John Foli

Response to Comment N-03605:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

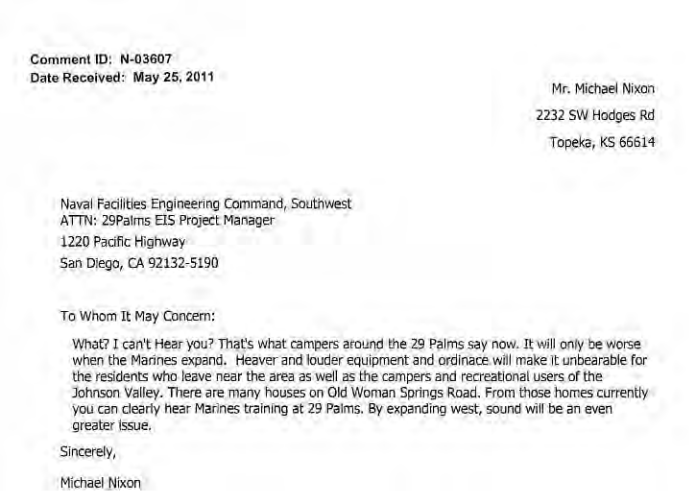
OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use. In addition to airing down, we are proud followers of the TREAD LIGHTLY principles and supporters of the Blue Ribbon Coalition. Please go East. We have fought hard to preserve and protect this land, keeping it open to the public as it should be.

Thanks,

Go EAST!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03606:

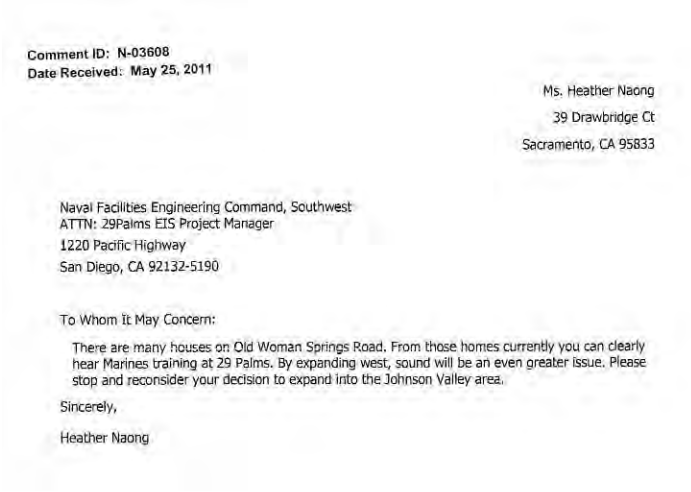
San Diego, CA 92132-5190

To Whom It May Concern:

What? I can't Hear you? That's what campers around the 29 Palms say now. It will only be worse when the Marines expand. Heaver and louder equipment and ordinace will make it unbearable for the residents who leave near the area as well as the campers and recreational users of the Johnson Valley. There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.



Sincerely,

Michael Nixon

Response to Comment N-03607:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use and aircraft operations under the proposed action may be periodically detected by residents and other members of the public, and may sometimes be an annoyance. In addition to the Community Noise Equivalent Level (CNEL) time-averaged analysis conducted in the Draft EIS, single-event noise modeling has been conducted and the results added to Section 4.9 of the Final EIS.

To Whom It May Concern:

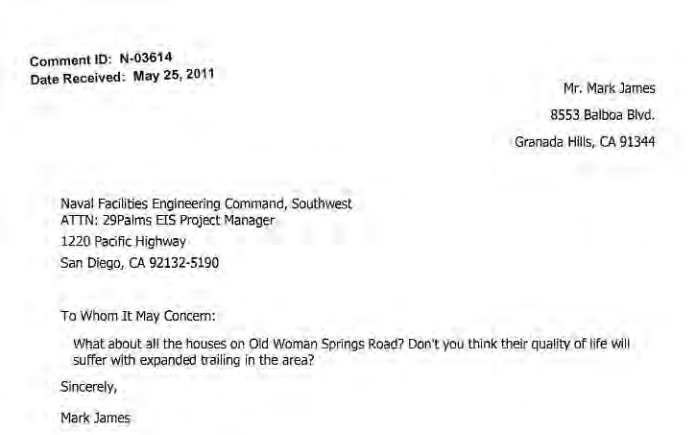
I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. There are many houses on Old Woman Springs Road. From those homes currently you can clearly hear Marines training at 29 Palms. By expanding west, sound will be an even greater issue.

Sincerely,



Matt Caskey

Response to Comment N-03613:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). First of all, I'd like to thank you for taking the time to read these letters. The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area. Not only will the loss of public lands take away from the economy of the area, but the loss of "nature" and beauty will drive away others who use the area as a site seeing destination.

Sincerely,

Matthew Hazel

Response to Comment N-03628:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

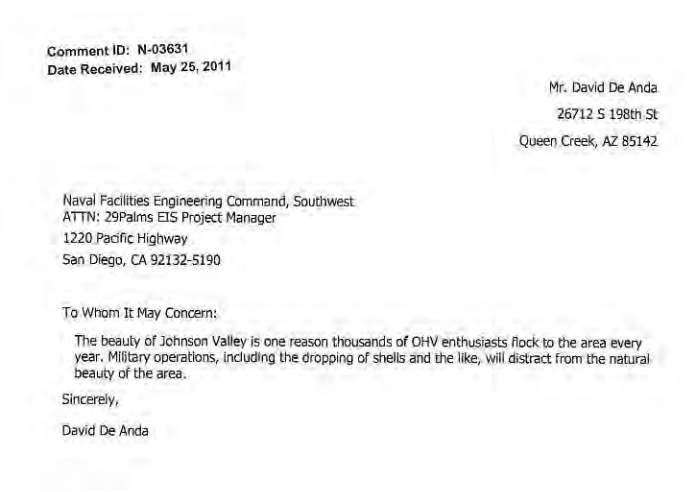
riverdale, UT 84405

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.



Sincerely,

Derek Murphy

Response to Comment N-03630:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

San Diego, CA 92132-5190

To Whom It May Concern:

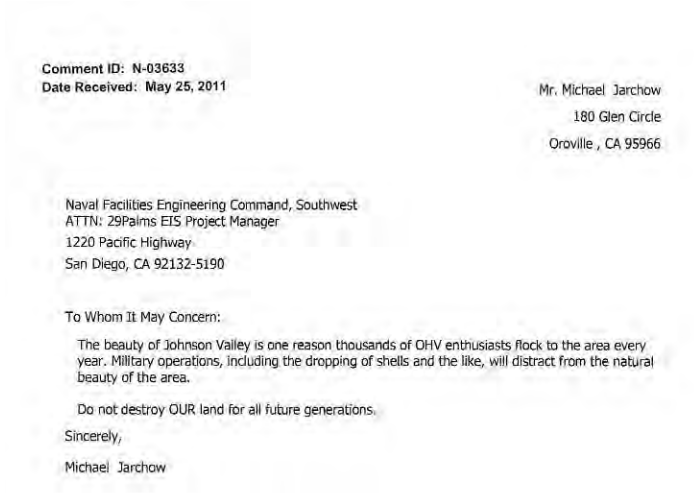
The beauty of Johnson Valley is one reason thousands people flock to the area every year - OHV users, hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, and others choose to use the area for camping, exploring, rock hounding, shooting, as well as other uses. Military operations, including the dropping of shells and the like, will destroy the natural beauty of the area.

Please go East. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03632:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

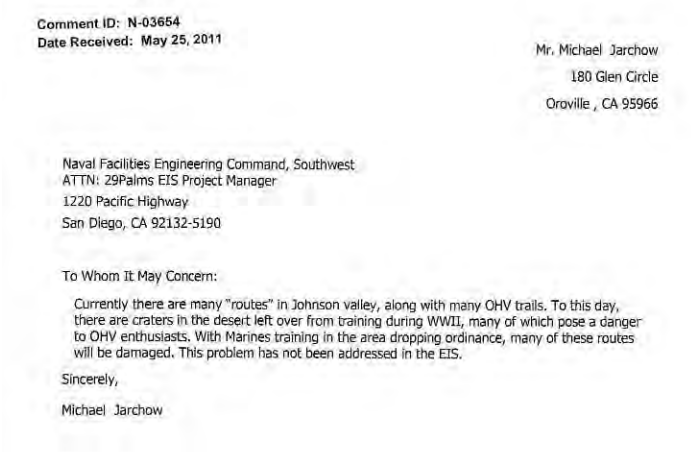
Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.



Sincerely,

Dan McCarthy

Response to Comment N-03653:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

Response to Comment N-03657:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

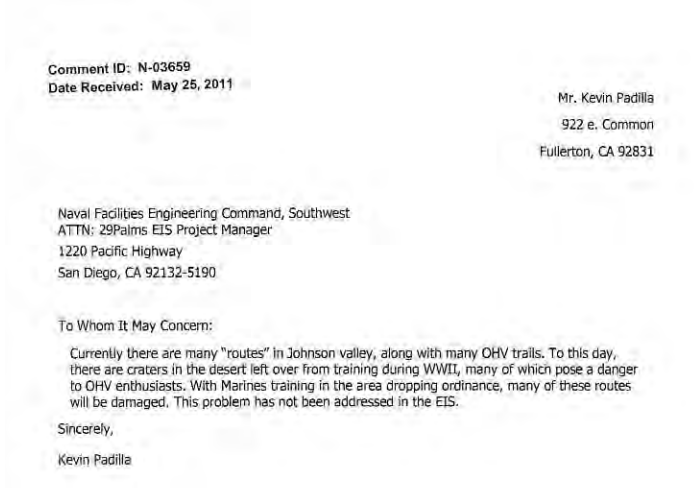
To Whom It May Concern:

I really appreciate the fact that you have taken the time to read all of our concerns about the expansion of 29 Palms. Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS. I feel that this is a very important issue that needs to be addresses, for the safety of everyone involved.



Sincerely,

Matthew Hazel

To Whom It May Concern:

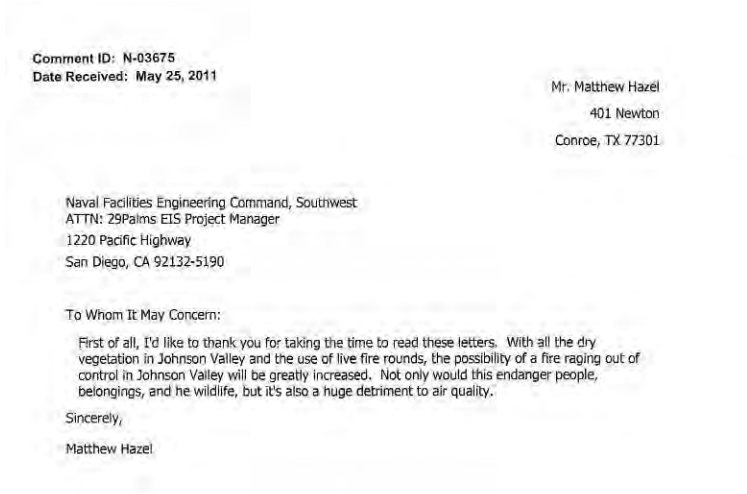
I am writing in regards to the proposed expansion of the 29 Palms Marine base into Johnson Valley, the home of some of the world's greatest off road trails. Responsible off highway vehicle enthusiasts, for years, have maintained the trails and avoided causing potentially disastrous fires.

If the Marines utilize this area for live fire exercises during training, this may certainly change.

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Please expand the base AWAY from Johnson Valley.



Sincerely,

David Simons

Response to Comment N-03674:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

To Whom It May Concern:

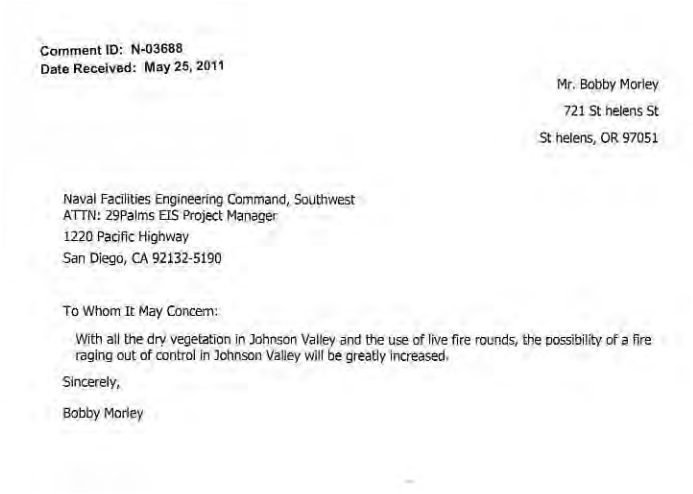
With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased. OHV enthusiast that currently use the area and care about their environment, all carry fire extinguishers and some even have built in fire suppression systems on their four wheelers. The OHV community has done a great deal to protect Johnson Valley and keep it pristine. Expanding Twentynine Palms to this area seems like a disaster waiting to happen. Have there been any studies done on the impact of fire, not only to this area that is close to many houses, but to the eastern wilderness area? I believe you will find that an expansion to the east may mitigate this issue.

Sincerely,



Amanda Smith

To Whom It May Concern:

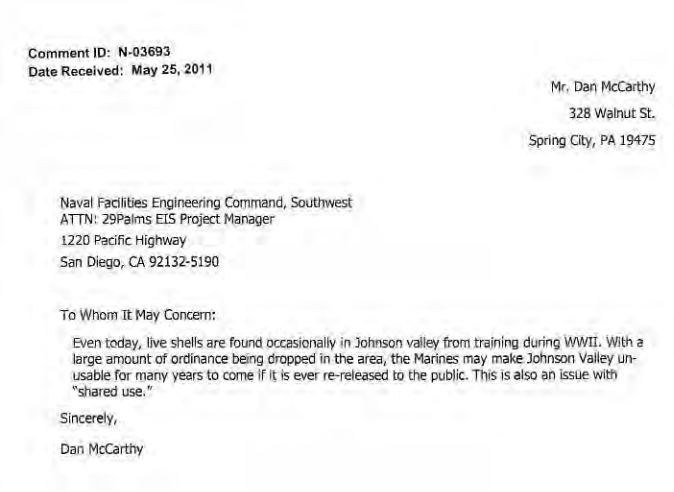
First of all, I'd like to thank you for taking the time to read these letters. Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use." It seems as though expanding East is a much more viable and safe solution, that won't endanger generations to come.

Sincerely,



Matthew Hazel

Response to Comment N-03692:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Mike Mundinger

Response to Comment N-03703:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

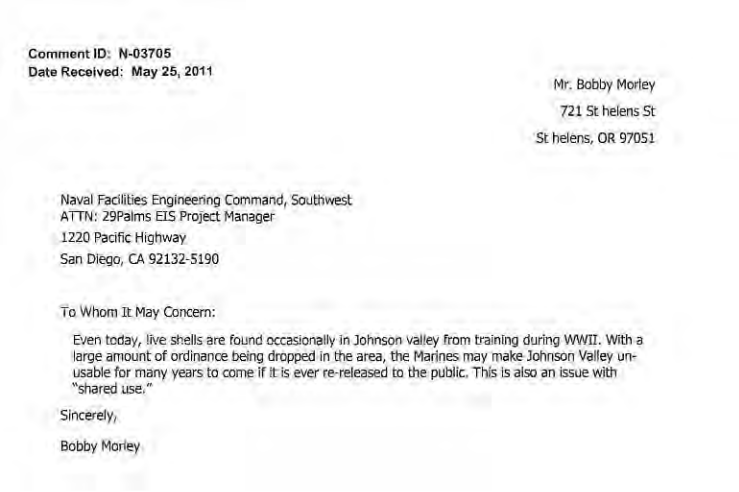
San Diego, CA 92132-5190

To Whom It May Concern:

Live shells can be found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."



Sincerely,

Max Barker

San Diego, CA 92132-5190

To Whom It May Concern:

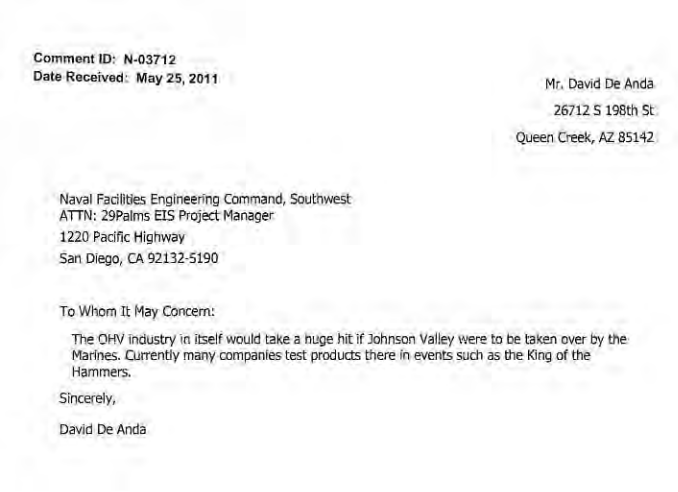
Many companies that support the off road industry depend on the Johnson Valley ORV park for advertisment and sponsor ship during the events heald there. The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers.

If the area is no longer to be used for events like the KOH, many business would suffer loss of capital and many would likely close. That's more unemployed.



Sincerely,

Michael Nixon

Response to Comment N-03711:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

The OHV industry in itself would take a huge hit if Johnson Valley were to be taken over by the Marines. Currently many companies test products there in events such as the King of the Hammers.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go East. Thanks Marines!!!

Mike

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Do not take our PUBLIC land away..

Sincerely,

Michael Jarchow

Response to Comment N-03729:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

To Whom It May Concern:

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,

David De Anda

Response to Comment N-03730:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

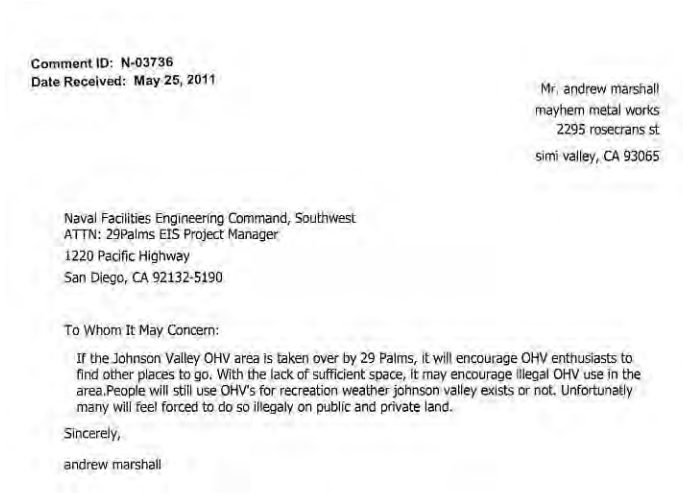
To Whom it May Concern:

I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area.

Sincerely,



Matt Caskey

Response to Comment N-03735:

Thank you for your comment. As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

If the Johnson Valley OHV area is taken over by 29 Palms, it will encourage OHV enthusiasts to find other places to go. With the lack of sufficient space, it may encourage illegal OHV use in the area. I've seen this in my own neighborhoods. Lands that were once open to the public were closed. The "renegades" go out and tear up new land, destorying the lands and the areas. The "honest wheelers" are further locked out and restricted with more laws and restrictions placed on the honest folks who have fought hard to protect this land. Please reconsider.

Thanks,

Mike

To Whom It May Concern:

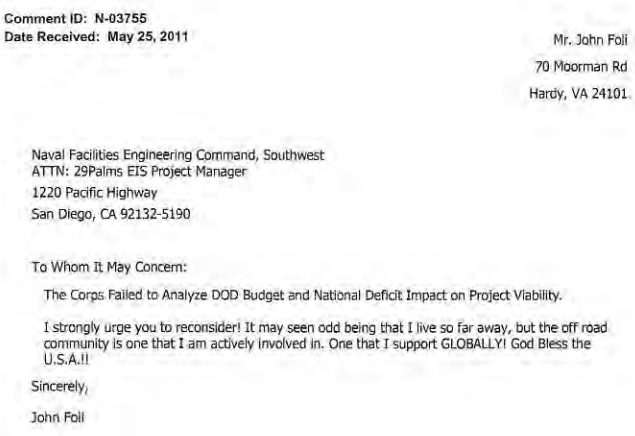
With the current fiscal state of the US goverenment and the DoD I wonder if the Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability.

Would it not be more feasible for the Marines to use existing training facilities like the one at Ft Bliss or Nellis AFB?

Sincerely,



Michael Nixon

Response to Comment N-03754:

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

San Diego, CA 92132-5190

To Whom It May Concern:

The Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability. I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

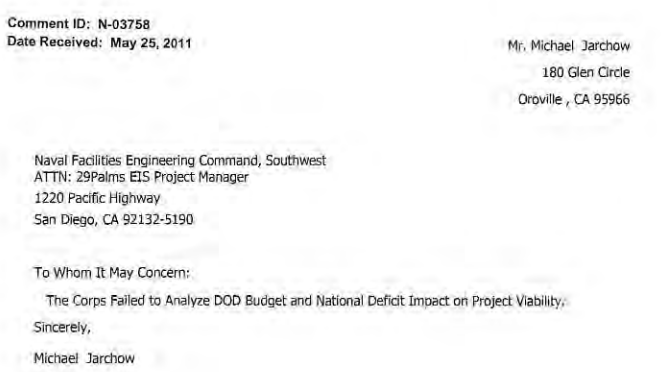
I have not seen evidence that the Corps has adequately analyzed the DOD Budget and National Deficit Impact on the Project Viability of taking over the Johnson Valley area.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST. Thanks Marines!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03757:

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Response to Comment N-03767:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

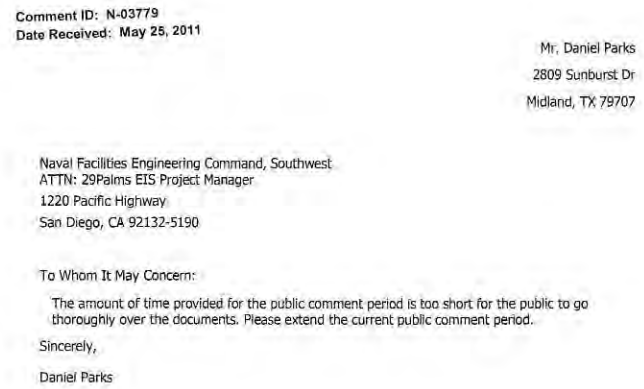
I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.

Sincerely,



Matt Caskey

Response to Comment N-03778:

Thank you for your comment. During the planning process, the Marine Corps determined that the de-designation of wilderness areas was not a viable option. Screening criteria #5 (see Section 2.3.1 of the EIS) states that any alternatives selected would avoid congressionally designated wilderness areas, parks, wildlife refuges, etc. Section 2.4.3 of the EIS describes an action alternative (Alternative 3) that would involve acquisition of land east of the current Combat Center without needing to de-designate wilderness area, and this alternative was carried forward for analysis in the EIS.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

I would like to comment on the proposed expansion of the 29 Palms Marine training area into Johnson Valley. I am against this move as it will destroy some of the best off roading on the planet.

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period.

Go east, Marines!

Sincerely,

David Simons

Response to Comment N-03780:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

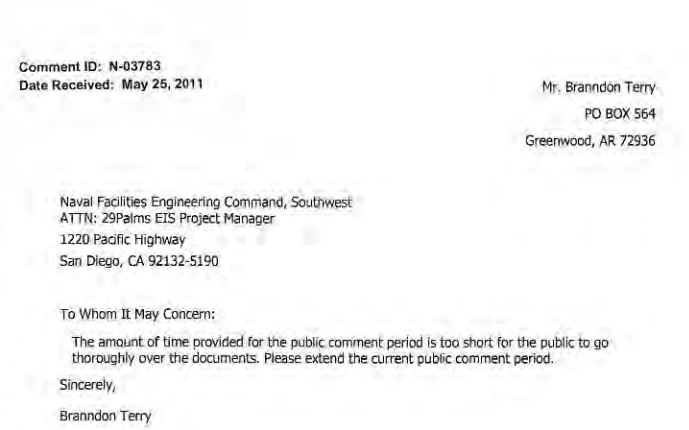
The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period. As an out-of-state person, it has been nearly impossible to get my voice heard and to gather info on this heated topic. Don't get me wrong, I FULLY support and back our armed forces and especially the Marines, but in this case, I question whether it is really the "RIGHT" thing to do and if the lands will be truly used as intended, or just expanded, then forgotten about at the next budget cut. Please reconsider and please go East if you do.

Thanks,

Mike

Sincerely,



Mike Mundinger

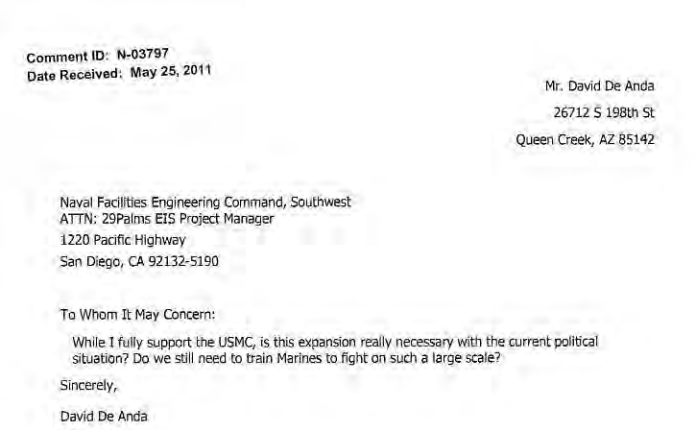
While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Please reconsider this and look into the real factors and impact this decision will make! I stongly urge that of you!



Sincerely,

John Foli

Response to Comment N-03796:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? I keep reading about talk of downsizing, returning to their roots, and not being a second ground force by the marines. If all or any of this happens there will be no need for an expansion of 29 palms and this will all just have been an unneeded loss of public lands that will sit idle like so much other land on military bases around the country.

Sincerely,

andrew marshall

To Whom It May Concern:

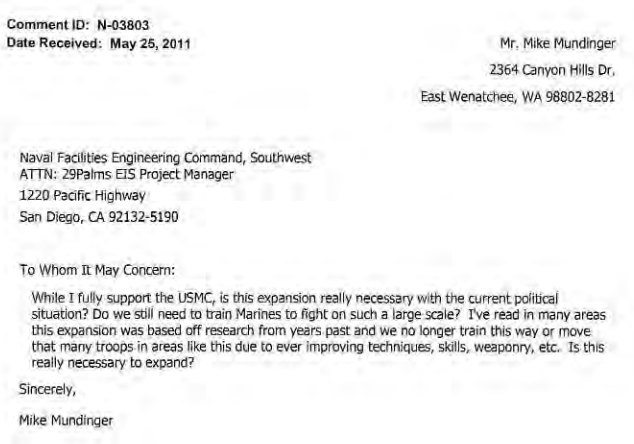
I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

Sincerely,

Matt Caskey



Response to Comment N-03802:

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

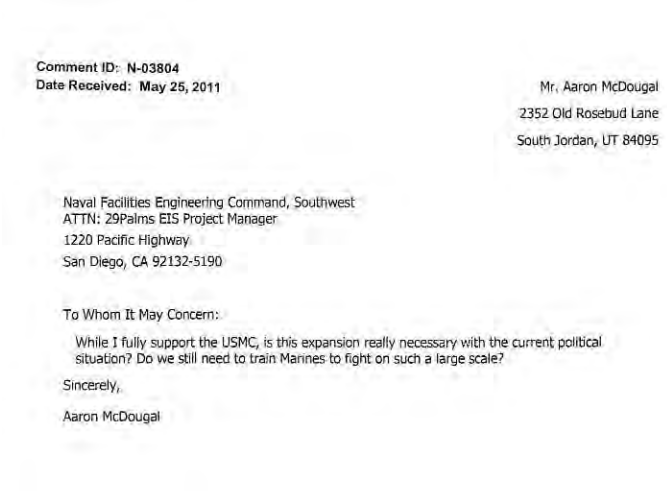
To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? I've read in many areas this expansion was based off research from years past and we no longer train this way or move that many troops in areas like this due to ever improving techniques, skills, weaponry, etc. Is this really necessary to expand?



Sincerely,

Mike Mundinger

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale? I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live -ammunition training missions.

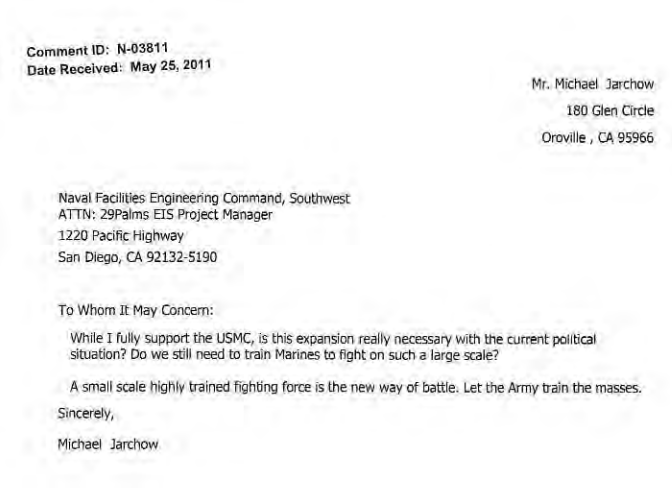
While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Pleases go EAST. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

To Whom It May Concern:

One of the biggest concerns I have with the Marines taking over Johnson Valley is the damage it may cause to the land. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not. When something breaks during recreation we have the time to properly clean up after ourselves. I question whether or not this will be true during a training exercise that simulates battle, where there is not time to worry about such things. Johnson Valley is a beautiful place that many people love and cherish as their own, it would pain me to see it spoiled because you were in too much of a hurry to keep it clean.

Sincerely,

Amber Cisneros

Response to Comment N-03814:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

Being a retired military memeber, I know how the DoD's vehicles can spring a leak. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Michael Nixon

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not. Since there is no mention of it, it appears as though no thought has been put into it at all. This seems very counterproductive to everything that we OHVers have been doing over the years to prevent any kind of soil contamination. If soil contamination is such a huge deal to us, and such a big deal to the environmentalists who like to attack us, then surely it should be equally important to the US government. Please address and outline what steps will be taken to insure that our land stays as clean and pure as possible, for our children.

Sincerely,

Matthew Hazel

To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not. I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

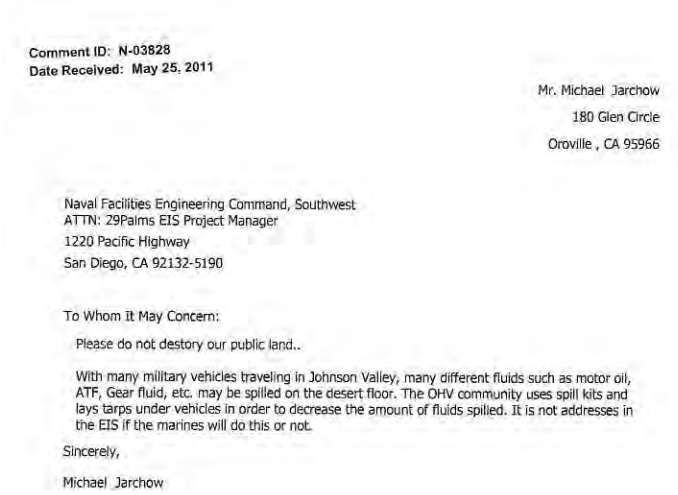
Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. Additionally, myself and many others actively participate in land clean-up events throughout the year to preserve the area. It is not addressed in the EIS if the marines will do this or not. As off road enthusiasts, we take a lot of pride in minimizing our environmental footprint in the areas that we use. I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great environmental impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please keep public lands open to the public. Go EAST with your training!

