIS, Highway 247 would not be used by the Marine Corps with acquisition of the east study area. Under alternatives that acquire land in the west acquisition study area, the EIS determined that marginal temporary traffic increases on Highway 247 due to MEB mobilization would not create significant impacts.

To Whom It May Concern:

No Alternative has clearly made any substantive, detailed description of how a Shared Use area might work.

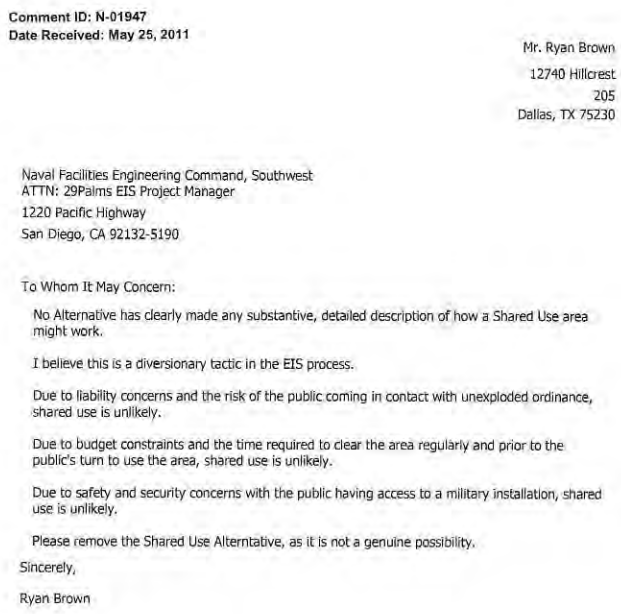
I believe this is a diversionary tactic in the EIS process.

Due to liability concerns and the risk of the public coming in contact with unexploded ordinance, shared use is unlikely.

Due to budget constraints and the time required to clear the area regularly and prior to the public's turn to use the area, shared use is unlikely.

Due to safety and security concerns with the public having access to a military installation, shared use is unlikely.

Please remove the Shared Use Alterntative, as it is not a genuine possibility.



Sincerely,

Shawn Baker

Response to Comment N-01946:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

To Whom It May Concern:

Given the Alternatives presented, I strongly support only a no-action Alternative.

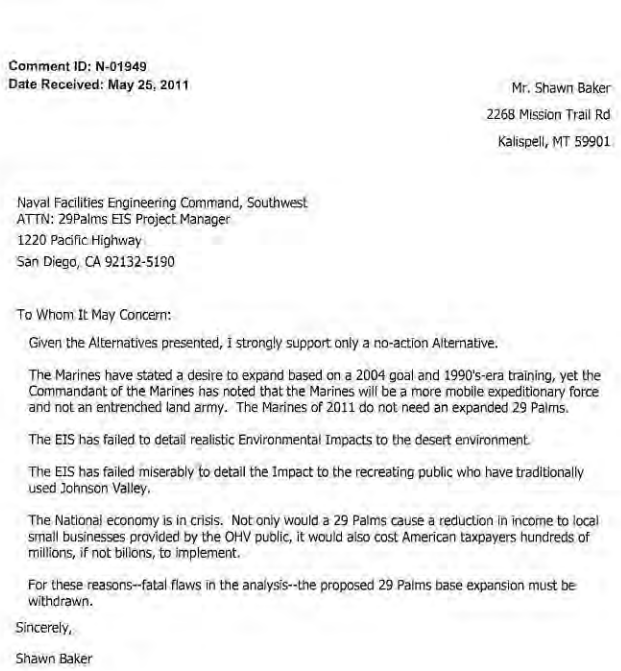
The Marines have stated a desire to expand based on a 2004 goal and 1990's-era training, yet the Commandant of the Marines has noted that the Marines will be a more mobile expeditionary force and not an entrenched land army. The Marines of 2011 do not need an expanded 29 Palms.

The EIS has failed to detail realistic Environmental Impacts to the desert environment.

The EIS has failed miserably to detail the Impact to the recreating public who have traditionally used Johnson Valley.

The National economy is in crisis. Not only would a 29 Palms cause a reduction in income to local small businesses provided by the OHV public, it would also cost American taxpayers hundreds of millions, if not billons, to implement.

For these reasons--fatal flaws in the analysis--the proposed 29 Palms base expansion must be withdrawn.



Sincerely,

Shaun Bootsma

Comment ID: N-01951 (Page 2 of 2)

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

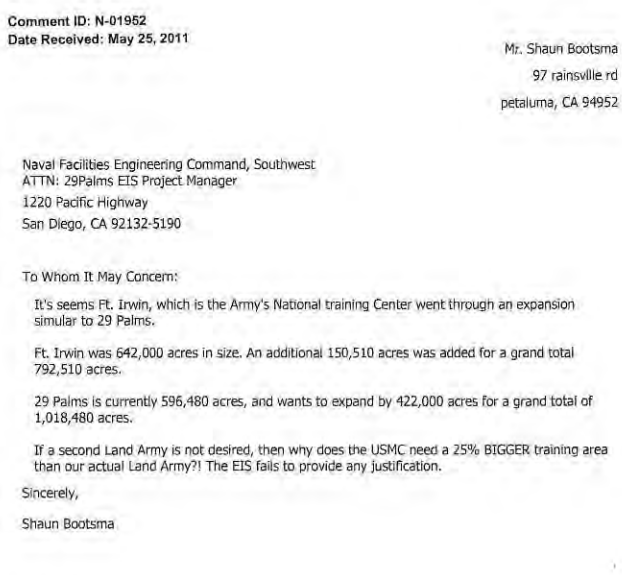
The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.



In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary

Sincerely,

Travis Carpenter

It's seems Ft. Irwin, which is the Army's National training Center went through an expansion simular to 29 Palms.

Ft. Irwin was 642,000 acres in size. An additional 150,510 acres was added for a grand total 792,510 acres.

29 Palms is currently 596,480 acres, and wants to expand by 422,000 acres for a grand total of 1,018,480 acres.

If a second Land Army is not desired, then why does the USMC need a 25% BIGGER training area than our actual Land Army?! The EIS fails to provide any justification.

Sincerely,

Shaun Bootsma

Response to Comment N-01952:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. To Whom It May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

A Marine Expeditionary Brigade (MEB) is a formation of the United States Marine Corps, a Marine Air-Ground Task Force of approximately 14,500 Marines and Sailors constructed around a reinforced infantry regiment, a composite Marine aircraft group, a logistics group and a command element.

The Commandant of the Marine Corps stated just months ago that the USMC's mission would be changing and that the Marines are not a second Army, and in past years have not been used like they should be used, so he is getting the Marines back to their roots.

Their roots do not consist of three simultaneous MEB's.

The US Army has just expanded Ft. Irwin for simultaneous battalion-level training. Leave the land army to the Army!

General James F. Amos promised the Armed Services committee promising that the Marines will only ask for what they NEED, not for what they WANT. I sincerely hope that Johnson Valley is on the "WANT" list and will be peacefully removed from that list!

Defense Secretary Robert M. Gates is quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

Sincerely,

Thomas Heath

Comment ID: N-01954 (Page 2 of 2)

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

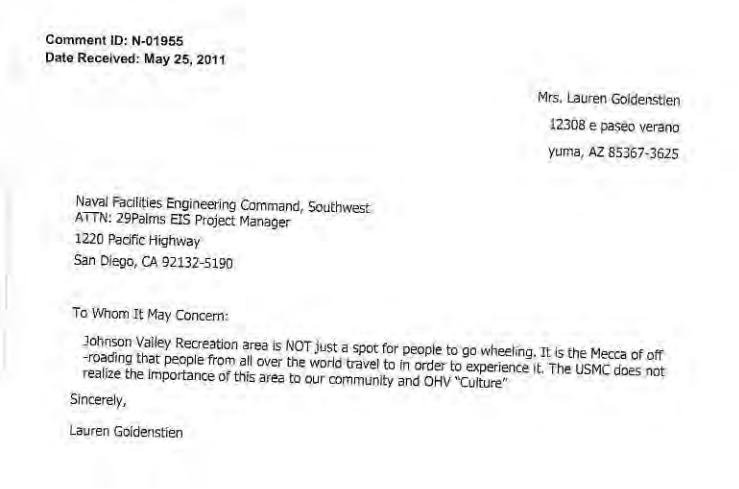
The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.



In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary

Sincerely,

Shaun Bootsma

Response to Comment N-01955:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

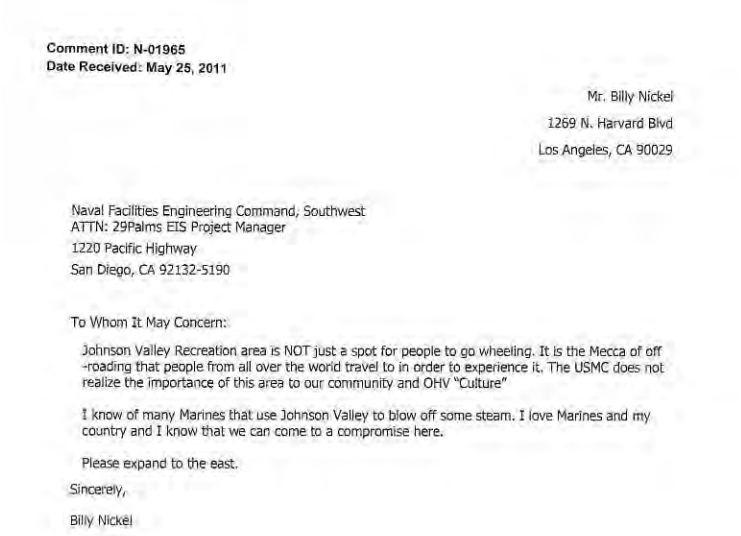
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture".
As such an important place to such a large international use group, JV OHV area should be protected and not allowed to be used by military forces. Please realize how unique and loved this place is by the citizens and review other options for expansion.



Sincerely,

Brad Buter

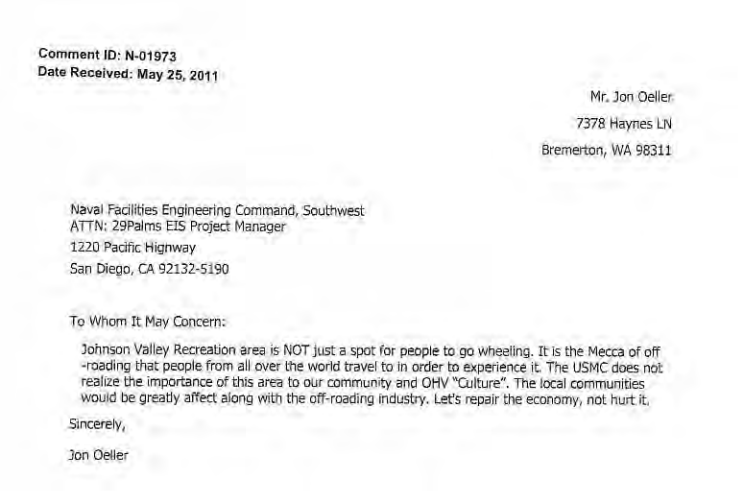
I am a US Marine and I understand the need to train like we fight. I do not see the need to expand MCAGCC into the OHV area. Once this is done there will be know turning it back over to the land users. There is more than enough desert to the east of the base that can be used.



Sincerely,

Robert Kennedy

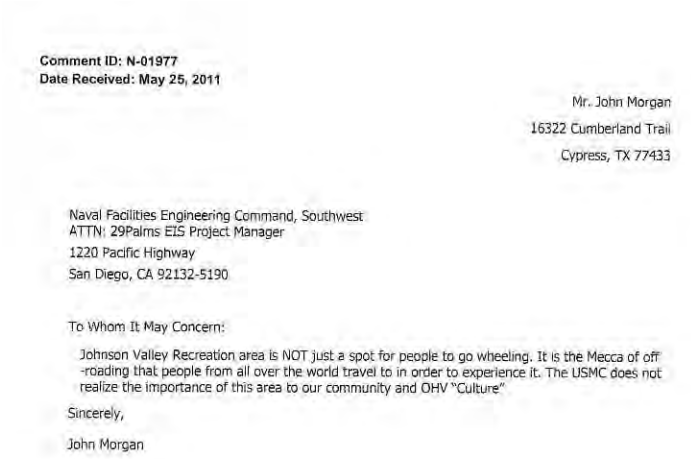
All though I have never been to Johnson Valley Recreation area, I plan on venturing out there in February 2012 for The King of The Hammers event. Johnson Valley is one of the biggest OHV areas in the Country, this is essential to the survival of our sport. JV also provides a significant boost to the local economy due to OHV users needing places to stay, eat, etc,...
So please read my letter and recognize our need for Johnson Valley to stay open for OHV use.



Sincerely,

Caleb Spillane

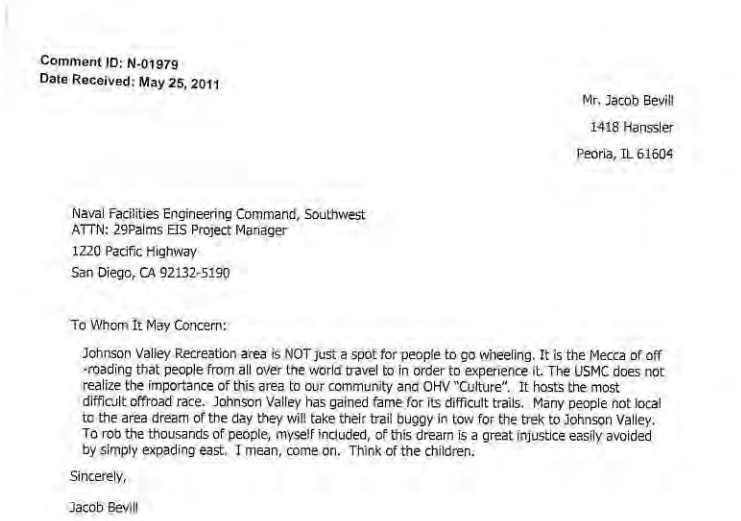
I think if the USMC would look closer into the area of Johnson Valley they would see how important it is to so many OHV users. The USMC has much more power when it comes to expanding into new areas than the general public. This would be a perfect time to flex those powers and move east into wilderness land that is currently not even available to the public. Let the OHV community keep what little they have. Your training exercises will be just as good if they were done east of the location in Johnson Valley. Please do not overpower the opinions of OHV users and push us out of our playground.



Sincerely,

Jason Gray

Response to Comment N-01978:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

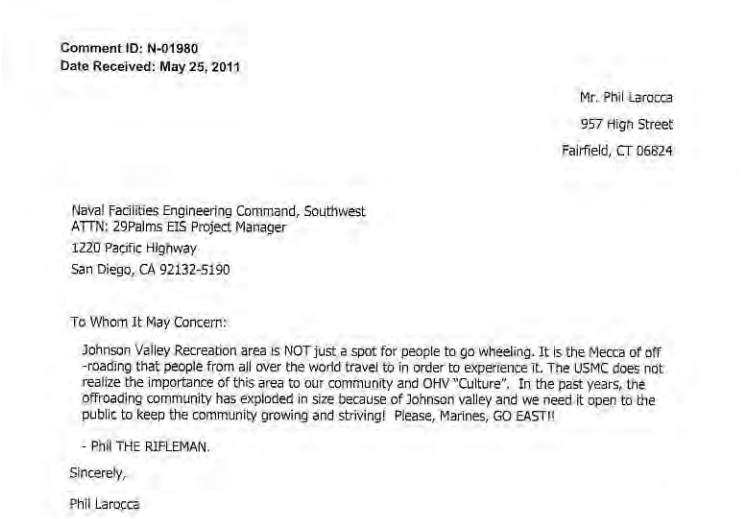
To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". It hosts the most difficult offroad race. Johnson Valley has gained fame for its difficult trails. Many people not local to the area dream of the day they will take their trail buggy in tow for the trek to Johnson Valley. To rob the thousands of people, myself included, of this dream is a great injustice easily avoided by simply expading east. I mean, come on. Think of the children.