Thank you Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03827:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. As four wheelers and off-roaders dedicated to our sport and preserving it for the future as well and future generations, part of responsible wheeling is done through environmental cleanup. As wheelers, not only do we take every precaution to keep the area clean, follow TREAD LIGHTLY, handle our own spills and cleanup and carry gear to do so, but we also go out on specific environmental "cleanup" runs in which things like picking up trash, cleaning an area, trail maintenance, etc. are all prime examples of work we do to preserve the land and our sport. Are the Marines planning on preserving any of this land in such manner?

Sincerely,

Mike Mundinger

The Corps excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated.

Sincerely,

Michael Jarchow

Response to Comment N-03843:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

The Corps has excluded the use of Fort Irwin based on false assumptions that scheduling conflicts, current infrastructure deficiencies, and other administrative hurdles cannot be mitigated. For all that will be lost by the expansion into Johnson Valley, it is owed to the multiple use groups involved to consider alternative options with a clear and open mind.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST Marines! THANK YOU!!!

Mike

Sincerely,

Mike Mundinger

Response to Comment N-03844:

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. To Whom It May Concern:

Instead of expanding 29 Palms Marine Base, it makes far more sense to train using the un-used time and locations already available at Fort Irwin. That base was expanded years ago and has not been used nearly to its potential. Do not ignore the fact that the funding saved by taking the Ft Irwin option is the RIGHT THING TO DO. Do not make false assumptions that Ft Irwin could not be used to properly gain the extra training the current missions of the US Marine Corps needs. Marines can get what they need at Fort Irwin, doing so at a far smaller cost, far smaller infrastructure commitment, and utilize lands that are fully under-used, versus taking away lands used for recreation and tourism in the area surrounding Johnson Valley.
Please, do not expand the 29 Palms Marine Base into Johnson Valley!

Sincerely,

Billy Nickel

The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

To Whom It May Concern:

All groups that are affected by this proposal should be made aware of the potential loss of their ability to use Johnson Valley.
Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

Sincerely,

Matthew Blain

Response to Comment N-03859:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

The OHV community has an advantage over these groups because of large nationwide online resouces and people that are active in getting the word out. If these other groups had the same information I believe you would find that the expansion would impact a much larger portion of the population

Sincerely,

andrew marshall

I'd first like to thank you for your time to read my letter. It may seem odd coming from someone in VA, but the outdoor community extends far beyond the boundaries of home for most people. I have never had the please of experiencing your wonderful state's resources, but it is a realistic accomplishment for me and my family. Unfortunately, the outlets for enjoying the off road sport of which I am so passionate are dwindling due to political decisions which seem to be made all too carelessly.

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

I urge you to reconsider your options! Thank you for your time and God Bless the USA!

Sincerely,

John Foli

Response to Comment N-03878:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

Why was Central Park in New York created? Because people need a place to get away from the city. Johnson Valley is our place to get away from the madness of the city.

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups.

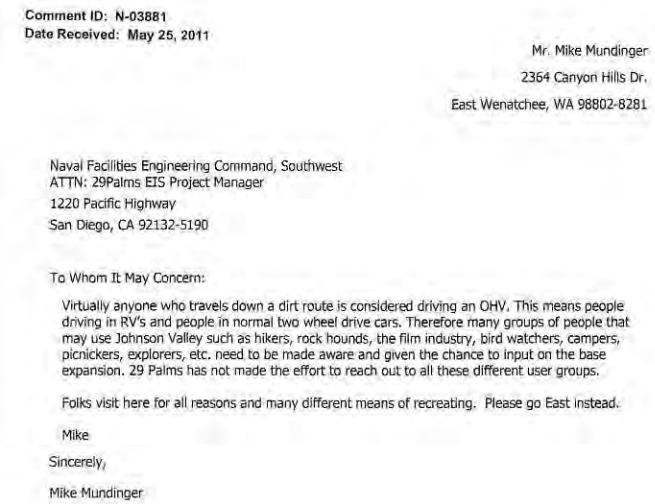
Been following this for a while. I really hope the sheer volume of letters sent speaks greatly and has a large influence on the Marines decision to move EAST instead, keeping public lands open for the public.

Thank you and Go Marines!

Mike

Sincerely,

Mike Mundinger



Response to Comment N-03880:

Virtually anyone who travels down a dirt route is considered driving an OHV. This means people driving in RV's and people in normal two wheel drive cars. Therefore many groups of people that may use Johnson Valley such as hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. need to be made aware and given the chance to input on the base expansion. 29 Palms has not made the effort to reach out to all these different user groups. I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions, mainly because Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race.

Beyond the typically defined OHV user, there are many other groups of people that access Johnson Valley - hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc.

All of these groups need to be made aware of the proposed changes and given the chance to add their input on the base expansion. To the best of my knowledge, 29 Palms has not made the effort to reach out to the full diversity of user groups who access Johnson Valley.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go East!

Thanks Marines!!!

Mike

Sincerely,

Mike Mundinger

To Whom It May Concern:

OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture.

Sincerely,

Michael Jarchow

Response to Comment N-03887:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Johnson Valley is a place where me and my family go to enjoy the fruits of out labor. Every couple of months, we head out to the lake bed to meet up with our friends in the desert to forget the every day grind and enjoy our free time from working so hard. There is no place more sacred to our family as Johnson Valley. This place is unique like none other. We have been all around California and this has become our home away from home. If this expansion takes place and we loose this place, we truthfully, will not have a home to go to. Sure we will still go camping and what not, but it will NOT be the same. Instead of going out with my buddys, out to the bars, to the race track, or even sit on the couch and watch sports, I work on my 4 wheeler with my kids, my wife participates and if she ever needs to know where I am, all she has to do is look outside and see my feet (toes up) in the backyard working on my buggy. The ONLY place to really enjoy this sport is, wheeling in Johnson Valley. Please take into consideration what you will be taking from us.

Sincerely,

Kevin Pad

San Diego, CA 92132-5190

To Whom It May Concern:

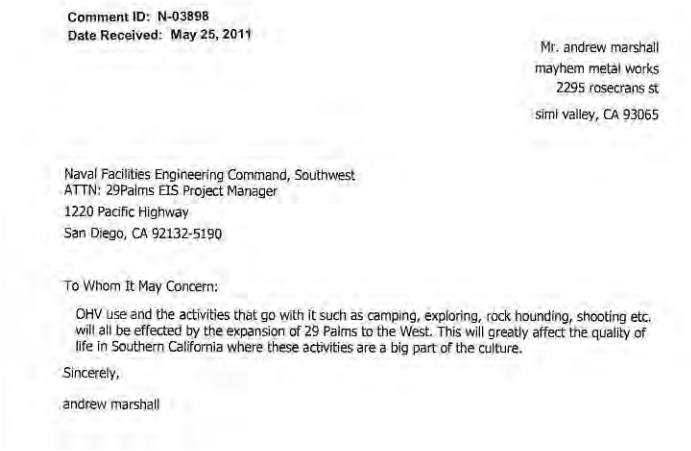
OHV use and the activities that go with is such as camping, exploring, rock hounding, shooting etc. will all be effected by the expansion of 29 Palms to the West. This will greatly affect the quality of life in Southern California where these activities are a big part of the culture. Johnson Valley is the premier destination spot for such activities, in addition to wheeling. It is the dedicated location for King of the Hammers-the largest off-road race in the world that draws racers and spectators from all over the world-literally. Please keep this public land open to the public. This area has a much larger focus world wide than just the eyes of California.

Thanks,

Mike



Sincerely,

Mike Mundinger

Response to Comment N-03897:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. Along with the other multiple uses, it is THE Mecca of off-roading that people from all over the world travel to in order to experience it. The King of the Hammers race has made Johnson Valley a household name throughout the world. I doubt that the USMC realizes the full importance of this area to our community and OHV "Culture" that it entails.

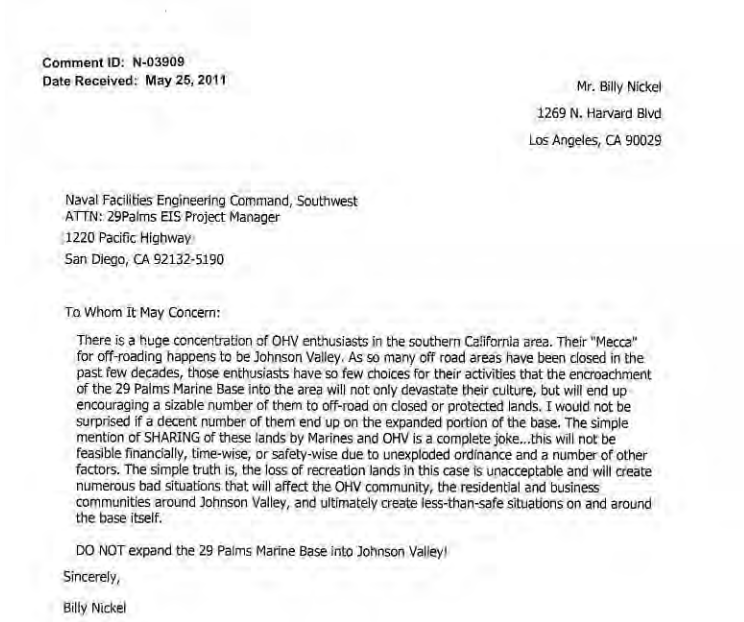
I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST Marines!!!

Thank You!

Mike

Sincerely,



Mike Mundinger

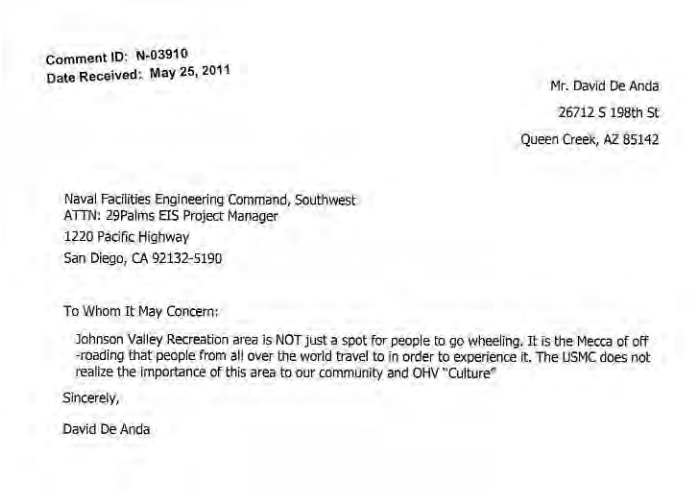
To Whom It May Concern:

There is a huge concentration of OHV enthusiasts in the southern California area. Their "Mecca" for off-roading happens to be Johnson Valley. As so many off road areas have been closed in the past few decades, those enthusiasts have so few choices for their activities that the encroachment of the 29 Palms Marine Base into the area will not only devastate their culture, but will end up encouraging a sizable number of them to off-road on closed or protected lands. I would not be surprised if a decent number of them end up on the expanded portion of the base. The simple mention of SHARING of these lands by Marines and OHV is a complete joke...this will not be feasible financially, time-wise, or safety-wise due to unexploded ordinance and a number of other factors. The simple truth is, the loss of recreation lands in this case is unacceptable and will create numerous bad situations that will affect the OHV community, the residential and business communities around Johnson Valley, and ultimately create less-than-safe situations on and around the base itself.

DO NOT expand the 29 Palms Marine Base into Johnson Valley!

Sincerely,



Billy Nickel

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

After doing my best to read the EIS in the very short amount of time given, I've noticed a major omission when it comes to the planned expansion on a culturally significant item.

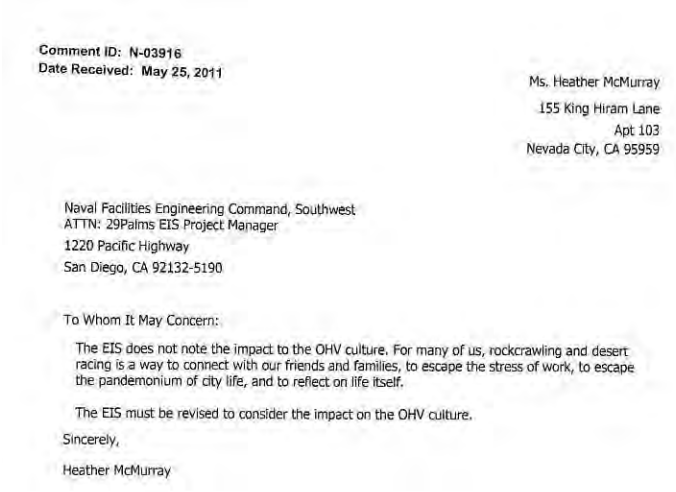
There is a huge concentration of OHV enthusiasts in the southern California area. Their "Mecca" for off-roading happens to be Johnson Valley. As so many off road areas have been closed in the past few decades, those enthusiasts have so few choices for their activities that the closure of any portion of Johnson Valley will devastate their culture.

With over 40 million OHV users in the United States of America, and the continued closure of public lands to the responsible use of OHV user, the loss of recreation lands in this case is unacceptable and will create numerous bad situations that will affect the OHV community, the residential and business communities around Johnson Valley, and ultimately create less-than-safe situations on and around the base itself.

DO NOT expand the 29 Palms Marine Base into Johnson Valley! If you must expand, expand East.

Sincerely,

Ryan Brown



Response to Comment N-03915:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". Please reconsider Johnson Valley as an option and look for other viable alternatives.

Sincerely,

Lesley Smith

Response to Comment N-03920:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

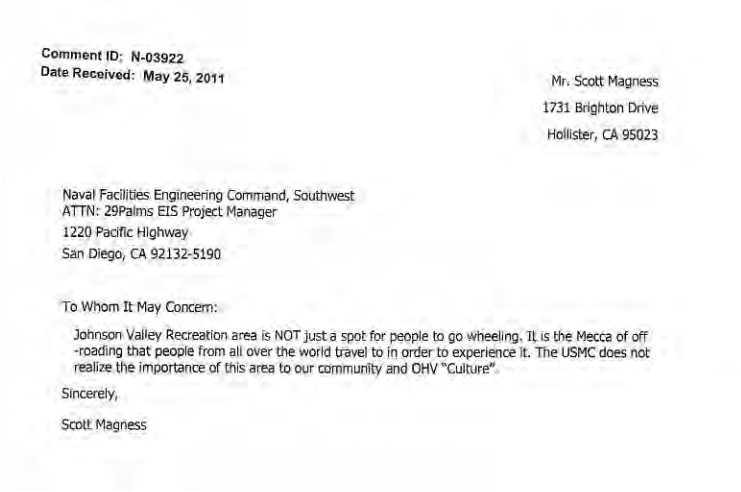
To Whom It May Concern:

I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off-roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

Sincerely,



Matt Caskey

Response to Comment N-03921:

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

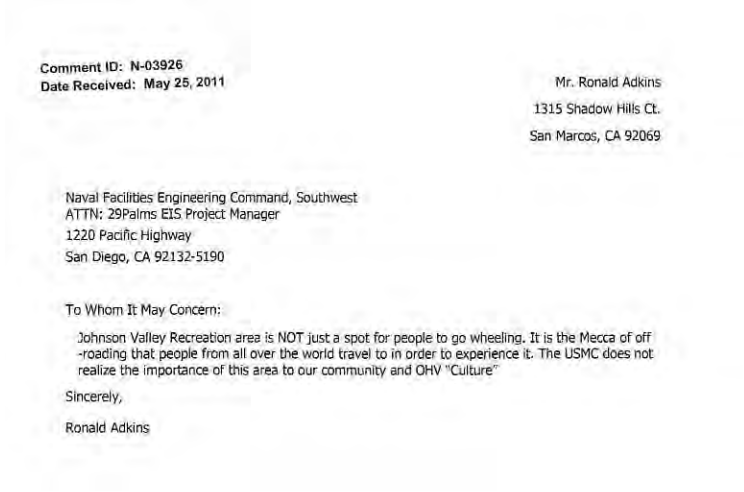
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture". My family and I very frequently visit Johnson Valley exclusively. We venture off to other parts of California, but Johnson Valley is a place we hold dear to our hearts. We gather with many others in this area because there is nothing like it here in California and in other states for that matter. It is unique and I really dont know where we would go if it were taken from us. I work very hard and camping in Johnson Valley keeps the life balance within our family. Our kids are growing up here and already are looking forward to offroading when they become old enough. They pretend with their rock crawler remote control cars that they are on "sledgehammer" and "jackhammer" like their dad does. It would be a real shame if they were (among MANY children) told that they could never play on these trails when they get older. It simply amazes me that you can grow so close to a place for the government to take it away from us since it is ONE OF A KIND. In reality, if this were just another lakebed like a lot of others in California, it wouldn't be so dissapointing because it will leave so many of us with nowhere to go. I really hope these letters are read and not just counted so those will know what we will be losing. Thank you,

Kevin Padilla



Sincerely,

Kevin Padilla

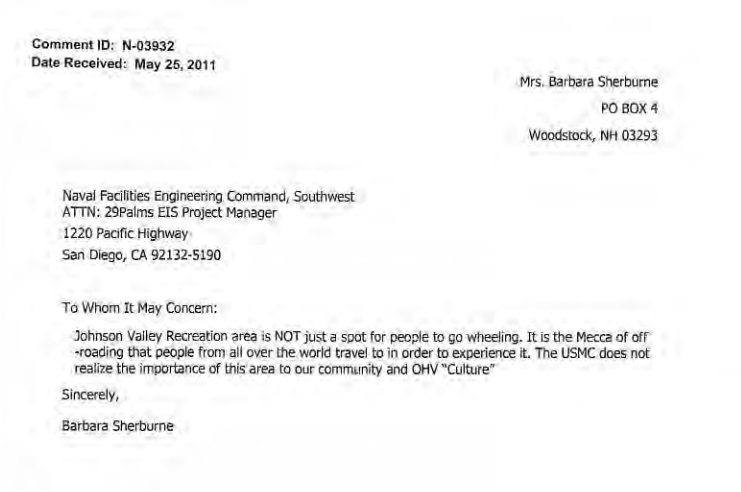
Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture" I have read about JV for years but have never been. It is my dream to one day have a vehicle capable of running the trails at JV and to go wheel there with many of my friends who live in that area, of which I only have computer contact or phone at the present time-not being able to actually go yet myself. Please don't lock this down like so many other lands that are getting chopped and shut down on an all to frequent basis. Leave JV open to the public as it should be.

Thanks,

Mike



Sincerely,

Mike Mundinger

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

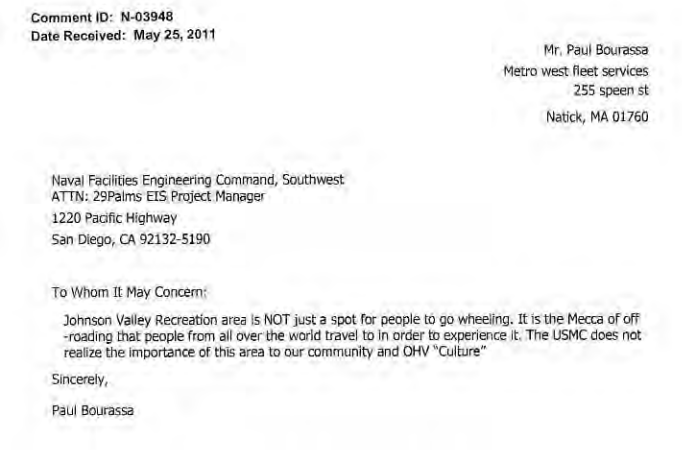
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.

Sincerely,

Gregory Eyrich



Response to Comment N-03947:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

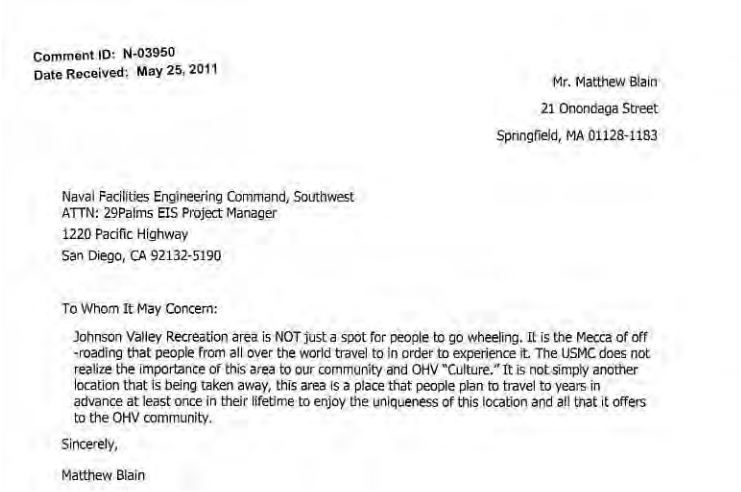
In addition, there is an entire economy of Jeep upgrades and parts that are tested at JV, and all those companies that make them serve the offroad world.

Sincerely,



Greg Kulosa

Response to Comment N-03949:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

To Whom It May Concern:

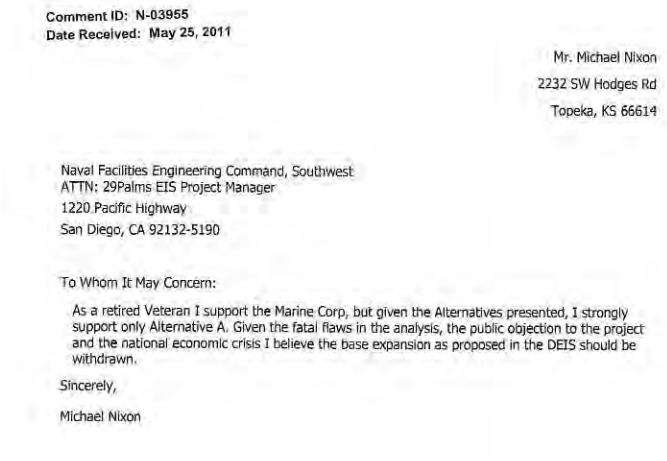
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.



Sincerely,

David De Anda

To Whom It May Concern:

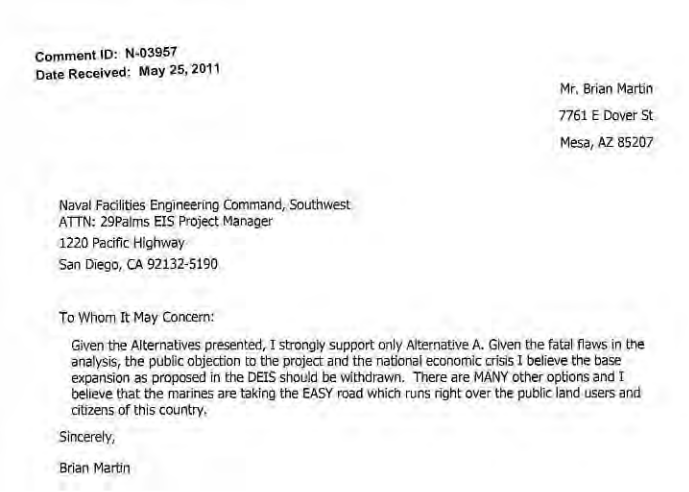
Given the Alternatives presented, I strongly support only Alternative A. Given the fatal flaws in the analysis, the public objection to the project and the national economic crisis I believe the base expansion as proposed in the DEIS should be withdrawn.



Sincerely,

Daniel Keller

Response to Comment N-03971:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

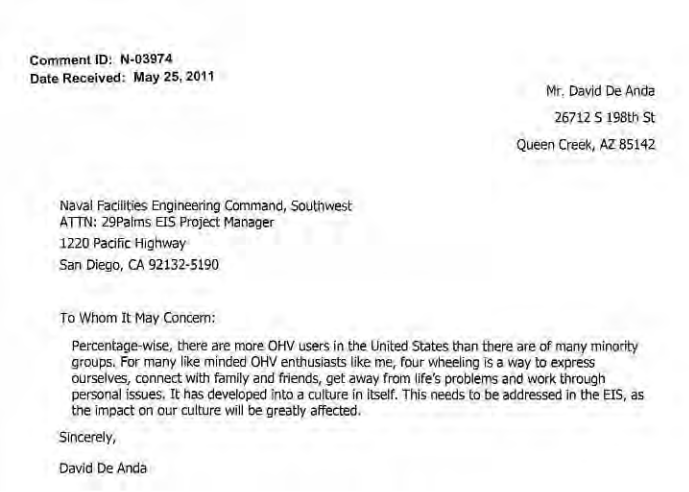
Comparatively, there is a greater percentage of OHV users in the United States than there are of many minority groups. This makes the OHV enthusiast a culture to be recognized. For tens of thousands of people like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Go EAST. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-03973:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Dear Sirs,

I am greatly saddened by the proposed closure of the Johnson Valley OHV area and expansion of the Marine base. I have been recreating here with my family since the 1970s and have many fond memories of camping, riding motorcycles, and driving 4x4s here. I have also watched the surrounding communities thrive as a result of the many OHV users passing through who have helped boost these local economies. Any action toward closure would greatly affect all of these communities and OHV users alike.

Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.

Even partial closure of the area would be devastating as OHV users have little space left to recreate. So much has been taken from the OHV community that we are only left with small strips of land that quickly become overcrowded because there is nowhere else to go. We have been constantly pushed around by environmentalists and proponents of land closure for OHV use that any land lost today is land lost forever. Johnson Valley is the last bastion for OHV users. It's the last stand. It's all we have left. Please, please take heed and do not take more. I support the military and the brave Americans who stand up to serve our country. I support the Marines. I do not support this proposed closure of Johnson Valley OHV.

Thank you for your time. Semper fidelis.

Best regards,

Christian Lee
Tech Editor

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

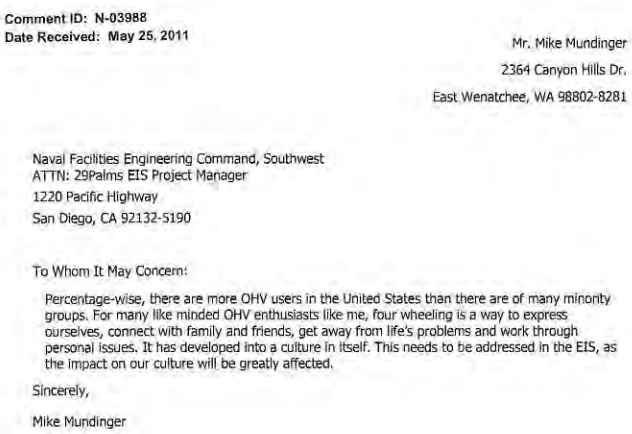
Percentage-wise, there are more OHV users in the United States than there are of many minority groups. For many like minded OHV enthusiasts like me, four wheeling is a way to express ourselves, connect with family and friends, get away from life's problems and work through personal issues. It has developed into a culture in itself. This needs to be addressed in the EIS, as the impact on our culture will be greatly affected.



Sincerely,

Kaylee Little

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. One aspect of any EIS is an evaluation of the fairness of the action and the equality of sacrifice if any to the community. Johnson Valley is an area utilized by countless user groups, but is the only place within hundreds of miles that offers the size and variety of terrain to OHV users that Johnson Valley does.

Expansion west will unduly impact the OHV community and its users. The EIS fails to address the fairness of this taking, especially when other options are available that wouldn't unduly burden one user group. If expansion is necessary, the best option is to Go East. This expansion will leave open to the public a long and often utilized area that is open to all user groups.

Go East Marines.

Sincerely,

Starr Penniman

Response to Comment N-04010:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Fullerton, CA 92831

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. When our family and club visits Johnson Valley (at least once a month), we make it a point to support the local community. I have spoken to many of the people in our ventures to Johnson Valley about this issue and they are sincerely scared. We purchase fuel, buy groceries, breakfasts, dinners, auto parts etc. etc. etc. They are very aware and dependent on the off road community that visits Johnson Valley. Since the economy hit its low, they have seen less of us and to think that they are potentially going to loose us coming through their town frightens them for it will be a severe blow to their income. Please consider the people who have built businesses which include our revenue in their business plan. Thank you,

Kevin Padilla

Sincerely,

Kevin Padilla

To Whom It May Concern:

I support our troops and with out them our freedoms wouldn't exist. I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES I love ridding my dirt bike and getting out to see nature. The JV area is a mecca of off road playgrounds and alse natural beauty. If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Sincerely,

Matt Caskey

San Diego, CA 92132-5190

To Whom It May Concern:

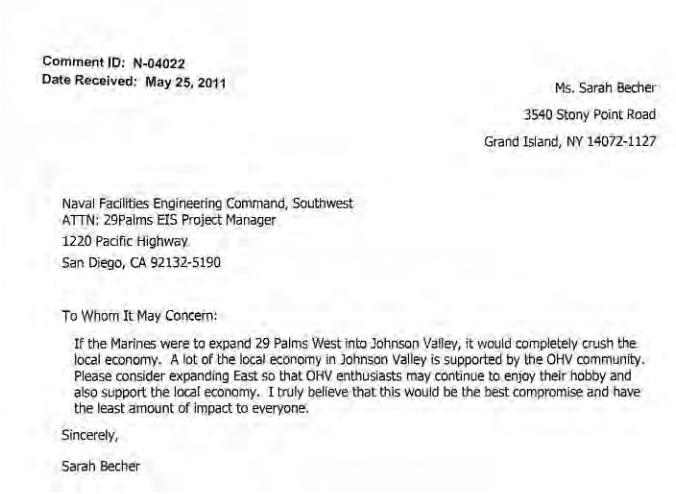
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Having frequently traveled this area, I was astonished to learn that this expansion was moving forward. To take a microeconomic area and nearly wipe it out of existence seems unnecessary as I understand there are other options for expansion. Please reconsider this plan and look for alternatives.

Sincerely,



Evelyn Smith

Response to Comment N-04021:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

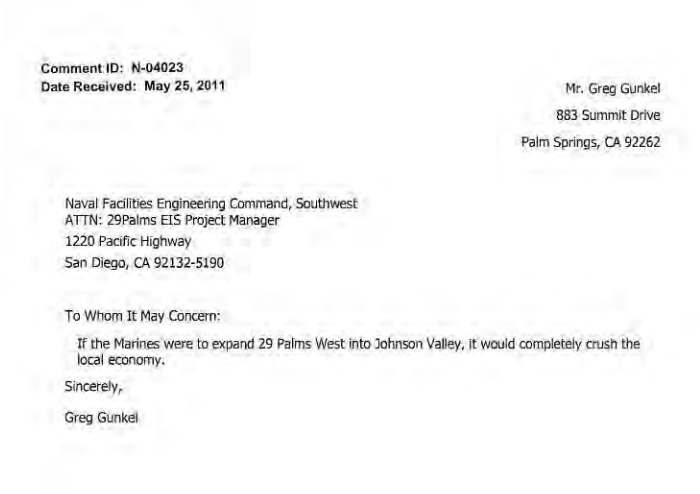
To Whom It May Concern:

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. A lot of the local economy in Johnson Valley is supported by the OHV community. Please consider expanding East so that OHV enthusiasts may continue to enjoy their hobby and also support the local economy. I truly believe that this would be the best compromise and have the least amount of impact to everyone.