Sincerely,



Jacob Bevill

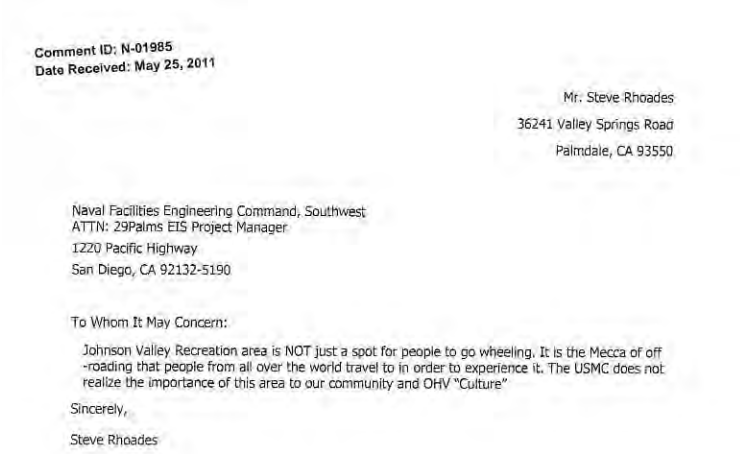
OHV users are huge supporters of the Military. Many current military and vets enjoy OHV activities, and Johnson Valley is on the "must see" list for any avid outdoorsmen. The closure of public areas that are so heavily utilized by the public is a real mistake. I whole heartedly support the marines, and completely support their expansion East instead of West. I understand there are hurdles going East, but you must understand the overwhelming public support you'll have helping you overcome those hurdles.

GO EAST MARINES

Sincerely,



Ryan Brown

I would like you to reconsider your land use expansion that is developing in the 29 Palms area. I have trained at the 29 palms area in the past as well as used the Hammers for recreational use. I live all the way across the country in NC, and fly out to events that our going on in the Jhonson valley area. I and my many friends bring in revenue for the local people with food,fuel, and other spending. The Government need for land is becoming more abundant and i would never want any training of our troops to suffer from a civilian standpoint.However there has to be a way that we can keep some of the areas open for OHV usage, while the military could use it as well. Compromise is what i am asking for the good of both parties. Thanks for listening to someone who loves public OHV areas and have seen them stripped away numerous times by the goverriment in the last years. We are losing use of our federal lands and we are ready for that to change.
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

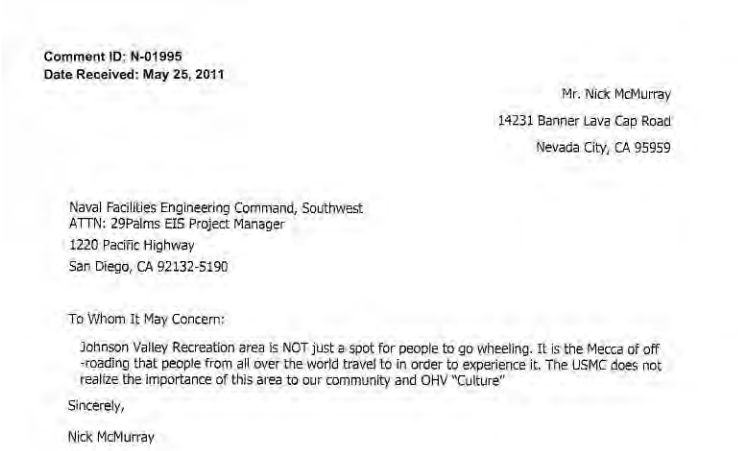
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". To draw foreigners from other countries to Johnson Valley must say something of it's raw importance. Not only as a piece of culture, but also as a piece of history. Not to leave out the large role of joining many parts of the world together in a peaceful enviroment where everyone can learn more about other cultures, and also share about our own. In other words, Johnson Valley and the recreation that it allows, also allows a gathering of many nations that could possibly lead to continuous peace among countries that may otherwise have no common interests.



Sincerely,

michael morton

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

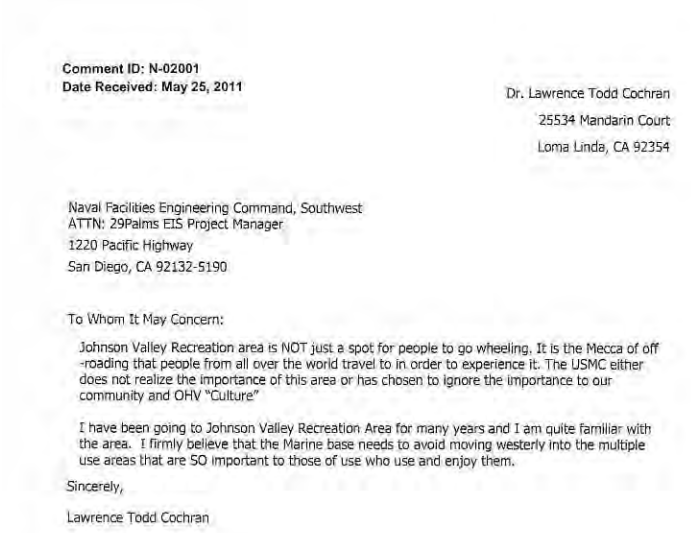
As a former Navy seabee EO1 (SCW). and offroad enthusiast as well as a asst high school ROP teacher i just wanted to let whoever may read this know how this will effect many people. first things first i spent 12 years as an equipment operator stationed outta port hueneme navy base did month and month of training and building K-span buildings on 29 palms military base. i have been going to to Johnson valley since i was a little kid riding dirt bikes and now racing in the King of the hammers last year we were car #4449 which was built by high school kid not me or other adults but by the kids them self. this was our third year doing this and the kids love it as much as any one else that has ever did any thing. i have been on 29 palms base before there are plenty on miles for training purposes for convoy training and shooting ranges as well as close combat training physicality . johnson valley is one of the few places in California that is an OHV area that hasn't be closed down yet and is open to the public JV is the hardiest area i have ever wheeled in my life and now i live 45min from the rubicon. If the people lose JV as an ohv area that would be a huge lose for the people. as from what iv seen beeing in the military and a civilian JV should say OHV



Sincerely,

Steven white

Response to Comment N-02000:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

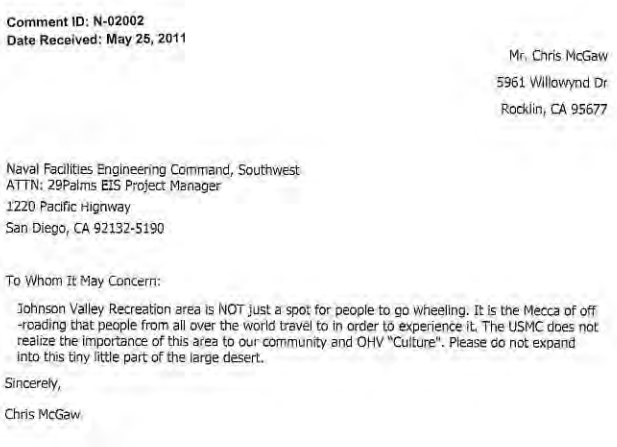
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC either does not realize the importance of this area or has chosen to ignore the importance to our community and OHV "Culture"

I have been going to Johnson Valley Recreation Area for many years and I am quite familiar with the area. I firmly believe that the Marine base needs to avoid moving westerly into the multiple use areas that are SO important to those of use who use and enjoy them.



Sincerely,

Lawrence Todd Cochran

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. I'm only willing to travel 32 hours by truck over hill and dale for one place on this planet, Johnson Valley! The USMC does not realize the importance of this area to our community and OHV "Culture". JV is the womb that has given birth to an entirely new breed of vehicle and sport. Much like the term 'Baja' brings visions of volkswagons with stinger exhaust and long travel trophy trucks, the term 'Hammers' brings visions of rigs that can do triple digits across the desert and crawl rocks and waterfalls. We need this area for the sport!

Sincerely,

Joel McJones

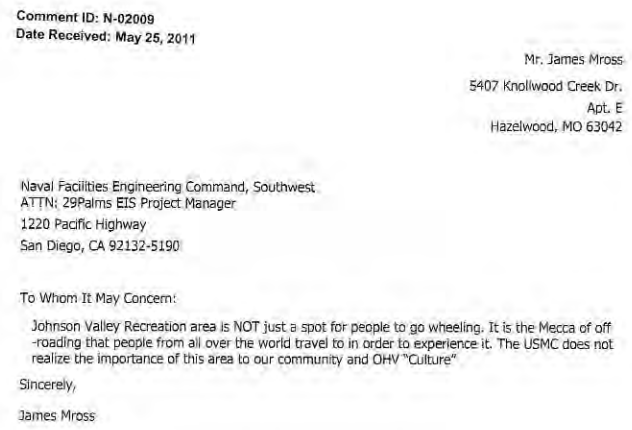
Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

We have been enjoying 4 wheeling in the Johnson Valley area for over 25 years. We have moved out of the So Cal area but still travel the 450 miles to enjoy the area as it is like no other.

Please spare the area we and our children enjoy!



Sincerely,

Brigitta Hopkins

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

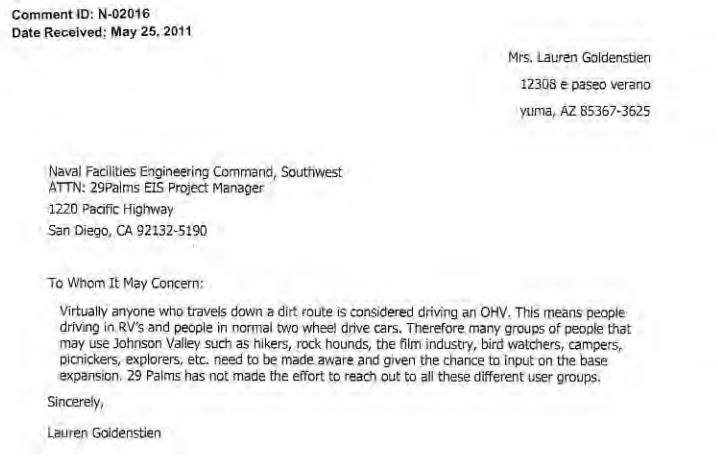
Johnson Valley Recreation area is NOT just a spot for people to go wheeling, It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". I recreat at least twice a year in the proposed area to be closed. During my vacations here I spend money at the local shops, markets and gas stations. Eliminating this popular destination may put these stores out of there customers. I hope you reconsider closing the area to OHV users. I see the need for training areas for our military I suggest using the area with ohv users instead of kicking them out.

Sincerely,



Sebastian Draeger

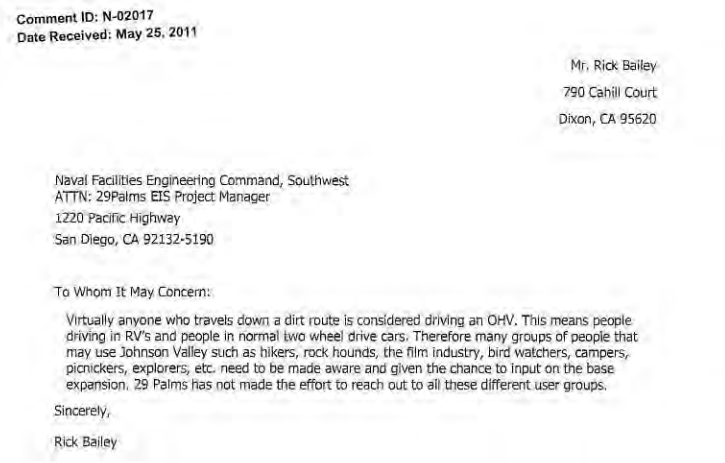
Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.



Sincerely,

Lauren Goldenstien

Response to Comment N-02016:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

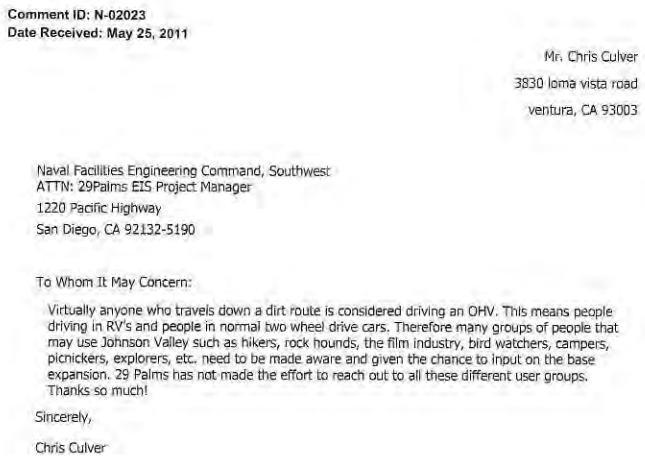
While I respect the US Marines and what they do for our country, their proposed expansion is not being allowed to be commented on by ALL the varied use groups of the area.
Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.
Please solicit and extend the information on Marine expansion into these other diverse user groups in order to really get an idea on the public's sentiment for this issue that is so important to these citizens.



Sincerely,

Brad Buter

Response to Comment N-02022:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

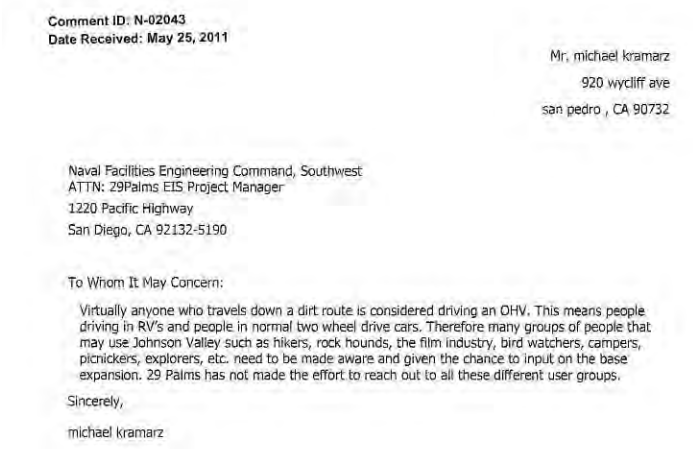
Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups. This proposal should have a large public release, that WILL be seen by a majority of the public. Many family members of mine that live within 1 hour of Johnson Valley knew nothing of this proposal until in I notified them once I had learned of it... and I live 9+ hours away!!!



Sincerely,

michael morton

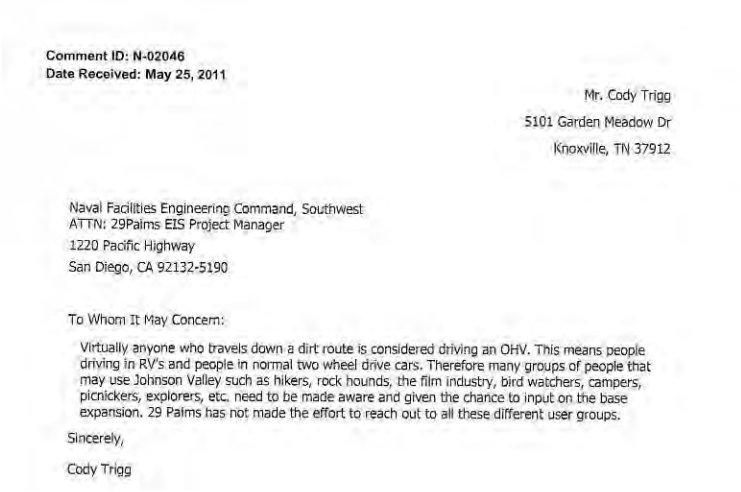
Johnson valley is more than just an offroading location, it is a unique zone that is favorite to recreationalists regardless of the specific avenue.

the marines have many other viable options for training grounds, taking this away is unnecessary.

Sincerely,



Taylor Wade

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

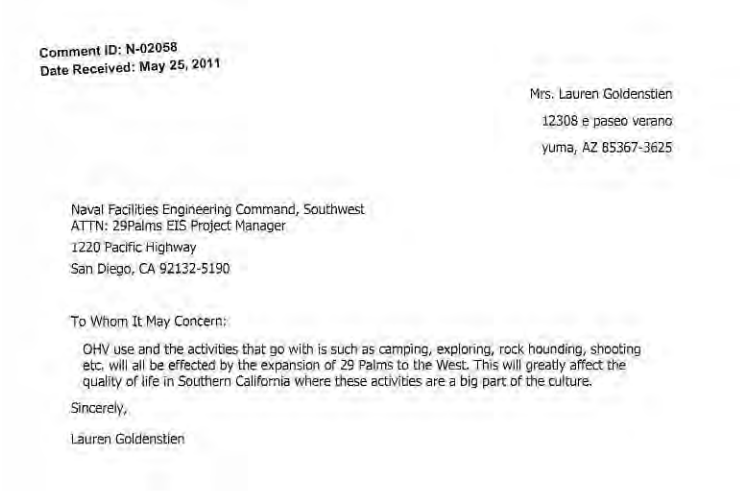
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.