Sincerely,



Sarah Becher

Response to Comment N-04022:

To Whom It May Concern:

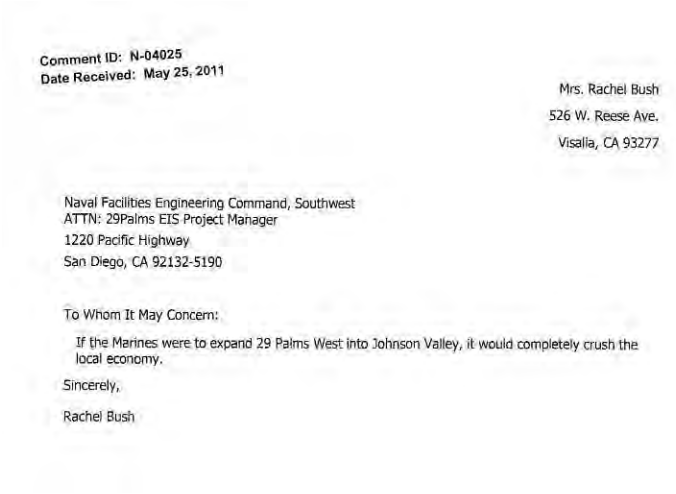
If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. This area thrives on the off-road community's support and the money we bring to the businesses and local government. If you expand to Johnson Valley the people who depend on our dollars to survive will be forced to move, close businesses, and put further burden on our already broke government welfare system if they cannot find new jobs.



Sincerely,

Branndon Terry

To Whom It May Concern:

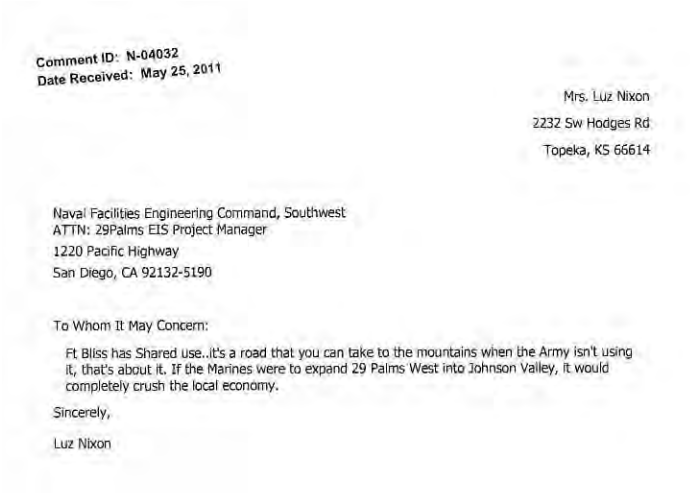
I'd first like to thank you for your time to read my letter. It may seem odd coming from someone in VA, but the outdoor community extends far beyond the boundaries of home for most people. I have never had the please of experiencing your wonderful state's resources, but it is a realistic accomplishment for me and my family. Unfortunately, the outlets for enjoying the off road sport of which I am so passionate are dwindling due to political decisions which seem to be made all too carelessly.

If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

I urge you to reconsider your options! Thank you for your time and God Bless the USA!

Sincerely,



John Foli

Response to Comment N-04031:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Ft Bliss has Shared use..it's a road that you can take to the mountains when the Army isn't using it, that's about it. If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy.

Sincerely,

Luz Nixon

Response to Comment N-04032:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

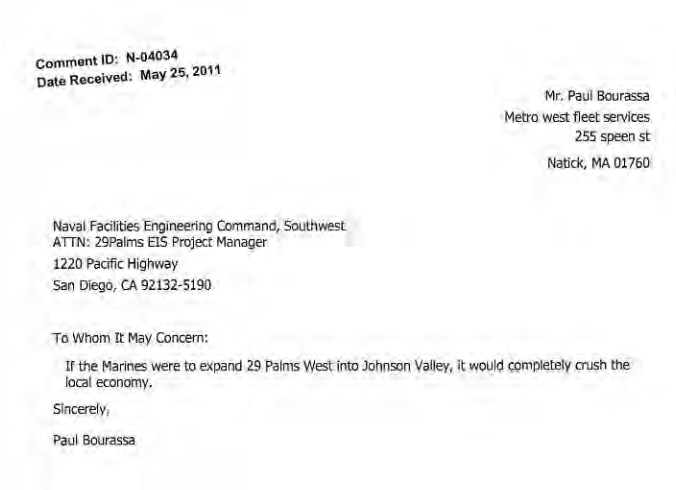
To Whom It May Concern:

Johnson Valley is not a self contained area cut off from the rest of the world. It's a beautiful and wonderful place, but it contains no services of it's own. When people come to Johnson Valley they need to bring supplies. These supplies are usually purchased in the surrounding towns. Food, Water, Gas, Auto parts, repair services, even hotels all get a lot of business from people having fun in Johnson Valley. If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Lets face it, we're talking about small cities in the desert without a lot of industry. Johnson Valley and the tourism that it attracts from all over the country brings a very significant amount of money into the area, and closing it would be a huge disservice to the people living in the area, people who are not only neighbors of JV, but your neighbors as well.



Sincerely,

Amber Cisneros

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

" If the Marines were to expand 29 Palms West into Johnson Valley, it would completely crush the local economy. Every time I go to Johnson Valley, I fuel up main and aux. fuel tanks, and buy all of the food and supplies I need for the weekend - either in Yucca Valley or Apple Valley. I know that this is true with THOUSANDS of other people travelling out to Johnson Valley every year, including active duty and retired Marines. Closing Johnson Valley to the public (even if there is a little piece left open) will have a devastating impact on local economy - especially with people spending more and more as time goes by due to rock crawling and rock racing becoming 'popular' and more mainstream. Thank you for regarding the impact that closing Johnson Valley will have on the area's economy and considering alternative areas to use for training."

The above is something I have quoted from an on-line site. I have never been to JV but have wanted to go for some time. I live out of state, was currently just put on medical leave due to work-related lung conditions, and now may be losing my job of the last 14 years as a result. Consequently, at the same time, I am seeing this discussion on the recent planned expansion of JV by the Marines at 29 Palms. I find myself sitting here now on a breathing machine at the computer copying and pasting notes and discussion topics fighting for a cause of which I believe firmly about-in land use and keeping public lands open for the public, yet at the same time, have to stand up to the core of who has helped provide those public lands and the freedom I enjoy today through the work they do each and every day. I Thank the Marines from the bottom of my heart for what they do. Don't get me wrong-I'm not at all about to put them down, not in the least. I'm very proud of our armed forces and especially the Marines. Instead, I ask on this troubled issue that they move EAST instead. Doing so would open up PLENTY of new training ground to keep the Marines in top fighting condition trained to handle various terrain such as what is seen in the middle east, yet at the same time, keep Johnson Vally open to the public. I hope that one day God willing, I am able to make the trip myself to visit and wheel Johnson Valley. Please go East instead, keep the public lands open for the public. It would be a win-win for all involved.

Thank you for your time, and THANK YOU for your service!!!

Mike

Sincerely,

Mike Mundinger

San Diego, CA 92132-5190

To Whom It May Concern:

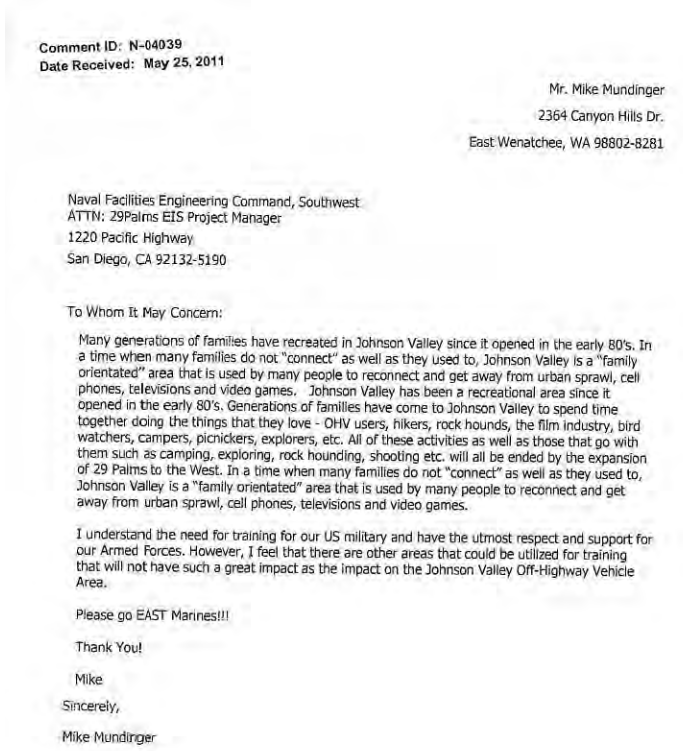
Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

Keep our family's together with camping.



Sincerely,

Michael Jarchow

Response to Comment N-04038:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. Johnson Valley has been a recreational area since it opened in the early 80's. Generations of families have come to Johnson Valley to spend time together doing the things that they love - OHV users, hikers, rock hounds, the film industry, bird watchers, campers, picnickers, explorers, etc. All of these activities as well as those that go with them such as camping, exploring, rock hounding, shooting etc. will all be ended by the expansion of 29 Palms to the West. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games.

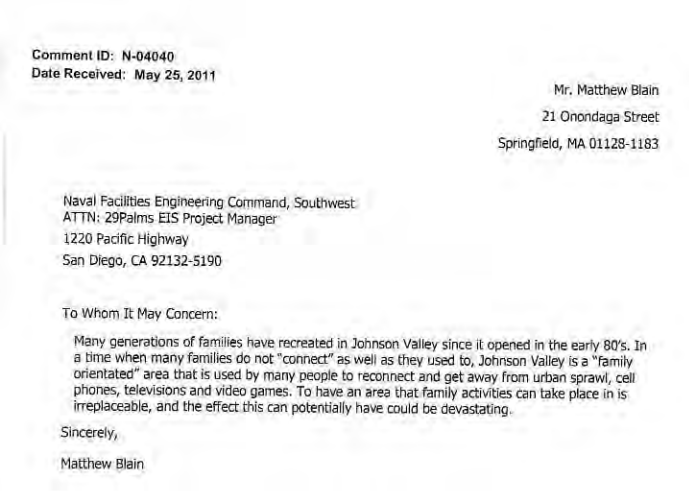
I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go EAST Marines!!!

Thank You!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-04044:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

To Whom It May Concern:

Many generations of families have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. This hits the nail directly on the head for my family. As I try to spend as much time as possible with my family at home, life gets in the way. We all look forward to taking off in the motorhome and wheeling in Johnson Valley. The kids for some reason, as well as I, feel no need to do anything else except for "enjoy" each other while in the desert. Once we found Johnson Valley, we never looked back. There is so much for us to enjoy together there and no other way to re-create it. It is almost like Johnson Valley "pulls" us together in some special way. Please consider mine, and many other families well being when the day comes for you to make your decision.

Sincerely,

Kevin Padilla

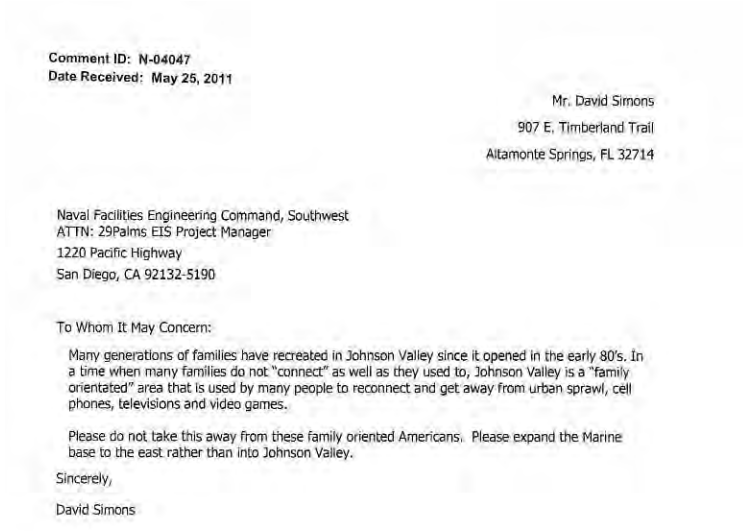
To Whom It May Concern:

Many generations of families (such as mine!) have recreated in Johnson Valley since it opened in the early 80's. In a time when many families do not "connect" as well as they used to, Johnson Valley is a "family orientated" area that is used by many people to reconnect and get away from urban sprawl, cell phones, televisions and video games. My step-children benefit greatly from the use of public lands, including Johnson Valley. Our options are shrinking with our public lands no longer being public. Please reconsider your expansion into Johnson Valley and look towards other viable alternatives.

Sincerely,

Lesley Smith



Response to Comment N-04046:

Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Just think-shut another popular land destination down and you're effectively putting that many more kids on the streets where they'll likely wind up on drugs, in gangs, committing more violence, getting pregnant earlier, etc. The alternative is to keep JV open to the public, allow the "family" events to continue and preserve our American Heritage in off-roading. Please do the right thing.

Thanks,

Mike

To Whom It May Concern:

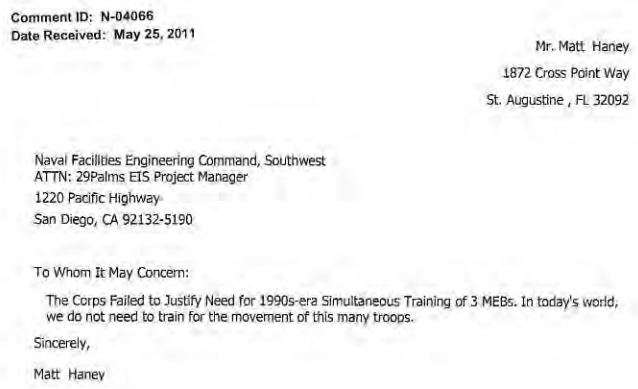
Do the Marines really need another training area? Can't they use the ones they have or even utilize other brances like Ft Bliss in Texas or the Range near Nellis? The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

Sincerely,

Michael Nixon



Response to Comment N-04065:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

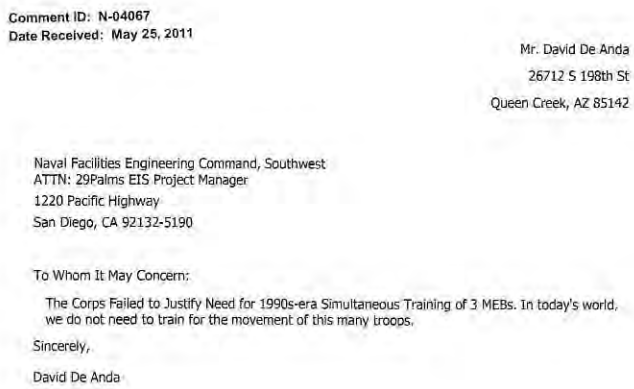
To Whom It May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.



Sincerely,

Matt Haney

Response to Comment N-04066:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

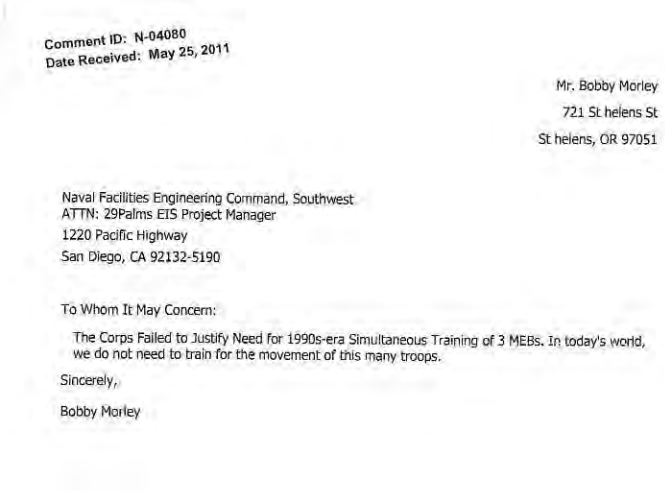
I'd first like to thank you for your time to read my letter. It may seem odd coming from someone in VA, but the outdoor community extends far beyond the boundaries of home for most people. I have never had the please of experiencing your wonderful state's resources, but it is a realistic accomplishment for me and my family. Unfortunately, the outlets for enjoying the off road sport of which I am so passionate are dwindling due to political decisions which seem to be made all too carelessly.

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

I urge you to reconsider your options! Thank you for your time and God Bless the USA!

Sincerely,



John Foli

Response to Comment N-04079:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. To Whom it May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. Several years ago, the Army's Ft Irwin also expanded in size.

Since then, because of lack of funding to complete additional studies and to expand infrastructure, only one section of the area to Ft. Irwin that was added is currently in use by the Army. Areas that they considered "critical" for their training, especially to the South are NOT in use.

It is also important to note, that this lack of funding for the Army at Ft. Irwin is during OEF when the military is receiving a lot of funding.

In a post OEF world, the Marine Corps, with even less funding than it has had in the past will run into the same issues with 29 Palms. The DEIS does not address this issue. If the land is annexed by the Marines, much of it will be able to be put into use because of lack of funding.

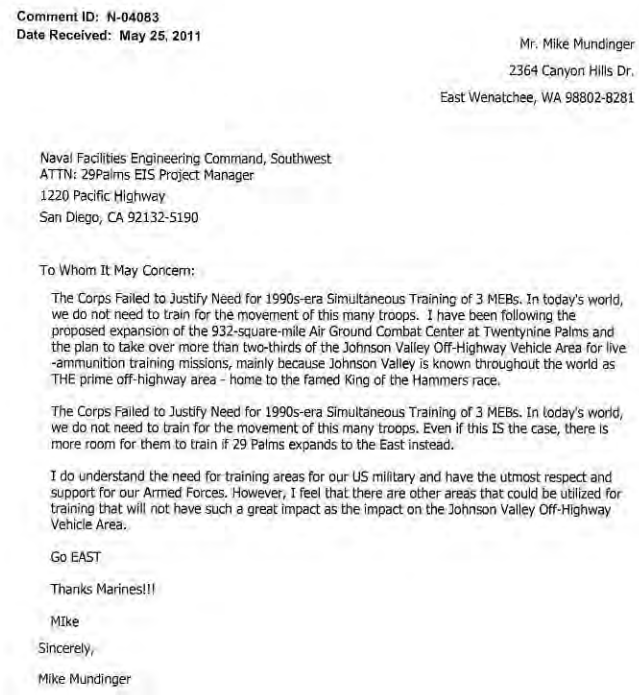
The DEIS needs to either be completely thrown out, or this issue needs to be added into the DEIS and addressed.

If you move at all, please go EAST instead.

Thanks

Mike

Sincerely,



Mike Mundinger

Response to Comment N-04082:

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

Public comments on the Draft EIS are an important part of the decision-making process. To Whom It May Concern:

The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live -ammunition training missions, mainly because Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race.

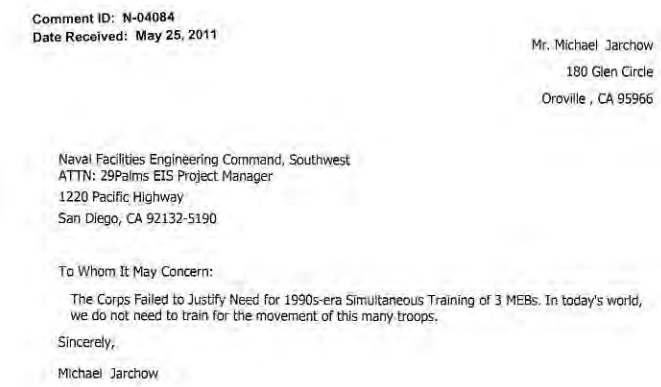
The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops. Even if this IS the case, there is more room for them to train if 29 Palms expands to the East instead.

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Go EAST

Thanks Marines!!!

MIke



Sincerely,

Mike Mundinger

I believe the Marines could use existing training facilities like the facilities Around Nellis and the area near White Sands/Fort Bliss and Holloman AFB. The Corps Failed to Justify Need for 1990s-era Simultaneous Training of 3 MEBs. In today's world, we do not need to train for the movement of this many troops.

Sincerely,

Michael Nixon

Response to Comment N-04086:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

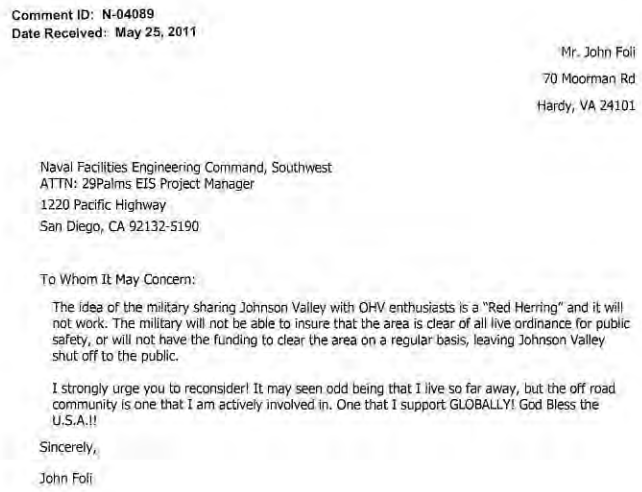
San Diego, CA 92132-5190

To Whom It May Concern:

The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.



Sincerely,

Daniel Keller

Response to Comment N-04088:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

First of all, I'd like to thank you for taking the time to read these letters. The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public. I feel that shared use is a pipe dream, and mainly just lip service. The logistics and costs involved to make the area even remotely safe for the public will undoubtedly be so high that the "shared" part of shared use will more than likely never happen.

Sincerely,

Matthew Hazel

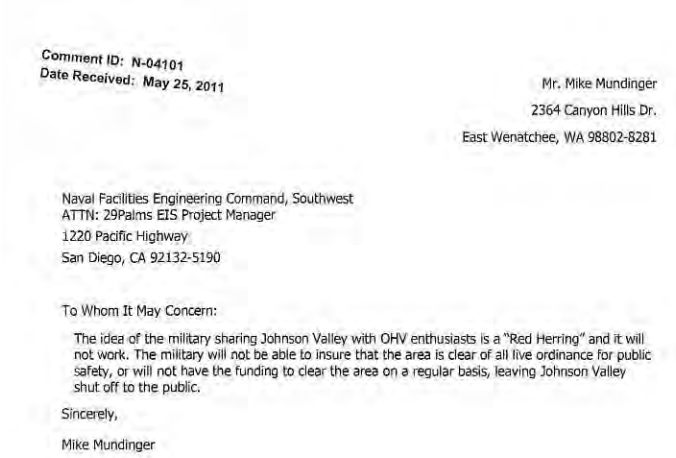
Keeping johnson valley open is a vital part to the out door community the military is not going to keep it open and it will be polluted with there test. My business is based on people that use there rigs hard and Johnson Valley is the place to do it. By shutting it down the economy will be hurt and so will the outdoor community.

Sincerely,

Seth Johnson



Response to Comment N-04100:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

San Diego, CA 92132-5190

To Whom It May Concern:

It's seems Ft. Irwin, which is the Army's National training Center went through an expansion simular to 29 Palms.

Ft. Irwin was 642,000 acres in size. An additional 150,510 acres was added for a grand total 792,510 acres.

29 Palms is currently 596,480 acres, and wants to expand by 422,000 acres for a grand total of 1,018,480 acres.

If a second Land Army is not desired, then why does the USMC need a 25% BIGGER training area than our actual Land Army?! The EIS fails to provide any justification.

Sincerely,

Tyler McMurray

Response to Comment N-04106 (Page 1 of 2):

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

Comment ID: N-04106 (Page 2 of 2)

Response to Comment N-04106 (Page 2 of 2):

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The EIS fails to answer a fairly large issue. 29 Palms is not a viable training area for today's Marines:

The USMC is to no longer be a second land army; Gen. Amos' goal is to get back to (our) amphibious roots, we've got to – and then all of a sudden people started using that language.

There is no viable amphibious training area within miles and miles of 29 Palms, and certainly not within the Johnson Valley area contemplated by the EIS.

The EIS should be rewritten to consider proximity to amphibious terrain for realistic training. The plan and all Alternatives to expand into DRY Johnson Valley should be withdrawn.

Sincerely,

Ryan Brown

Response to Comment N-04107:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

To Whom It May Concern:

The amount of time provided for the public comment period is too short for the public to go thoroughly over the documents. Please extend the current public comment period. Upon trying to find the proper mailing address for sending in my comments, I realized that it was not included in the DEIS document and was VERY difficult difficult to find, if not excluded, from every other typical place a concerned citizen may look when they try to find a way to submit any comments they have. I had to rely on a friend who finally dug it up on the Federal Register. How many Americans would know to look on the Federal Register to find an address so important to submitting their comments DURING A PUBLIC COMMENT PERIOD? This alone is enough to demonstrate that people are NOT encouraged to submit their comments and views on this very important subject that affects millions of people.

Due to this major oversight (or possible planned act of discouraging the public to comment), a large percentage of the public may have not found a way to submit their opinions. This means the address(es) should be posted clearly and VERY publicly and the time-period for comments extended.

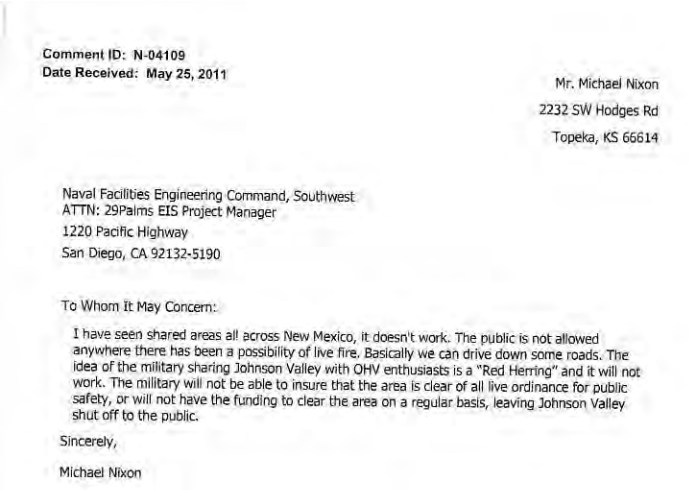
Furthermore, the amount of time provided for the public comment period is too short for the public to go thoroughly over the documents.

That is two-strikes against the way the public comment period has been handled and all-the-more reason to review what has gone wrong, correct the blatant mistakes, and extend the public comment period to a length of time that satisfies the condition that Americans get a truly fair shot at reviewing all of the documents and issues and having a simple and effective way for them to submit their comments because this time, you'll actually provide the mailing address in locations where EVERYONE who is interested, can find it.

Please go EAST instead. Thank you Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-04108:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

I have seen shared areas all across New Mexico, it doesn't work. The public is not allowed anywhere there has been a possibility of live fire. Basically we can drive down some roads. The idea of the military sharing Johnson Valley with OHV enthusiasts is a "Red Herring" and it will not work. The military will not be able to insure that the area is clear of all live ordinance for public safety, or will not have the funding to clear the area on a regular basis, leaving Johnson Valley shut off to the public.

Sincerely,

Michael Nixon

Response to Comment N-04109:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

To Whom It May Concern:

I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

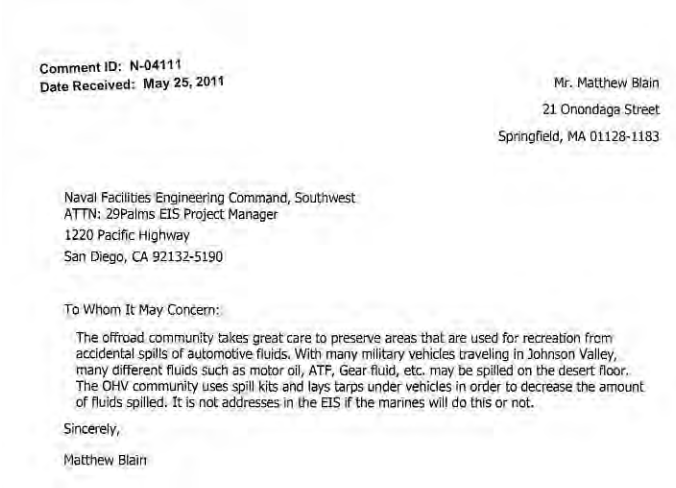
Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go East. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-04110:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

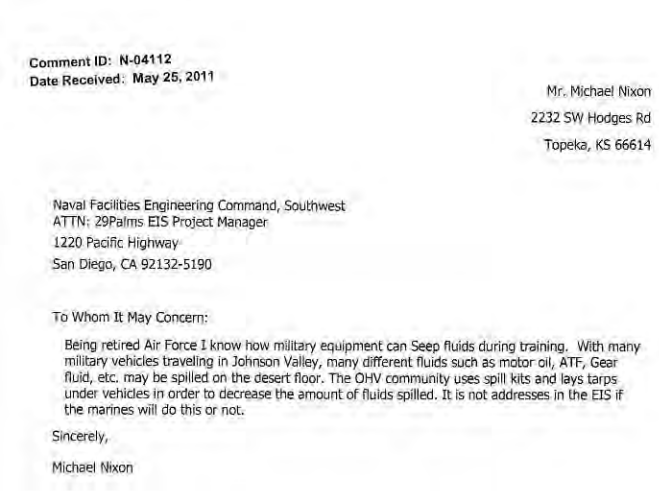
To Whom It May Concern:

The offroad community takes great care to preserve areas that are used for recreation from accidental spills of automotive fluids. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.



Sincerely,

Matthew Blain

Response to Comment N-04111:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

Truly, is this expansion based on the REAL needs of the Marine Corps in the near and distant future OR is it based on the by-gone needs of yesterday? The way the political, social, cultural, and financial status of the world has appeared recently, it looks as though EVERYTHING is different than it was just a few years ago. Listenening to the expansion presentation given by the Marine Corps at a couple of different locations, most all of the planning for this expansion was decided on a VERY long time ago. The world is a different place and continuing with this expansion without ensuring it is what the Corps truly needs is a mistake that will not benefit the Corps and will hurt a large number of Americans along the way.

DO NOT expand the 29 Palms Military base without re-visiting ALL aspects of what Marines TRULY need for the near and distant future.

Sincerely,

Matthew Blain

Response to Comment N-04113:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement.

In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

The last Quadrennial Defense Review, in 2010, was widely derided for failing to match priorities with resources, and for essentially endorsing each services' force size and equipment wish lists.

The DEIS fails to state how the expansion of 29 Palms meets any of today's Marine Corps' priorities.

This proposed expansion seems to be a "wish list" item, rather than a priority item that will be upheld by the actual Force Structure.

President Obama's upcoming review will be very similar to a QDR, and will inevitably highlight "wish list items" like the 29 Palms expansion. It would be a better solution to axe this proposed expansion at this stage, rather than having the embarassment of having it axed by the Pentagon.