Sincerely,

Derek Kagley

Response to Comment N-02057:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Response to Comment N-02062:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

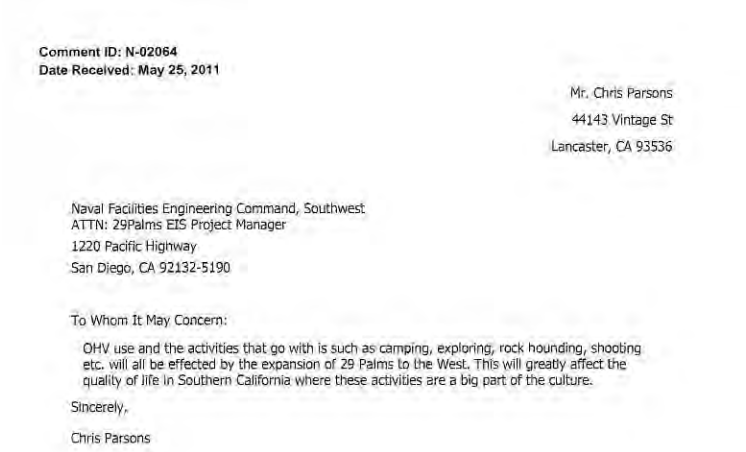
To Whom It May Concern:

While I respect the US Marines and what they do for our country,I do not think expansion into JV OHV area is a good idea.
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.
Families and individuals depend on areas such as JV for their recreation and as a chance to leave their lives in the cities behind. Shrinking the areas allowed to be used by the OHV community will be extremely detrimental to these citizens, and needs to stopped.



Sincerely,

Brad Buter

I am from Texas. the closure of the Johnson Valley OHV area will have much larger effects than simply the Southern California area. People from around the country utilize this area to enjoy the outdoors. This area has long been open to the public and should remain so.

GO EAST MARINES

Sincerely,

Ryan Brown

Response to Comment N-02070:

To Whom It May Concern:

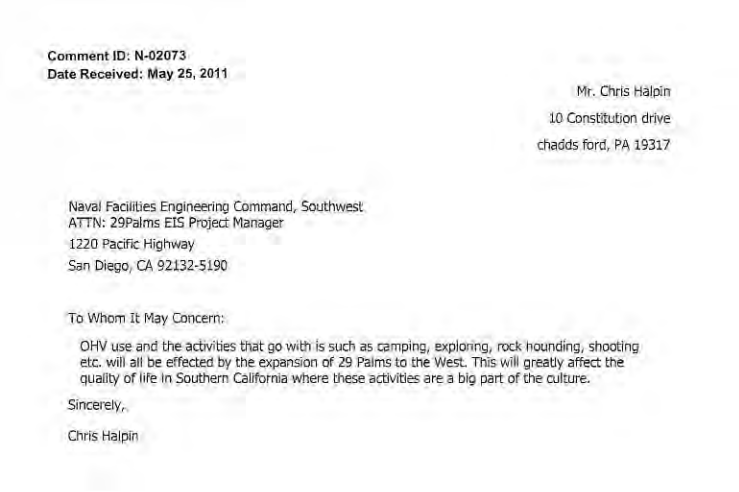
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. If the Marine base is expanded it will remove yet another area of the country that we off highway enthusiasts can no longer recreate. This will greatly affect the quality of life all over the country who travel to Johnson Valley for their recreation trip. People drive from the east coast and all over the mid west to visit Johnson Valley and experience it's great natural terrain and beauty. With out JV, there will be one less new place for people to explore, this lowering their quality of life.



Sincerely,

Adam Wiegmann

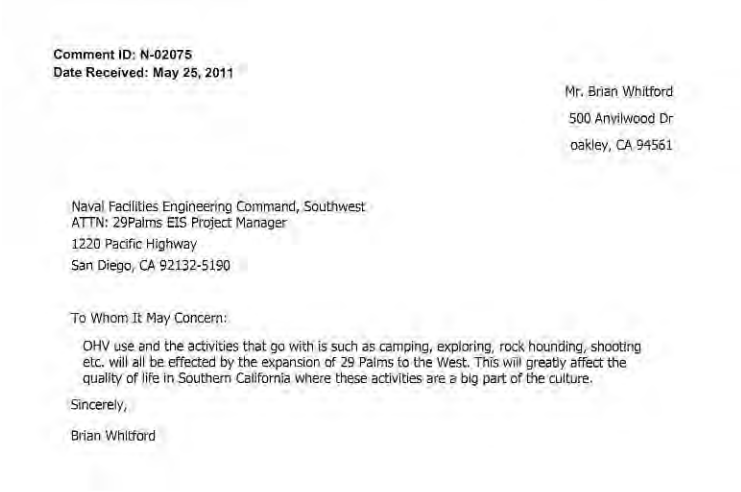
This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. To think that is okay to expand in to our ever diminishing public land is completely asinine. Please reconsider, and go East. If expansion is necessary then purchase that land from private parties. Do not steal it from Americans. I use Jonson Valley multiple times a month and this is a heartbreaking issue. I really wish that my children will be able to see the hammers, and experience the great opportunities that JV gives us to socialize, wheel, and have fun.

I am doubtful that any consideration will be made, but i have a little hope in people to do what is right for the American People. Do not let us down.

Sincerely,



Jason Cook

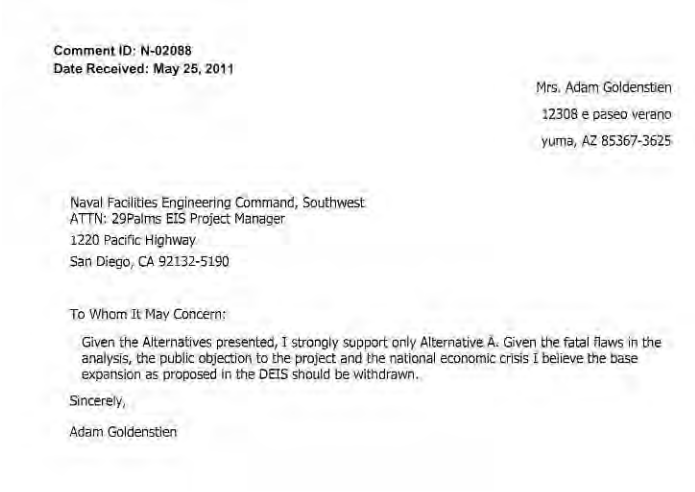
yuma, AZ 85367-3625

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.



Sincerely,

Lauren Goldenstien

Response to Comment N-02087:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

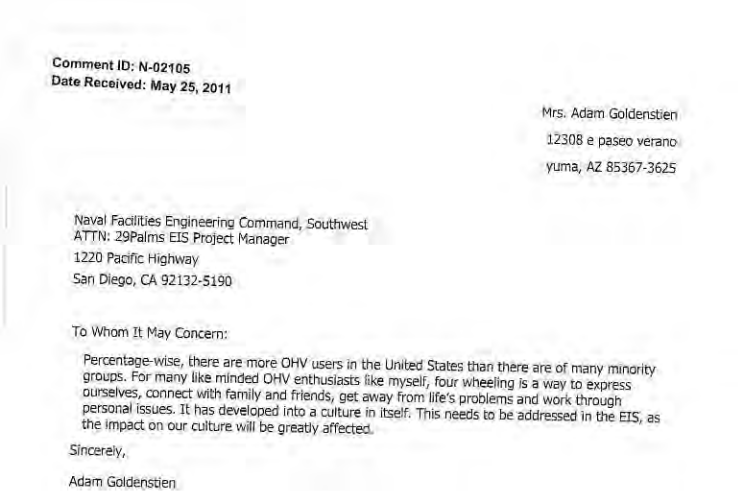
Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.



Sincerely,

Lauren Goldenstien

Response to Comment N-02104:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

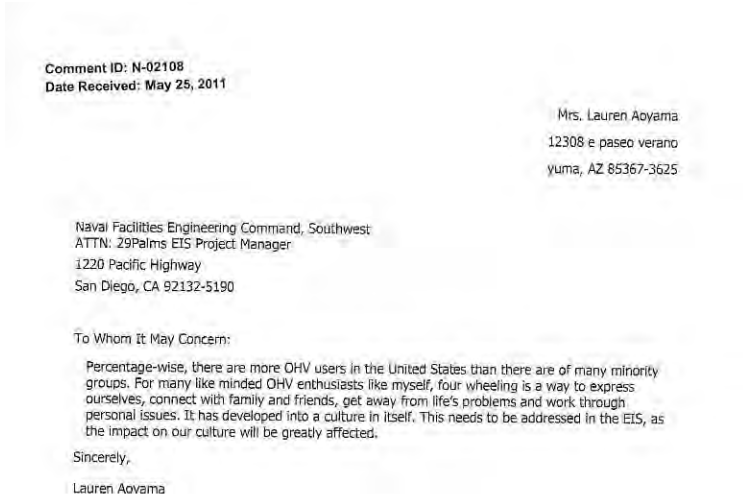
Many of us have physical disabilities that make it much harder for us to get out and enjoy nature, OHV's help us to get out and enjoy nature where otherwise we wouldn't be able to. JV is one of the Meccas of Offroading in the country. If this gets taken it will be a great loss to the OHV community. I understand that our armed forces need training facilities but this is a very important area to the OHV community and they currently have thousands of acres in the area at their disposal.



Sincerely,

Aaron Thompson

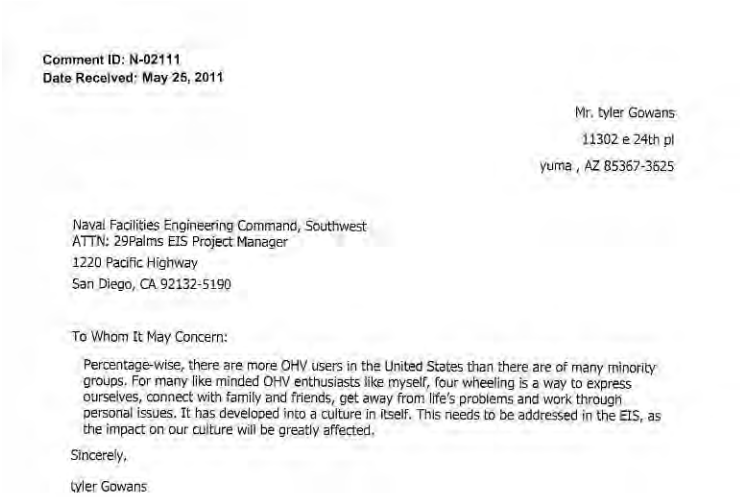
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.
As such, there are many areas for expansion that will not affect such a large group of Americans. Please consider these before you detrimentally affect a large culture of OHV using citizens.



Sincerely,

Brad Buter

Response to Comment N-02110:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like myself, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Sincerely,

Jamie Kelly

We need the Johnson Valley area to remain open to the public for OHV use. This is one of the few remaining places that offers the quality of terrain to excercise our sport in the way we enjoy most.

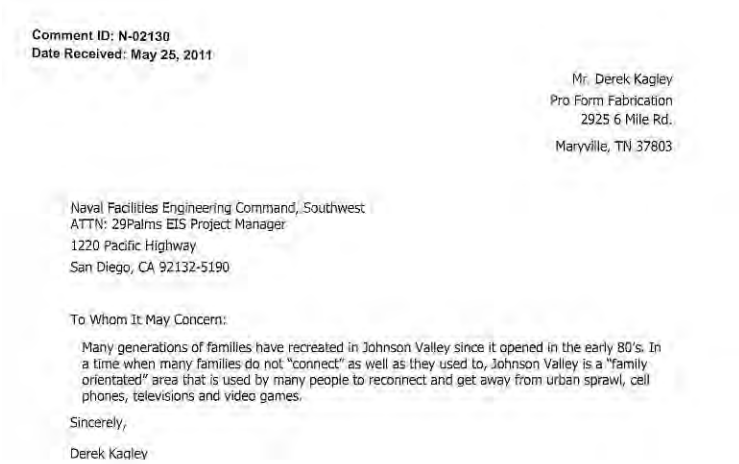
Please realize, That the johnson valley orv area is THE mecca for orv users who want the most challenging area's to recreate. People come from all over the united states, and many other foreign country's so enjoy the terrain unique to the area. It would be very difficult to account for the loss of revenue the area creates worlwide if it is no longer available to recreate at.



Sincerely,

Joseph Bunker

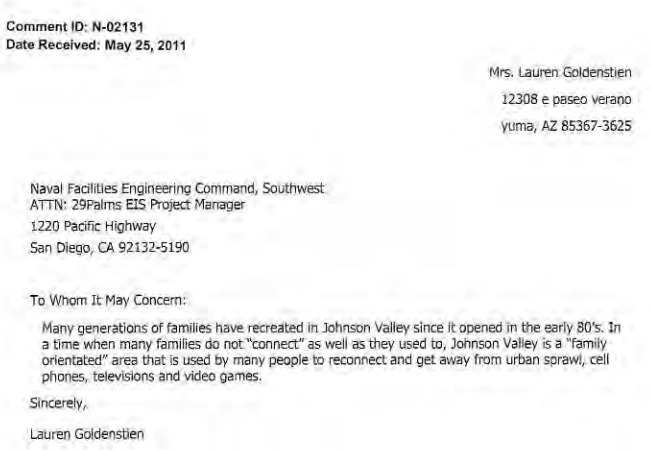
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.



Sincerely,

Derek Kagley

To Whom It May Concern:

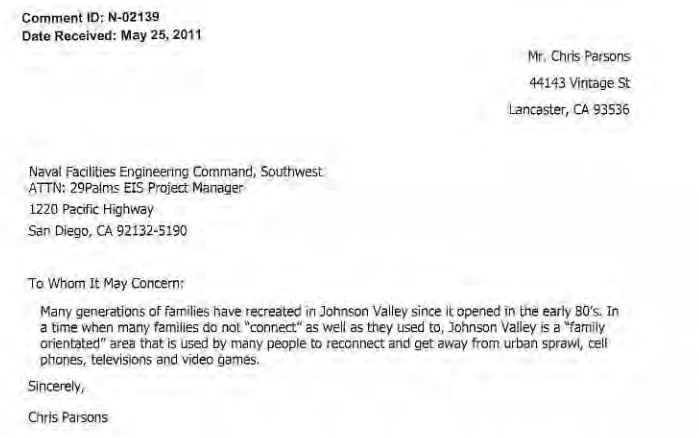
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. Thanks so much!



Sincerely,

Chris Culver

Response to Comment N-02138:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

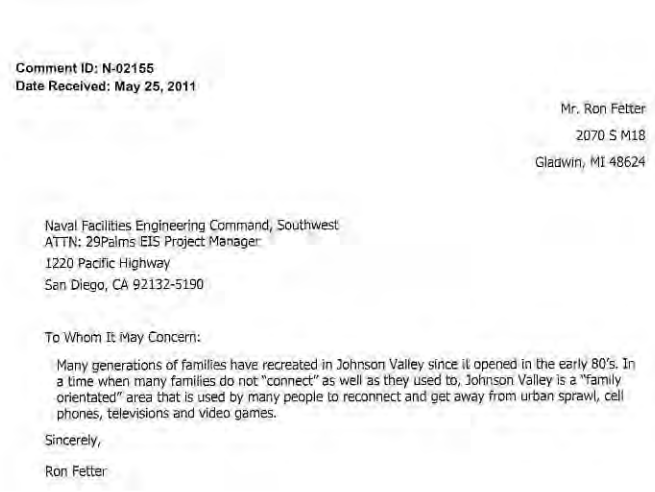
This is a place for the public to go and enjoy the outdoors. I have lived within 5 miles of 2 major military bases almost my whole life. There is always a way to work things out between the military and the public. There needs to be a compromise reached.



Sincerely,

Mike Nixon

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Sincerely,

Whitaker Behrens

Response to Comment N-02163:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

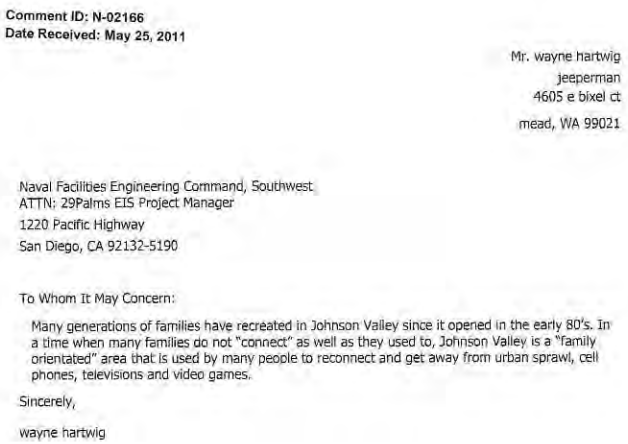
this land grab will be our families last push out of california. we are tired of losing lands. we are currently building a 60 thousand dollar off road car to compete in king of the hammers and many other events in california. we spend a lot of money every year on ohv sports and in the ohv communities. if we lose this land it will be our final push out and i have heard at least have a dozen other families say the same.