The nation cannot afford to have the military keep doing everything that it does today. The Marine Corps is prepared to be a more mobile, middleweight fighter. The Marine Corps can come through the reviews largely unscathed--but some of the less necessary programs like a 29 Palms expansion should be cut immediately.

The DEIS does not state that the 29 Palms expansion meets current Marine Corps Force Structure needs. The DEIS does not state that the 29 Palms expansion will be fundable given federal government cutbacks--including $400 Billion by 2023. The project should be withdrawn.

Sincerely,

Shawn Baker

To Whom It May Concern:

I first want to thank the Marine Corps for your support of the OHV community. This community is comprised of thousands of active Marines, veterans, and countless other citizens of this great country that love and respect all the Marines do for us.

The expansion of 29 Palms is a delicate issue for me. I believe our military deserves the very best, regardless of the cost. After reviewing the EIS, I simply can't agree that the expansion of 29 Palms is in the best interest of the Marines. There are countless errors and omissions to the EIS. It doesn't properly address the expansion's impact on OHV culture, the availability of public land for use by all user groups, its impact on the local community, the needs of the Marine corps as dictated on numerous occasions by its leadership, the affect on the families that enjoy the Johnson Valley OHV, whether this expansion is properly budgeted and/or a good use of the Marine's resources, air impacts, water impacts, erosion impacts, the list goes on and on.

These errors alone should cause the EIS to be removed, the process started over, and a real evaluation of the true needs for today's Marine Corp. My first request is the removal of this EIS. If after carefully considering all of its shortfalls you still believe expansion is necessary I implore you to expand East instead of West. While I believe this expansion is still a poor deployment of financial resources, the expansion East instead of West will minimize all of the other impacts the 29 Palms expansion will have.

Thank you again for your service.

Mike

Sincerely,

Mike Mundinger

Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

To Whom It May Concern:

As a Sr. Financial Analyst, I am surprised that the The Corps failed to analyze DOD Budget and National Deficit Impact on project viability. Many times in Business Development, we see project start and fail due to short sighted long-term planning. It appears as though you are planning to shut down an area currently used by the public without making long term plans for its sustainability. How sad that a determined OHV culture will be shut out and then have to watch their beloved area go defect due to this financial failure. Please analyse the numbers and reconsider expanding into Johnson Valley.

Sincerely,

Amanda Smith

To Whom It May Concern:

The expansion of 29 Palms into the Johnson Valley area is not properly addressed by this EIS. Johnson Valley is an area loved and enjoyed by tens of thousands of people throughout the year. Motorcycle riders, hikers, bird watchers, campers, explorers, 4wheelers, and people just out to camp and enjoy the area flock to the area each and every weekend. There is not an alternative to this area for all of these users, and the EIS fails to address this catastrophic loss.

One weekend in particular this area and all of Johnson Valley are used for the King of the Hammers race. This race combines the technical nature of rock crawling with the high speed endurance of a desert race. It is the hardest one day off road race in the world. Tens of thousands of participants and spectators enjoy this race, many of them camping out for the entire week in the Johnson Valley Area. Much of the course for that race would no longer be available if the 29 Palms expansion comes West into Johnson Valley.

The King of the Hammers race promoters worked tirelessly with the BLM, the Marines, and other local law enforcement officers at last years race to ensure a smooth and safe race for participants, spectators, and the environment. At the post race review the organizers and participants were given the highest marks for their approach to safety, preparation, and post race clean up. Johnson Valley was truly a better place after the race than it was before.

Without the Johnson Valley OHV area this event can not go on. People from all over the country and all over the world will no longer be able to enjoy the lifestyle and sport they love. This is not addressed within the EIS, and is a major shortfall that must be addressed. There is an alternative within the EIS that would give the Marines the ability to expand, while not permanently damaging the economy and culture of the area. GO East Marines. If expansion is necessary, then expand to the East and leave Johnson Valley for the continued and life long use of the public you fight so hard to defend.

Please go East instead. Thank You!

Mike

Sincerely,

Mike Mundinger

Response to Comment N-04117:

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Many OHV areas in the US have been closed due to noise complaints.

If the Federal Government has determined that this is a legitimate problem, then the noise of live fire exercises in the proposed 29 Palms expansion should be enough to halt this proposed action.

If, on the other hand, noise is not a legitimate problem, and the 29 Palms Marine Base expands into the Johnson Valley OHV Area, then the US Government must re-open OHV recreation areas in the US that were previously closed due to noise complaints.

Please go East. Thanks Marines!!!

Mike

Sincerely,

Mike Mundinger

Response to Comment N-04118:

Thank you for your comment. The EIS evaluates noise impacts under each of the action alternatives (see Section 4.9). As discussed in Section 4.4 of the EIS, some noise and vibrations associated with ordnance use under the proposed action may be periodically detected by residents and other members of the public from a distance, and may sometimes be an annoyance. Although proposed training activities would increase noise levels in adjacent land areas, noise levels would not exceed the threshold criteria outside of the proposed acquisition boundaries. The results of additional single-event noise modeling have been added to Section 4.9 of the EIS to contribute to the evaluation of noise impacts.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

The US Government (BLM) has determined that fireworks are illegal at the Johnson Valley OHV area due to the risk of wildfire.

How does the US Government (USMC) propose to mitigate the risk of wildfire at Johnson valley with the use of live fire rounds?

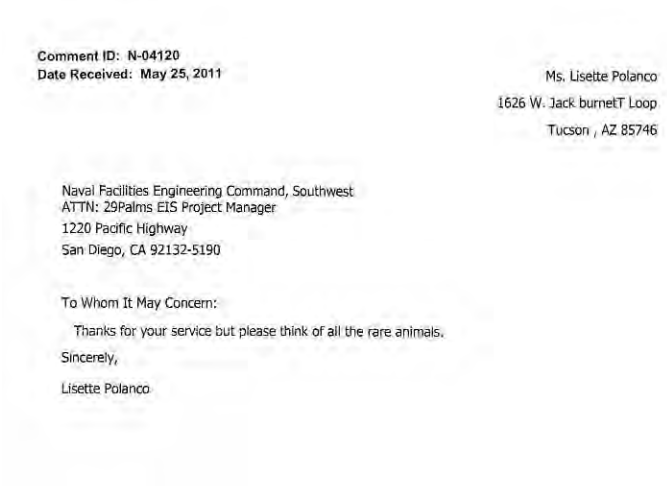
There seems to be a huge contradiction in the laws that the US Government wants to impose upon its citizens and the regulations it allows for itself.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Please go East. Thanks Marines!!!

Mike

Sincerely,



Mike Mundinger

Response to Comment N-04119:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

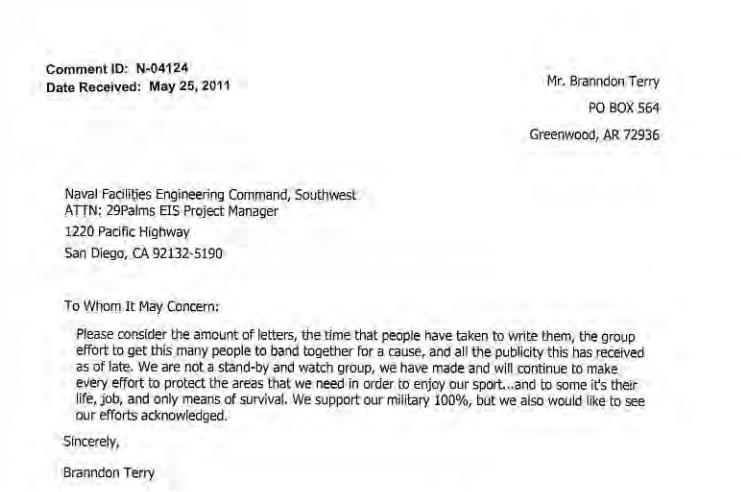
My family and I recreate often in JV. All three of my kids learned to drive there. It's a special place to us. Please consider moving the expansion east. Thanks!

Sincerely,



Rob Campbell

Response to Comment N-04123:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

Please consider the amount of letters, the time that people have taken to write them, the group effort to get this many people to band together for a cause, and all the publicity this has received as of late. We are not a stand-by and watch group, we have made and will continue to make every effort to protect the areas that we need in order to enjoy our sport...and to some it's their life, job, and only means of survival. We support our military 100%, but we also would like to see our efforts acknowledged.

Sincerely,

Branndon Terry

To Whom It May Concern:

My name is Nick and I appreciate you taking the time to read my letter. I find the decision by the United States Marine Corps to expand their operations at 29 Palms in Southern California to be a poor decision for a number of reasons including the detrimental effect it would have on the local economy, the offroad industry, and thousands, if not millions of families from not just California and the USA, but other countries as well.

Johnson Valley is a world renouned hiking, camping, and offroading destination and many folks, such as myself, have not yet had the opportunity to recreate here. With the recent sucess of the King of the Hammers offroad race, Johnson Valley has further highlighted itself as one of the most hardcore offroading enviornments in the country. Not to mention the area, as well as the King of the Hammers event generates millions of dollars for the local economy and the offroad industry. Losing JV forever would be a critical blow to both in a time when boosts to the economy should come before all else.

Myself I hope to take my girlfriend there within the next year or two to four wheel our Toyota 4Runner and camp. Our ultimate goal is to travel the country and JV is one of our first desired stops. Please reconsider this decision to expand west into Johnson Valley and instead explore options to go East instead. Thank you.

Sincerely,

Nick McMurray

Response to Comment N-04125:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Dear Marines,

First of all, thank you for the opportunity to make public comment on this issue. Public input with respect to the use of public lands is an important process in protecting our public lands for multiple uses as mandated by Congress.

I am devasted by the news that the Marines are considering commandeering part of the Johnson Valley OHV area. This action would close these public lands FROM the public. It would take away from the OHV community one of the most important playgrounds in the country.

Johnson Valley is the largest open-access off-road area in the nation, according to the BLM. The proposed action would take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions, according to the Press Enterprise.

At a time when off road areas are being closed and access prohibited at an alarming rate, such an action would blow a devastating loss to the OHV community, the businesses that rely upon it, and the local communities whose economies rely on public OHV visits to this area.

I respectfully request that you consider all other alternatives (ANY other alternative) to closing public OHV access to this important OHV area.

Thank you,

Ron Tolman

Response to Comment N-04127:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

To Whom It May Concern:

It is not often i will take the time to write a letter like this but the subject is one I am passionate about. While I understand the importance of giving our military the best tools possible I must make a passionate plea for them to consider the importance of the Johnson Valley to the OHV public. The trails and conditions there are second to none when it comes to "King of the Hammers" race. There is simply no place better for us to hold this race.

The phenomenal success of this race and sport during the current recession amazing. This success has a huge economical impact not only in the communities surrounding JV but it has also spread around this country. Many of the companies making, distributing and selling the parts and equipment to support this sport are almost all 100% USA.

I love this country and I know are military is responsible for the freedoms I have to go "off roading" I just want them to consider some of the other options as the JV trails are a unique treasure. Please consider the alternativs.

Austin Armstrong

Sincerely,

Austin Armstrong

To Whom It May Concern:

The use of OHV enthusiasts of Johnson Valley needs to be addressed in the EIS as the impact on our culture will be greatly affected. As a camper and hiker, the Johnson Valley area provides for valuable family outing opportunities. The vast amounts of families in the OHV community are considered as extended family. Not accounting for the OHV culture is a determent to society and the local economy. Please reconsider your expansion into Johnson Valley.

Sincerely,

Evelyn Smith

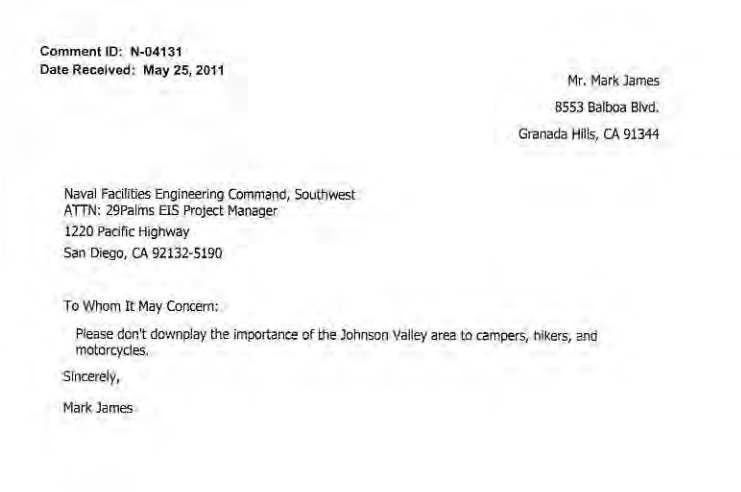
To Whom It May Concern:

Johnson Valley Recreation area is NOT just a spot for people to go wheeling. It is the Mecca of off -roading that people from all over the world travel to in order to experience it. The USMC does not realize the importance of this area to our community and OHV "Culture"

In addition, I believe the military should use the public as an asset for further vehicular research. Take for example the recently developed vehicle to possibly replace the Hummer; ELSORV. Where do you think the use of a vehicle like this came from? I'll tell you, it came from the offroad industry, in particular rock crawlers. Where was rock crawling really started, once again I'll tell you; Johnson Valley.

I do not feel with this country as vast as it is, that the military would feel the need to eliminate a culture that has the possibility to contribute so much to its future vehicles to transport their troups. Technology is increasing constantly at a rapid pace, and there is much to be learned to better the safety and diversity of terrain vehicles can handle. We would like to continue to be that resource.

Thank you for your time,
Chris Roes



Sincerely,

Christopher Roes

I doubt this expansion is really necessary with the current political situation. It is based on plans made over 10 years ago.

Sincerely,

Mark James

Response to Comment N-04133:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

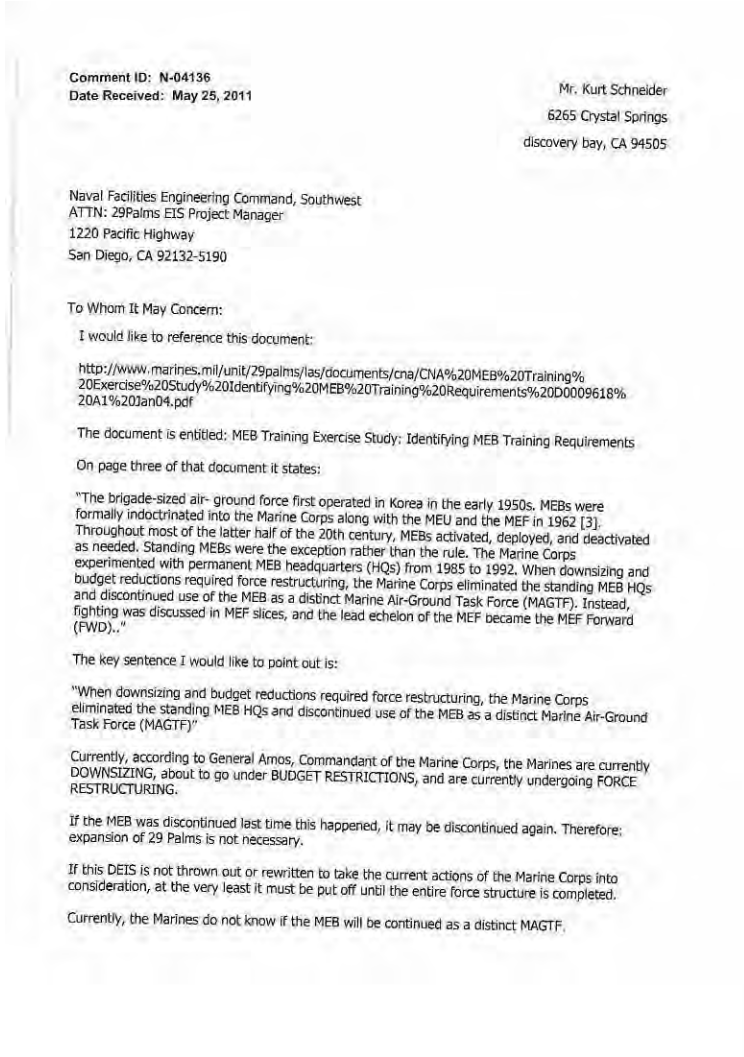
One aspect of any EIS is an evaluation of the fairness of the action and the equality of sacrifice if any to the community. Johnson Valley is an area utilized by countless user groups, but is the only place within hundreds of miles that offers the size and variety of terrain to OHV users that Johnson Valley does.

Expansion west will unduly impact the OHV community and its users. The EIS fails to address the fairness of this taking, especially when other options are available that wouldn't unduly burden one user group. If expansion is necessary, the best option is to Go East. This expansion will leave open to the public a long and often utilized area that is open to all user groups.

Go East Marines.

Sincerely,



Mike Mundinger

Response to Comment N-04135:

To Whom It May Concern:

I would like to reference this document:

http://www.marines.mil/unit/29palms/las/documents/cna/CNA%20MEB%20Training%20Exercise%20Study%20Identifying%20MEB%20Training%20Requirements%20D0009618%20A1%20Jan04.pdf

The document is entitled: MEB Training Exercise Study: Identifying MEB Training Requirements

On page three of that document it states:

"The brigade-sized air- ground force first operated in Korea in the early 1950s. MEBs were formally indoctrinated into the Marine Corps along with the MEU and the MEF in 1962 [3]. Throughout most of the latter half of the 20th century, MEBs activated, deployed, and deactivated as needed. Standing MEBs were the exception rather than the rule. The Marine Corps experimented with permanent MEB headquarters (HQs) from 1985 to 1992. When downsizing and budget reductions required force restructuring, the Marine Corps eliminated the standing MEB HQs and discontinued use of the MEB as a distinct Marine Air-Ground Task Force (MAGTF). Instead, fighting was discussed in MEF slices, and the lead echelon of the MEF became the MEF Forward (FWD).."

The key sentence I would like to point out is:

"When downsizing and budget reductions required force restructuring, the Marine Corps eliminated the standing MEB HQs and discontinued use of the MEB as a distinct Marine Air-Ground Task Force (MAGTF)"

Currently, according to General Amos, Commandant of the Marine Corps, the Marines are currently DOWNSIZING, about to go under BUDGET RESTRICTIONS, and are currently undergoing FORCE RESTRUCTURING.

If the MEB was discontinued last time this happened, it may be discontinued again. Therefore; expansion of 29 Palms is not necessary.

If this DEIS is not thrown out or rewritten to take the current actions of the Marine Corps into consideration, at the very least it must be put off until the entire force structure is completed.

Currently, the Marines do not know if the MEB will be continued as a distinct MAGTF.

Response to Comment N-04136:

To Whom It May Concern:

The expansion of 29 Palms into the Johnson Valley area is not properly addressed by this EIS. Johnson Valley is an area loved and enjoyed by tens of thousands of people throughout the year. Motorcycle riders, hikers, bird watchers, campers, explorers, 4wheelers, and people just out to camp and enjoy the area flock to the area each and every weekend. There is not an alternative to this area for all of these users, and the EIS fails to address this catastrophic loss.

One weekend in particular this area and all of Johnson Valley are used for the King of the Hammers race. This race combines the technical nature of rock crawling with the high speed endurance of a desert race. It is the hardest one day off road race in the world. Tens of thousands of participants and spectators enjoy this race, many of them camping out for the entire week in the Johnson Valley Area. Much of the course for that race would no longer be available if the 29 Palms expansion comes West into Johnson Valley.

The King of the Hammers race promoters worked tirelessly with the BLM, the Marines, and other local law enforcement officers at last years race to ensure a smooth and safe race for participants, spectators, and the environment. At the post race review the organizers and participants were given the highest marks for their approach to safety, preparation, and post race clean up. Johnson Valley was truly a better place after the race than it was before.

Without the Johnson Valley OHV area this event can not go on. People from all over the country and all over the world will no longer be able to enjoy the lifestyle and sport they love. This is not addressed within the EIS, and is a major shortfall that must be addressed. There is an alternative within the EIS that would give the Marines the ability to expand, while not permanently damaging the economy and culture of the area. GO East Marines. If expansion is necessary, then expand to the East and leave Johnson Valley for the continued and life long use of the public you fight so hard to defend.

Sincerely,

Mike Mundinger

Response to Comment N-04137:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. To Whom It May Concern:

In arguing against the expansion of 29 Palms, I would like to share a story told by General James F. Amos, Commandant of the Marine Corps at the Defense Writers group breakfast on February 18th, 2011.

"We found that we were buying a new water bull. Now, for everybody here, a water bull is not an animal. It's a big – it's a water tank that holds, I'm guessing, I don't know, four (hundred) or 500 gallons of water.

"We call them "water bull," but that's like a water buffalo. And you tow it behind a Humvee or a seven-ton truck or that kind of thing. Now, that's where Marines get fresh water. You pump fresh water in it. You go up there, and Marines are up there shaving, and all that stuff. And we've got a good one. We've had that one since I was a lieutenant, and it works just fine. Nothing wrong with it; (served us as Marines ?). Well, we found out that – and I'm not sure who, but we said, well, we need a bigger water bull. We need one that's about three or four times as big.

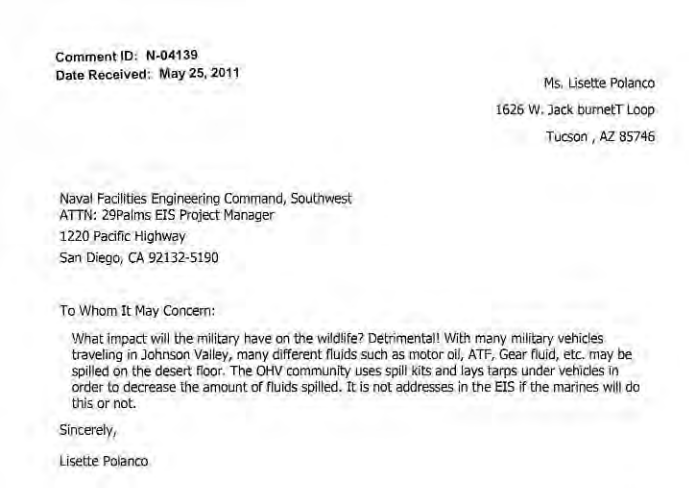
And we said, well – then we see this picture of this thing, and it's huge. It not only takes up more cube, it's heavier. Well, why do we need it? Well, because we've got a seven-ton truck now that can tow it. Because we can. We said, let's buy it.

We canceled that program. So there's an example. There's others that are out there. But being frugal just means going back and paying very close attention, close scrutiny on everything we're buying, making sure that we can – that it's something we need."

In a post OEF world, The Marines are getting back to their frugal roots and only asking for what they NEED, not for what they want. Currently, with the state of the world and planning for smaller actions in littoral areas, the Marines do not need to train 3 Battalions for a large scale campaign. According to General Amos, the Marines were used in OEF as a "two for", as a second land army. Now their role is changing back to their original purpose.

The entire DEIS needs to be thrown out since the purpose and need of the base expansion is no longer valid in a post OEF world.

Sincerely,



Mike Mundinger

Response to Comment N-04138:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

To Whom It May Concern:

What impact will the military have on the wildlife? Detrimental! With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

Sincerely,

Lisette Polanco

Response to Comment N-04139:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

To Whom It May Concern:

As an off-highway vehicle enthusiast I write to urge you to support the "no action" alternative in the Draft Environmental Impact Statement - Land Acquisition and Airspace Establishment To Support Large-Scale Marine Air Ground Task Force Live Fire and Maneuver Training. I recognize that the Draft Environmental Impact Statement (DEIS) notes that no action "...is not a viable alternative since it does not meet the purpose and need..." However, none of the 6 proposed alternatives, including preferred alternative 6, adequately address all issues including providing for recreation, particularly motorized recreation.

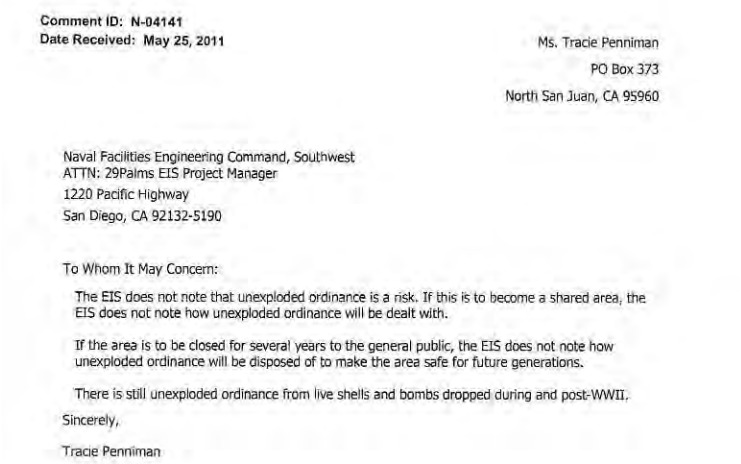
Local riders, and many from adjoining regions, have been pushed off of public lands and out of many areas of the desert for decades. While I understand that the Marines have a vital mission, there simply must be a better way to provide for adequate training while not essentially eliminating responsible access to Johnson Valley for motorized recreationists.

I encourage you to withdraw the DEIS in favor of developing a new DEIS with a broadened range of alternatives that include options that allow for the continued responsible use of off-highway vehicles (OHVs), and that recognize the vital economic impact that motorized recreation has in the area.

Sincerely,

Ronald Adkins

Response to Comment N-04140:



Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.) because they did not meet the purpose of and need for the proposed action or did not satisfy the minimum screening criteria for identifying suitable lands for acquisition (as described in Section 2.3 of the EIS).

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

The EIS does not note that unexploded ordinance is a risk. If this is to become a shared area, the EIS does not note how unexploded ordinance will be dealt with.

If the area is to be closed for several years to the general public, the EIS does not note how unexploded ordinance will be disposed of to make the area safe for future generations.

There is still unexploded ordinance from live shells and bombs dropped during and post-WWII.

Sincerely,

Tracie Penniman

Response to Comment N-04141:

Thank you for your comment. The Marine Corps has determined that Alternatives 4, 5, and 6 (all of which provide for Restricted Public Access to some or all of the acquired land area approximately 10 months of the year) are feasible alternatives that would allow it to meet at least the minimum identified training requirement. If one of these alternatives is selected by the Department of the Navy and approved by Congress, the Marine Corps would be required to implement the selected alternative as described in the Final EIS or they would be legally required to comply with the NEPA process to assess potential impacts of some other course of action.

As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

The Environmental Impact Statement has not considered the Environmental Impact of the increased wheeled and tracked military vehicle traffic and the airborne dust created.

Air quality will be negatively impacted.

The EIS does not state how many water trucks will be necessary to cope with the dust created by a single MEB.

Sincerely,

Lisa Penniman

Response to Comment N-04142:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

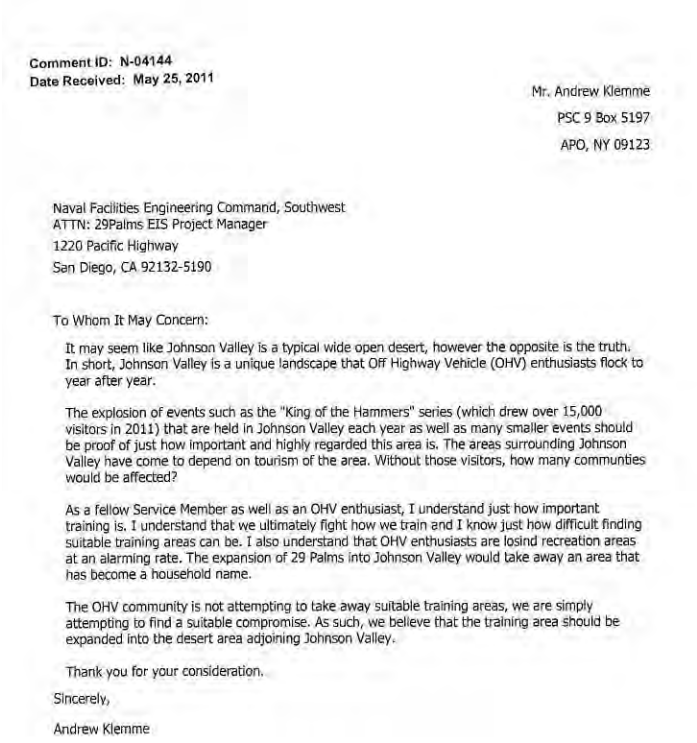
To Whom It May Concern:

One aspect of any EIS is an evaluation of the fairness of the action and the equality of sacrifice if any to the community. Johnson Valley is an area utilized by countless user groups, but is the only place within hundreds of miles that offers the size and variety of terrain to OHV users that Johnson Valley does.

Expansion west will unduly impact the OHV community and its users. The EIS fails to address the fairness of this taking, especially when other options are available that wouldn't unduly burden one user group. If expansion is necessary, the best option is to Go East. This expansion will leave open to the public a long and often utilized area that is open to all user groups.

Go East Marines.

Sincerely,



Nicholas McMurray

Response to Comment N-04143:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Mr. Andrew Klemme
PSC 9 Box 5197
APO, NY 09123

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

It may seem like Johnson Valley is a typical wide open desert, however the opposite is the truth. In short, Johnson Valley is a unique landscape that Off Highway Vehicle (OHV) enthusiasts flock to year after year.

The explosion of events such as the "King of the Hammers" series (which drew over 15,000 visitors in 2011) that are held in Johnson Valley each year as well as many smaller events should be proof of just how important and highly regarded this area is. The areas surrounding Johnson Valley have come to depend on tourism of the area. Without those visitors, how many communties would be affected?

As a fellow Service Member as well as an OHV enthusiast, I understand just how important training is. I understand that we ultimately fight how we train and I know just how difficult finding suitable training areas can be. I also understand that OHV enthusiasts are losind recreation areas at an alarming rate. The expansion of 29 Palms into Johnson Valley would take away an area that has become a household name.

The OHV community is not attempting to take away suitable training areas, we are simply attempting to find a suitable compromise. As such, we believe that the training area should be expanded into the desert area adjoining Johnson Valley.

Thank you for your consideration.

Sincerely,

Andrew Klemme

Response to Comment N-04144:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

Is the expansion of 29 Palms really necessary. The EIS fails to consider as a real option the training of our Marines at Fort Irwin during its unused times. That base was expanded years ago and has not been used to its potential. I realize it will take some coordination, but that very coordination is key to the proper training of our fighting force in this day and age when joint operations are the norm.

The EIS must take this option more seriously. If after giving this option a real chance, it is determined that the expansion of 29 Palms is still necessary, please go East. The expansion East will accomplish the same goal as expanding into Johnson Valley, but will not remove thousands of acres from use by the public.

Sincerely,

Ryan Brown

Response to Comment N-04145 (Page 1 of 2):

Thank you for your comment. As discussed in Section 2.7 of the EIS, the Marine Corps considered several alternative scenarios for the proposed action (including conducting the proposed MEB-sized Marine Air-Ground Task Force (MAGTF) Training at other military bases in the U.S.) but eliminated them from detailed study. Although the Army and the Marine Corps often serve side-by-side and sometimes execute similar missions, they have very different training requirements. The MAGTF is the Marine Corps' principal organization for conducting missions across the range of military operations. MAGTFs employ and integrate air- and ground-based operations. The Marine Corps is legally required to provide forces of combined arms, which is a unique Marine Corps mission and capability. MAGTF training involves a fully integrated live fire environment. MAGTF training employs a progressive approach, starting with combined arms integration techniques and procedures at the company level and culminating in a final exercise involving all elements of the Exercise Force MAGTF, such as the MEB-sized training proposed for the Combat Center. Fort Irwin does not have ranges capable of supporting MEB-sized sustained, combined-arms live-fire and maneuver training and the modification of Fort Irwin to better accommodate Marine Corps training requirements would preclude the Army's ability to meet its own training requirements and be optimally prepared for deployment. See Section 2.7 of the EIS for more information about alternatives that were considered but not carried forward for analysis in the EIS.

As discussed in Section 2.7 of the EIS, the Marine Corps considered other alternatives for the proposed action, including suggestions offered by members of the public during the public scoping period in late 2008. Several alternative scenarios were considered and eliminated from detailed study (including conducting the proposed MEB-sized MAGTF Training at other military bases in the U.S.)

To Whom It May Concern:

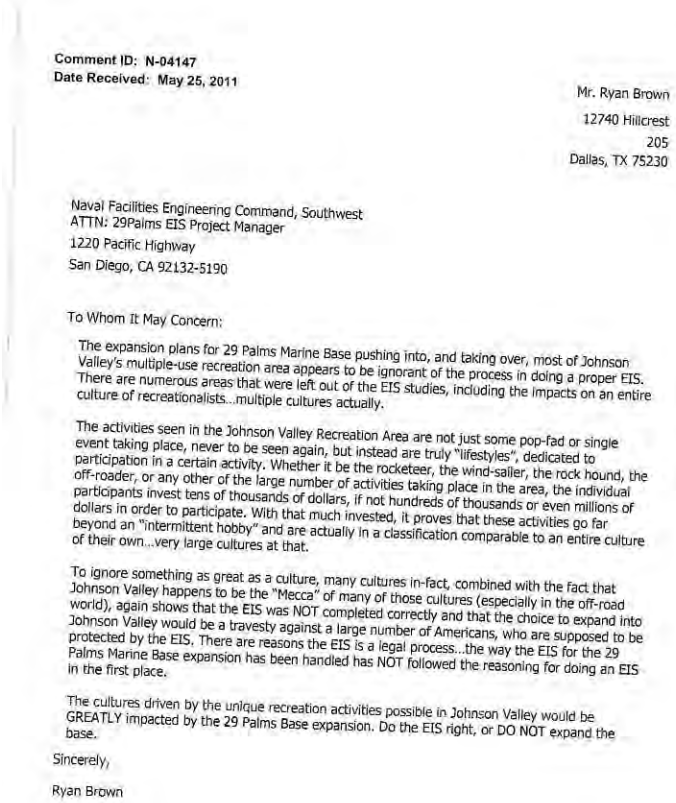
An issue of shared sacrifice. Around the country areas previously open to public use are being closed at an alarming rate. We are doing so to save a beetle, and owl, or some species of lichen. Every piece of our environment is precious, but without the ability for the citizens and guests of this great country to get out there and enjoy them the passion and love for this wonderful land of ours will quickly evaporate.

In a time when families are looking for affordable group activities, why are we closing areas that are used most by those very families the land is supposed to be preserved for.

I support the Marine Corps, and value their service to this country I love, but the EIS performed for the 29 Palms expansion has a glaring error. The recommendation to expand into Johnson Valley is the wrong choice. Remove this option from the EIS, so that people from around the country and the globe can continue to enjoy the responsible use of the treasures that Johnson Valley holds. If you must expand, GO EAST. If you must expand choose any option that doesn't impact the citizens of this country by removing one of the last great public areas from legal use.

Sincerely,

Ryan Brown



Response to Comment N-04146:

Thank you for your comment. To Whom It May Concern:

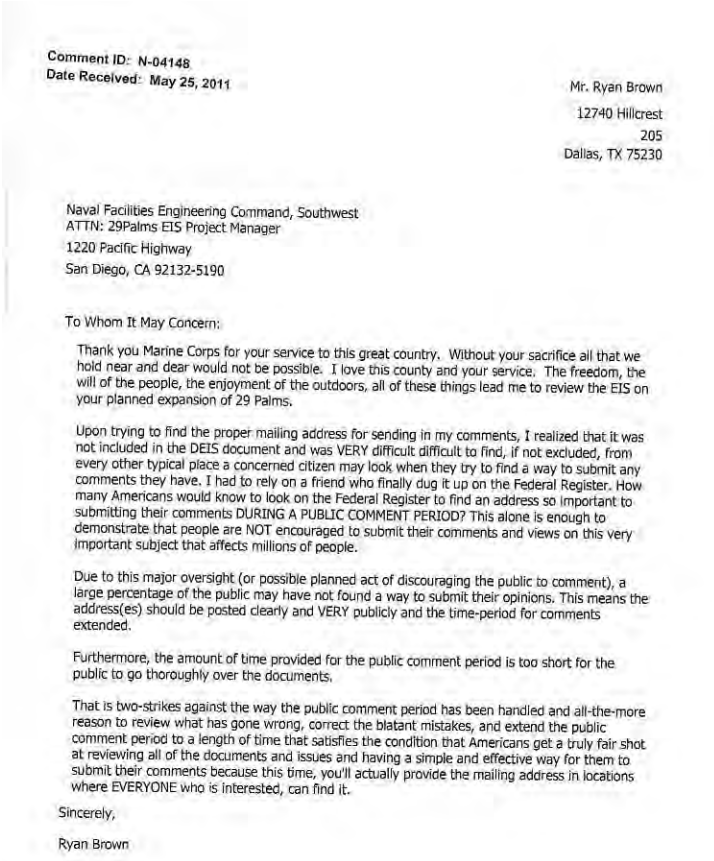
The expansion plans for 29 Palms Marine Base pushing into, and taking over, most of Johnson Valley's multiple-use recreation area appears to be ignorant of the process in doing a proper EIS. There are numerous areas that were left out of the EIS studies, including the impacts on an entire culture of recreationalists...multiple cultures actually.

The activities seen in the Johnson Valley Recreation Area are not just some pop-fad or single event taking place, never to be seen again, but instead are truly "lifestyles", dedicated to participation in a certain activity. Whether it be the rocketeer, the wind-sailer, the rock hound, the off-roader, or any other of the large number of activities taking place in the area, the individual participants invest tens of thousands of dollars, if not hundreds of thousands or even millions of dollars in order to participate. With that much invested, it proves that these activities go far beyond an "intermittent hobby" and are actually in a classification comparable to an entire culture of their own...very large cultures at that.

To ignore something as great as a culture, many cultures in-fact, combined with the fact that Johnson Valley happens to be the "Mecca" of many of those cultures (especially in the off-road world), again shows that the EIS was NOT completed correctly and that the choice to expand into Johnson Valley would be a travesty against a large number of Americans, who are supposed to be protected by the EIS. There are reasons the EIS is a legal process...the way the EIS for the 29 Palms Marine Base expansion has been handled has NOT followed the reasoning for doing an EIS in the first place.

The cultures driven by the unique recreation activities possible in Johnson Valley would be GREATLY impacted by the 29 Palms Base expansion. Do the EIS right, or DO NOT expand the base.

Sincerely,



Ryan Brown

Response to Comment N-04147:

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Thank you Marine Corps for your service to this great country. Without your sacrifice all that we hold near and dear would not be possible. I love this county and your service. The freedom, the will of the people, the enjoyment of the outdoors, all of these things lead me to review the EIS on your planned expansion of 29 Palms.

Upon trying to find the proper mailing address for sending in my comments, I realized that it was not included in the DEIS document and was VERY difficult difficult to find, if not excluded, from every other typical place a concerned citizen may look when they try to find a way to submit any comments they have. I had to rely on a friend who finally dug it up on the Federal Register. How many Americans would know to look on the Federal Register to find an address so important to submitting their comments DURING A PUBLIC COMMENT PERIOD? This alone is enough to demonstrate that people are NOT encouraged to submit their comments and views on this very important subject that affects millions of people.

Due to this major oversight (or possible planned act of discouraging the public to comment), a large percentage of the public may have not found a way to submit their opinions. This means the address(es) should be posted clearly and VERY publicly and the time-period for comments extended.

Furthermore, the amount of time provided for the public comment period is too short for the public to go thoroughly over the documents.

That is two-strikes against the way the public comment period has been handled and all-the-more reason to review what has gone wrong, correct the blatant mistakes, and extend the public comment period to a length of time that satisfies the condition that Americans get a truly fair shot at reviewing all of the documents and issues and having a simple and effective way for them to submit their comments because this time, you'll actually provide the mailing address in locations where EVERYONE who is interested, can find it.

Sincerely,

Ryan Brown

Response to Comment N-04148:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

The time given to the general public for review and comment of the EIS is not sufficient. While it may be possible for our elected officials in Washington to review thousands of pages in detail I do not posses that ability, nor does the rest of the public.

Closure of any lands open to the public, no matter how great the cause, is a very serious matter and it is one that must be review, monitored, and its wide ranging consequences thoroughly understood.

Where will the current users of the Johnson Valley OHV be allowed the responsible pursuit of their passion on public lands? I see no alternative for all of the users of that area within the EIS.

This proposal must be removed, or the Eastward expansion chosen.

Sincerely,

Ryan Brown

Response to Comment N-04149:

Thank you for your comment. 1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Truly, is this expansion based on the REAL needs of the Marine Corps in the near and distant future OR is it based on the by-gone needs of yesterday? The way the political, social, cultural, and financial status of the world has appeared recently, it looks as though EVERYTHING is different than it was just a few years ago. Listening to the expansion presentation given by the Marine Corps at a couple of different locations, most all of the planning for this expansion was decided on a VERY long time ago. The world is a different place and continuing with this expansion without ensuring it is what the Corps truly needs is a mistake that will not benefit the Corps and will hurt a large number of Americans along the way.

DO NOT expand the 29 Palms Military base without re-visiting ALL aspects of what Marines TRULY need for the near and distant future.

Sincerely,

Billy Nickel

Response to Comment N-04150:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

UXO's are found all around the world, many times by innocents who are injured or even killed by them. Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

Sincerely,

Michael Nixon

Response to Comment N-04151:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

Mitigation of OHV loss.

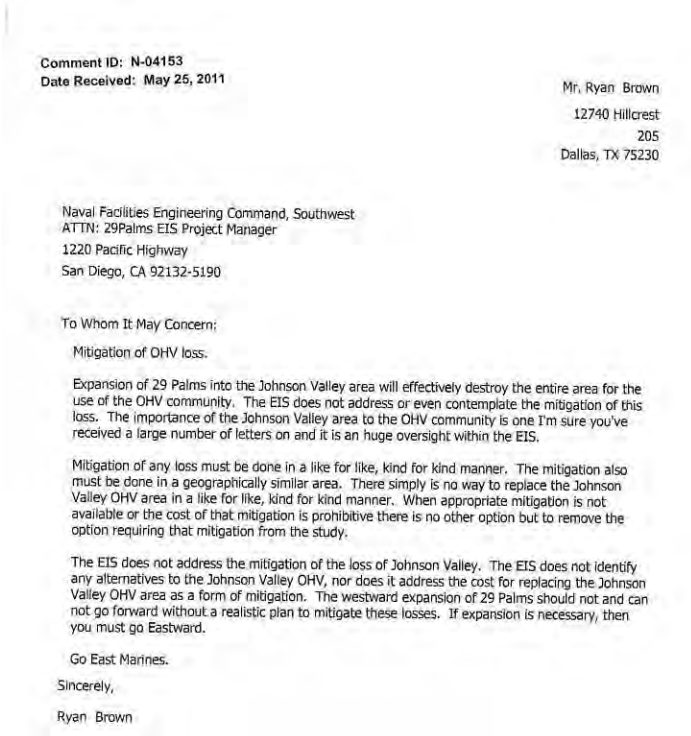
Expansion of 29 Palms into the Johnson Valley area will effectively destroy the entire area for the use of the OHV community. The EIS does not address or even contemplate the mitigation of this loss. The importance of the Johnson Valley area to the OHV community is one I'm sure you've received a large number of letters on and it is an huge oversight within the EIS.

Mitigation of any loss must be done in a like for like, kind for kind manner. The mitigation also must be done in a geographically similar area. There simply is no way to replace the Johnson Valley OHV area in a like for like, kind for kind manner. When appropriate mitigation is not available or the cost of that mitigation is prohibitive there is no other option but to remove the option requiring that mitigation from the study.

The EIS does not address the mitigation of the loss of Johnson Valley. The EIS does not identify any alternatives to the Johnson Valley OHV, nor does it address the cost for replacing the Johnson Valley OHV area as a form of mitigation. The westward expansion of 29 Palms should not and can not go forward without a realistic plan to mitigate these losses. If expansion is necessary, then you must go Eastward.

Go East Marines.

Sincerely,



Mike Mundinger

Response to Comment N-04152:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation, but does not have the authority to designate recreation lands as mitigation for the proposed action. The EIS determined that impacts to recreation (under all action alternatives) would be significant and that no mitigation measures would fully reduce the impacts to below a level of significance. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

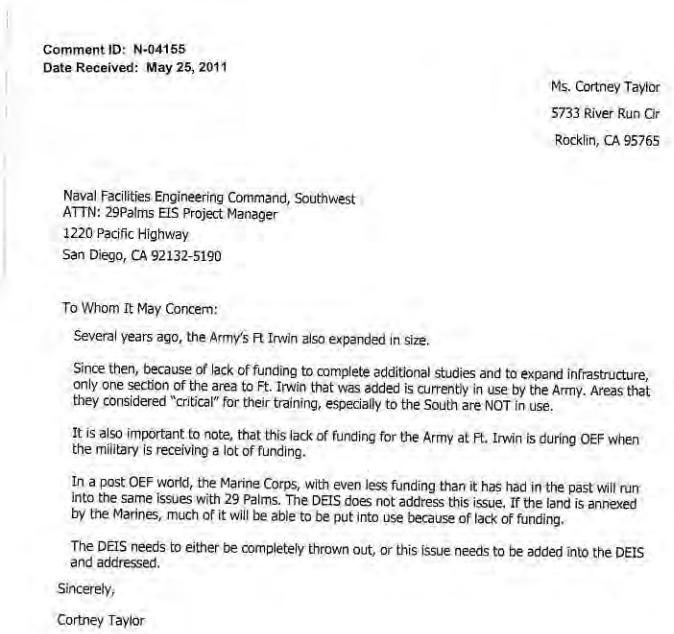
Several years ago, the Army's Ft Irwin also expanded in size.

Since then, because of lack of funding to complete additional studies and to expand infrastructure, only one section of the area to Ft. Irwin that was added is currently in use by the Army. Areas that they considered "critical" for their training, especially to the South are NOT in use.

It is also important to note, that this lack of funding for the Army at Ft. Irwin is during OEF when the military is receiving a lot of funding.

In a post OEF world, the Marine Corps, with even less funding than it has had in the past will run into the same issues with 29 Palms. The DEIS does not address this issue. If the land is annexed by the Marines, much of it will be able to be put into use because of lack of funding.

The DEIS needs to either be completely thrown out, or this issue needs to be added into the DEIS and addressed.



Sincerely,

Mike Mundinger

Response to Comment N-04154:

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

I first want to thank the Marine Corps for your support of the OHV community. This community is comprised of thousands of active Marines, veterans, and countless other citizens of this great country that love and respect all the Marines do for us.

The expansion of 29 Palms is a delicate issue for me. I believe our military deserves the very best, regardless of the cost. After reviewing the EIS, I simply can't agree that the expansion of 29 Palms is in the best interest of the Marines. There are countless errors and omissions to the EIS. It doesn't properly address the expansion's impact on OHV culture, the availability of public land for use by all user groups, its impact on the local community, the needs of the Marine corps as dictated on numerous occasions by its leadership, the affect on the families that enjoy the Johnson Valley OHV, whether this expansion is properly budgeted and/or a good use of the Marine's resources, air impacts, water impacts, erosion impacts, the list goes on and on.

These errors alone should cause the EIS to be removed, the process started over, and a real evaluation of the true needs for today's Marine Corp. My first request is the removal of this EIS. If after carefully considering all of its shortfalls you still believe expansion is necessary I implore you to expand East instead of West. While I believe this expansion is still a poor deployment of financial resources, the expansion East instead of West will minimize all of the other impacts the 29 Palms expansion will have.

Thank you again for your service.

Sincerely,

Mike Mundinger

Response to Comment N-04160 (Page 1 of 2):

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Comment ID: N-04160 (Page 2 of 2)

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

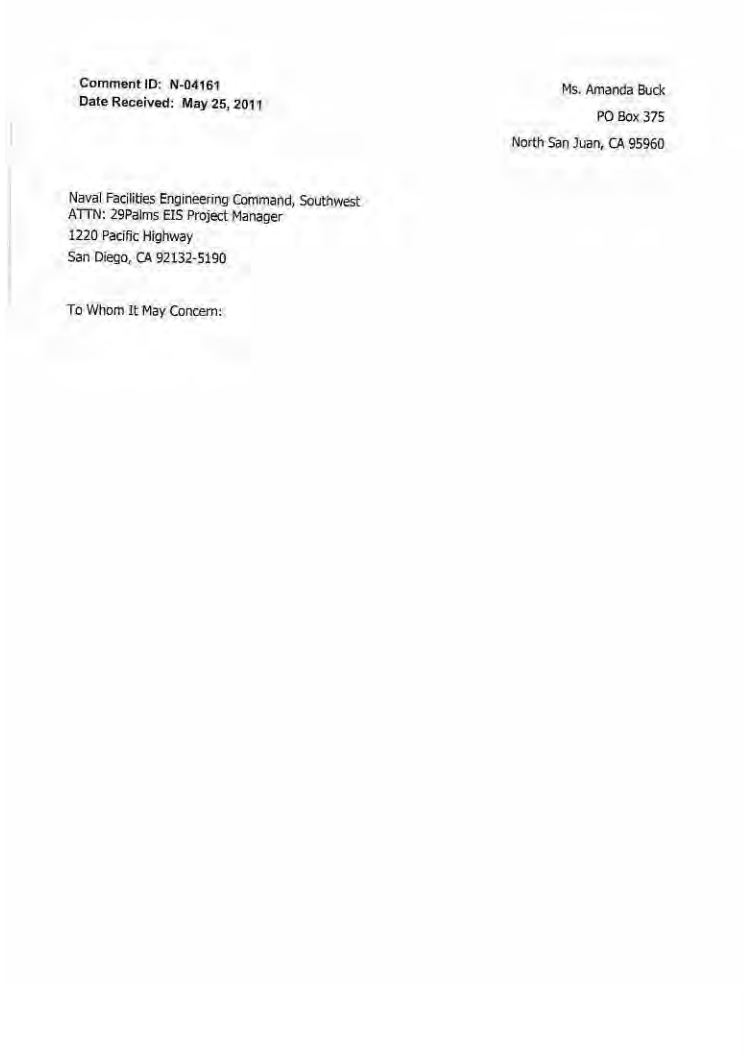
The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.



In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary. Thank you for taking the time to read my letter and my thoughts.

Sincerely,

Nick McMurray

To Whom It May Concern:

Response to Comment N-04162 (Page 1 of 2):

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Comment ID: N-04162 (Page 2 of 2)

Mr. Richard Crowe noted in his article "A Perspective on Desert Vehicle Recreation and the Proposed Expansion of the Marine Corps Air Ground Combat Training Center" that this current proposal is the crux of a very controversial, complicated, and long-time building situation.

"Recreation vehicle users (i.e., both people who drive dirt roads to get somewhere as well as motorcycle, ATV, and dune buggy riders who enjoy family fun and competitive racing in desert "open areas" like the Johnson Valley Open Area and the Imperial Sand Dunes) have seen an erosion of space and roads for their interests in the Desert since the 1930s. This is why they are so concerned with the proposed expansion of the Marine Corps Air Ground Combat Training Center into the Johnson Valley Open Area. In fact, vehicle use is at the very heart of a fight among competing interests and land uses on public lands that BLM has been dealing with for 40 years."

1. Until the 1930s one could take a vehicle just about anywhere a vehicle could go

2. 1930s: 2 national monuments are designated, Death Valley and Joshua Tree

3. 1940s saw the withdrawal of several large tracts of public lands for WWII and post-war military training, research and development, and testing. By 1945 approximately 25% of the Desert is off limit or severely restricted to recreation vehicles.

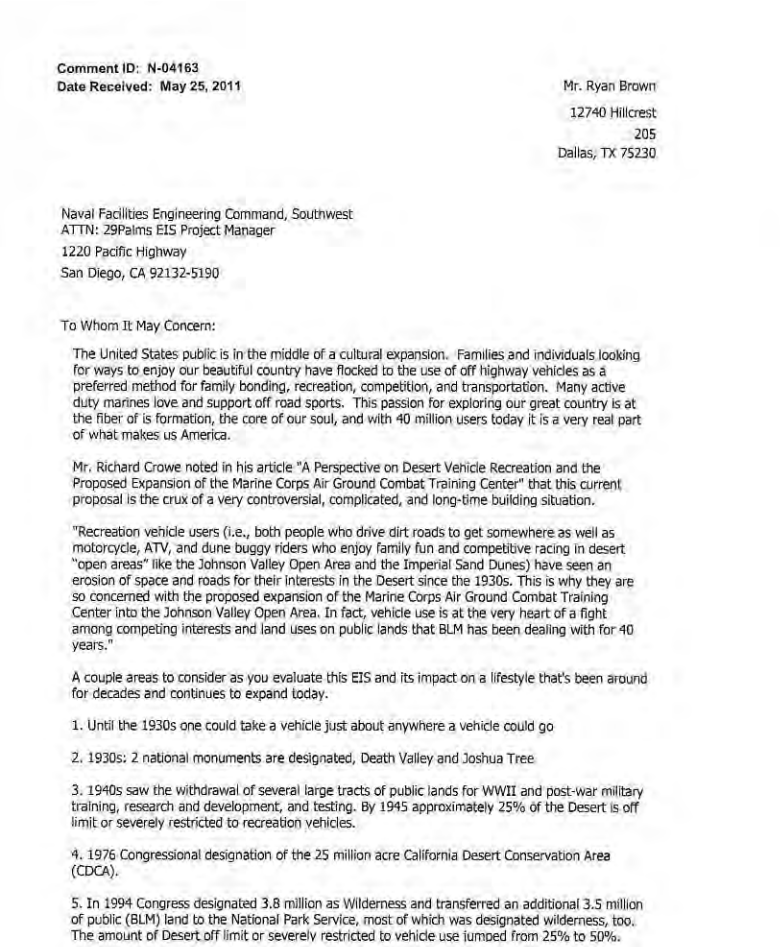
4. 1976 Congressional designation of the 25 million acre California Desert Conservation Area (CDCA).

5. In 1994 Congress designated 3.8 million as Wilderness and transferred an additional 3.5 million of public (BLM) land to the National Park Service, most of which was designated wilderness, too. The amount of Desert off limit or severely restricted to vehicle use jumped from 25% to 50%.

At the same time, half of the other 50% of the Desert is private land: off-limit to public use. AND, about half of the remaining 25% of the Desert that is not military, not wilderness, not parkland, and not private – i.e., not off limit for vehicle use - is affected by species and habitat issues and subject to further vehicle restrictions.

6. Six plan amendments due to threatened species have reduced the amount of open roads by 3,671 miles.

The cumulative effect on off-highway vehicle use is massive. The closure of another 422,000 miles will be catastrophic to our way of life. This is another 659 square miles of PREMIER OHV area. The closure of Johnson Valley OHV area is unacceptable. The Plan must be either withdrawn or revised to shift the Base Expansion east due to the massive cumulative effect it has on OHV use.



I love my freedom, and I respect the mission of the US Marine Corps, but enough is enough. I support the Marines, just not in Johnson Valley.

Sincerely,

Shawn Baker

Response to Comment N-04162 (Page 2 of 2):

Comment ID: N-04163 (Page 1 of 2)

Comment ID: N-04163

Mr. Ryan Brown
12740 Hillcrest
205
Dallas, TX 75230

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

The United States public is in the middle of a cultural expansion. Families and individuals looking for ways to enjoy our beautiful country have flocked to the use of off highway vehicles as a preferred method for family bonding, recreation, competition, and transportation. Many active duty marines love and support off road sports. This passion for exploring our great country is at the fiber of is formation, the core of our soul, and with 40 million users today it is a very real part of what makes us America.

Mr. Richard Crowe noted in his article "A Perspective on Desert Vehicle Recreation and the Proposed Expansion of the Marine Corps Air Ground Combat Training Center" that this current proposal is the crux of a very controversial, complicated, and long-time building situation.

"Recreation vehicle users (i.e., both people who drive dirt roads to get somewhere as well as motorcycle, ATV, and dune buggy riders who enjoy family fun and competitive racing in desert "open areas" like the Johnson Valley Open Area and the Imperial Sand Dunes) have seen an erosion of space and roads for their interests in the Desert since the 1930s. This is why they are so concerned with the proposed expansion of the Marine Corps Air Ground Combat Training Center into the Johnson Valley Open Area. In fact, vehicle use is at the very heart of a fight among competing interests and land uses on public lands that BLM has been dealing with for 40 years."

A couple areas to consider as you evaluate this EIS and its impact on a lifestyle that's been around for decades and continues to expand today.

1. Until the 1930s one could take a vehicle just about anywhere a vehicle could go

2. 1930s: 2 national monuments are designated, Death Valley and Joshua Tree

3. 1940s saw the withdrawal of several large tracts of public lands for WWII and post-war military training, research and development, and testing. By 1945 approximately 25% of the Desert is off limit or severely restricted to recreation vehicles.

4. 1976 Congressional designation of the 25 million acre California Desert Conservation Area (CDCA).

5. In 1994 Congress designated 3.8 million as Wilderness and transferred an additional 3.5 million of public (BLM) land to the National Park Service, most of which was designated wilderness, too. The amount of Desert off limit or severely restricted to vehicle use jumped from 25% to 50%.

Response to Comment N-04163 (Page 1 of 2):

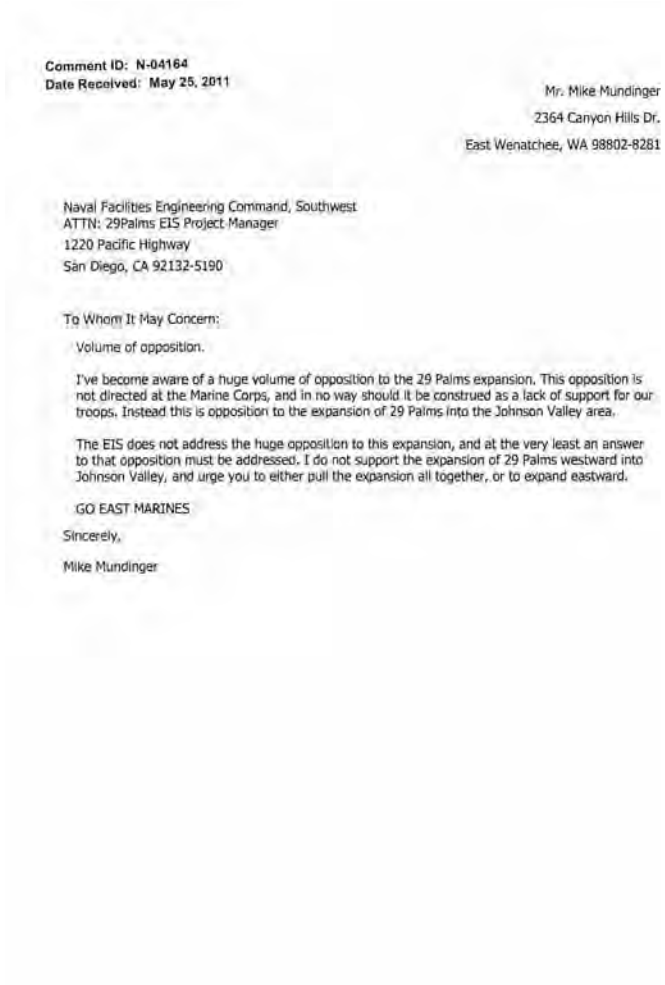
Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Comment ID: N-04163 (Page 2 of 2)

At the same time, half of the other 50% of the Desert is private land: off-limit to public use. AND, about half of the remaining 25% of the Desert that is not military, not wilderness, not parkland, and not private – i.e., not off limit for vehicle use - is affected by species and habitat issues and subject to further vehicle restrictions.

6. Six plan amendments due to threatened species have reduced the amount of open roads by 3,671 miles.

The cumulative effect on off-highway vehicle use is massive. It is unacceptable that these closures continue despite the growing number of Americans that love and enjoy the sport. The closure of another 422,000 miles will be catastrophic to our way of life. This is another 659 square miles of PREMIER OHV area. The closure of Johnson Valley OHV area is unacceptable. The Plan must be either withdrawn or revised to shift the Base Expansion east due to the massive cumulative effect it has on OHV use.



Please consider the huge impact on not only OHV users, but all citizens in the South West United States. Closure of this land should not be an option.

Sincerely,

Ryan Brown

To Whom It May Concern:

Volume of opposition.

I've become aware of a huge volume of opposition to the 29 Palms expansion. This opposition is not directed at the Marine Corps, and in no way should it be construed as a lack of support for our troops. Instead this is opposition to the expansion of 29 Palms into the Johnson Valley area.

The EIS does not address the huge opposition to this expansion, and at the very least an answer to that opposition must be addressed. I do not support the expansion of 29 Palms westward into Johnson Valley, and urge you to either pull the expansion all together, or to expand eastward.

GO EAST MARINES

Sincerely,

Mike Mundinger

Response to Comment N-04164

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

The last Quadrennial Defense Review, in 2010, was widely derided for failing to match priorities with resources, and for essentially endorsing each services' force size and equipment wish lists.

The DEIS fails to state how the expansion of 29 Palms meets any of today's Marine Corps' priorities.

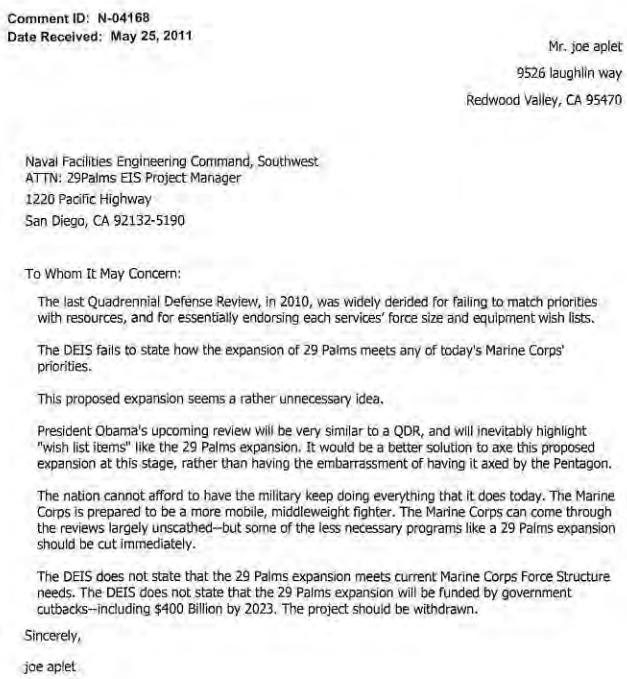
This proposed expansion seems to be a "wish list" item, rather than a priority item that will be upheld by the actual Force Structure.