Sincerely,

josh lombardo

San Diego, CA 92132-5190

To Whom It May Concern:

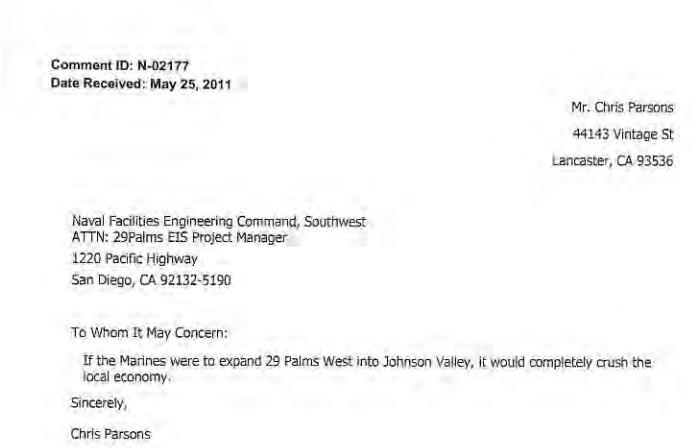
I respect the military that allows us to live free in the USA. However, if the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.
The high desert surrounding JV OHV area supports a community of people that are robust and proud to live in an area that is not considered hospitable by most of the population. These people have carved out a niche for their lives and most depend in some way on the revenue generated by the use of Johnson Valley OHV area.
Nearly every weekend groups from large to small of freinds and family converge on the lakebed in Johnson Valley to engage in off road activities that many base their lives around. These activities are not cheap, and force their practitioners to spend money in the local economies to support their time in the desert. From gas stations to grocery stores to motels and restaurants, few parts of the local communities are unaffected by the money that Johnson Valley brings to their table. While this occurs every weekend, during weekends of large races, such as KOH, this effect is magnified exponentially, with 20-30,000 people spending their hard earned money in the local communities during race week. Add that up, it is a huge boost to the local economy of the high desert.
Please reconsider your expansion into this OHV area that means so much to the citizens of the surrounding and supporting communities. Any change to JV use plan will have a detrimental effect on these people who so depend on its use for their livlihoods.



Sincerely,

brad buter

San Diego, CA 92132-5190

To Whom It May Concern:

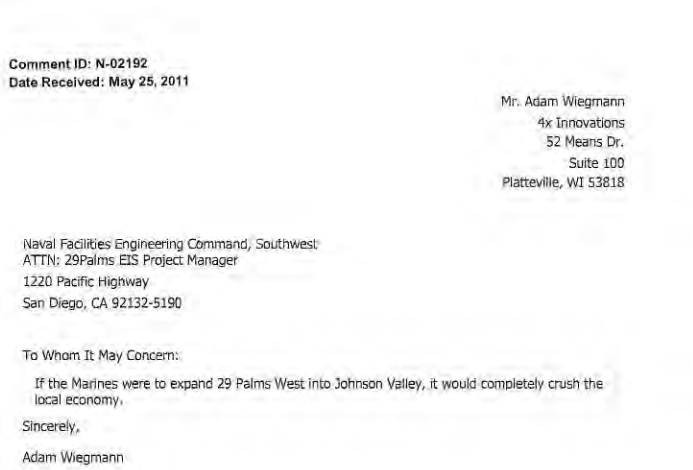
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. We travel all the way to Johnson Valley from Vancouver BC yearly and always make a point of doing all our shopping local to JV. I know lots of others do this as well as a way to say thanks for sharing their wonderful land was us. Closing JV would cause a huge loss to the local economy.



Sincerely,

Nic Pook

Response to Comment N-02191:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

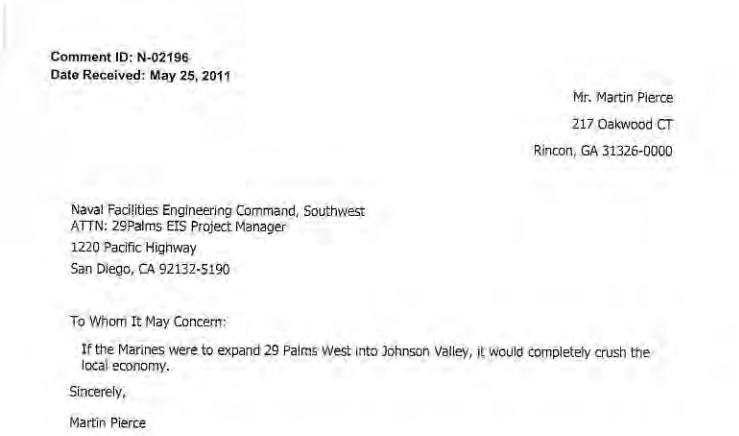
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Everytime we recreate at Johnson Valley, I personally spend hundreds of dollars at multiple stores between Barstow and the Johnson Valley OHV area. I am 1 family out of thousands that use this area multiple times a year. Imagine what would happen to all these small business's when 40,000 ohv users stop using them for business..... Please expand 29palms to the east... don't ruin the local ecocomy...

Sincerely,



Brian Whitford

Response to Comment N-02195:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). To Whom It May Concern:

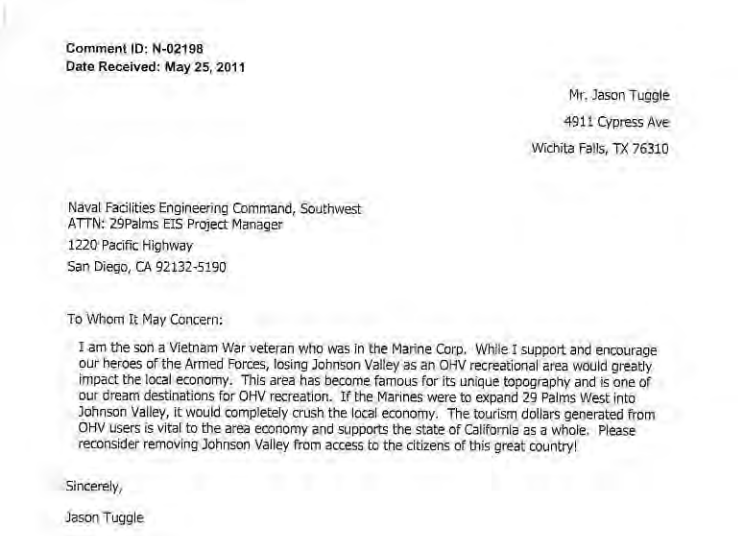
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. The local economy is based on the OHV use in the area and with the closure of Johnson Valley to the public the people who currently come from all over the country would no longer be there. Most people would be force to relocate and start business over or find new jobs. With the current state of the country's economy no one can afford to be looking for jobs for reasons like this.



Sincerely,

Karl Knowlton

Response to Comment N-02197:

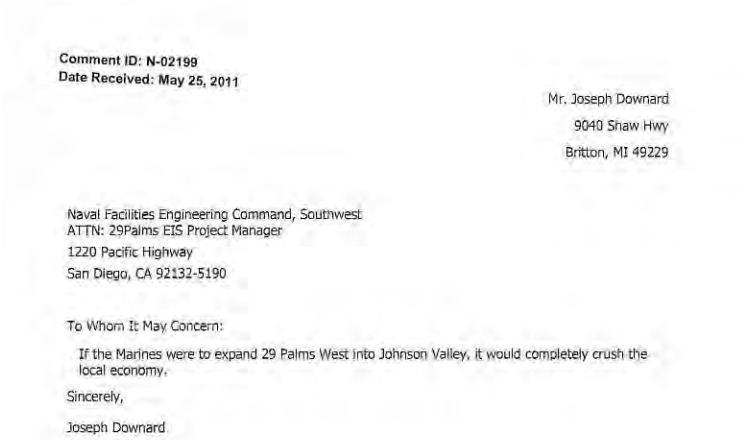
To Whom It May Concern:

I am the son a Vietnam War veteran who was in the Marine Corp. While I support and encourage our heroes of the Armed Forces, losing Johnson Valley as an OHV recreational area would greatly impact the local economy. This area has become famous for its unique topography and is one of our dream destinations for OHV recreation. If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. The tourism dollars generated from OHV users is vital to the area economy and supports the state of California as a whole. Please reconsider removing Johnson Valley from access to the citizens of this great country!