President Obama's upcoming review will be very similar to a QDR, and will inevitably highlight "wish list items" like the 29 Palms expansion. It would be a better solution to axe this proposed expansion at this stage, rather than having the embarassment of having it axed by the Pentagon.

The nation cannot afford to have the military keep doing everything that it does today. The Marine Corps is prepared to be a more mobile, middleweight fighter. The Marine Corps can come through the reviews largely unscathed--but some of the less necessary programs like a 29 Palms expansion should be cut immediately.

The DEIS does not state that the 29 Palms expansion meets current Marine Corps Force Structure needs. The DEIS does not state that the 29 Palms expansion will be fundable given federal government cutbacks--including $400 Billion by 2023. The project should be withdrawn.

Sincerely,



Nick McMurray

Response to Comment N-04167:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

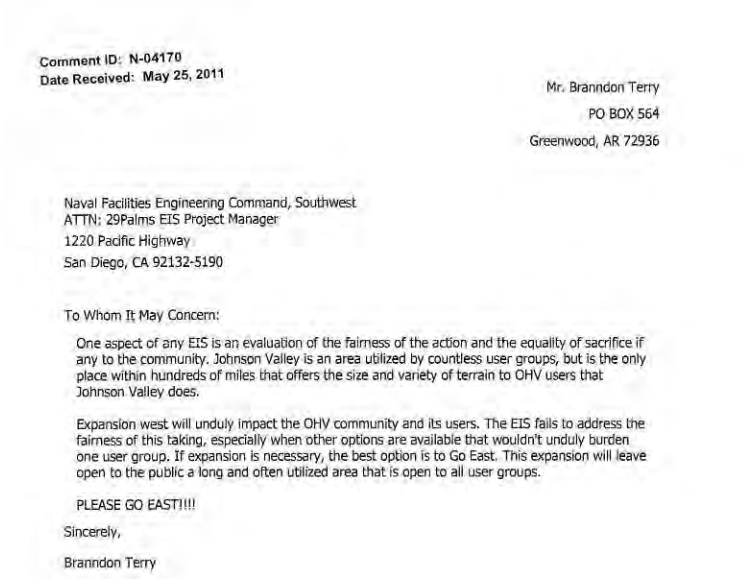
One aspect of any EIS is an evaluation of the fairness of the action and the equality of sacrifice if any to the community. Johnson Valley is an area utilized by countless user groups, but is the only place within hundreds of miles that offers the size and variety of terrain to OHV users that Johnson Valley does.

Expansion west will unduly impact the OHV community and its users. The EIS fails to address the fairness of this taking, especially when other options are available that wouldn't unduly burden one user group. If expansion is necessary, the best option is to Go East. This expansion will leave open to the public a long and often utilized area that is open to all user groups.

Go East Marines.

Sincerely,



Ryan Brown

Response to Comment N-04169:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

In a time when economic resources are scarce I believe our military still deserves the very best. There is no reason to short those that defend and protect the very freedoms we hold dear. Having said that, I also believe it is imperative to utilize every dollar in the most effective manner.

The current Force Structure Review Group's report,
"Reshaping America's Expeditionary Force in Readiness" dated March 14, 2011

http://www.marines.mil/unit/hqmc/cmc...11_ExecSum.PDF

Page 5 states that the "Marine Corps' force structure must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence." It further goes on to state that this presence and the assault echelons require two Marine Expeditionary Brigades.

Training three simultaneous MEB's, therefore, is not a wise deployment of financial reasons and not a valid reason to expand 29 Palms into Johnson Valley if the Marine Corps does not even intend to project three MEB's simultaneously.

If the Marines must train as they fight, a 29 Palms expansion is unnecessary. Please withdraw the proposal. The time for review of the public documents was very short, and there is a chance that I've missed something. While I believe this expansion is unnecessary if you must expand, Go EAST

Sincerely,

Ryan Brown

Response to Comment N-04174:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

I thank you for the opportunity to provide comments within the EIS for the 29 Palms expansion. While the time to comment was very short, and the method by which I could mail my comments was not included in the EIS, those are only two of the failures for this EIS.

1. The Marines basic "mission" has changed since the plans for expansion were made a VERY long time ago.
2. Our economy continues to struggle and even the experts say it could be another decade before we see true recovery.
3. The recreation lands of Johnson Valley generate revenue and taxes in a big way.
4. An expansion of 29 Palms Military Base will not replace the lost revenue and taxes if Johnson Valley recreation is cut even a little bit.
5. The Corps Failed to Analyze National Deficit Impact on Project Viability.
6. The Corps Failed to Analyze DOD Budget on this expansion.

This entire idea of expansion, especially into Johnson Valley, make zero sense financially and is irresponsible. Please save this money and provide better equipment for our Marines. If an expansion is truly necessary and by doing so we don't put our Marines in jeopardy, then expand East. Do not take the Johnson Valley area.

Sincerely,

Ryan Brown

Response to Comment N-04179 (Page 1 of 2):

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

Comment ID: N-04179 (Page 2 of 2)

Response to Comment N-04179 (Page 2 of 2):

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

To Whom It May Concern:

Regarding the expansion of 29 Palms Marine Base, please consider the following facts:
1. The Marines basic "mission" has changed since the plans for expansion were made a VERY long time ago.
2. Our economy continues to struggle and even the experts say it could be another decade before we see true recovery.
3. The recreation lands of Johnson Valley generate revenue and taxes in a big way.
4. An expansion of 29 Palms Military Base will not replace the lost revenue and taxes if Johnson Valley recreation is cut even a little bit.
5. The Corps Failed to Analyze National Deficit Impact on Project Viability.
6. The Corps Failed to Analyze DOD Budget on this expansion.
This entire idea of expansion, especially into Johnson Valley, make zero sense financially and is irresponsible, and quite possibly bordering on illegal. I am against this expansion.

Sincerely,

Billy Nickel

General Amos has noted the need for more Austerity in the Marine Corps--a reduction in footprint. In his Expeditionary Energy Strategy and Implementation plan

http://www.marines.mil/unit/hqmc/cmc...y_Strategy.pdf, Gen. Amos notes:

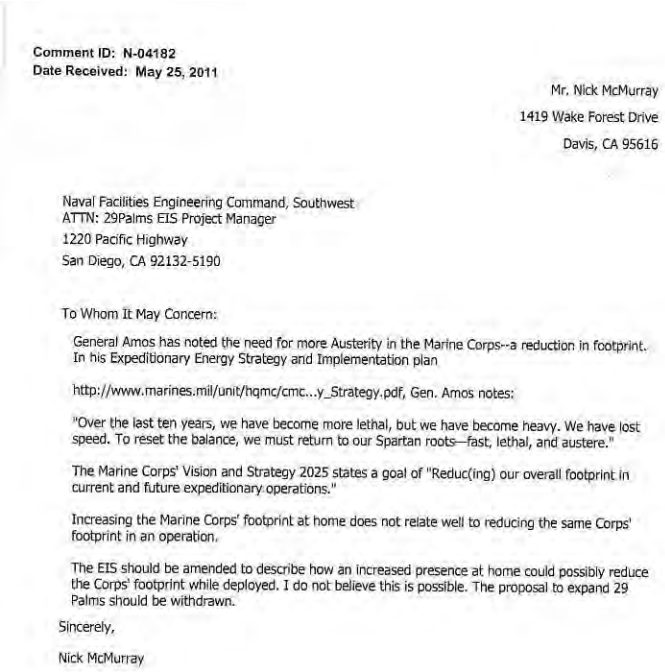
"Over the last ten years, we have become more lethal, but we have become heavy. We have lost speed. To reset the balance, we must return to our Spartan roots—fast, lethal, and austere."

The Marine Corps' Vision and Strategy 2025 states a goal of "Reduc(ing) our overall footprint in current and future expeditionary operations."

Increasing the Marine Corps' footprint at home does not relate well to reducing the same Corps' footprint in an operation.

The EIS should be amended to describe how an increased presence at home could possibly reduce the Corps' footprint while deployed. I do not believe this is possible. The proposal to expand 29 Palms should be withdrawn.

Sincerely,



Starr Penniman

To Whom It May Concern:

General Amos has pledged a reduction in energy use. In his Expeditionary Energy Strategy and Implementation plan, he notes:

"As a Corps, we have become more lethal, yet we have also become increasingly dependent on fossil fuel. Our growing demand for liquid logistics comes at a price. By tethering our operations to vulnerable supply lines, it degrades our expeditionary capabilities and ultimately puts Marines at risk. To maintain our lethal edge, we must change the way we use energy.

The current and future operating environment requires an expeditionary mindset geared toward increased efficiency and reduced consumption, which will make our forces lighter and faster. We will aggressively pursue innovative solutions to reduce energy demand in our platforms and systems, increase our self-sufficiency in our sustainment, and REDUCE OUR EXPEDITIONARY FOOTPRINT ON THE BATTLEFIELD (emphasis added). Transforming the way we use energy is essential to rebalance our Corps and prepare it for the future."

How will an increased training area reduce energy use?

Please amend the DEIS to show how increasing the size of 29 Palms will decrease fossil fuel use.

Sincerely,

Starr Penniman

Response to Comment N-04183:

Thank you for your comment. As discussed in Section 7.2 of the EIS, implementation of the proposed action would involve the consumption of fuel, oil, and lubricants for training activities. The energy consumed for training operations represents a permanent and non-renewable commitment of these resources. However, relatively small quantities of these types of resources would be required.

As indicated in Section 7.1 of the EIS, the Combat Center would complete and implement an Installation Energy and Sustainability Strategy (IESS) in accordance with EO 13423 (Strengthening Federal Environmental, Energy, and Transportation Management), EO 13514 (Federal Leadership in Environmental, Energy, and Economic Performance), Energy Independence and Security Act of 2007 (EISA), and Energy Policy Act of 2005 (EPACT 2005).

To Whom It May Concern:

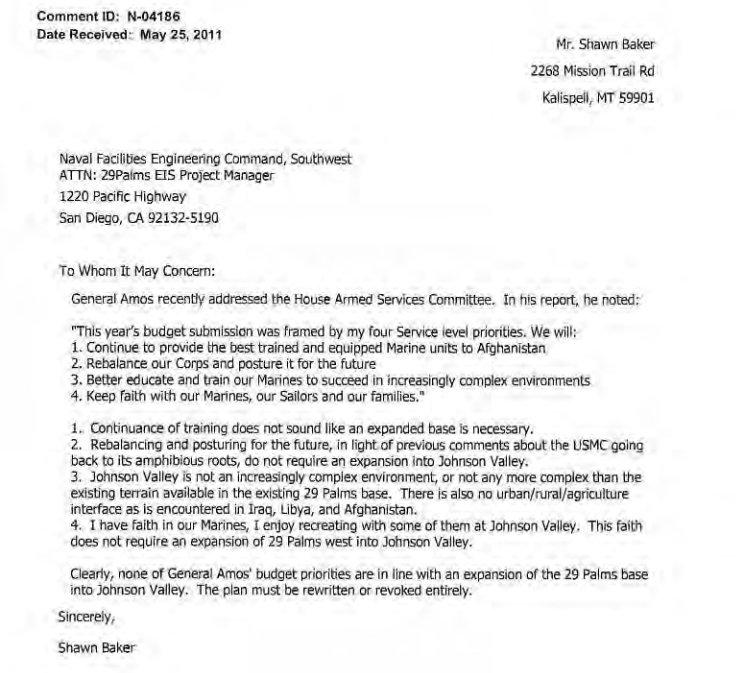
29 Palms is not a viable training area for today's Marines:

The USMC is to no longer be a second land army; Gen. Amos' goal is to get back to (our) amphibious roots, we've got to – and then all of a sudden people started using that language.

There is not too much in the way of amphibious terrain in Johnson Valley that I'm aware of.

The base expansion is little more than a land grab, predicated on obsolete training regimens. The EIS should be rewritten to consider proximity to amphibious terrain for realistic training. The plan and all Alternatives to expand into DRY Johnson Valley should be withdrawn.

Sincerely,



Shawn Baker

ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

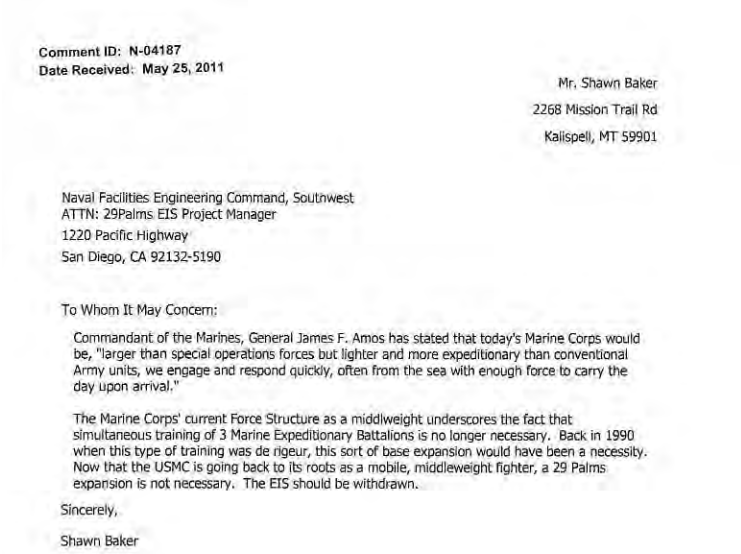
To Whom It May Concern:

General Amos recently addressed the House Armed Services Committee. In his report, he noted:

"This year's budget submission was framed by my four Service level priorities. We will:
1. Continue to provide the best trained and equipped Marine units to Afghanistan
2. Rebalance our Corps and posture it for the future
3. Better educate and train our Marines to succeed in increasingly complex environments
4. Keep faith with our Marines, our Sailors and our families."

1. Continuance of training does not sound like an expanded base is necessary.
2. Rebalancing and posturing for the future, in light of previous comments about the USMC going back to its amphibious roots, do not require an expansion into Johnson Valley.
3. Johnson Valley is not an increasingly complex environment, or not any more complex than the existing terrain available in the existing 29 Palms base. There is also no urban/rural/agriculture interface as is encountered in Iraq, Libya, and Afghanistan.
4. I have faith in our Marines, I enjoy recreating with some of them at Johnson Valley. This faith does not require an expansion of 29 Palms west into Johnson Valley.

Clearly, none of General Amos' budget priorities are in line with an expansion of the 29 Palms base into Johnson Valley. The plan must be rewritten or revoked entirely.



Sincerely,

Shawn Baker

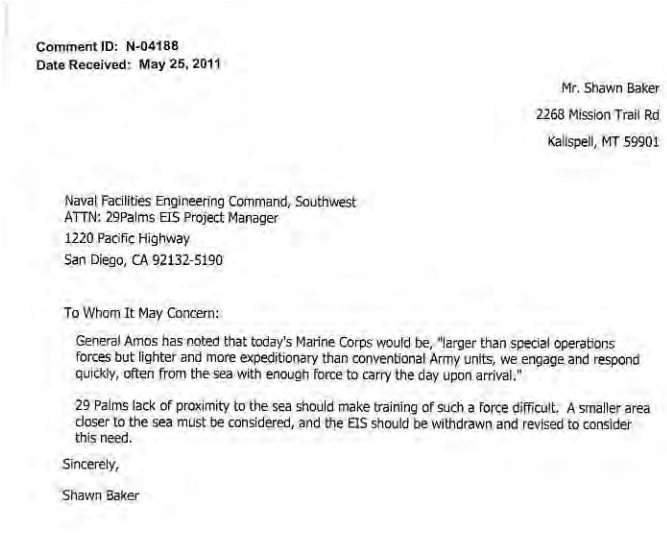
To Whom It May Concern:

Commandant of the Marines, General James F. Amos has stated that today's Marine Corps would be, "larger than special operations forces but lighter and more expeditionary than conventional Army units, we engage and respond quickly, often from the sea with enough force to carry the day upon arrival."

The Marine Corps' current Force Structure as a middleweight underscores the fact that simultaneous training of 3 Marine Expeditionary Battalions is no longer necessary. Back in 1990 when this type of training was de rigeur, this sort of base expansion would have been a necessity. Now that the USMC is going back to its roots as a mobile, middleweight fighter, a 29 Palms expansion is not necessary. The EIS should be withdrawn.

Sincerely,



Shawn Baker

To Whom It May Concern:

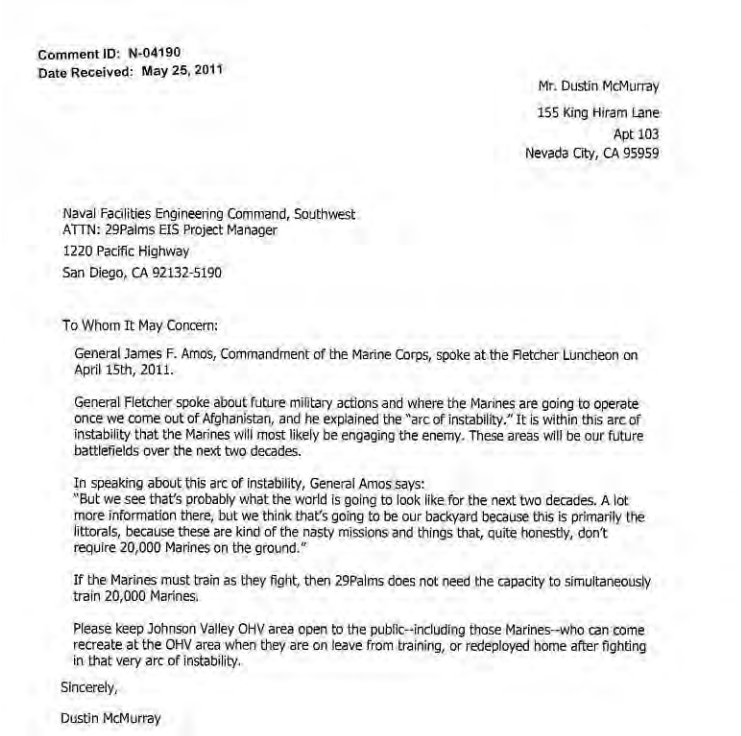
General Amos has noted that the USMC Expeditionary Energy Strategy spans the full spectrum of Marine operations, from Bases to Battlefield, because "...being truly expeditionary is based upon an institutional and individual mindset, not simply the ability to deploy overseas."

http://www.marines.mil/unit/hqmc/cmc...y_Strategy.pdf

"This strategy is holistic. Although it emphasizes our expeditionary operations, it spans our bases and stations and the intersection between these two mission sets. As the "fifth element" of the MAGTF, our bases,
stations, and Garrison Mobile Equipment (GME)provide essential support to sustain and enhance Marine Corps' combat readiness. And because our ethos is rooted in how Marines train and live, as well as in how they fight, what we do on our bases influences the expeditionary mindset."

Again, proof positive that the Marines do not need to expand at home (where they train and live) to learn how to be more agile on the battlefield. A low-energy expeditionary mindset should not allow a high-energy expansion and takeover of public land. The DEIS should be amended to correct this parallax or the proposal to expand 29 Palms should be withdrawn entirely.

Sincerely,



Heather McMurray

To Whom It May Concern:

General James F. Amos, Commandment of the Marine Corps, spoke at the Fletcher Luncheon on April 15th, 2011.

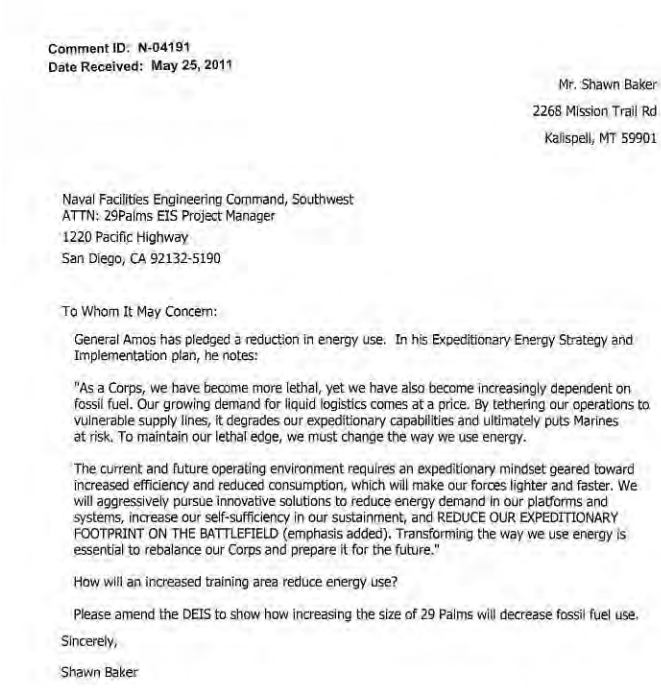
General Fletcher spoke about future military actions and where the Marines are going to operate once we come out of Afghanistan, and he explained the "arc of instability." It is within this arc of instability that the Marines will most likely be engaging the enemy. These areas will be our future battlefields over the next two decades.

In speaking about this arc of instability, General Amos says:
"But we see that's probably what the world is going to look like for the next two decades. A lot more information there, but we think that's going to be our backyard because this is primarily the littorals, because these are kind of the nasty missions and things that, quite honestly, don't require 20,000 Marines on the ground."

If the Marines must train as they fight, then 29Palms does not need the capacity to simultaneously train 20,000 Marines.

Please keep Johnson Valley OHV area open to the public--including those Marines--who can come recreate at the OHV area when they are on leave from training, or redeployed home after fighting in that very arc of instability.

Sincerely,



Dustin McMurray

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

General Amos has pledged a reduction in energy use. In his Expeditionary Energy Strategy and Implementation plan, he notes:

"As a Corps, we have become more lethal, yet we have also become increasingly dependent on fossil fuel. Our growing demand for liquid logistics comes at a price. By tethering our operations to vulnerable supply lines, it degrades our expeditionary capabilities and ultimately puts Marines at risk. To maintain our lethal edge, we must change the way we use energy.

The current and future operating environment requires an expeditionary mindset geared toward increased efficiency and reduced consumption, which will make our forces lighter and faster. We will aggressively pursue innovative solutions to reduce energy demand in our platforms and systems, increase our self-sufficiency in our sustainment, and REDUCE OUR EXPEDITIONARY FOOTPRINT ON THE BATTLEFIELD (emphasis added). Transforming the way we use energy is essential to rebalance our Corps and prepare it for the future."

How will an increased training area reduce energy use?

Please amend the DEIS to show how increasing the size of 29 Palms will decrease fossil fuel use.

Sincerely,

Shawn Baker

Response to Comment N-04191:

Thank you for your comment. As discussed in Section 7.2 of the EIS, implementation of the proposed action would involve the consumption of fuel, oil, and lubricants for training activities. The energy consumed for training operations represents a permanent and non-renewable commitment of these resources. However, relatively small quantities of these types of resources would be required.

As indicated in Section 7.1 of the EIS, the Combat Center would complete and implement an Installation Energy and Sustainability Strategy (IESS) in accordance with EO 13423 (Strengthening Federal Environmental, Energy, and Transportation Management), EO 13514 (Federal Leadership in Environmental, Energy, and Economic Performance), Energy Independence and Security Act of 2007 (EISA), and Energy Policy Act of 2005 (EPACT 2005).

San Diego, CA 92132-5190

To Whom It May Concern:

General Amos' 2011 report to Congress on the Posture of the US Marine Corps pledged "Your Marine Corps is not oblivious to the fiscal realities confronting our Nation. You have my promise that the Marine Corps will only ask for what it needs ... not what it might want. We will make the hard decisions before we come to Congress. We will redouble our attention towards our traditional 'culture of frugality' as we aim to be responsible stewards of scarce public funds."

In the current Budget reality, and with the current USMC Force Structure poised as a middleweight fighter, an Expansion of 29 Palms is both fiscally wasteful and strategically unnecessary. A larger Marine Corps might be able to use a larger 29 Palms. A leaner, meaner Marine Corps does not need a larger 29 Palms.

An expansion into Johnson Valley would fall into the category of "what the Marines might want, not what (they) need". The plan to expand into Johnson Valley must be withdrawn, or at a minimum the EIS revised to note the increased budgetary realities of an expanded base, and the training realities of a smaller, middleweight fighter USMC.

Sincerely,

Baily McMurray

Response to Comment N-04192:

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

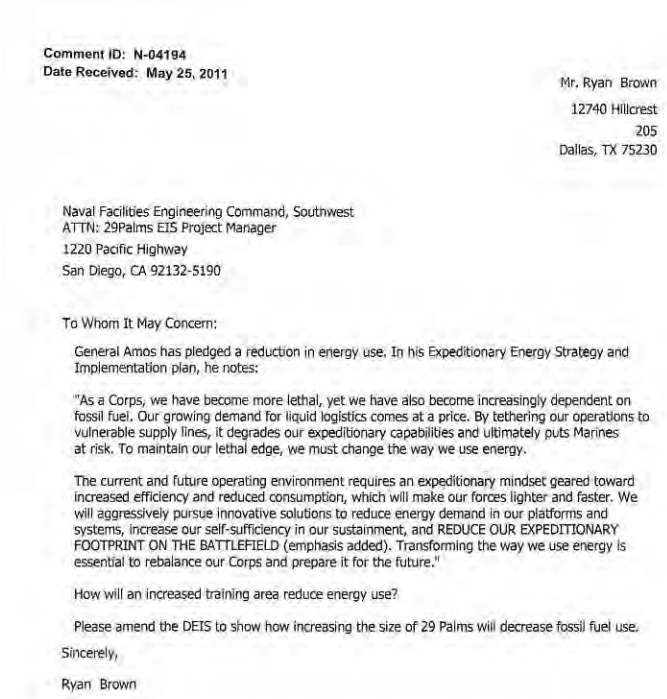
To Whom It May Concern:

At the Defense Writers Group Breakfast on February 18, 2011, General James F. Amos, Commandant of the Marine Corps stated,

"You know, we've got shortfalls in equipment at home station right now because we've taken that equipment and sent it to Afghanistan. You know, we've been at war for nine years. ...We're about 30-percent short at our home stations across the Marine Corps. So in other words, if you have – if you're supposed to have 10 of this vehicle, we've got seven. So we took that money, part of that $3.1 billion, moved it to the left and said, let's start buying up those other three."

With current budget shortfalls, the DEIS has failed to state how home station equipment can be brought up to prewar reserve levels while simultaneously expanding base size.



Sincerely,

Shawn Baker

Response to Comment N-04193:

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis. Ultimately, Congress will make the final decision about proceeding with the proposed action.

To Whom It May Concern:

General Amos has pledged a reduction in energy use. In his Expeditionary Energy Strategy and Implementation plan, he notes:

"As a Corps, we have become more lethal, yet we have also become increasingly dependent on fossil fuel. Our growing demand for liquid logistics comes at a price. By tethering our operations to vulnerable supply lines, it degrades our expeditionary capabilities and ultimately puts Marines at risk. To maintain our lethal edge, we must change the way we use energy.

The current and future operating environment requires an expeditionary mindset geared toward increased efficiency and reduced consumption, which will make our forces lighter and faster. We will aggressively pursue innovative solutions to reduce energy demand in our platforms and systems, increase our self-sufficiency in our sustainment, and REDUCE OUR EXPEDITIONARY FOOTPRINT ON THE BATTLEFIELD (emphasis added). Transforming the way we use energy is essential to rebalance our Corps and prepare it for the future."

How will an increased training area reduce energy use?

Please amend the DEIS to show how increasing the size of 29 Palms will decrease fossil fuel use.

Sincerely,

Ryan Brown

Response to Comment N-04194:

Thank you for your comment. As discussed in Section 7.2 of the EIS, implementation of the proposed action would involve the consumption of fuel, oil, and lubricants for training activities. The energy consumed for training operations represents a permanent and non-renewable commitment of these resources. However, relatively small quantities of these types of resources would be required.

As indicated in Section 7.1 of the EIS, the Combat Center would complete and implement an Installation Energy and Sustainability Strategy (IESS) in accordance with EO 13423 (Strengthening Federal Environmental, Energy, and Transportation Management), EO 13514 (Federal Leadership in Environmental, Energy, and Economic Performance), Energy Independence and Security Act of 2007 (EISA), and Energy Policy Act of 2005 (EPACT 2005).

To Whom It May Concern:

General Amos has noted that the USMC Expeditionary Energy Strategy spans the full spectrum of Marine operations, from Bases to Battlefield, because "...being truly expeditionary is based upon an institutional and individual mindset, not simply the ability to deploy overseas."

http://www.marines.mil/unit/hqmc/cmc/Documents/USMC_Expeditionary_Energy_Strategy.pdf

"This strategy is holistic. Although it emphasizes our expeditionary operations, it spans our bases and stations and the intersection between these two mission sets. As the "fifth element" of the MAGTF, our bases,
stations, and Garrison Mobile Equipment (GME)provide essential support to sustain and enhance Marine Corps' combat readiness. And because our ethos is rooted in how Marines train and live, as well as in how they fight, what we do on our bases influences the expeditionary mindset."

Again, proof positive that the Marines do not need to expand at home (where they train and live) to learn how to be more agile on the battlefield. A low-energy expeditionary mindset should not allow a high-energy expansion and takeover of public land. The DEIS should be amended to correct this parallax or the proposal to expand 29 Palms should be withdrawn entirely.

Sincerely,

Shawn Baker

To Whom It May Concern:

General Amos has noted the need for more Austerity in the Marine Corps--a reduction in footprint. In his Expeditionary Energy Strategy and Implementation plan

http://www.marines.mil/unit/hqmc/cmc/Documents/USMC_Expeditionary_Energy_Strategy.pdf, Gen. Amos notes:

"Over the last ten years, we have become more lethal, but we have become heavy. We have lost speed. To reset the balance, we must return to our Spartan roots—fast, lethal, and austere."

The Marine Corps' Vision and Strategy 2025 states a goal of "Reduc(ing) our overall footprint in current and future expeditionary operations."

Increasing the Marine Corps' footprint at home does not relate well to reducing the same Corps' footprint in an operation.

The EIS should be amended to describe how an increased presence at home could possibly reduce the Corps' footprint while deployed. I do not believe this is possible. The proposal to expand 29 Palms should be withdrawn.

Sincerely,

Shawn Baker

To Whom It May Concern:

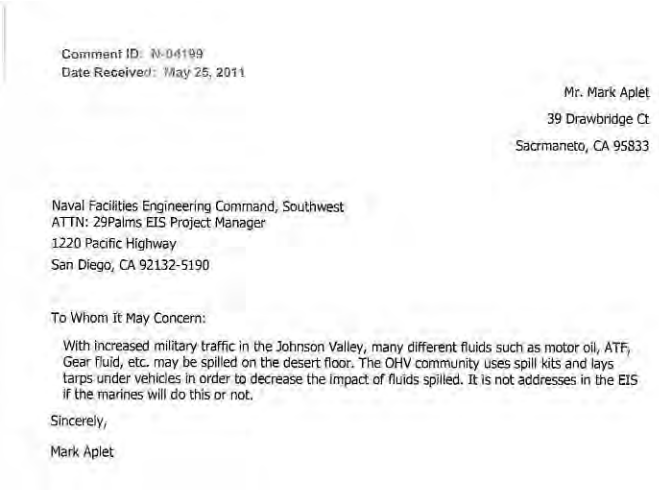
General Amos' 2011 report to Congress on the Posture of the US Marine Corps pledged "Your Marine Corps is not oblivious to the fiscal realities confronting our Nation. You have my promise that the Marine Corps will only ask for what it needs ... not what it might want. We will make the hard decisions before we come to Congress. We will redouble our attention towards our traditional 'culture of frugality' as we aim to be responsible stewards of scarce public funds."

In the current Budget reality, and with the current USMC Force Structure poised as a middleweight fighter, an Expansion of 29 Palms is both fiscally wasteful and strategically unnecessary. A larger Marine Corps might be able to use a larger 29 Palms. A leaner, meaner Marine Corps does not need a larger 29 Palms.

An expansion into Johnson Valley would fall into the category of "what the Marines might want, not what (they) need". The plan to expand into Johnson Valley must be withdrawn, or at a minimum the EIS revised to note the increased budgetary realities of an expanded base, and the training realities of a smaller, middleweight fighter USMC.



Sincerely,

Shawn Baker

To Whom It May Concern:

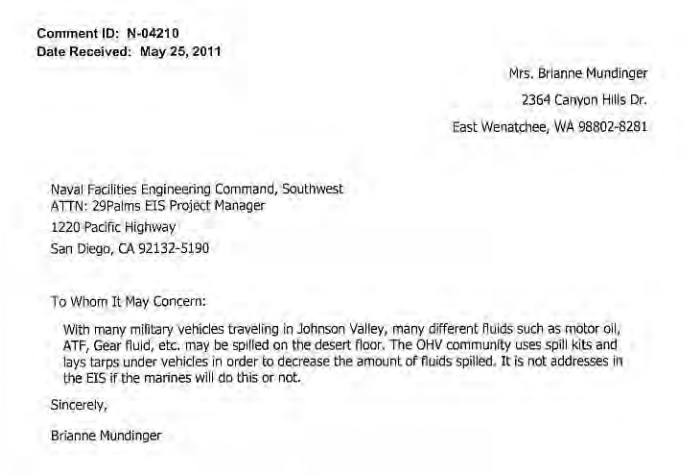
I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race. With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. Additionally, myself and many others actively participate in land clean-up events throughout the year to preserve the area. It is not addressed in the EIS if the marines will do this or not. As off road enthusiasts, we take a lot of pride in minimizing our environmental footprint in the areas that we use. I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great environmental impact as the impact on the Johnson Valley Off-Highway Vehicle Area.



Sincerely,

Chris Schutt

Response to Comment N-04211:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

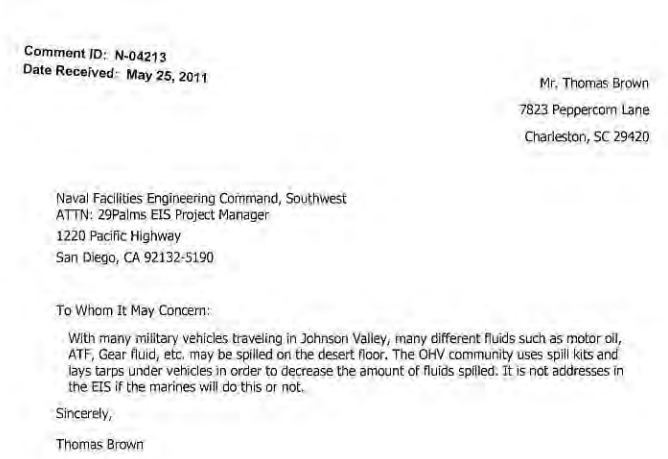
To Whom It May Concern:

With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.



Sincerely,

Susan Buckner

The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry

Response to Comment N-04220 (Page 1 of 2):

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion

Comment ID: N-04220 (Page 2 of 2)

A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!

Mike

Sincerely,

Mike Mundinger

Response to Comment N-04220 (Page 2 of 2):

task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?
I have only known about the offroad sport/industry for a little over 2 years,since I've been with my husband.In that short amount of time I have seen what kind of impact OHV park closures have on the local community,families,and anyone else who is into camping,hiking,wheeling,atvs,and anything else the area has to offer.
I have seen small family businesses close due to no customers,all caused by park closures.
I have seen some local wilderness torn up by illegal wheeling due to lack of public lands designated to OHV use.These are just a couple of MANY things affected by land closures.
From what I understand the marines have a choice of expanding to the east.I beg to you to please strongly look into this option.Johnson Valley is a HUGE attraction to thousand and thousands of people every year who travel across the country just to join in the activities and beauty that the area has to offer.

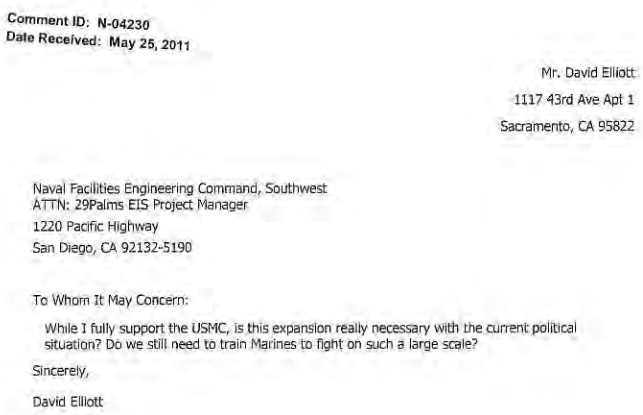
Sincerely,

Crystal Charpentier

Response to Comment N-04229 (Page 1 of 2):

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.



As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Comment ID: N-04229 (Page 2 of 2)

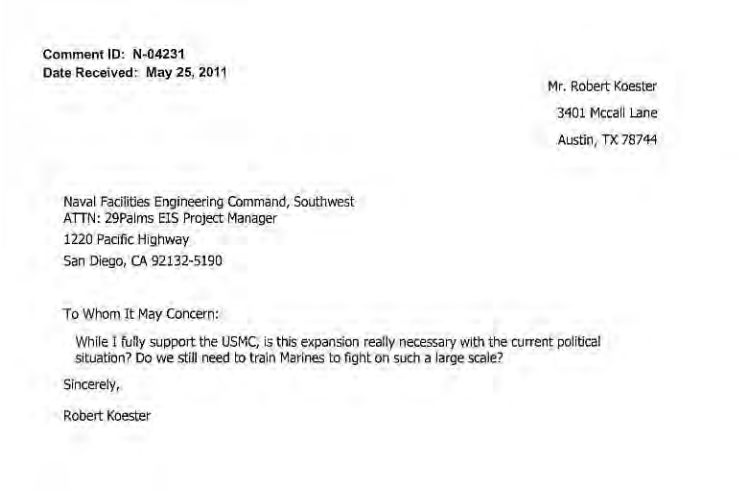
To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?



Sincerely,

David Elliott

Response to Comment N-04230:

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

To Whom It May Concern:

While I fully support the USMC, is this expansion really necessary with the current political situation? Do we still need to train Marines to fight on such a large scale?

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor

Response to Comment N-04245 (Page 1 of 2):

Thank you for your comment. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

Comment ID: N-04245 (Page 2 of 2)

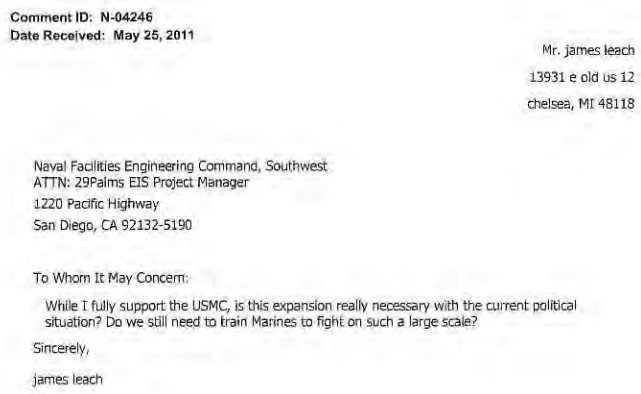
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!



Mike

Sincerely,

Mike Mundinger

To Whom It May Concern:

In the planning of the expansion into Johnson Valley, the Marine Corps failed to take into consideration all the variables. The DOD budget and Nation Deficit impact on Project are but two of these considerations not taken into account.
It would be best if the expansion into Johnson Valley was rejected at this time until the plan and all its subsequent impacts is fully studied.

Sincerely,

Richard Wilson

Response to Comment N-04253:

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

To Whom It May Concern:

I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

I have not seen evidence that the Corps has adequately analyzed the DOD Budget and National Deficit Impact on the Project Viability of taking over the Johnson Valley area.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.

Sincerely,

Chris Schutt

To Whom It May Concern:

The Corps Failed to Analyze DOD Budget and National Deficit Impact on Project Viability.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons

Response to Comment N-04267 (Page 1 of 2):

Thank you for your comment. Consideration of indirect effects of the Proposed Action on the DoD budget and the National Deficit are outside the scope of this EIS analysis.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action.

Comment ID: N-04267 (Page 2 of 2)

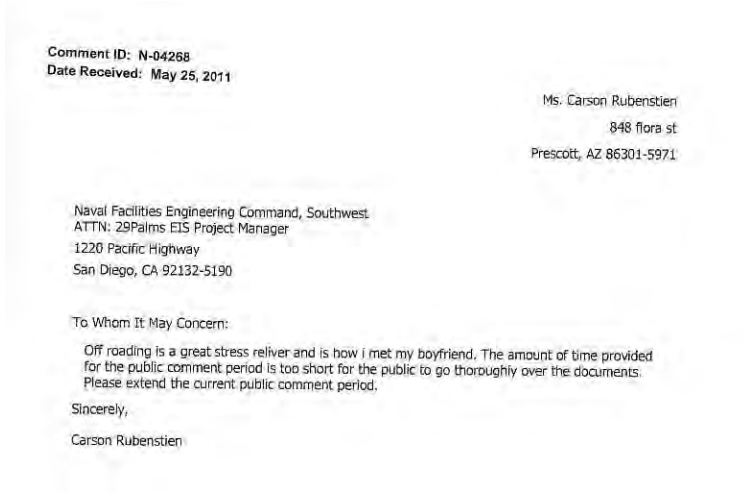
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!



Mike

Sincerely,

Mike Mundinger

Carson Rubenstien

Response to Comment N-04268:

Thank you for your comment. The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

To Whom It May Concern:

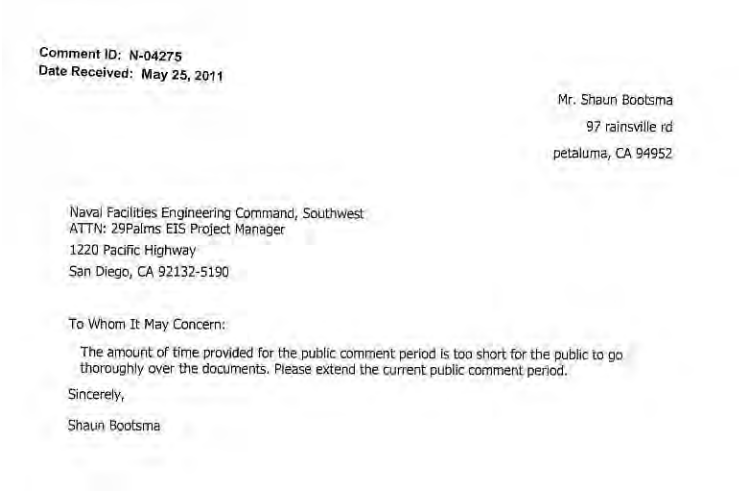
With many military vehicles traveling in Johnson Valley, many different fluids such as motor oil, ATF, Gear fluid, etc. may be spilled on the desert floor. The OHV community uses spill kits and lays tarps under vehicles in order to decrease the amount of fluids spilled. It is not addresses in the EIS if the marines will do this or not.



Sincerely,

Kenneth Stewart

Response to Comment N-04274:

Thank you for your comment. The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

The Marine Corps has kept the public informed as required by NEPA, including holding public scoping meetings before preparation of the Draft EIS, additional public meetings during the public review period for the Draft EIS, and encouraging the public to comment on the Draft EIS. In addition, the Marine Corps provided a 90-day public comment period for the Draft EIS, twice the minimum duration required by NEPA. The Marine Corps took additional steps to make the document publicly accessible for review and comment (e.g., project website, mailings, press releases, etc.). The Marine Corps has proactively reached out to interested stakeholders to ensure that their concerns were identified.

San Diego, CA 92132-5190

To Whom It May Concern:

Off roading is a great stress reliver and is how i met my boyfriend. With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Sincerely,

Carson Rubenstien

Response to Comment N-04288:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

San Diego, CA 92132-5190

To Whom It May Concern:

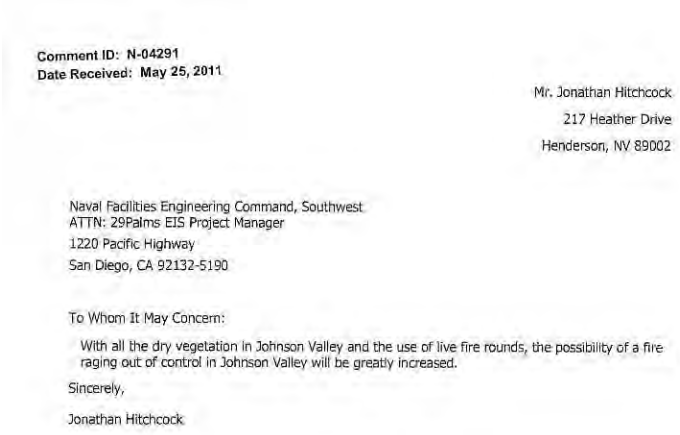
As the Marine Corp considers expansion into Johnson Valley, the concern over fire should be taken into account. With the abundance of dry vegetation in Johnson Valley, the risk of raging fires is a real possibility. As they will be using live fire rounds, these rounds have the potential of starting wild fires that may rage out of control.
I would like to request that the Marine Corp seriously consider other alternatives to the expansion West into Johnson Valley.



Sincerely,

Richard Wilson

Response to Comment N-04290:

To Whom It May Concern:

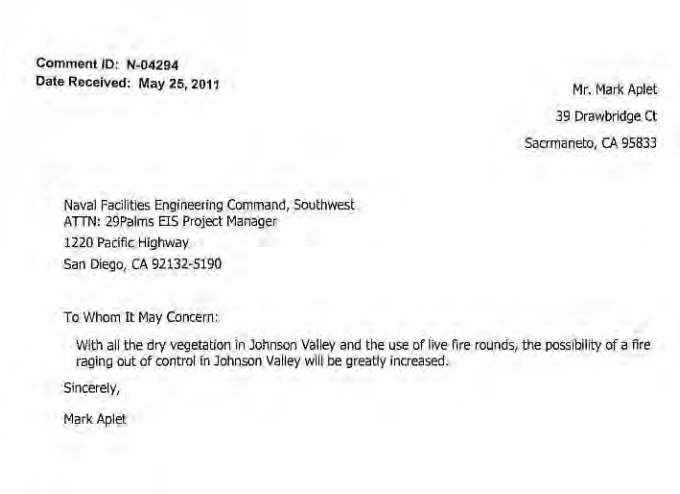
I have only known about the offroad sport/industry for a little over 2 years,since I've been with my husband.In that short amount of time I have seen what kind of impact OHV park closures have on the local community,families,and anyone else who is into camping,hiking,wheeling,atvs,and anything else the area has to offer.
I have seen small family businesses close due to no customers,all caused by park closures.
I have seen some local wilderness torn up by illegal wheeling due to lack of public lands designated to OHV use.These are just a couple of MANY things affected by land closures.
From what I understand the marines have a choice of expanding to the east.I beg to you to please strongly look into this option.Johnson Valley is a HUGE attraction to thousand and thousands of people every year who travel across the country just to join in the activities and beauty that the area has to offer.

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

Sincerely,



Crystal Charpentier

Response to Comment N-04293:

Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (refer to Section 4.3 of the EIS). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses and direct regional impacts from lost sales and tax revenue related to reduced recreational spending.

As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. To Whom It May Concern:

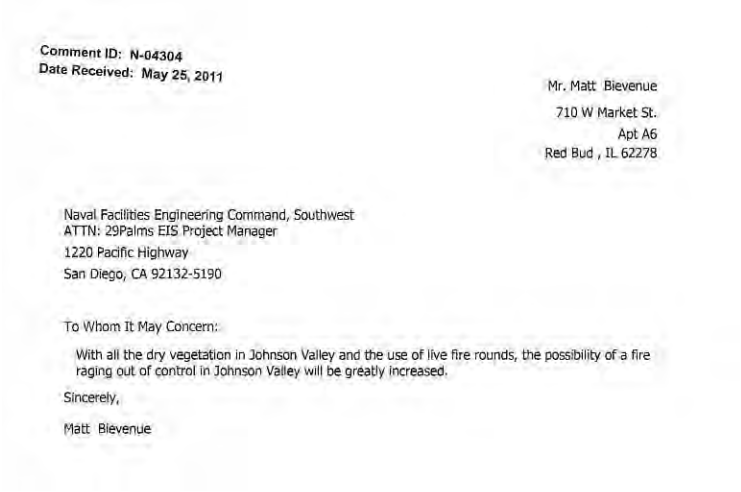
I love to ride my dirt bike all over and see the beautiful land open to the public. It is what make america so great. With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.



Sincerely,

lauren goldenstien

Response to Comment N-04303:

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

To Whom It May Concern:

With all the dry vegetation in Johnson Valley and the use of live fire rounds, the possibility of a fire raging out of control in Johnson Valley will be greatly increased.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence. "

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery
A 20% reduction in Armor

Response to Comment N-04307 (Page 1 of 2):

Thank you for your comment. As described in Section 4.4 of the EIS, the environment within the acquisition study areas is similar to that of the existing Combat Center, where wildland fires have not posed a substantial problem due to infrequent occurrence, timely emergency response, low levels of fuel, and strict use of Best Management Practices. Existing emergency response procedures would be applied to acquired land areas. In addition, current procedures for fire management and response contained in the Integrated Natural Resources Management Plan would be extended to any acquired lands.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Comment ID: N-04307 (Page 2 of 2)

A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!

Mike

Sincerely,

Mike Mundinger

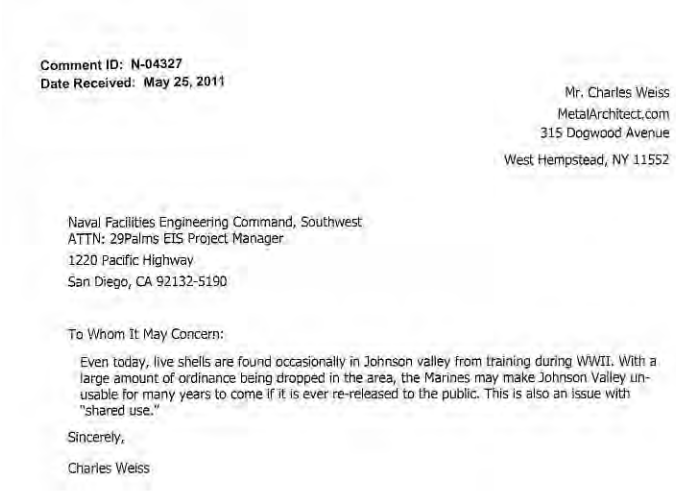
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!



Mike

Sincerely,

Mike Mundinger

To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

Sincerely,

Charles Weiss

Response to Comment N-04327:

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

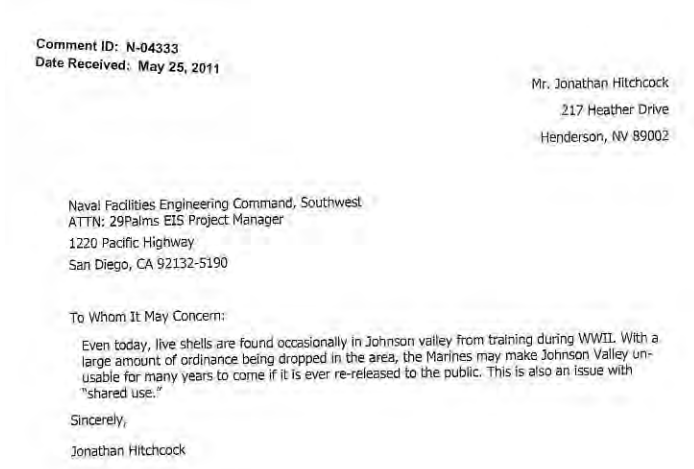
Even today, live shells are found occasionally in Johnson valley from training that was done during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley un-usable for many years to come if it is ever re-released to the public. This is also an issue with "shared use." Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public and expose them to an increased potential danger from ordinance.

Sincerely,



Tyler DeSpain

Response to Comment N-04332:

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

This is also an issue with "shared use."
I have only known about the offroad sport/industry for a little over 2 years,since I've been with my husband.In that short amount of time I have seen what kind of impact OHV park closures have on the local community,families,and anyone else who is into camping,hiking,wheeling,atvs,and anything else the area has to offer.
I have seen small family businesses close due to no customers,all caused by park closures.
I have seen some local wilderness torn up by illegal wheeling due to lack of public lands designated to OHV use.These are just a couple of MANY things affected by land closures.
From what I understand the marines have a choice of expanding to the east.I beg to you to please strongly look into this option.Johnson Valley is a HUGE attraction to thousand and thousands of people every year who travel across the country just to join in the activities and beauty that the area has to offer.

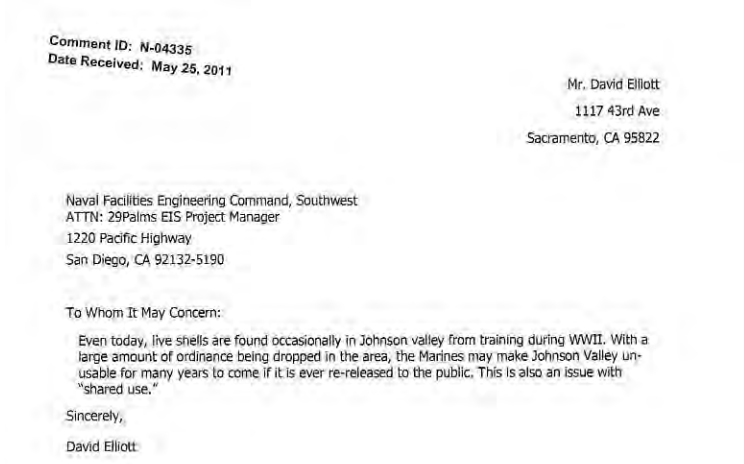
Sincerely,

Crystal Charpentier

Response to Comment N-04334 (Page 1 of 2):

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.



As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Comment ID: N-04334 (Page 2 of 2)

Response to Comment N-04334 (Page 2 of 2):

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

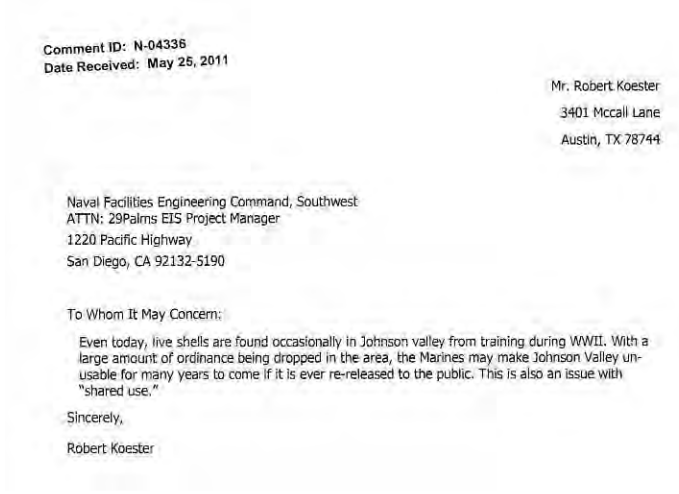
To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."



Sincerely,

joe aplet

Response to Comment N-04347:

To Whom It May Concern:

Even today, live shells are found occasionally in Johnson valley from training during WWII. With a large amount of ordinance being dropped in the area, the Marines may make Johnson Valley unusable for many years to come if it is ever re-released to the public. This is also an issue with "shared use."

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry

Response to Comment N-04348 (Page 1 of 2):

Thank you for your comment. As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Comment ID: N-04348 (Page 2 of 2)

A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

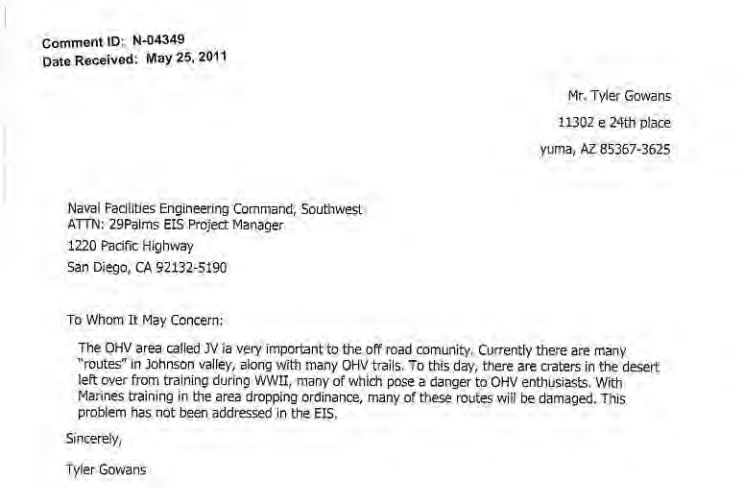
Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!

Mike



Sincerely,

Mike Mundinger

Response to Comment N-04348 (Page 2 of 2):

Thank you for your comment. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

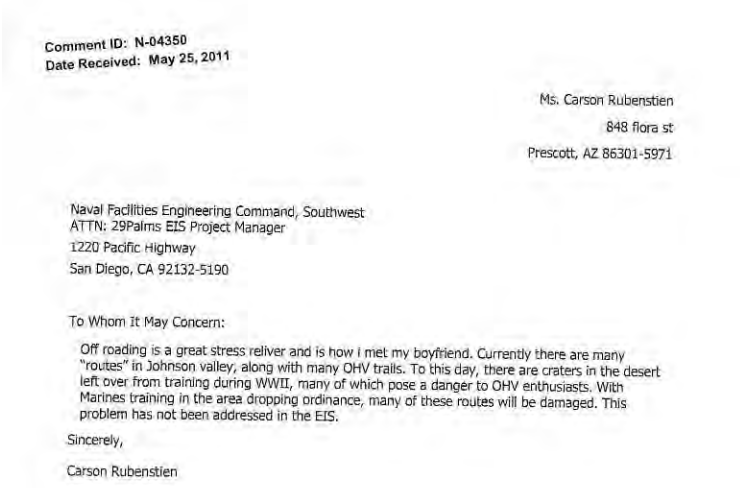
To Whom It May Concern:

The OHV area called JV ia very important to the off road comunity. Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.



Sincerely,

Tyler Gowans

Response to Comment N-04349:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

To Whom It May Concern:

I have only known about the offroad sport/industry for a little over 2 years,since I've been with my husband.In that short amount of time I have seen what kind of impact OHV park closures have on the local community,families,and anyone else who is into camping,hiking,wheeling,atvs,and anything else the area has to offer.
I have seen small family businesses close due to no customers,all caused by park closures.
I have seen some local wilderness torn up by illegal wheeling due to lack of public lands designated to OHV use.These are just a couple of MANY things affected by land closures.
From what I understand the marines have a choice of expanding to the east.I beg to you to please strongly look into this option.Johnson Valley is a HUGE attraction to thousand and thousands of people every year who travel across the country just to join in the activities and beauty that the area has to offer.
Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

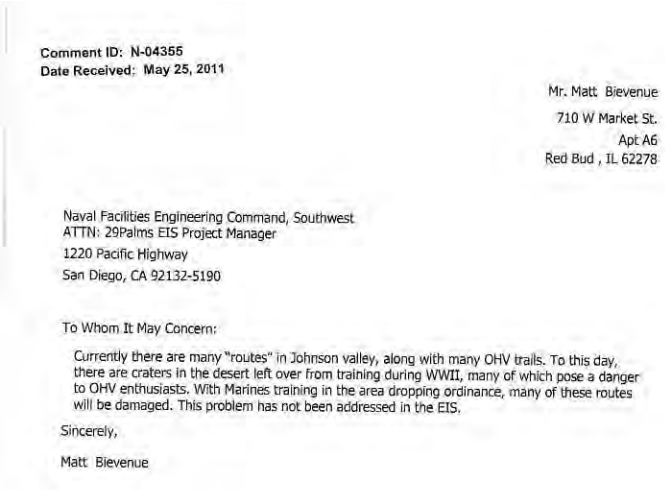
Crystal Charpentier

Response to Comment N-04354:



Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

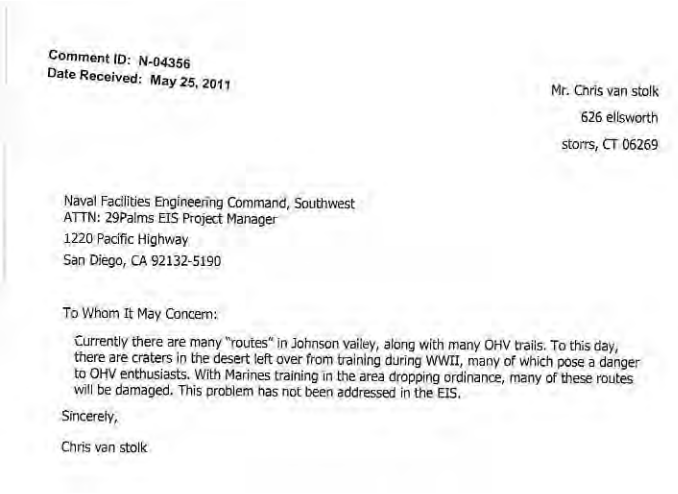
San Diego, CA 92132-5190

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.



Sincerely,

Robert Koester

Response to Comment N-04365:

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

To Whom It May Concern:

Currently there are many "routes" in Johnson valley, along with many OHV trails. To this day, there are craters in the desert left over from training during WWII, many of which pose a danger to OHV enthusiasts. With Marines training in the area dropping ordinance, many of these routes will be damaged. This problem has not been addressed in the EIS.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry

Response to Comment N-04366 (Page 1 of 2):

Thank you for your comment. As described in Section 4.12 of the EIS, the same programs and procedures that apply to current training activities to avoid and minimize impacts to soils at the Combat Center (e.g., tank traps, foxholes, trenches, and obstacles would be filled and graded when training exercises are completed) would be extended to any lands acquired under the proposed action. In addition, the Marine Corps proposed several measures that would be implemented under Alternative 4, 5, or 6 to prepare the Restricted Public Access Area for public use (refer to Section 2.5 of the EIS).

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Comment ID: N-04366 (Page 2 of 2)

A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!

Mike

Sincerely,

Mike Mundinger

To Whom It May Concern:

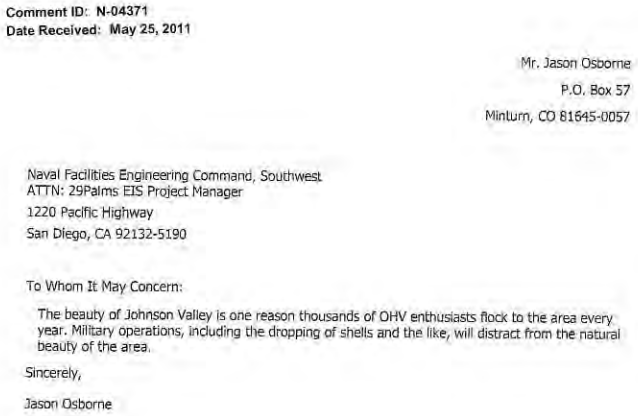
The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area. Previous military use is already apparent in the area. If the military continues to destroy the natural environment in the area it would be a shame. It would also not allow the area to reopen for OHV use after the military is finished with it due to the effects of military activities.

Sincerely,



Peter Anacabe

Response to Comment N-04370:

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

As outlined in Section 3.4, Combat Center Order 3500.4h SOP for Range/Training Area and Airspace provides guidance for training range operations, which includes routine range sweeps to remove safety hazards and range clearance operations following every exercise. The Marine Corps would continue these same procedures on any acquired land area. In addition, the Marine Corps proposed several measures (such as use of non dud-producing ordnance, range weep, and range clearance) that would be implemented under Alternatives 4, 5 or 6 that would allow the Restricted Public Access Area to be available for public use (refer to Section 2.5.3 of the EIS).

To Whom It May Concern:

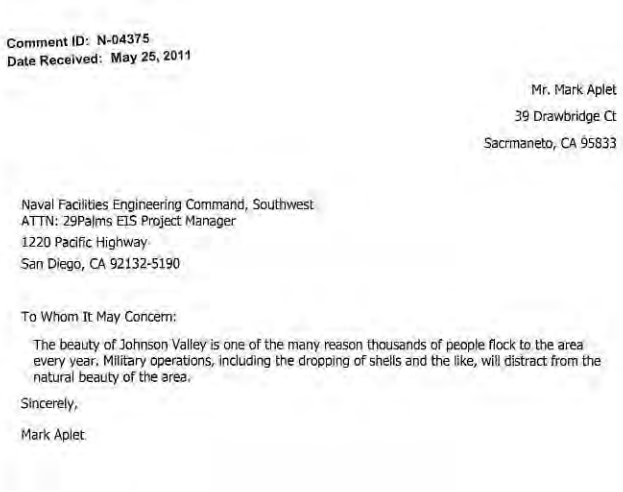
I have only known about the offroad sport/industry for a little over 2 years,since I've been with my husband.In that short amount of time I have seen what kind of impact OHV park closures have on the local community,families,and anyone else who is into camping,hiking,wheeling,atvs,and anything else the area has to offer.
I have seen small family businesses close due to no customers,all caused by park closures.
I have seen some local wilderness torn up by illegal wheeling due to lack of public lands designated to OHV use.These are just a couple of MANY things affected by land closures.
From what I understand the marines have a choice of expanding to the east.I beg to you to please strongly look into this option.Johnson Valley is a HUGE attraction to thousand and thousands of people every year who travel across the country just to join in the activities and beauty that the area has to offer.

beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.

Sincerely,

Crystal Charpentier

Response to Comment N-04374:



Thank you for your comment. The EIS evaluates socioeconomic impacts under each of the action alternatives (see Section 4.3). As noted in the EIS, there is expected to be a direct economic impact to individual small businesses that are dependent on limited recreational visitor spending and direct regional impacts from lost sales and tax revenue related to reduced recreational and film industry spending.

As discussed in the EIS, implementation of the proposed action is likely to result in an increase in illegal riding in the form of trespass on BLM, state, or private lands (refer to Section 4.2). The potential for such illegal riding has been considered in the EIS; including potential adverse impacts on the Desert Tortoise (see Section 4.10). The EIS also evaluates several special conservation measures (refer to Section 4.2.2.1) to reduce these potentially significant impacts. Additional information regarding the potential for illegal OHV use has been added to Section 4.2.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

The beauty of Johnson Valley is one reason thousands of OHV enthusiasts flock to the area every year. Military operations, including the dropping of shells and the like, will distract from the natural beauty of the area.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence. "

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry
A 20% reduction in cannon artillery

Response to Comment N-04388 (Page 1 of 2):

Thank you for your comment. The EIS evaluates visual impacts under each of the action alternatives (refer to Section 4.5 of the EIS) and acknowledges the impact to viewsheds in the Johnson Valley OHV area. As noted in the EIS, there would be less than significant impacts to visual resources for any alternative selected.

As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a current Marine Corps training requirement. In addition to the high deployment tempo in Afghanistan and Iraq, the Marine Corps must maintain high proficiency for other vital Marine Corps missions, including combined arms maneuver at the MEB level. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces. Currently, the Combat Center can only accommodate live-fire and maneuver training for up to two battalion task forces. Additional land area is needed to ensure adequate separation distances for operation of the three battalions required for MEB-sized training.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

Comment ID: N-04388 (Page 2 of 2)

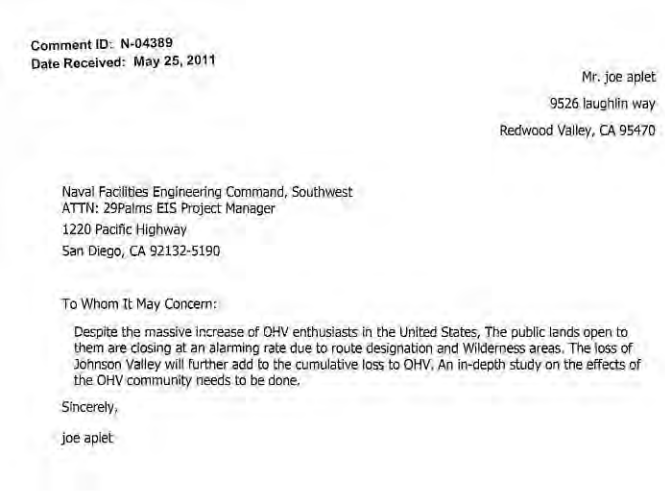
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!



Mike

Sincerely,

Mike Mundinger

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

Sincerely,

joe aplet

Response to Comment N-04389:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

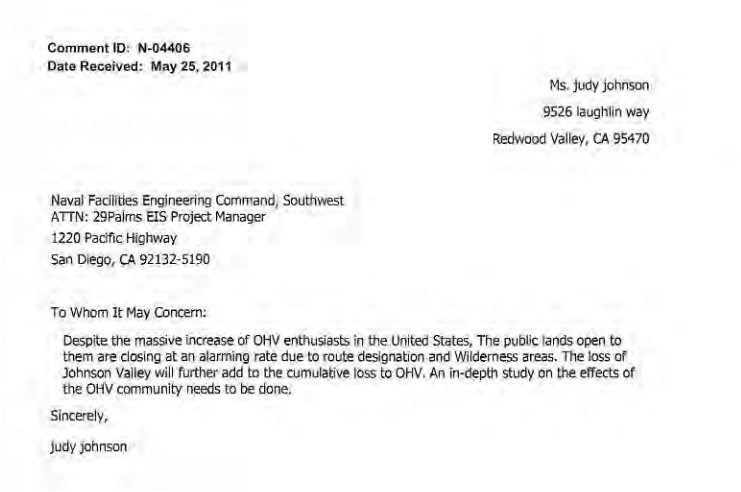
I have been following the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions mainly because Johnson Valley is known throughout the world as THE prime off-highway area - home to the famed King of the Hammers race and YEARS of other important events.

Despite the massive increase of OHV enthusiasts in the United States, the public lands that are open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley - a premier location - will further add to the cumulative loss to OHV users without a suitable replacement. An in-depth study on the effects of the closure to the OHV community needs to be done. Johnson Valley is SACRED GROUND to our sport and our way of life; please do not take it from us!

I do understand the need for training areas for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.



Sincerely,

Chris Schutt

San Diego, CA 92132-5190

To Whom It May Concern:

Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done. It seems every day more and more trails are being taken away, and its not fair to us taxpaying citizens that we don't get the opportuntiy to use the publicly funded lands.

Sincerely,

Nicholas Pearl

Response to Comment N-04411:

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

To Whom It May Concern:

I strongly support our Marines but find it terrible to thing that the personal freedoms they fight for may cause me to lose the freedom I have to recreate in JV OHV area.
Despite the massive increase of OHV enthusiasts in the United States, The public lands open to them are closing at an alarming rate due to route designation and Wilderness areas. The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done in order to fully understand the impact this loss would have.
Please look elsewhere and leave this public land for use by the public.

Sincerely,

Brad Buter

The loss of Johnson Valley will further add to the cumulative loss to OHV. An in-depth study on the effects of the OHV community needs to be done.

First I must begin by thanking the Marine Corps for their service to our country.

The executive summary of the DEIS on the Expansion of 29 Palms states that the Marine Corps has a requirement to provide sustained, combined-arms, live-fire, and maneuver training for a Marine Expeditionary Brigade sized Air Ground Task Force, and the existing facilities are inadequate.

However, I have found many current documents from the Marine Corps stating that the role of the Marine Corps is changing. Defense Secretary Robert M. Gates is even quoted saying, "The nation does not need a second land army, but rather forces that can deploy quickly and sustain themselves for a short period of time."

In the fall of 2010, the Marine Corps conducted a Force Structure Review (FSR) to evaluate and refine the organization, posture and capabilities required of America's Expeditionary Force in Readiness in a post Operation Enduring Freedom security environment.

In a document dated March 14th, 2010, entitled "Reshaping America's Expeditionary Force in Readiness, Report of the 2010 Marine Corps Force Structure Review Group" it clearly states that the 21st century Marine Corps force structure "must provide a strategically mobile, middleweight force optimized for rapid crisis response and forward presence."

The document further states that the Marine Corps will "Accept a degree of risk by reducing our active component capacity for conducting multiple, major sustained operations ashore."

The report states that the Marine Corps will be reshaped by reducing the end strength of the active component of the Marine Corps from 202,000 to approximately 186,800 following the completion of Marine Corps operations in Afghanistan.

This works out to:

A 13% reduction in ground combat forces
An 11% reduction in Infantry

Response to Comment N-04424 (Page 1 of 2):

Thank you for your comment. The Marine Corps understands the trend in availability of OHV land and has considered the loss of OHV land over time in Chapter 5 under cumulative impacts to Recreation (see Section 5.4.2 of the EIS). The EIS finds that the loss of availability of OHV land would be a significant impact under the proposed action as well as a significant cumulative impact.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. As described in Section 1.3 of the EIS, the purpose of the proposed action is to fulfill a Marine Corps training requirement. In November 2006, the Marine Corps validated the need to establish a large-scale training area for live fire and maneuver training of a Marine Expeditionary Brigade (MEB) composed of three battalion task forces.

Comment ID: N-04424 (Page 2 of 2)

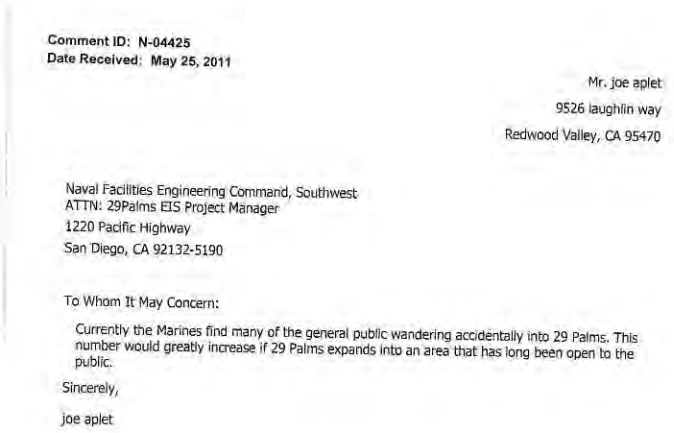
A 20% reduction in cannon artillery
A 20% reduction in Armor
A 16% reduction in fixed wing tactical aviation squadrons
A 9% reduction in logistics
A 7% reduction in Marines assigned to non-operational billets
And a 13% reduction in the civilian workforce.

Page four of the DEIS clearly states that the training requirement put forward as the reasoning to expand 29 Palms comes from a Marine strategy put forward in the year 2000.

With this new strategy and re-vamping of the Marine Corps from the 2010 Marine Corps Force Structure Review group, the entire document must be discarded as it is based on outdated decisions and information.

In summary: in light of the changes in today's Marine Corps, the expansion of 29 Palms in not necessary.

Marines-Thank You but Please go East!



Mike

Sincerely,

Mike Mundinger

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

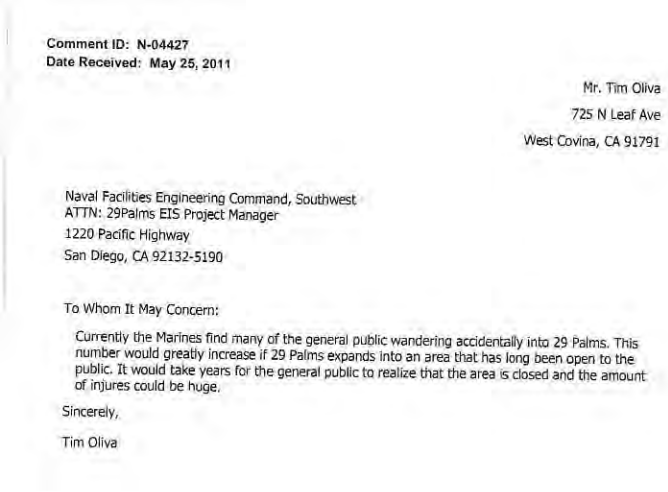
People wander in the desert. It is fun to explore. People currently wander onto the existing 29 Palms base.

Many more people would wander onto an expanded 29 Palms if the base expands into an area that the public has been long accustomed to using.

The public does not much use the area East of 29 Palms. This area would be ideal from a safety standpoint for a base expansion.

Sincerely,



Darrell Drummer

Response to Comment N-04426:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

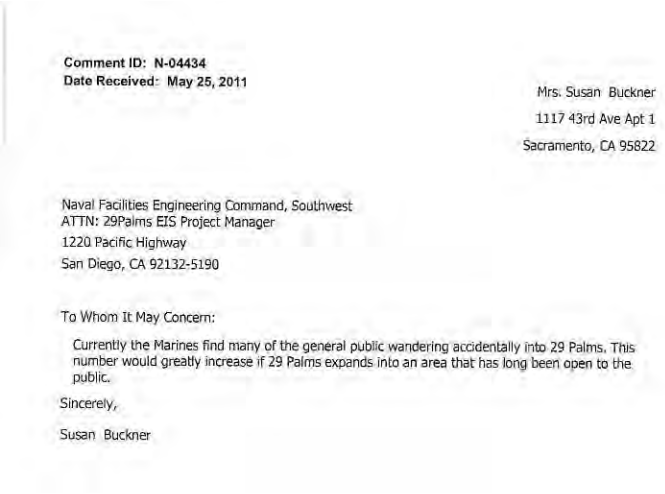
Charleston, SC 29420

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.



Sincerely,

Thomas Brown

Response to Comment N-04433:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. Included are a series of communication and notification procedures (modeled after BLM's management plan for Johnson Valley) that would be implemented to increase public awareness, as well as pre- and post-exercise range control and management procedures that would enhance public safety.

Naval Facilities Engineering Command, Southwest
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

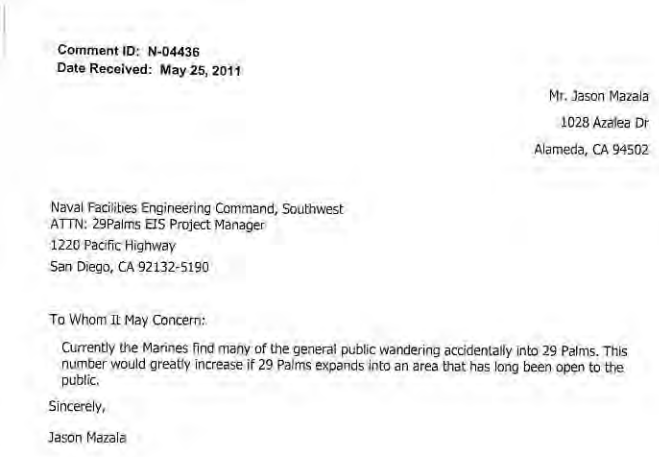
I am aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

Johnson Valley is known throughout the world as a prime off-highway area - home to the famed King of the Hammers race.

Not only during the KOH race, but throughout the year, off-highway and other recreational uses brings thousands of users to the area. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.



Sincerely,

Chris Schutt

Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Johnson Valley has been open to the public for many years and the use of it's land is almost assumed at this moment. Many who are used to using the area for legal off highway vehicle recreation may accidentally venture into a live fire excercise and be harmed. Moving east, to a vastly unused section of geography, is the only reasonable option.

Sincerely,

Kyle Crowley

Response to Comment N-04439:

Thank you for your comment. The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Public comments on the Draft EIS are an important part of the decision-making process. This information becomes part of the Final EIS and will be evaluated by the Department of the Navy during its decision process. Ultimately, Congress will make the final decision about proceeding with the proposed action. The Marine Corps appreciates your comment and involvement in the NEPA process.

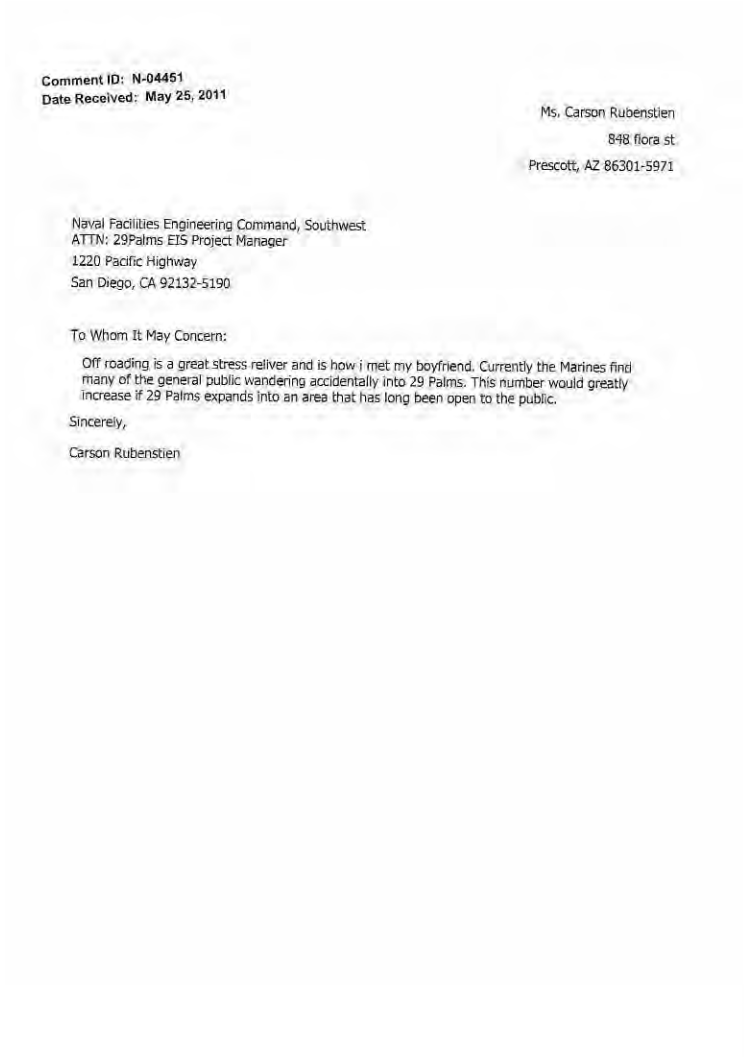
Between dirt bikes and rock crawlers i spend almost all my spare time outdoors on trails like the ones offered at JV. It is trails like these that offer an alternative to drugs and gang violence. Currently the Marines find many of the general public wandering accidentally into 29 Palms. This number would greatly increase if 29 Palms expands into an area that has long been open to the public.

Sincerely,



Dan McClaine

Response to Comment N-04450:

Thank you for your comment. The Marine Corps understands the importance of Johnson Valley for recreation and the EIS analysis finds that acquisition of land within Johnson Valley would cause a significant impact to recreation, even under alternatives involving restricted public access to acquired areas. Under each of the action alternatives, many of the current recreational opportunities and uses would continue to be available within specific portions of Johnson Valley and during various portions of the year.

The Marine Corps understands the public's concern in regards to safety on lands used by the Marine Corps for training purposes. Section 2.5 of the EIS outlines the measures that would be implemented under Alternative 4, 5, or 6. OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

Sincerely,

joe aplet

Response to Comment N-04453:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

Responsible OHV users know that airing down our tires gives us better flotation in soft sand, and better grip on rocks.

We also find that our aired-down tires do little damage to the desert floor.

The EIS fails to note whether wheeled military vehicles will be similarly aired-down for less impact to the desert floor, and fails to note that using tracked vehicles will absolutely have a greater impact on the desert floor.

Sincerely,

Darrell Drummer

Response to Comment N-04454:

To Whom It May Concern:

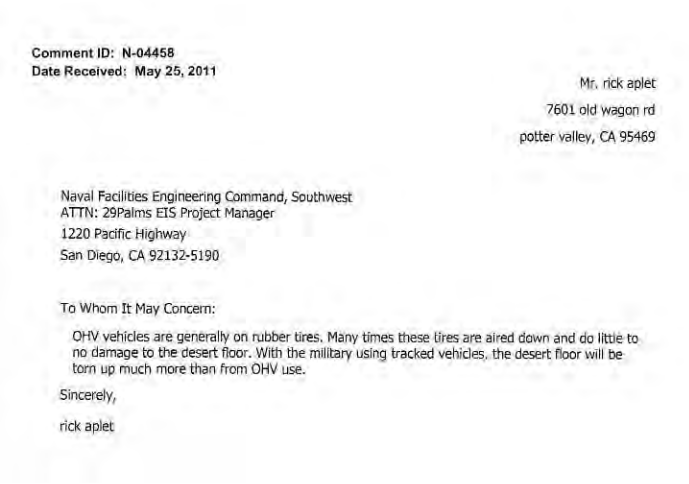
I love to ride my dirt bike all over and see the beautiful land open to the public. It is what make america so great. OHV vehicles are generally on rubber tires. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.



Sincerely,

lauren goldenstien

Response to Comment N-04457:

Thank you for your comment. The EIS evaluates geological impacts under each of the action alternatives (refer to Section 4.12 of the EIS). As noted in the EIS, there would be less than significant impacts to soils from military vehicle operations, ordnance delivery, and infantry training.

To Whom It May Concern:

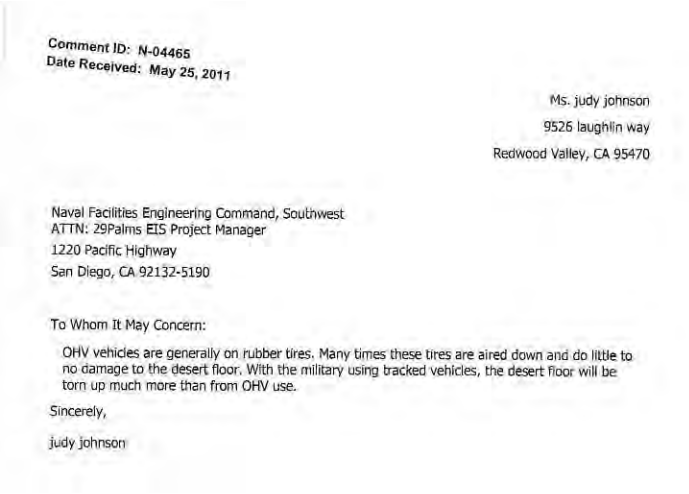
I have been aware of the proposed expansion of the 932-square-mile Air Ground Combat Center at Twentynine Palms and the plan to take over more than two-thirds of the Johnson Valley Off-Highway Vehicle Area for live-ammunition training missions.

OHV vehicles are generally on rubber tires and stay to specific trails. Many times these tires are aired down and do little to no damage to the desert floor. With the military using tracked vehicles, the desert floor will be torn up much more than from OHV use.

I understand the need for training for our US military and have the utmost respect and support for our Armed Forces. However, I feel that there are other areas that could be utilized for training that will not have such a great impact as the impact on the Johnson Valley Off-Highway Vehicle Area.



Sincerely,

Chris Schutt

1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.

Sincerely,

joe aplet

Response to Comment N-04470:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

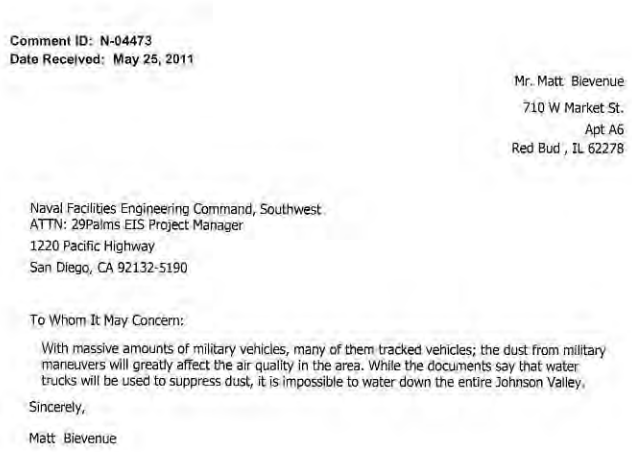
With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley. Not only dust but oil/coolant and other fluids that would leak from the vehicles can cause ground water contamination.

Sincerely,



Tim Oliva

Response to Comment N-04472:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

The Marine Corps is committed to protection of the public and the environment. Therefore, use of spill kits and drip pans is a Standard Operating Procedure. Section 4.4.2.3 of the EIS discusses the management of hazardous materials and wastes under the proposed action. Under any land acquisition scenario, current procedures for spill prevention, containment, cleanup, and management of hazardous wastes (including motor oil, gear fluid, etc.) would be implemented as outlined in Combat Center Order 5090.1D and environmental Standard Operating Procedures.

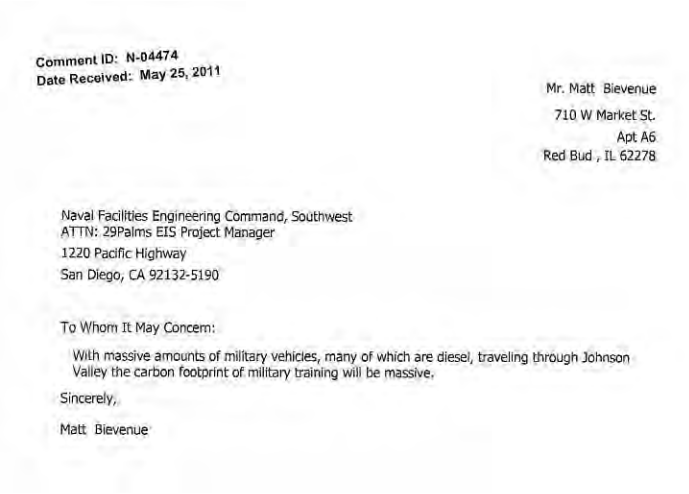
ATTN: 29Palms EIS Project Manager
1220 Pacific Highway
San Diego, CA 92132-5190

To Whom It May Concern:

With massive amounts of military vehicles, many of them tracked vehicles; the dust from military maneuvers will greatly affect the air quality in the area. While the documents say that water trucks will be used to suppress dust, it is impossible to water down the entire Johnson Valley.



Sincerely,

judy johnson

Response to Comment N-04485:

Thank you for your comment. It is acknowledged that the proposed training exercises will generate substantial amounts of fugitive dust, as shown in the EIS tables that present estimations of air emissions for each project alternative. The EIS dispersion modeling analyses determined that fugitive dust emissions would produce less than significant impacts to ambient PM10 levels for Alternatives 1, 2, and 4-6. However, Alternative 3 would contribute to an exceedance of the national ambient air quality standard for PM10. The EIS only proposes to control fugitive dust emissions from proposed construction activities, as it would be infeasible to control fugitive dust generated from the proposed training exercises.

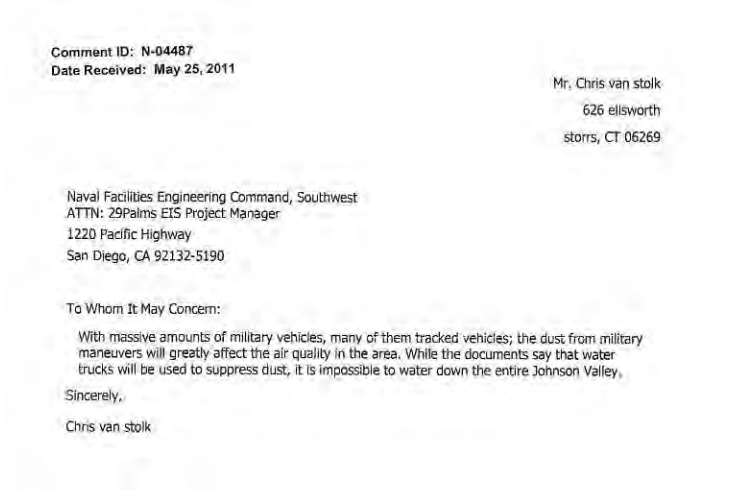
To Whom It May Concern:

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.



Sincerely,

judy johnson

Response to Comment N-04486:

Thank you for your comment. The proposed training exercises would increase emissions of GHGs, as presented in Section 5.4.8 of the EIS. However, the efforts by the Marine Corps and DoN to implement broad-based programs to reduce energy consumption and use renewable and alternative fuels would somewhat offset these emission increases.

With massive amounts of military vehicles, many of which are diesel, traveling through Johnson Valley the carbon footprint of military training will be massive.

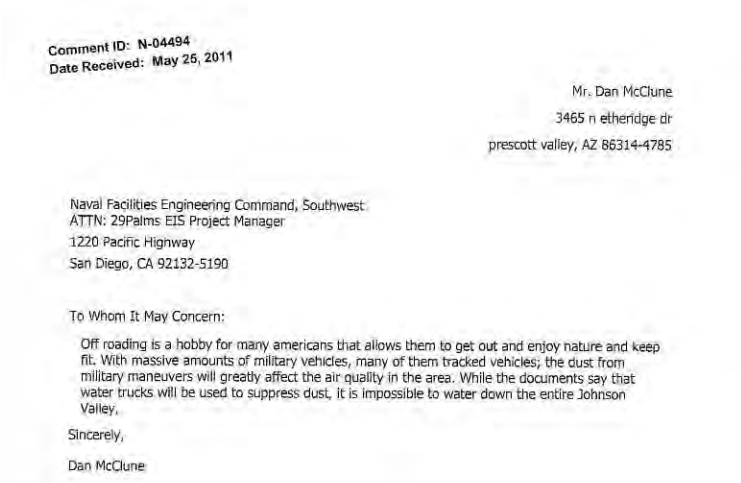
After so many years of the pressed importance of packing it in and packing it out and responsible land use, especially in the far reaches of Johnson Valley the Marine Corps inundating the area with unregulated emissions and destroying what we have worked so hard to protect even through our own use would be catastrophic.



Sincerely,

Kyle Crowley