Sincerely,



Jason Tuggle

Response to Comment N-02198:

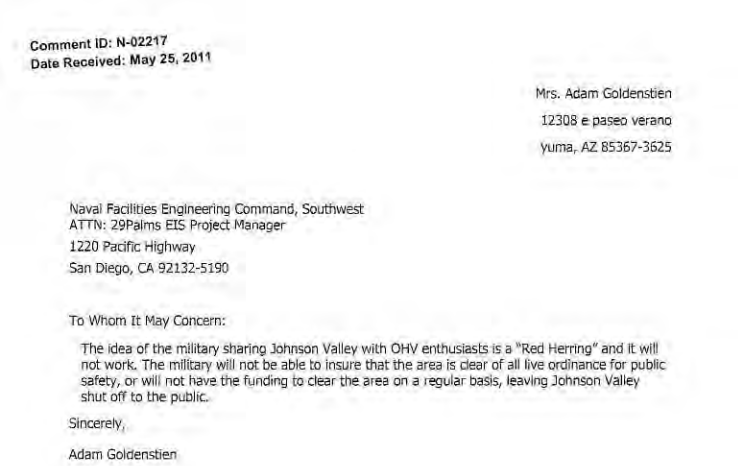
The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.



Sincerely,

Lauren Goldenstien

Response to Comment N-02216:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

Response to Comment N-02218:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Steven Rector

To Whom It May Concern:

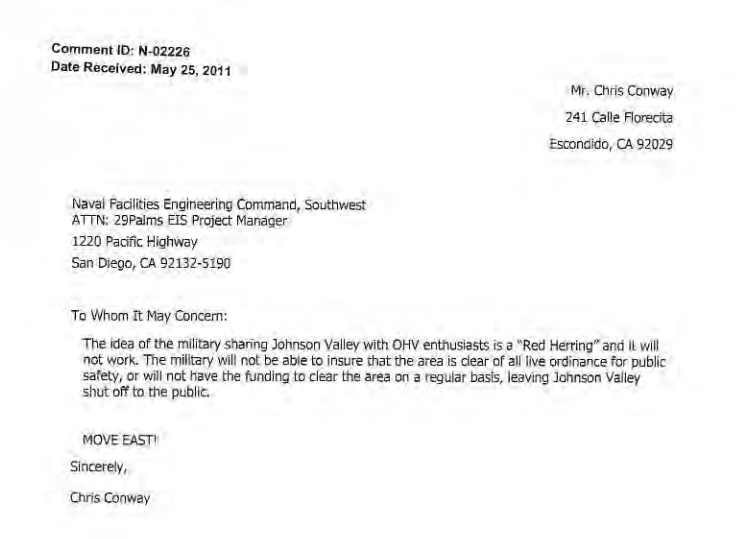
While I respect the US Marines and what they do for our country, I strongly disagree with their proposed expansion into the Johnson Valley OHV area.
The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.
For the possible danger to the public, please do not consider a shared use program and search for possible alternatives that will not shut the door on OHV using citizens and tax payers.

Sincerely,



Brad Buter

Response to Comment N-02225:

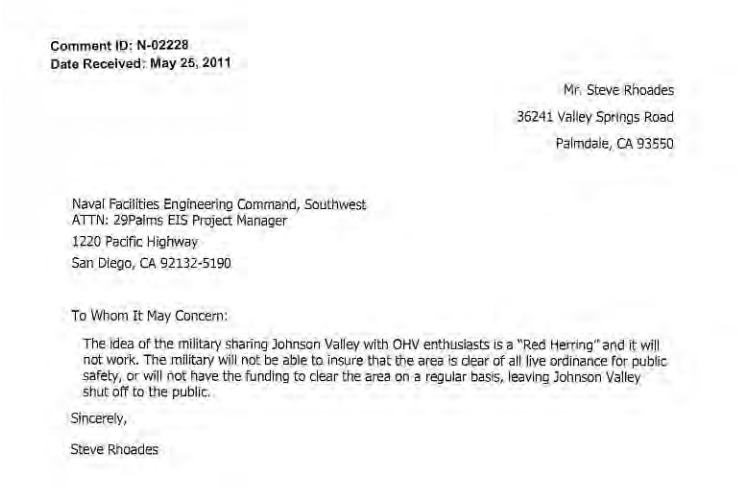
Thank you for your comment. The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public. To attempt this poor argument tactic is low down, and I really expected more from the highly respected, my respect included, USMC. The idea that Johnson Valley could be shared, while intially agreeable, is one which should be easily recognized as an idea bound never to fully come to fruition. Resorting the famed "Red Herring" is usually a desperate attempt by a losing party, showing their humble realizion of their wrong stance on the issue. I sincerely hope an expansion east is more thoroughly examined in order to keep Johnson Valley open to the public as it is in its current state.

Sincerely,



Jacob Bevill

To Whom It May Concern:

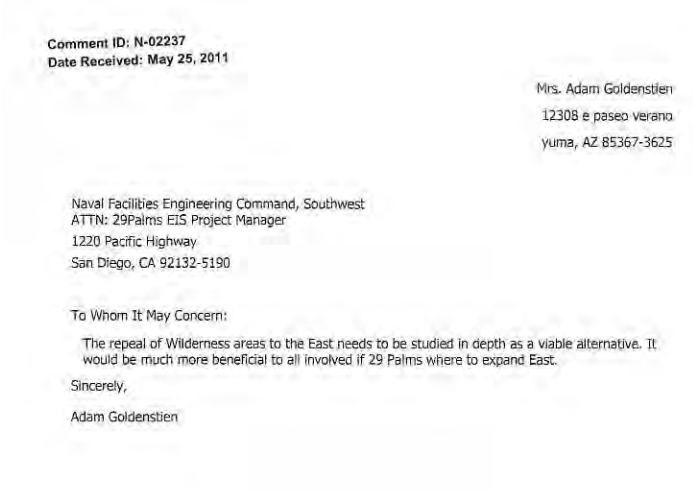
The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.



Sincerely,

Lauren Goldenstien

Response to Comment N-02236:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Response to Comment N-02240:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

While I respect the needs of the US Marines, I do not support their intusion/expansion into the JV OHV area.

The repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all involved if 29 Palms where to expand East.

Johnson Valley is a widely used OHV area that has no compare in this country. It is used by tens of thousands of citizens every year. The areas to the east of 29 palms are MUCH less used, and are comprised of the same type of terrain as far as military operations are concerned.

The expansion to the East should be considered heavily, as any effect on JV will be detrimental to all the offroad enthusiasts as well as the communities and businesses that depend on them.

Sincerely,

brad buter

Response to Comment N-02243:

To Whom It May Concern:

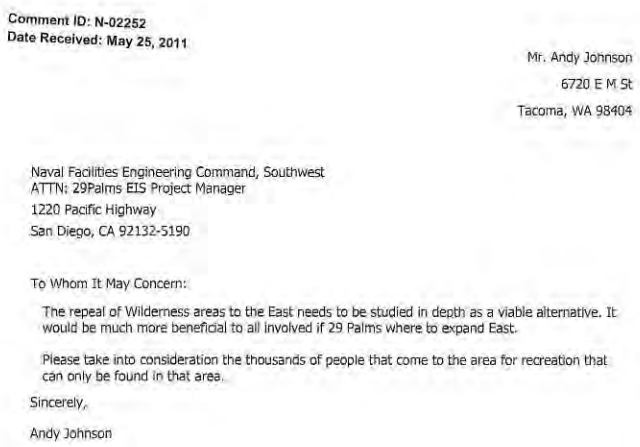
The proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions has been on my radar since it became an issue.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

I would suggest that the repeal of Wilderness areas to the East needs to be studied in depth as a viable alternative. It would be much more beneficial to all stakeholders involved in Johnson Valley if 29 Palms were to expand East.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,



Thomas Bank

Response to Comment N-02251:
